ATTONAL LITENATURE AND ART

THE SMITHSONIAN INSTITUTION is the result of the philanthropy of an Englishman, James Smithson, a younger son of the Duke of Nothumberland, who in 1329 bequeathed a fortue of over \$500,000 to the United States "to found an institution at Washington for the increase of howkidge." The fund now amounts to over a multion. The building was designed by Renvck, architect of St, Patrick's Cathedral in New York.

A States to

WASHINGTON, May 9, 1840.

To the House of Representatives of the United States:

I communicate to the House of Representatives a report* from the Secretary of State, which, with the documents accompanying it, furnishes the information requested by their resolution of the 23d of March last.

M. VAN BUREN.

To the Senate of the United States:

In part compliance with the resolution of the Senate of the 29th of December last, I herewith submit a report † from the Secretary of the Treasury, with the documents therein referred to.

M. VAN BUREN.

WASHINGTON, May 12, 1840.

To the Senate of the United States:

I communicate to the Senate a copy of a letter ‡ from the secretary of the Territory of Florida, with documents accompanying it, received at the Department of State since my message of the 2d instant and containing additional information on the subject of the resolution of the Senate of the 30th of December last. M. VAN BUREN.

WASHINGTON, May 16, 1840.

To the House of Representatives of the United States:

I transmit the report of the Secretary of War furnishing a statement of the amounts paid to persons concerned in negotiating Indian treaties since 1829, etc., which completes the information called for by the resolution of the House of Representatives dated the 28th January, 1839, upon that subject and the disbursing officers in the War Department.

M. VAN BUREN.

WASHINGTON, May 18, 1840.

To the Senate of the United States:

I communicate to the Senate a copy of a letter ‡ from the governor of Florida to the Secretary of State, containing, with the documents accompanying it, further information on the subject of the resolution of the Senate of the 30th of December last.

M. VAN BUREN.

MAY 11, 1840.

^{*}Transmitting correspondence with France, Sweden, Denmark, and Prussia relating to the surrender to the United States of persons charged with piracy and murder on board the United States schooner *Platt.barg* in 1517; correspondence relating to the demand by the chargé d'affaires of Great Britain for the surrender of a mutineer in the British armed ship *Lee* in 1819; opinion of the Attorney-General with regard to the right of the President of the United States or the governor of a State to deliver up, on the demand of any foreign government, persons charged with crimee committed without the jurisdiction of the United States.

[†] Relating to the sale or exchange of Government drafts, etc.

Relating to bonds of the Territory of Florida.

WASHINGTON, May 21, 1840.

To the Senate and House of Representatives of the United States:

I communicate to Congress sundry papers, from which it will be perceived that the Imaum of Muscat has transmitted to this country and, through the agency of the commander of one of his vessels, offered for my acceptance a present, consisting of horses, pearls, and other articles The answer of the Secretary of State to a letter from the of value. agents of the vessel communicating the offer of the present, and my own letter to the Imaum in reply to one which he addressed to me, were intended to make known in the proper quarter the reasons which had precluded my acceptance of the proffered gift. Inasmuch, however, as the commander of the vessel, with the view, as he alleges, of carrying out the wishes of his Sovereign, now offers the presents to the Government of the United States, I deem it my duty to lay the proposition before Congress for such disposition as they may think fit to make of it; and I take the opportunity to suggest for their consideration the adoption of legislative provisions pointing out the course which they may deem proper for the Executive to pursue in any future instances where offers of presents by foreign states, either to the Government, its legislative or executive branches, or its agents abroad, may be made under circumstances precluding a refusal without the risk of giving offense.

The correspondence between the Department of State and our consul at Tangier will acquaint Congress with such an instance, in which every proper exertion on the part of the consul to refrain from taking charge of an intended present proved unavailing. The animals constituting it may consequently, under the instructions from the Secretary of State, be expected soon to arrive in the United States, when the authority of Congress as to the disposition to be made of them will be necessary.

M. VAN BUREN.

WASHINGTON, May 23, 1840.

To the Senate of the United States:

I transmit a communication from the Secretary of War, together with the papers therein referred to, relative to the proceedings instituted under a resolution of Congress to try the title to the Pea Patch Island, in the Delaware River, and recommend that Congress pass a special act giving to the circuit court of the district of Maryland jurisdiction to try the cause. M. VAN BUREN.

JUNE 4, 1840.

To the House of Representatives:

I herewith submit a report from the Secretary of the Treasury, showing the progress made in complying with the requirements of a resolution passed February 6, 1839, concerning mineral lands of the United States.

1800

Martin Van Buren

The documents he communicates contain much important information on the subject of those lands, and a plan for the sale of them is in a course of preparation and will be presented as soon as completed.

M. VAN BUREN.

WASHINGTON, June 5, 1840.

To the Senate of the United States:

In compliance with the resolution of the Senate dated the 30th Decem ber, 1839, I transmit herewith the report* of the Secretary of War, fuinishing so much of the information called for by said resolution as relates to the Executive Department under his charge.

M. VAN BUREN.

WASHINGTON, June 5, 1840.

To the Senate of the United States:

In compliance with the resolution of the Senate of the 30th December 1839. I communicate the report † of the Secretary of War, containing the information called for by that resolution as far as it relates to the Depart. ment under his charge. M. VAN BUREN.

WASHINGTON, June 6, 1840.

To the House of Representatives:

I herewith submit a report from the Secretary of the Treasury, in relation to certain lands falling within the Chickasaw cession which have been sold at Chocchuma and Columbus, in Mississippi, and invite the attention of Congress to the subject of further legislation in relation to them.

M. VAN BUREN.

WASHINGTON, June 13, 1840.

To the House of Representatives:

I communicate to the House of Representatives a report ‡ from the Secretary of State, with documents, containing the information requested by their resolution of the 26th of May last. M. VAN BUREN.

WASHINGTON, June 19, 1840.

The Speaker of the House of Representatives of the United STATES.

SIR: I transmit a communication from the Secretary of the Navy, suggesting that an appropriation of \$50,000 be made by Congress to

† Relating to the manner in which the public funds have been paid out by disbursing officers and agents during 1838 and 1839.

Relating to charges preferred by Dr. John Baldwin, of Louisiana, against Marmaduke Burroughs, consul at Vera Cruz,

^{*}Relating to the refusal of banks to pay the Government demands in specie since the general resumption in 1838, and the payment of Government creditors in depreciated currency.

meet claims of navy pensioners, payable on the 1st of July next, reimbursable by a transfer of stocks belonging to the fund at their nominal value to the amount so appropriated, and respectfully recommend the measure to the consideration and action of Congress.

M. VAN BUREN.

To the Senate of the United States:

I lay before you, for your consideration, a treaty of commerce and navigation between the United States of America and His Majesty the King of Hanover, signed by their ministers on the 20th day of May last.

M. VAN BUREN.

WASHINGTON, June 27, 1840.

WASHINGTON, June 22, 1840.

To the Senate:

The importance of the subject to the tranquillity of our country makes it proper that I should communicate to the Senate, in addition to the information heretofore transmitted in reply to their resolution of the 17th of January last, the copy of a letter just received from Mr. Fox, announcing the determination of the British Government to consent to the principles of our last proposition for the settlement of the question of the northeastern boundary, with a copy of the answer made to it by the Secretary of State. I can not doubt that, with the sincere disposition which actuates both Governments to prevent any other than an amicable termination of the controversy, it will be found practicable so to arrange the details of a conventional agreement on the principles alluded to as to effect that object.

The British commissioners, in their report communicated by Mr. Fox, express an opinion that the true line of the treaty of 1783 is materially different from that so long contended for by Great Britain. The report is altogether *ex parte* in its character, and has not yet, as far as we are informed, been adopted by the British Government. It has, however, assumed a form sufficiently authentic and important to justify the belief that it is to be used hereafter by the British Government in the discussion of the question of boundary; and as it differs essentially from the line claimed by the United States, an immediate preparatory exploration and survey on our part, by commissioners appointed for that purpose, of the portions of the territory therein more particularly brought into view would, in my opinion, be proper. If Congress concur with me in this view of the subject, a provision by them to enable the Executive to carry it into effect will be necessary.

M. VAN BUREN.

1811

Mr. Fox to Mr. Forsyth.

WASHINGTON, June 22, 1840.

Hon. JOHN FORSYTH, etc.:

The undersigned, Her Britannic Majesty's envoy extraordinary and minister plenipotentiary, has the honor to transmit to the Secretary of State of the United States, by order of his Government, the accompanying printed copies of a report and map which have been presented to Her Majesty's Government by Colonel Mudge and Mr. Featherstonhaugh, the commissioners employed during the last season to survey the disputed territory.

The undersigned is instructed to say that it will of course have become the duty of Her Majesty's Government to lay the said report and map before Parliament; but Her Majesty's Government have been desirous, as a mark of courtesy and consideration toward the Government of the United States, that documents bearing upon a question of so much interest and importance to the two countries should in the first instance be communicated to the President. The documents had been officially placed in the hands of Her Majesty's Government only a few days previously to the date of the instruction addressed to the undersigned.

Her Majesty's Government feel an unabated desire to bring the long-pending questions connected with the boundary between the United States and the British possessions in North America to a final and satisfactory settlement, being well aware that questions of this nature, as long as they remain open between two countries, must be the source of frequent irritation on both sides and are liable at any moment to lead to events that may endanger the existence of friendly relations.

It is obvious that the questions at issue between Great Britain and the United States must be beset with various and really existing difficulties, or else those questions would not have remained open ever since the year 1783, notwithstanding the frequent and earnest endeavors made by each Government to bring them to an adjustment; but Her Majesty's Government do not relinquish the hope that the sincere desire which is felt by both parties to arrive at an amicable settlement will at length be attended with success.

The best clew to guide the two Governments in their future proceedings may perhaps be obtained by an examination of the causes of past failure; and the most prominent amongst these causes has certainly been a want of correct information as to the topographical features and physical character of the district in dispute.

This want of adequate information may be traced as one of the difficulties which embarrassed the Netherlands Government in its endeavors to decide the points submitted to its arbitration in 1830. The same has been felt by the Government in England; it has been felt and admitted by the Government of the United States, and even by the local government of the contiguous State of Maine.

The British Government and the Government of the United States agreed, therefore, two years ago that a survey of the disputed territory by a joint commission would be the measure best calculated to elucidate and solve the questions at issue. The President proposed such a commission and He. Majesty's Government consented to it, and it was believed by Her Majesty's Government that the general principles upon which the commission was to be guided in its local operations had been settled by mutual agreement, arrived at by means of a correspondence which took place between the two Governments in 1837 and 1838. Her Majesty's Government accordingly transmitted in April of last year, for the consideration of the President, the draft of a convention to regulate the proceedings of the proposed commission. The preamble of that draft recited textually the agreement that had been come to by means of notes which had been exchanged between the two Governments, and the articles of the draft were framed, as Her Majesty's Government considered, in strict conformity with that agreement. But the Government of the United States did not think proper to assent to the convention so proposed.

The United States Government did not, indeed, allege that the proposed convention was at variance with the result of the previous correspondence between the two Governments, but it thought that the convention would establish a commission of "mere exploration and survey," and the President was of opinion that the step next to be taken by the two Governments should be to contract stipulations bearing upon the face of them the promise of a final settlement under some form or other and within a reasonable time.

The United States Government accordingly transmitted to the undersigned, for communication to Her Majesty's Government, in the month of July last a counter draft of convention varying considerably in some parts (as the Secretary of State of the United States admitted in his letter to the undersigned of the 29th of July last) from the draft proposed by Great Britain, but the Secretary of State added that the United States Government did not deem it necessary to comment upon the alterations so made, as the text itself of the counter draft would be found sufficiently perspicuous.

Her Majesty's Government might certainly well have expected that some reasons would have been given to explain why the United States Government declined to confirm an arrangement which was founded upon propositions made by that Government itself and upon modifications to which that Government had agreed, or that if the American Government thought the draft of convention thus proposed was not in conformity with the previous agreement it would have pointed out in what respect the two were considered to differ.

Her Majesty's Government, considering the present state of the boundary question, concur with the Government of the United States in thinking that it is on every account expedient that the next measure to be adopted by the two Governments should contain arrangements which will necessarily lead to a final settlement, and they think that the convention which they proposed last year to the President, instead of being framed so as to constitute a mere commission of exploration and survey, did, on the contrary, contain stipulations calculated to lead to the final ascertainment of the boundary between the two countries.

There was, however, undoubtedly one essential difference between the British draft and the American counter draft. 'The British draft contained no provision embodying the principle of arbitration; the American counter draft did contain such a provision.

The British draft contained no provision for arbitration, because the principle of arbitration had not been proposed on either side during the negotiations upon which that draft was founded, and because, moreover, it was understood at that time that the principle of arbitration would be decidedly objected to by the United States.

But as the United States Government have now expressed a wish to embody the principle of arbitration in the proposed convention, Her Majesty's Government are perfectly willing to accede to that wish.

The undersigned is accordingly instructed to state officially to Mr. Forsyth that Her Majesty's Government consent to the two principles which form the main foundation of the American counter draft, namely: First, that the commission to be appointed shall be so constituted as necessarily to lead to a final settlement of the questions of boundary at issue between the two countries, and, secondly, that in order to secure such a result the convention by which the commission is to be created shall contain a provision for arbitration upon points as to which the British and American commissioners may not be able to agree.

The undersigned is, however, instructed to add that there are many matters of detail in the American counter draft which Her Majesty's Government can not adopt. The undersigned will be furnished from his Government, by an early opportunity, with an amended draft in conformity with the principles above stated, to be

Martin Van Buren

submitted to the consideration of the President. And the undersigned expects to be at the same time furnished with instructions to propose to the Government of the United States a fresh, local, and temporary convention for the better prevention of incidental border collisions within the disputed territory during the time that may be occupied in carrying through the operations of survey or arbitration.

The undersigned avails himself of this occasion to renew to the Secretary of State the assurance of his distinguished consideration.

Mr. Forsyth to Mr. Fox.

DEPARTMENT OF STATE, Washington, June 26, 1840.

H. S. Fox, Esq., etc.:

The undersigned, Secretary of State of the United States, has had the honor to receive a note addressed to him on the 22d instant by Mr. Fox, envoy extraordinary and minister plenipotentiary of Great Britain, inclosing printed copies of the report and map laid before the British Government by the commissioners employed during the last season to survey the territory in dispute between the two countries, and communicating the consent of Her Britannic Majesty's Government to the two principles which form the main foundation of the counter proposition of the United States for the adjustment of the question.

The undersigned, having laid Mr. Fox's note before the President, is instructed to say in answer that the President duly appreciates the motives of courtesy which prompted the British Government to communicate to that of the United States the documents referred to, and that he derives great satisfaction from the announcement that Her Majesty's Government do not relinquish the hope that the sincere desire which is felt by both parties to arrive at an amicable settlement will at length be attended with success, and from the prospect held out by Mr. Fox of his being accordingly furnished by an early opportunity with the draft of a proposition amended in conformity with the principles to which Her Majesty's Government has acceded, to be submitted to the consideration of this Government.

Mr. Fox states that his Government might have expected that when the American counter draft was communicated to him some reasons would have been given to explain why the United States Government declined accepting the British draft of convention, or that if it thought the draft was not in conformity with previous agreement it would have pointed out in what respect the two were considered to differ.

In the note which the undersigned addressed to Mr. Fox on the 29th July of last year, transmitting the American counter draft, he stated that in consequence of the then recent events on the frontier and the danger of collision between the citizens and subjects of the two Governments a mere commission of exploration and survey would be inadequate to the exigencies of the occasion and fall behind the just expectations of the people of both countries, and referred to the importance of having the measure next adopted bear upon its face stipulations which must result in a final settlement under some form and in a reasonable time. These were the reasons which induced the President to introduce in the new project the provisions which he thought calculated for the attainment of so desirable an object, and which in his opinion rendered obviously unnecessary any allusion to the previous agreements referred to by Mr. Fox. The President is gratified to find that a concurrence in those views has brought the minds of Her Majesty's Government to a similar conclusion, and from this fresh indication of harmony in the wishes of the two cabinets he permits himself to anticipate the most satisfactory result from the measure under consideration.

The undersigned avails himself of the opportunity to offer to Mr. For renewed assurances of his distinguished consideration. JOHN FORSYTH.

WASHINGTON, June 29, 1840.

WAR DEPARTMENT, June 27, 1840.

To the Senate of the United States:

I transmit, in answer to a resolution of the Senate of the 12th of March last, a communication of the Secretary of War, accompanied by such information as could be obtained in relation to the military and naval preparations of the British authorities on the northern frontier of the United States from Lake Superior to the Atlantic Ocean.

M. VAN BUREN.

The PRESIDENT OF THE UNITED STATES.

SIR: I have the honor to transmit herewith a report of the Commanding General, embracing the substance of the answers of the several officers who were applied to to furnish the information required by a resolution of the Senate of the 12th March last, referred by you to this Department, requesting the President to communicate to the Senate, if in his judgment compatible with the public interests, any information which may be in the possession of the Government, or which can be conveniently obtained, of the military and naval preparations of the British authorities on the northern frontier of the United States from Lake Superior to the Atlantic Occau, distinguishing the permanent from the temporary and field works, and particularly by noticing those which are within the claimed limits of the United States.

This report and a letter of General Scott on the subject, which was transmitted to the Senate on the 27th of March last, furnish all the information the Department is in possession of in relation to the requirements of the above resolution.

Very respectfully, your most obedient servant,

J. R. POINSETT.

HEADQUARTERS OF THE ARMY, Washington, June 26, 1840.

The SECRETARY OF WAR.

SIR: I have the honor to report that in obedience to your instructions letters have been addressed to the various officers who it was supposed might be able to procure the information required by the resolution of the Senate of the 12th of March, to wit: "Resolved, That the President of the United States be requested to communicate to the Senate, if in his judgment compatible with the public interest, any information which may be in possession of the Government, or which can be conveniently obtained, of the military and naval preparations of the British authorities on the northern frontier of the United States from Lake Superior to the Atlantic Ocean, distinguishing the permanent from the temporary and field works, and particularly by noting those which are within the claimed limits of the United States." In answer to the letter addressed to him on the subject, and with regard to the Senate's resolution as far as relates to "military preparations of the British authorities on the northern frontier of the United States," General Scott communicates the following facts: That he,has paid but little attention to the forts and barracks crected by the British authorities near the borders of Maine above Frederickton, in New Brunswick, or in Upper Canada *above* Cornwall, being of the fixed opinion that all such structures would be of little or no military value to either of the parties in the event of a new war between the United States and Great Britain; that he was last summer at the foot of Lake Superior, and neither saw nor heard of any British fort or barracks on the St. Marys River; that between Lakes Huron and Erie the British have three sets of barracksone at Windsor, opposite to Detroit; one at Sandwich, a little lower down; and the third at Malden, 18 miles below the first-all built of sawed logs, strengthened by

blockhouses, loopholes, etc.; that Malden has long been a military post, with slight defenses; these have been recently strengthened. The works at Sandwich and Windsor have also, he thinks, been erected within the last six or eight months. That near the mouth of the Niagara the British have two small forts—George and Mississauga; both existed during the last war; the latter may be termed a permanent work. Slight barracks have been erected within the last two years on the same side near the Falls and at Chippewa, with breastworks at the latter place, but nothing, he believes, above the work first named on the Niagara which can be termed a fort.

That since the commencement of recent troubles and (consequent thereon) within our own limits Fort William Henry, at Kingston, and Fort Wellington, opposite to Ogdensburg (old works), have both been strengthened within themselves, besides the addition of dependencies. These forts may be called permanent. That on the St. Lawrence below Prescott, and confronting our territory, he knows of no other military post. Twelve miles above, at Brockville, there may be temporary barracks and breastworks; that he knows that of late Brockville has been a military station.

That in the system of defenses on the approaches to Montreal the Isle aux Noix, a few miles below our line, and in the outlet of Lake Champlain, stands at the head. This island contains within itself a system of permanent works of great strength; on them the British Government has from time to time expended much skill and labor.

That Odletown, near our line, on the western side of Lake Champlain, has been a station for a body of Canadian militia for two years, to guard the neighborhood from refugee incendiaries from our side. He thinks that barracks have been erected there for the accommodation of those troops, and also at a station, with the like object, near Alburgh, Vt. He believes that there are no important British forts or extensive British barracks on our borders from Vermont to Maine. In respect to such structures on the disputed territory, that Governor Fairfield's published letters contain fuller information than has reached him through any other channel; that he has heard of no new military preparations by the British authorities on the St. Croix or Passamaquoddy Bay.

That among such preparations, perhaps he ought not to omit the fact that Great Britain, besides numerous corps of well-organized and well-instructed militia, has at this time within her North American Provinces more than 20,000 of her best regular troops. The whole of those forces might be brought to the verge of our territory in a few days. Two-thirds of that regular force has arrived out since the spring of 1838. General Scott states that he has had the honor to report directly to the Secreeary of War with regard to the naval force recently maintained upon the American lakes by Great Britain. In answer to a similar letter to that addressed to General Scott, General Brady writes from Detroit that the only permanent work of which he has any knowledge is the one at Fort Malden, which has in the last year been thoroughly repaired, and good substantial barracks of wood have been erected within the works, sufficient, he thinks, to contain six if not eight hundred men; that the timber on the island of Bois Blanc has been partly taken off and three small blockhouses erected on the island. These are all the military improvements he knows of between the mouth of Detroit River and the outlet of Lake Superior. That temporary barracks of wood capable of containing perhaps 150 men have been erected opposite to Detroit; that some British militia are stationed along the St. Clair River.

Colonel Bankhead writes that of the military and naval preparations of the British on the northern frontier of the United States, he can only state that Fort Mississauga, nearly opposite our Fort Niagara, has been enlarged and strengthened; that permanent and extensive barracks were commenced last summer at Toronto and are probably completed by this time, and that a large vessel for a steamer was being constructed last fall at Niagara City by and for the service of the Government; that the British Government has on Lake Ontario a steamboat commanded and officered by officers of the navy, and is commissioned, he presumes, as a Government vessel;

Messages and Papers of the Presidents

that the authorities of Upper Canada had last summer in their service on Lake Erie two steamboats, which were at first hired from citizens of Buffalo, but which they subsequently purchased, as he was informed.

Lieutenant-Colonel Craue writes from Buffalo that the only military work in that vicinity undergoing repairs (within his knowledge) is Fort Mississauga, at the mouth of the Niagara River, on the Canada side, which the English have been repairing and extending for two years past, and it is believed to be now in a very efficient state; that there have been runnors of armed steamers being built or building at Chippewa, but on inquiry he could learn of none except the ordinary steamboats for the navigation of the lakes. It has been said, however, that one is building on Lake Ontario by the English, and intended for the revenue service, but he does not know what truth there is in this statement.

Lieutenant-Colonel Pierce reports from Plattsburg that he has no knowledge of any military or naval preparations of the British authorities on the line of frontier adjacent to his command, comprising what is generally called the Lake Champlain frontier, except the introduction of troops at Odletown and Napierville, near the boundary line between New York and Canada, on the west side of the lake, and also the establishment of a line of posts from Missisquoi Bay, on the east side of the lake, along and near to the Vermont frontier as far as the Connecticut River, the erection of a new barrack and fieldwork at St. John, and the repairs and armament of the Isle aux Noix, with increased force at both of these posts; that none of the positions so occupied by British troops are within the claimed limits of the United States; that these military preparations (it has been heretofore understood) have been made by the British authorities to suppress rebellion and insurrection among the Canadian population.

Captain Johnson reports from Fort Brady that he has heard nothing on the subject of the resolution but mere rumors, and that there is no appearance of any works going up anywhere on the Canada side of the St. Marys River. The files of the Adjutant-General's Office have been examined, but no further information has been elicited.

Respectfully submitted.

ALEX. MACOMB, Major-General.

WASHINGTON, June 29, 1840.

To the House of Representatives of the United States:

I transmit herewith a communication of the Secretary of War, accompanied by a report of the Commanding General of the Army, embracing all the information which can be obtained in answer to a resolution of the House of Representatives of the 6th of April, 1840, requesting to be furnished with any information in possession of the executive department showing the military preparation of Great Britain by introducing troops into Canada or New Brunswick or erecting or repairing fortifications on our northern or northeastern boundary or by preparing naval armaments on any of the great northern lakes, and what preparations, if any, have been made by this Government to put the United States, and especially those frontiers, in a posture of defense against Great Britain in case of war.

M. VAN BUREN.

1817

WASHINGTON CITY, June 29, 1840.

To the House of Representatives of the United States:

I transmit the inclosed report of the Secretary of War, with accompanying documents, furnishing all the information the Department has been able to obtain in relation to any violation of or desire on the part of Great Britain to annul the agreement entered into between that Government and the United States in the month of April, 1817, relative to the naval force to be maintained upon the American lakes, called for by a resolution of the House of Representatives of the 9th March last.

M. VAN BUREN.

Hon. R. M. JOHNSON, President of the Senate.

SIR: I transmit herewith to the Senate a statement from the Secretary of the Navy of the transfers which have been made since the commencement of the present year from different appropriations for the naval service to other appropriations for the same service, which had become necessary for the public interests.

The law under which these transfers were made conveys no authority for refunding the different amounts which may be transferred. On the centrary, so soon as the appropriations for the year shall pass and the means be furnished for refunding these sums the repayments would be prohibited by the law of 3d March, 1809, in relation to general transfers.

Some authority to refund the amounts which may be transferred under the law of 30th of June, 1834, seems so obviously indispensable to any beneficial exercise of the power which it grants that its omission may be presumed to have been accidental.

The subject is respectfully referred to the consideration of Congress for such action as they may deem proper to accomplish the restoration of these transfers, and thus confirm the original appropriations as they are established by Congress, instead of leaving their expenditure discretionary with the Executive.

JULY 2, 1840.

[The same message was addressed to the Speaker of the House c Representatives.]

WASHINGTON, July 20, 1840.

To the Senate of the United States:

I transmit herewith, in reply to the resolution of the Senate of the tith March last, a report* from the Secretary of War, accompanied by a communication and other documents from the Commissioner of Indian Affairs.

M. VAN BUREN.

* Relating to purchases of Indian lands since the establishment of the Federal Government.

JULY 25, 1840.

The President of the United States, in pursuance of a resolution of the Senate of the 20th instant, herewith transmits to the honorable Secretary of the Senate a copy of the report of Captain M. C. Perry in relation to the light-houses of England and France.

M. VAN BUREN.

EXECUTIVE ORDER.

WASHINGTON CITY, March 31, 1840.

The President of the United States, finding that different rules prevail at different places as well in respect to the hours of labor by persons employed on the public works under the immediate authority of himself and the Departments as also in relation to the different classes of workmen, and believing that much inconvenience and dissatisfaction would be removed by adopting a uniform course, hereby directs that all such persons, whether laborers or mechanics, be required to work only the number of hours prescribed by the ten-hour system.

M. VAN BUREN.

FOURTH ANNUAL MESSAGE.

WASHINGTON, December 5, 1840.

Fellow-Citizens of the Senate and House of Representatives:

Our devout gratitude is due to the Supreme Being for having graciously continued to our beloved country through the vicissitudes of another year the invaluable blessings of health, plenty, and peace. Seldom has this favored land been so generally exempted from the ravages of disease or the labor of the husbandman more amply rewarded, and never before have our relations with other countries been placed on a more favorable basis than that which they so happily occupy at this critical conjuncture in the affairs of the world. A rigid and persevering abstinence from all interference with the domestic and political relations of other States, alike due to the genius and distinctive character of our Government and to the principles by which it is directed; a faithful observance in the management of our foreign relations of the practice of speaking plainly, dealing justly, and requiring truth and justice in return as the best conservatives of the peace of nations; a strict impartiality in our manifestations of friendship in the commercial privileges we concede and those we require from others-these, accompanied by a disposition as

prompt to maintain in every emergency our own rights as we are from principle averse to the invasion of those of others, have given to our country and Government a standing in the great family of nations of which we have just cause to be proud and the advantages of which are experienced by our citizens throughout every portion of the earth to which their enterprising and adventurous spirit may carry them. Few, if any, remain insensible to the value of our friendship or ignorant of the terms on which it can be acquired and by which it can alone be preserved.

A series of questions of long standing, difficult in their adjustment and important in their consequences, in which the rights of our citizens and the honor of the country were deeply involved, have in the course of a few years (the most of them during the successful Administration of my immediate predecessor) been brought to a satisfactory conclusion; and the most important of those remaining are, I am happy to believe, in a fair way of being speedily and satisfactorily adjusted.

With all the powers of the world our relations are those of honorable peace. Since your adjournment nothing serious has occurred to interrupt or threaten this desirable harmony. 'If clouds have lowered above the other hemisphere, they have not cast their portentous shadows upon our happy shores. Bound by no entangling alliances, yet linked by a common nature and interest with the other nations of mankind, our aspirations are for the preservation of peace, in whose solid and civilizing triumphs all may participate with a generous emulation. Yet it behooves us to be prepared for any event and to be always ready to maintain those just and enlightened principles of national intercourse for which this Government has ever contended. In the shock of contending empires it is only by assuming a resolute bearing and clothing themselves with defensive armor that neutral nations can maintain their independent rights.

The excitement which grew out of the territorial controversy between the United States and Great Britain having in a great measure subsided, it is hoped that a favorable period is approaching for its final settlement. Both Governments must now be convinced of the dangers with which the question is fraught, and it must be their desire, as it is their interest, that this perpetual cause of irritation should be removed as speedily as In my last annual message you were informed that the practicable. proposition for a commission of exploration and survey promised by Great Britain had been received, and that a counter project, including also a provision for the certain and final adjustment of the limits in dispute, was then before the British Government for its consideration. The answer of that Government, accompanied by additional propositions of its own, was received through its minister here since your separation. These were promptly considered, such as were deemed correct in principle and consistent with a due regard to the just rights of the United

States and of the State of Maine concurred in, and the reasons for dissenting from the residue, with an additional suggestion on our part, communicated by the Secretary of State to Mr. Fox. That minister, not feeling himself sufficiently instructed upon some of the points raised in the discussion, felt it to be his duty to refer the matter to his own Government for its further decision. Having now been for some time under its advisement, a speedy answer may be confidently expected. From the character of the points still in difference and the undoubted disposition of both parties to bring the matter to an early conclusion, I look with entire confidence to a prompt and satisfactory termination of the nego-Three commissioners were appointed shortly after the adjourntiation. ment of Congress under the act of the last session providing for the exploration and survey of the line which separates the States of Maine and New Hampshire from the British Provinces. They have been actively employed until their progress was interrupted by the inclemency of the season, and will resure their labors as soon as practicable in the ensuing year.

It is understood that their respective examinations will throw new light upon the subject in controversy and serve to remove any erroneous impressions which may have been made elsewhere prejudicial to the rights of the United States. It was, among other reasons, with a view of preventing the embarrassments which in our peculiar system of government impede and complicate negotiations involving the territorial rights of a State that I thought it my duty, as you have been informed on a previous occasion, to propose to the British Government, through its minister at Washington, that early steps should be taken to adjust the points of difference on the line of boundary from the entrance of Lake Superior to the most northwestern point of the Lake of the Woods by the arbitration of a friendly power in conformity with the seventh article of the treaty of Ghent. No answer has yet been returned by the British Government to this proposition.

With Austria, France, Prussia, Russia, and the remaining powers of Europe I am happy to inform you our relations continue to be of the most friendly character. With Belgium a treaty of commerce and navigation, based upon liberal principles of reciprocity and equality, was concluded in March last, and, having been ratified by the Belgian Government, will be duly laid before the Senate. It is a subject of congratulation that it provides for the satisfactory adjustment of a long-standing question of controversy, thus removing the only obstacle which could obstruct the friendly and mutually advantageous intercourse between the two nations. A messenger has been dispatched with the Hanoverian treaty to Berlin, where, according to stipulation, the ratifications are to be exchanged. I am happy to announce to you that after many delays and difficulties a treaty of commerce and navigation between the United States and Portugal was concluded and signed at Lisbon on the 26th of August last by the plenipotentiaries of the two Governments. Its stipulations are founded upon those principles of mutal liberality and advantage which the United States have always sought to make the basis of their intercourse with foreign powers, and it is hoped they will tend to foster and strengthen the commercial intercourse of the two countries.

Under the appropriation of the last session of Congress an agent has been sent to Germany for the purpose of promoting the interests of our tobacco trade.

The commissioners appointed under the convention for the adjustment of claims of citizens of the United States upon Mexico having met and organized at Washington in August last, the papers in the possession of the Government relating to those claims were communicated to the board. The claims not embraced by that convention are now the subject of negotiation between the two Governments through the medium of our minister at Mexico.

Nothing has occurred to disturb the harmony of our relations with the different Governments of South America. I regret, however, to be obliged to inform you that the claims of our citizens upon the late Republic of Colombia have not yet been satisfied by the separate Governments into which it has been resolved.

The chargé d'affaires of Brazil having expressed the intention of his Government not to prolong the treaty of 1828, it will cease to be obligatory upon either party on the 12th day of December, 1841, when the extensive commercial intercourse between the United States and that vast Empire will no longer be regulated by express stipulations.

It affords me pleasure to communicate to you that the Government of Chili has entered into an agreement to indemnify the claimants in the case of the *Macedonian* for American property seized in 1819, and to add that information has also been received which justifies the hope of an early adjustment of the remaining claims upon that Government.

The commissioners appointed in pursuance of the convention between the United States and Texas for marking the boundary between them have, according to the last report received from our commissioner, surveyed and established the whole extent of the boundary north along the western bank of the Sabine River from its entrance into the Gulf of Mexico to the thirty-second degree of north latitude. The commission adjourned on the 16th of June last, to reassemble on the 1st of November for the purpose of establishing accurately the intersection of the thirty-second degree of latitude with the western bank of the Sabine and the meridian line thence to Red River. It is presumed that the work will be concluded in the present season.

The present sound condition of their finances and the success with which embarrassments in regard to them, at times apparently insurmountable, have been overcome are matters upon which the people and Government of the United States may well congratulate themselves. An

1823 Messages and Papers of the Presidents

overflowing Treasury, however it may be regarded as an evidence of public prosperity, is seldom conducive to the permanent welfare of any people, and experience has demonstrated its incompatibility with the salutary action of political institutions like those of the United States. Our safest reliance for financial efficiency and independence has, on the contrary, been found to consist in ample resources unencumbered with debt, and in this respect the Federal Government occupies a singularly fortunate and truly enviable position.

When I entered upon the discharge of my official duties in March, 1837, the act for the distribution of the surplus revenue was in a course of rapid execution. Nearly \$28,000,000 of the public moneys were, in pursuance of its provisions, deposited with the States in the months of January, April, and July of that year. In May there occurred a general suspension of specie payments by the banks, including, with very few exceptions, those in which the public moneys were deposited and upon whose fidelity the Government had unfortunately made itself dependent for the revenues which had been collected from the people and were indispensable to the public service.

This suspension and the excesses in banking and commerce out of which it arose, and which were greatly aggravated by its occurrence, made to a great extent unavailable the principal part of the public money then on hand, suspended the collection of many millions accruing on merchants' bonds, and greatly reduced the revenue arising from customs and the public lands. These effects have continued to operate in various degrees to the present period, and in addition to the decrease in the revenue thus produced two and a half millions of duties have been relinquished by two biennial reductions under the act of 1833, and probably as much more upon the importation of iron for railroads by special legislation.

Whilst such has been our condition for the last four years in relation to revenue, we have during the same period been subjected to an unavoidable continuance of large extraordinary expenses necessarily growing out of past transactions, and which could not be immediately arrested without great prejudice to the public interest. Of these, the charge upon the Treasury in consequence of the Cherokee treaty alone, without adverting to others arising out of Indian treaties, has already exceeded \$5,000,000; that for the prosecution of measures for the removal of the Seminole Indians, which were found in progress, has been nearly fourteen millions, and the public buildings have required the unusual sum of nearly three millions.

It affords me, however, great pleasure to be able to say that from the commencement of this period to the present day every demand upon the Government, at home or abroad, has been promptly met. This has been done not only without creating a permanent debt or a resort to additional taxation in any form, but in the midst of a steadily progressive reduction of existing burdens upon the people, leaving still a considerable balance of available funds which will remain in the Treasury at the end of the year. The small amount of Treasury notes, not exceeding \$4,500,000, still outstanding, and less by twenty-three millions than the United States have in deposit with the States, is composed of such only as are not yet due or have not been presented for payment. They may be redeemed out of the accruing revenue if the expenditures do not exceed the amount within which they may, it is thought, be kept without prejudice to the public interest, and the revenue shall prove to be as large as may justly be anticipated.

Among the reflections arising from the contemplation of these circumstances, one, not the least gratifying, is the consciousness that the Government had the resolution and the ability to adhere in every emergency to the sacred obligations of law, to execute all its contracts according to the requirements of the Constitution, and thus to present when most needed a rallying point by which the business of the whole country might be brought back to a safe and unvarying standard-a result vitally important as well to the interests as to the morals of the people. There can surely now be no difference of opinion in regard to the incalculable evils that would have arisen if the Government at that critical moment had suffered itself to be deterred from upholding the only true standard of value, either by the pressure of adverse circumstances or the violence of unmerited denunciation. The manner in which the people sustained the performance of this duty was highly honorable to their fortitude and patriotism. It can not fail to stimulate their agents to adhere under all circumstances to the line of duty and to satisfy them of the safety with which a course really right and demanded by a financial crisis may in a community like ours be pursued, however apparently severe its immediate operation.

The policy of the Federal Government in extinguishing as rapidly as possible the national debt, and subsequently in resisting every temptation to create a new one, deserves to be regarded in the same favorable light. Among the many objections to a national debt, the certain tendency of public securities to concentrate ultimately in the coffers of foreign stockholders is one which is every day gathering strength. Already have the resources of many of the States and the future industry of their citizens been indefinitely mortgaged to the subjects of European Governments to the amount of twelve millions annually to pay the constantly accruing interest on borrowed money-a sum exceeding half the ordinary revenues of the whole United States. The pretext which this relation affords to foreigners to scrutinize the management of our domestic affairs, if not actually to intermeddle with them, presents a subject for earnest attention, not to say of serious alarm. Fortunately, the Federal Government, with the exception of an obligation entered into in behalf of the District of Columbia, which must soon be discharged,

is wholly exempt from any such embarrassment. It is also, as is believed, the only Government which, having fully and faithfully paid all its creditors, has also relieved itself entirely from debt. To maintain a distinction so desirable and so honorable to our national character should be an object of earnest solicitude. Never should a free people. if it be possible to avoid it, expose themselves to the necessity of having to treat of the peace, the honor, or the safety of the Republic with the governments of foreign creditors, who, however well disposed they may be to cultivate with us in general friendly relations, are nevertheless by the law of their own condition made hostile to the success and permanency of political institutions like ours. Most humiliating may be the embarrassments consequent upon such a condition. Another objection, scarcely less formidable, to the commencement of a new debt is its inevitable tendency to increase in magnitude and to foster national extravagance. He has been an unprofitable observer of events who needs at this day to be admonished of the difficulties which a government habitually dependent on loans to sustain its ordinary expenditures has to encounter in resisting the influences constantly exerted in favor of additional loans: by capitalists, who enrich themselves by government securities for amounts much exceeding the money they actually advancea prolific source of individual aggrandizement in all borrowing countries: by stockholders, who seek their gains in the rise and fall of public stocks; and by the selfish importunities of applicants for appropriations for works avowedly for the accommodation of the public, but the real objects of which are too frequently the advancement of private interests. The known necessity which so many of the States will be under to impose taxes for the payment of the interest on their debts furnishes an additional and very cogent reason why the Federal Government should refrain from creating a national debt, by which the people would be exposed to double taxation for a similar object. We possess within ourselves ample resources for every emergency, and we may be quite sure that our citizens in no future exigency will be unwilling to supply the Government with all the means asked for the defense of the country. In time of peace there can, at all events, be no justification for the creation of a permanent debt by the Federal Government. Its limited range of constitutional duties may certainly under such circumstances be performed without such a resort. It has, it is seen, been avoided during four years of greater fiscal difficulties than have existed in a similar period since the adoption of the Constitution, and one also remarkable for the occurrence of extraordinary causes of expenditures.

But to accomplish so desirable an object two things are indispensable: First, that the action of the Federal Government be kept within the boundaries prescribed by its founders, and, secondly, that all appropriations for objects admitted to be constitutional, and the expenditure of them also, be subjected to a standard of rigid but well-considered and

1825

practical economy. The first depends chiefly on the people themselvesthe opinions they form of the true construction of the Constitution and the confidence they repose in the political sentiments of those they select as their representatives in the Federal Legislature: the second rests upon the fidelity with which their more immediate representatives and other public functionaries discharge the trusts committed to them. The duty of economizing the expenses of the public service is admitted on all hands; yet there are few subjects upon which there exists a wider difference of opinion than is constantly manifested in regard to the fidelity with which that duty is discharged. Neither diversity of sentiment nor even mutual recriminations upon a point in respect to which the public mind is so justly sensitive can well be entirely avoided, and least so at periods of great political excitement. An intelligent people, however, seldom fail to arrive in the end at correct conclusions in such a matter. Practical economy in the management of public affairs can have no adverse influence to contend with more powerful than a large surplus revenue, and the unusually large appropriations for 1837 may without doubt, independently of the extraordinary requisitions for the public service growing out of the state of our Indian relations, be in no inconsiderable degree traced The sudden and rapid distribution of the large surplus to this source. then in the Treasury and the equally sudden and unprecedentedly severe revulsion in the commerce and business of the country, pointing with unerring certainty to a great and protracted reduction of the revenue, strengthened the propriety of the earliest practicable reduction of the public expenditures.

But to change a system operating upon so large a surface and applicable to such numerous and diversified interests and objects was more than the work of a day. The attention of every department of the Government was immediately and in good faith directed to that end, and has been so continued to the present moment. The estimates and appropriations for the year 1838 (the first.over which I had any control) were somewhat diminished. The expenditures of 1839 were reduced \$6,000,000. Those of 1840, exclusive of disbursements for public debt and trust claims, will probably not exceed twenty-two and a half millions, being between two and three millions less than those of the preceding year and nine or ten millions less than those of 1837. Nor has it been found necessary in order to produce this result to resort to the power conferred by Congress of postponing certain classes of the public works, except by deferring expenditures for a short period upon a limited portion of them, and which postponement terminated some time since-at the moment the Treasury Department by further receipts from the indebted banks became fully assured of its ability to meet them without prejudice to the public service in other respects. Causes are in operation which will, it is believed, justify a still further reduction without injury to any important national interest. The expenses of sustaining the troops

employed in Florida have been gradually and greatly reduced through the persevering efforts of the War Department, and a reasonable hope may be entertained that the necessity for military operations in that quarter will soon cease. The removal of the Indians from within our settled borders is nearly completed. The pension list, one of the heaviest charges upon the Treasury, is rapidly diminishing by death. The most costly of our public buildings are either finished or nearly so, and we may, I think, safely promise ourselves a continued exemption from border difficulties.

The available balance in the Treasury on the 1st of January next is estimated at \$1,500,000. This sum, with the expected receipts from all sources during the next year, will, it is believed, be sufficient to enable the Government to meet every engagement and have a suitable balance in the Treasury at the end of the year, if the remedial measures connected with the customs and the public lands heretofore recommended are adopted and the new appropriations by Congress shall not carry the expenditures beyond the official estimates.

The new system established by Congress for the safe-keeping of the public money, prescribing the kind of currency to be received for the public revenue and providing additional guards and securities against losses, has now been several months in operation. Although it might be premature upon an experience of such limited duration to form a definite opinion in regard to the extent of its influences in correcting many evils under which the Federal Government and the country have hitherto suffered, especially those that have grown out of banking expansions, a depreciated currency, and official defalcations, yet it is but right to say that nothing has occurred in the practical operation of the system to weaken in the slightest degree, but much to strengthen, the confident anticipations of its friends. The grounds of these have been heretofore so fully explained as to require no recapitulation. In respect to the facility and convenience it affords in conducting the public service, and the ability of the Government to discharge through its agency every duty attendant on the collection, transfer, and disbursement of the public money with promptitude and success, I can say with confidence that the apprehensions of those who felt it to be their duty to oppose its adoption have proved to be unfounded. On the contrary, this branch of the fiscal affairs of the Government has been, and it is believed may always be, thus carried on with every desirable facility and security. A few changes and improvements in the details of the system, without affecting any principles involved in it, will be submitted to you by the Sceretary of the Treasury, and will, I am sure, receive at your hands that attention to which they may on examination be found to be entitled.

I have deemed this brief summary of our fiscal affairs necessary to the due performance of a duty specially enjoined upon me by the Constitution. It will serve also to illustrate more fully the principles by which I have been guided in reference to two contested points in our public policy which were earliest in their development and have been more important in their consequences than any that have arisen under our complicated and difficult, yet admirable, system of government. I allude to a national debt and a national bank. It was in these that the political contests by which the country has been agitated ever since the adoption of the Constitution in a great measure originated, and there is too much reason to apprehend that the conflicting interests and opposing principles thus marshaled will continue as heretofore to produce similar if not aggravated consequences.

Coming into office the declared enemy of both, I have earnestly endeavored to prevent a resort to either.

The consideration that a large public debt affords an apology, and produces in some degree a necessity also, for resorting to a system and extent of taxation which is not only oppressive throughout, but is likewise so apt to lead in the end to the commission of that most odious of all offenses against the principles of republican government, the prostitution of political power, conferred for the general benefit, to the aggrandizement of particular classes and the gratification of individual cupidity, is alone sufficient, independently of the weighty objections which have already been urged, to render its creation and existence the sources of bitter and unappeasable discord. If we add to this its inevitable tendency to produce and foster extravagant expenditures of the public moneys, by which a necessity is created for new loans and new burdens on the people, and, finally, refer to the examples of every government which has existed for proof, how seldom it is that the system, when once adopted and implanted in the policy of a country, has failed to expand itself until public credit was exhausted and the people were no longer able to endure its increasing weight, it seems impossible to resist the conclusion that no benefits resulting from its career, no extent of conquest, no accession of wealth to particular classes, nor any nor all its combined advantages, can counterbalance its ultimate but certain results-a splendid government and an impoverished people.

If a national bank was, as is undeniable, repudiated by the framers of the Constitution as incompatible with the rights of the States and the liberties of the people; if from the beginning it has been regarded by large portions of our eitizens as coming in direct collision with that great and vital amendment of the Constitution which declares that all powers not conferred by that instrument on the General Government are reserved to the States and to the people; if it has been viewed by them as the first great step in the march of latitudinous construction, which unchecked would render that sacred instrument of as little value as an unwritten constitution, dependent, as it would alone be, for its meaning on the interested interpretation of a dominant party, and affording no security to the rights of the minority—if such is undeniably the case, what rational

Messages and Papers of the Presidents

grounds could have been conceived for anticipating aught but determined opposition to such an institution at the present day.

Could a different result have been expected when the consequences which have flowed from its creation, and particularly from its struggles to perpetuate its existence, had confirmed in so striking a manner the appreliensions of its earliest opponents; when it had been so clearly demonstrated that a concentrated money power, wielding so vast a capital and combining such incalculable means of influence, may in those peculiar conjunctures to which this Government is unavoidably exposed prove an overmatch for the political power of the people themselves; when the true character of its capacity to regulate according to its will and its interests and the interests of its favorites the value and production of the labor and property of every man in this extended country had been so fully and fearfully developed; when it was notorious that all classes of this great community had, by means of the power and influence it thus possesses, been infected to madness with a spirit of heedless speculation; when it had been seen that, secure in the support of the combination of influences by which it was surrounded, it could violate its charter and set the laws at defiance with impunity; and when, too, it had become most apparent that to believe that such an accumulation of powers can ever be granted without the certainty of being abused was to indulge in a fatal delusion?

To avoid the necessity of a permanent debt and its inevitable consequences I have advocated and endeavored to carry into effect the policy of confining the appropriations for the public service to such objects only as are clearly within the constitutional authority of the Federal Government; of excluding from its expenses those improvident and unauthorized grants of public money for works of internal improvement which were so wisely arrested by the constitutional interposition of my predecessor, and which, if they had not been so checked, would long before this time have involved the finances of the General Government in embarrassments far greater than those which are now experienced by any of the States; of limiting all our expenditures to that simple, unostentations, and economical administration of public affairs which is alone consistent with the character of our institutions; of collecting annually from the customs, and the sales of public lands a revenue fully adequate to defray all the expenses thus incurred; but under no pretense whatsoever to impose taxes upon the people to a greater amount than was actually necessary to the public service conducted upon the principles I have stated.

In lieu of a national bank or a dependence upon banks of any description for the management of our fiscal affairs, I recommended the adoption of the system which is now in successful operation. That system affords every requisite facility for the transaction of the pecuniary concerns of the Government; will, it is confidently anticipated, produce in other respects many of the benefits which have been from time to time expected from the creation of a national bank, but which have never been realized;

1829

Martin Van Buren

avoid the manifold evils inseparable from such an institution; diminish to a greater extent than could be accomplished by any other measure of reform the patronage of the Federal Government—a wise policy in all governments, but more especially so in one like ours, which works well only in proportion as it is made to rely for its support upon the unbiased and unadulterated opinions of its constituents; do away forever all dependence on corporate bodies either in the raising, collecting, safekeeping, or disbursing the public revenues, and place the Government equally above the temptation of fostering a dangerous and unconstitutional institution at home or the necessity of adapting its policy to the views and interests of a still more formidable money power abroad.

It is by adopting and carrying out these principles under circumstances the most arduous and discouraging that the attempt has been made, thus far successfully, to demonstrate to the people of the United States that a national bank at all times, and a national debt except it be incurred at a period when the honor and safety of the nation demand the temporary sacrifice of a policy which should only be abandoned in such exigencies, are not merely unnecessary, but in direct and deadly hostility to the principles of their Government and to their own permanent welfare.

The progress made in the development of these positions appears in the preceding sketch of the past history and present state of the financial concerns of the Federal Government. The facts there stated fully authorize the assertion that all the purposes for which this Government was instituted have been accomplished during four years of greater pecuniary embarrassment than were ever before experienced in time of peace, and in the face of opposition as formidable as any that was ever before arrayed against the policy of an Administration; that this has been done when the ordinary revenues of the Government were generally decreasing as well from the operation of the laws as the condition of the country, without the creation of a permanent public debt or incurring any liability other than such as the ordinary resources of the Government will speedily discharge, and without the agency of a national bank.

If this view of the proceedings of the Government for the period it embraces be warranted by the facts as they are known to exist; if the Army and Navy have been sustained to the full extent authorized by law, and which Congress deemed sufficient for the defense of the country and the protection of its rights and its honor; if its civil and diplomatic service has been equally sustained; if ample provision has been made for the administration of justice and the execution of the laws; if the claims upon public gratitude in behalf of the soldiers of the Revolution have been promptly met and faithfully discharged; if there have been no failures in defraying the very large expenditures growing out of that longcontinued and salutary policy of peacefully removing the Indians to regions of comparative safety and prosperity; if the public faith has at all times and everywhere been most scrupulously maintained by a prompt

1830

discharge of the numerous, extended, and diversified claims on the Treas ury—if all these great and permanent objects, with many others that might be stated, have for a series of years, marked by peculiar obstacles and difficulties, been successfully accomplished without a resort to a permanent debt or the aid of a national bank, have we not a right to expect that a policy the object of which has been to sustain the public service independently of either of these fruitful sources of discord will receive the final sanction of a people whose unbiased and fairly elicited judgment upon public affairs is never ultimately wrong?

That embarrassments in the pecuniary concerns of individuals of unexampled extent and duration have recently existed in this as in other commercial nations is undoubtedly true. To suppose it necessary now to trace these reverses to their sources would be a reflection on the intelligence of my fellow-citizens. Whatever may have been the obscurity in which the subject was involved during the earlier stages of the revulsion, there can not now be many by whom the whole question is not fully understood.

Not deeming it within the constitutional powers of the General Governnent to repair private losses sustained by reverses in business having no connection with the public service, either by direct appropriations from the Treasury or by special legislation designed to secure exclusive privileges and immunities to individuals or classes in preference to or at the expense of the great majority necessarily debarred from any participation in them, no attempt to do so has been either made, recommended, or encouraged by the present Executive.

It is believed, however, that the great purposes for the attainment of which the Federal Government was instituted have not been lost sight Intrusted only with certain limited powers, cautiously enumerated, of. distinctly specified, and defined with a precision and clearness which would seem to defy misconstruction, it has been my constant aim to confine myself within the limits so clearly marked out and so carefully guarded. Having always been of opinion that the best preservative of the union of the States is to be found in a total abstinence from the exercise of all doubtful powers on the part of the Federal Government rather than in attempts to assume them by a loose construction of the Constitution or an ingenious perversion of its words, I have endeavored to avoid recommending any measure which I had reason to apprehend would, in the opinion even of a considerable minority of my fellow-citizens, be regarded as trenching on the rights of the States or the provisions of the hallowed instrument of our Union. Viewing the aggregate powers of the Federal Government as a voluntary concession of the States, it seemed to me that such only should be exercised as were at the time intended to be given.

I have been strengthened, too, in the propriety of this course by the conviction that all efforts to go beyond this tend only to produce dis-

Martin Van Buren

satisfaction and distrust, to excite jealousies, and to provoke resistance. Instead of adding strength to the Federal Government, even when successful they must ever prove a source of incurable weakness by alienating a portion of those whose adhesion is indispensable to the great aggregate of united strength and whose voluntary attachment is in my estimation far more essential to the efficiency of a government strong in the best of all possible strength—the confidence and attachment of all those who make up its constituent elements.

Thus believing, it has been my purpose to secure to the whole people and to every member of the Confederacy, by general, salutary, and equal laws alone, the benefit of those republican institutions which it was the end and aim of the Constitution to establish, and the impartial influence of which is in my judgment indispensable to their preservation. I can not bring myself to believe that the lasting happiness of the people, the prosperity of the States, or the permanency of their Union can be maintained by giving preference or priority to any class of citizens in the distribution of benefits or privileges, or by the adoption of measures which enrich one portion of the Union at the expense of another; nor can I see in the interference of the Federal Government with the local legislation and reserved rights of the States a remedy for present or a security against future dangers.

The first, and assuredly not the least, important step toward relieving the country from the condition into which it had been plunged by excesses in trade, banking, and credits of all kinds was to place the business transactions of the Government itself on a solid basis, giving and receiving in all cases value for value, and neither countenancing nor encouraging in others that delusive system of credits from which it has been found so difficult to escape, and which has left nothing behind it but the wrecks that mark its fatal career.

That the financial affairs of the Government are now and have been during the whole period of these wide-spreading difficulties conducted with a strict and invariable regard to this great fundamental principle, and that by the assumption and maintenance of the stand thus taken on the very threshold of the approaching crisis more than by any other cause or causes whatever the community at large has been shielded from the incalculable evils of a general and indefinite suspension of specie payments, and a consequent annihilation for the whole period it might have lasted of a just and invariable standard of value, will, it is believed, at this period scarcely be questioned.

A steady adherence on the part of the Government to the policy which has produced such salutary results, aided by judicious State legislation and, what is not less important, by the industry, enterprise, perseverance, and economy of the American people, can not fail to raise the whole country at an early period to a state of solid and enduring prosperity, not subject to be again overthrown by the suspension of banks or the

Messages and Papers of the Presidents

explosion of a bloated credit system. It is for the people and their representatives to decide whether or not the permanent welfare of the country (which all good citizens equally desire, however widely they may differ as to the means of its accomplishment) shall be in this way secured, or whether the management of the pecuniary concerns of the Government, and by consequence to a great extent those of individuals also. shall be carried back to a condition of things which fostered those contractions and expansions of the currency and those reckless abuses of credit from the baleful effects of which the country has so deeply suffered-a return that can promise in the end no better results than to reproduce the embarrassments the Government has experienced, and to remove from the shoulders of the present to those of fresh victims the bitter fruits of that spirit of speculative enterprise to which our countrymen are so liable and upon which the lessons of experience are so unavailing. The choice is an important one, and I sincerely hope that it may be wisely made.

A report from the Secretary of War, presenting a detailed view of the affairs of that Department, accompanies this communication.

The desultory duties connected with the removal of the Indians, in which the Army has been constantly engaged on the northern and western frontiers and in Florida, have rendered it impracticable to carry into full effect the plan recommended by the Secretary for improving its discipline. In every instance where the regiments have been concentrated they have made great progress, and the best results may be anticipated from a continuance of this system. During the last season a part of the troops have been employed in removing Indians from the interior to the territory assigned them in the West—a duty which they have performed efficiently and with praiseworthy humanity—and that portion of them which has been stationed in Florida continued active operations there throughout the heats of summer.

The policy of the United States in regard to the Indians, of which a succinct account is given in my message of 1838, and of the wisdom and expediency of which I am fully satisfied, has been continued in active operation throughout the whole period of my Administration. Since the spring of 1837 more than 40,000 Indians have been removed to their new homes west of the Mississippi, and I am happy to add that all accounts concur in representing the result of this measure as eminently beneficial to that people.

The emigration of the Seminoles alone has been attended with serious difficulty and occasioned bloodshed, hostilities having been commenced by the Indians in Florida under the apprehension that they would be compelled by force to comply with their treaty stipulations. The execution of the treaty of Paynes Landing, signed in 1832, but not ratified until 1834, was postponed at the solicitation of the Indians until 1836, when they again renewed their agreement to remove peaceably to their new

1833

homes in the West. In the face of this solemn and renewed compact they broke their faith and commenced hostilities by the massacre of Major Dade's command, the murder of their agent, General Thompson, and other acts of cruel treachery. When this alarming and unexpected intelligence reached the seat of Government, every effort appears to have been made to reenforce General Clinch, who commanded the troops then in Florida. General Eustis was dispatched with reenforcements from Charleston, troops were called out from Alabama, Tennessee, and Georgia, and General Scott was sent to take the command, with ample powers and ample means. At the first alarm General Gaines organized a force at New Orleans, and without waiting for orders landed in Florida, where he delivered over the troops he had brought with him to General Scott.

Governor Call was subsequently appointed to conduct a summer campaign, and at the close of it was replaced by General Jesup. These events and changes took place under the Administration of my predeces-Notwithstanding the exertions of the experienced officers who had sor command there for eighteen months, on entering upon the administration of the Government I found the Territory of Florida a prey to Indian atrocities. A strenuous effort was immediately made to bring those hostilities to a close, and the army under General Jesup was reenforced until it amounted to 10,000 men, and furnished with abundant supplies of every description. In this campaign a great number of the enemy were captured and destroyed, but the character of the contest only was changed. The Indians, having been defeated in every engagement, dispersed in small bands throughout the country and became an enterprising, formidable, and ruthless banditti. General Taylor, who succeeded General Jesup, used his best exertions to subdue them, and was seconded in his efforts by the officers under his command; but he too failed to protect the Territory from their depredations. By an act of signal and cruel treachery they broke the truce made with them by General Macomb, who was sent from Washington for the purpose of carrying into effect the expressed wishes of Congress, and have continued their devastations ever since. General Armistead, who was in Florida when General Taylor left the army by permission, assumed the command, and after active summer operations was met by propositions for peace, and from the fortunate coincidence of the arrival in Florida at the same period of a delegation from the Seminoles who are happily settled west of the Mississippi and are now anxious to persuade their countrymen to join them there hopes were for some time entertained that the Indians might be induced to leave the Territory without further difficulty. These hopes have proved fallacious and hostilities have been renewed throughout the whole of the Territory. That this contest has endured so long is to be attributed to causes beyond the control of the Government. Experienced generals have had the command of the troops, officers and soldiers have alike distinguished themselves for their activity, patience, and enduring courage,

the army has been constantly furnished with supplies of every description, and we must look for the causes which have so long procrastinated the issue of the contest in the vast extent of the theater of hostilities, the almost insurmountable obstacles presented by the nature of the country, the climate, and the wily character of the savages.

The sites for marine hospitals on the rivers and lakes which I was authorized to select and cause to be purchased have all been designated, but the appropriation not proving sufficient, conditional arrangements only have been made for their acquisition. It is for Congress to decide whether these conditional purchases shall be sanctioned and the humane intentions of the law carried into full effect.

The Navy, as will appear from the accompanying report of the Secretary, has been usefully and honorably employed in the protection of our commerce and citizens in the Mediterranean, the Pacific, on the coast of Brazil, and in the Gulf of Mexico. A small squadron, consisting of the frigate *Constellation* and the sloop of war *Boston*, under Commodore Kearney, is now on its way to the China and Indian seas for the purpose of attending to our interests in that quarter, and Commander Aulick, in the sloop of war *Yorktown*, has been instructed to visit the Sandwich and Society Islands, the coasts of New Zealand and Japan, together with other ports and islands frequented by our whale ships, for the purpose of giving them countenance and protection should they be required. Other smaller vessels have been and still are employed in prosecuting the surveys of the coast of the United States directed by various acts of Congress, and those which have been completed will shortly be laid before you.

The exploring expedition at the latest date was preparing to leave the Bay of Islands, New Zealand, in further prosecution of objects which have thus far been successfully accomplished. The discovery of a new continent, which was first seen in latitude 66° 2' south, longitude 154° 27' east, and afterwards in latitude 66° 31' south, longitude 153° 40' east, by Lieutenants Wilkes and Hudson, for an extent of 1,800 miles, but on which they were prevented from landing by vast bodies of ice which encompassed it, is one of the honorable results of the enterprise. Lieutenant Wilkes bears testimony to the zeal and good conduct of his officers and men, and it is but justice to that officer to state that he appears to have performed the duties assigned him with an ardor, ability, and perseverance which give every assurance of an honorable issue to the undertaking.

The report of the Postmaster-General herewith transmitted will exhibit the service of that Department the past year and its present condition. The transportation has been maintained during the year to the full extent authorized by the existing laws; some improvements have been effected which the public interest seemed urgently to demand, but not involving any material additional expenditure; the contractors have generally performed their engagements with fidelity; the postmasters, with few exceptions, have rendered their accounts and paid their quarterly balances with promptitude, and the whole service of the Department has maintained the efficiency for which it has for several years been distinguished.

The acts of Congress establishing new mail routes and requiring more expensive services on others and the increasing wants of the country have for three years past carried the expenditures something beyond the accruing revenues, the excess having been met until the past year by the surplus which had previously accumulated. That surplus having been exhausted and the anticipated increase in the revenue not having been realized owing to the depression in the commercial business of the country, the finances of the Department exhibit a small deficiency at the close of the last fiscal year. Its resources, however, are ample, and the reduced rates of compensation for the transportation service which may be expected on the future lettings from the general reduction of prices, with the increase of revenue that may reasonably be anticipated from the revival of commercial activity, must soon place the finances of the Department in a prosperous condition.

Considering the unfavorable circumstances which have existed during the past year, it is a gratifying result that the revenue has not declined as compared with the preceding year, but, on the contrary, exhibits a small increase, the circumstances referred to having had no other effect than to check the expected income.

It will be seen that the Postmaster-General suggests certain improvements in the establishment designed to reduce the weight of the mails, cheapen the transportation, insure greater regularity in the service, and secure a considerable reduction in the rates of letter postage—an object highly desirable. The subject is one of general interest to the commtnity, and is respectfully recommended to your consideration.

The suppression of the African slave trade has received the continued attention of the Government. The brig *Dolphin* and schooner *Grampus* have been employed during the last season on the coast of Africa for the purpose of preventing such portions of that trade as were said to be prosecuted under the American flag. After cruising off those parts of the coast most usually resorted to by slavers until the commencement of the rainy season, these vessels returned to the United States for supplies, and have since been dispatched on a similar service.

From the reports of the commanding officers it appears that the trade is now principally carried on under Portuguese colors, and they express the opinion that the apprehension of their presence on the slave coast has in a great degree arrested the prostitution of the American flag to this inhuman purpose. It is hoped that by continuing to maintain this force in that quarter and by the exertions of the officers in command much will be done to put a stop to whatever portion of this traffic may have been carried on under the American flag and to prevent its use

1837 Messages and Papers of the Presidents

in a trade which, while it violates the laws, is equally an outrage on the rights of others and the feelings of humanity. The efforts of the several Governments who are anxiously seeking to suppress this traffic must, however, be directed against the facilities afforded by what are now recognized as legitimate commercial pursuits before that object can be fully accomplished.

Supplies of provisions, water casks, merchandise, and articles connected with the prosecution of the slave trade are, it is understood, freely carried by vessels of different nations to the slave factories, and the effects of the factors are transported openly from one slave station to another without interruption or punishment by either of the nations to which they belong engaged in the commerce of that region. I submit to your judgments whether this Government, having been the first to prohibit by adequate penalties the slave trade, the first to declare it piracy, should not be the first also to forbid to its citizens all trade with the slave factories on the coast of Africa, giving an example to all nations in this respect which if fairly followed can not fail to produce the most effective results in breaking up those dens of iniquity.

M. VAN BUREN.

SPECIAL MESSAGES.

WASHINGTON, December 7, 1840.

Hon. R. M. T. HUNTER, Speaker of the House of Representatives.

SIR: I herewith transmit a letter from the Secretary of the Navy, in relation to the navy pension fund, to which the attention of Congress is invited, and recommend an immediate appropriation of \$151,352.39 to meet the payment of pensions becoming due on and after the 1st of January, 1841. M. VAN BUREN.

M. VIII DORIAN.

WASHINGTON, December 10, 1840.

To the Senate of the United States:

I transmit, for the action of the Senate, a communication from the Secretary of War, on the subject of the transfer of Chickasaw stock to the Choctaw tribe, which the accompanying papers explain.

M. VAN BUREN.

WAR DEPARTMENT, December 10, 1840.

The President of the United States.

SIR: I have the honor to lay before you a communication from the Commissioner of Indian Affairs, relative to the transfer of \$500,000 Chickasaw stock to the Choctaws in execution of the compact of 17th January, 1837, between those tribes, that if you

AFRICANS ON DECK OF SLAVER "WILDFIRE" (From a daguerreotype)

A COTTON FIELD

THE AFRICAN SLAVE TRADE

One of the considerations which induced all sections to ratify the Constitution was that under it the slave trade would cease in 1808. The trade continued, however, though men caught at it were subject to the penalties for piracy. In 1858 the crew of a vessel which, when captured, had more than 300 Africans aboard, were indicted but acquitted. The laws of the United States could not be enforced against the slave power in South Carolina. In Georgia the captain and crew of a vessel which had landed and distributed 300 Africans, were indicted, prosecuted and acquitted. Again the laws of the United States were powerless. Tiring of the inconvenience of evading the law, lax as its enforcement was, the South at last demanded the reopening of the slave trade, although it imported more slaves during each year that the trade was illegal than during any year when it was allowed. The Federal Government could enforce the Fugitive Slave Law against the sentiment of the North, because in the North Federal officers were loyal to the United States. It could not force its law in any particular upon the South, because there its agents were loyal to their States, first, last and always.

The daguerreotype shows a portion of a captured slaver's cargo, emaciated by hunger and dysentery, and beneath the toil for which they were required.

For a discussion of this subject, see the articles entitled "African Slave Trade" and "Slavery," in the Encyclopedic Index, and turn to the pages thereafter indicated in which occur presidential references to the matter. think it advisable you may assent to the proposed transfer and lay the matter before the Senate for the sanction of that body.

Very respectfully, your most obedient servant, I. R. POINSETT.

WAR DEPARTMENT, OFFICE INDIAN AFFAIRS,

Hon. J. R. POINSETT,

Secretary of War.

SIR: A compact was made on the 17th January, 1837, "subject to the approval of the President and Senate of the United States," which it received from the former on the 24th March, 1837, in conformity with the resolution of the Senate of 25th February, between the Choctaw and Chickasaw tribes of Indians, of which I have the honor to inclose a copy.

By this instrument the right to occupy a portion of the Choctaw country west of the Mississippi was, with certain privileges, secured to the Chickasaws, who agreed to pay therefor \$530,000, of which \$30,000 were paid in 1837, and the remaining \$500,000 it was agreed should be invested under the direction of the Government of the United States and that the interest should be paid annually to the Choctaws.

There being no money to place in the hands of the United States, but a very large amount of Chickasaw stock under the direction of the Treasury, the reasonable desire of the Choctaws that this large fund belonging to them should be put in their own names on the books of the Government can be gratified by a transfer of so much of the stock to the Secretary of War for their use, upon which the interest will be received and paid over to them. This will be an execution of the agreement of the parties. A sale of stocks to raise the money and then a reinvestment of it according to the letter of the compact ought not to be resorted to on account of their present low price in the market.

In considering this subject in the course of the autumn the thirteenth article of the treaty of 24th May, 1834, with the Chickasaws was adverted to, by which it is provided: "If the Chickasaws shall be so fortunate as to procure a home within the limits of the United States, it is agreed that, with the consent of the President and Senate, so much of their invested stock as may be necessary to the purchase of a country for them to settle in shall be permitted to them to be sold, or the United States will advance the necessary amount upon a guaranty and pledge of an equal amount of their stocks." The compact before referred to having been ratified by the President and Senate, it was doubted whether that was not a virtual consent to the application of so much of the stock as would be required to pay for the land and privileges contracted for by the said compact, and an authority for the transfer of it. The question was referred to the Attorney-General, who was of opinion that the transfer could not be legally made without the assent of the President and Senate to the particular act.

I have therefore respectfully to request that you will lay the matter before the President, that if he concurs in the propriety of so doing he may give his own and ask the consent of the Senate to the proposed proceeding.

Very respectfully, your most obedient,

T. HARTLEY CRAWFORD.

To the Senate:

WASHINGTON, December 10, 1840.

I communicate a report * of the Secretary of State, with the documents accompanying it, in compliance with the resolution of the Senate of the 20th of July last.

⁺Transmitting correspondence with Great Britain relative to the burning of the steamboat *Caroline* at Schlosser, N. Y., December 29, 1537.

Transmitting correspondence with Great Britain relative to proceedings on the part of that Government which may have a tendency to interrupt our commerce with China.

Martin Van Buren

WASHINGTON, January 2, 1841.

To the House of Representatives of the United States:

I think proper to communicate to the House of Representatives, in further answer to their resolution of the 21st ultimo, the correspondence which has since occurred between the Secretary of State and the British minister on the same subject.

M. VAN BUREN.

Mr. Fox to Mr. Forsyth.

WASHINGTON, December 29, 1840.

Hon. JOHN FORSYTH, etc.

٠.

SIR: I have the honor to acknowledge the receipt of your letter of the 26th instant, in which, in reply to a letter which I had addressed to you on the 13th, you acquaint me that the President is not prepared to comply with my demand for the liberation of Mr. Alexander McLeod, of Upper Canada, now imprisoned at Lockport, in the State of New York, on a pretended charge of murder and arson, as having been engaged in the destruction of the piratical steamboat *Caroline* on the 29th of December, 1837.

I learn with deep regret that such is the decision of the President of the United States, for I can not but foresee the very grave and serious consequences that must ensue if, besides the injury already inflicted upon Mr. McLeod of a vexatious and unjust imprisonment, any further harm should be done to him in the progress of this extraordinary proceeding.

I have lost no time in forwarding to Her Majesty's Government in England the correspondence that has taken place, and I shall await the further orders of Her Majesty's Government with respect to the important question which that correspondence involves.

But I feel it my duty not to close this communication without likewise testifying my vast regret and surprise at the expressions which I find repeated in your letter with reference to the destruction of the steamboat *Caroline*. I had confidently hoped that the first erroneous impression of the character of that event, imposed upon the mind of the United States Government by partial and exaggerated representations, would long since have been effaced by a more strict and accurate examination of the facts. Such an investigation must even yet, I am willing to believe, lead the United States Government to the same conviction with which Her Majesty's authorities on the spot were impressed-that the act was one, in the strictest sense, of self-defense, rendered absolutely necessary by the circumstances of the occasion for the safety and protection of Her Majesty's subjects, and justified by the same motives and principles which upon similar and well-known occasions have governed the conduct of illustrious officers of the United States. The steamboat Caroline was a hostile vessel engaged in piratical war against Her Majesty's people, hired from her owners for that express purpose, and known to be so beyond the possibility of doubt. The place where the vessel was destroyed was nominally, it is true, within the territory of a friendly power, but the friendly power had been deprived through overbearing piratical violence of the use of its proper authority over that portion of territory. The authorities of New York had not even been able to prevent the artillery of the State from being carried off publicly at midday to be used as instruments of war against Her Majesty's subjects. It was under such circumstances, which it is to be hoped will never recur, that the vessel was attacked by a party of Her Majesty's people, captured, and destroyed. A remonstrance against the act in question has been addressed by the United States to Her Majesty's Government in England. I am not authorized to pronounce the decision of Her Majesty's Government upon that remonstrance, but I have felt myself bound to record in the meantime the above opinion,

Messages and Papers of the Presidents

in order to protest in the most solemn manner against the spirited and loyal conduct of a party of Her Majesty's officers and people being qualified, through an unfortunate misapprehension, as I believe, of the facts, with the appellation of outrage or of murder.

I avail myself of this occasion to renew to you the assurance of my distinguished consideration. H. S. FOX.

Mr. Forsyth to Mr. Fox.

DEPARTMENT OF STATE, Washington, December 31, 1840.

SIR: I have the honor to acknowledge the receipt of your note of the 29th instant, in reply to mine of the 26th, on the subject of the arrest and detention of Alexander McLeod as one of the perpetrators of the outrage committed in New York when the steamboat *Caroline* was seized and burnt. Full evidence of that outrage has been presented to Her Britannic Majesty's Government with a demand for redress, and of course no discussion of the circumstances here can be either useful or proper, nor can I suppose it to be your desire to invite it. I take leave of the subject with this single remark, that the opinion so strongly expressed by you on the facts and principles involved in the demand for reparation on Her Majesty's Government by the United States would hardly have been hazarded had you been possessed of the carefully collected testimony which has been presented to your Government in support of that demand.

I avail myself of the occasion to renew to you the assurance of my distinguished consideration. JOHN FORSYTH.

To the Senate of the United States:

I submit herewith a treaty concluded with the Miami Indians for the cession of their lands in the State of Indiana. The circumstances attending this negotiation are fully set forth in the accompanying communication from the Secretary of War. Although the treaty was concluded without positive instructions and the usual official preliminaries, its terms appear to be so advantageous and the acquisition of these lands are deemed so desirable by reason of their importance to the State of Indiana and the Government, as well as on account of the Indians themselves, who will be greatly benefited by their removal west, that I have thought it advisable to submit it to the action of the Senate.

M. VAN BUREN.

WAR DEPARTMENT, January 4, 1841

The PRESIDENT OF THE UNITED STATES.

SIR: I have the honor to transmit herewith a treaty concluded with the Miami Indians of the State of Indiana, to be laid before the Senate for their ratification if upon due consideration of the circumstances under which this treaty was negotiated you should think proper to do so. These circumstances are fully and correctly set forth in the accompanying communication from the Commissioner of Indian Affairs to which I beg leave respectfully to refer you.

I have the honor to be, very respectfully, your most obedient servant,

J. R. POINSETT.

WASHINGTON, January 4, 1841.

1841

WAR DEPARTMENT, OFFICE INDIAN AFFAIRS,

December 29, 1840.

Hon. J. R. POINSETT,

Secretary of War.

SIR: A treaty made with the Miami tribe of Indians in the State of Indiana on the 28th day of November last for the residue of their lands in that State has been unexpectedly received.

Great anxiety has been manifested by the citizens of Indiana and made known by their representatives in both Houses of Congress that a cession of the Miami land should be procured, and it seems to have been met by a correspondent disposition on the part of the leading men among the Indians. On the 25th May last a communication was received from General Samuel Milroy, subagent, etc., expressing the belief that the Miamies would treat and that their principal chief was desirous before the close of his life, now drawing near, to effect a negotiation, as in his opinion the emigration or extinction of the tribe were the alternatives before them, and suggesting that the most judicious course would be to conduct the business informally at the annuity payment. In reply he was informed on the 2d July that the Department did not open negotiations for the purchase of Indian lands unless thereto previously authorized by Congress, and that at the request of a portion of the representation of Indiana an estimate had been furnished of the sum that would be required to hold a treaty, and that if the presumed intention of obtaining the estimate should be realized an effort would be made to execute the purpose for which the appropriation would be obtained. (Extracts from these letters, so far as they relate to the subject, are herewith sent, marked A.*) On the 31st July he renewed the subject, accompanied by an extract of a letter of 22d July to himself from Allen Hamilton, esg., the confidential friend of Chief Richardville, urging the propriety of a negotiation. (B.*)

On the 12th August, no appropriation having been made by Congress, a letter was addressed to you by the Hon. O. H. Smith, of the Senate of the United States from Indiana, inclosing a letter from Mr. Hamilton, dated on the 11th, urging the vast importance of treating with the Miamies, as well to them as to the State, and giving the reasons which in the judgment of both led to the conclusion that their particular case should form an exception to the general rule that obtains in regard of Indian treaties, and recommending strongly the appointment of General Milroy as a suitable person to conduct the negotiation. A communication of similar character (except the last feature), dated 20th August, was received from Mr. Milroy. The letter of the Hon. Mr. Smith was referred by you to this office, and on the 27th August, after a conference with you on the subject, I replied that exceptions to the rule stated might under very peculiar circumstances exist, but that as the Senate certainly, and it was believed the House too, had rejected an application for an appropriation, the opening of a negotiation might be considered to be opposed to an expression of legislative opinion. In answer to the suggestion that little or perhaps no expense need be incurred, as the treaty could be made at the payment of the annuities, it was remarked that the consideration money must necessarily be large, as the Miami lands were very valuable, and an appropriation of it required, which Congress might be disinclined to grant after what had happened; that it was therefore deemed advisable to decline treating, and that perhaps a future application for legislative sanction might be more successful. Of this letter a copy was sent to General Milroy as a reply on the subject in hand to his communication of 31st July, and his letter of 20th August was further answered on 2d September. (C.*)

In consequence of the representations referred to, and probably others which did not reach me, you addressed me an unofficial note on 14th September, suggesting that Allen Hamilton, esq., might at the payment of the annuities make an arrangement with the Miamies that would be "gratifying to the people as well as beneficial to

the service." With this expressed wish of the head of the Department, and after consultation with you, I wrote unofficial letters to General Samuel Milroy and to Allen Hamilton, esq., on the 18th September, setting forth the views of the Department as hereinbefore expressed in regard of precedent legislative sanction and the importance to Indiana of treating with the Miamies, whose disposition to cede their remaining lands on just and equitable terms might not continue. It was thought, however, to be in keeping with the rule adopted to ascertain informally from the Miamies what they would be willing to take for their lands when it was their pleasure to emigrate, etc. It was doubted whether it would be judicious to reduce the terms to writing, however informally, on account of the difficulty there might be in convincing the Indians that it was not a treaty, although it was desirable, if it could be safely done, that it should be so; and they were informed that a report from them would answer "all my purposes, as my object is to be able to say to each branch of Congress upon what terms the Miami lands can be had by the United States, so that if the terms are approved the necessary law may be passed." It was suggested that the annuity payment would afford a good opportunity for procuring the information desired, which it was expected could be had without any expense, for which there were no funds, and that if there were it would not be proper to expend them in the way proposed. (D.*)

I desire to state the facts as they exist so fully as to exhibit precisely what has been the action of the Department, without going into more detail than may be necessary, and therefore annex extracts and copies of the papers referred to instead of embodying them in this communication.

On the 28th day of November last a treaty was concluded by Messrs. Samuel Milroy and Allen Hamilton with "the chiefs, warriors, and headmen of the Miami tribe of Indians," which was received here on the 19th instant, accompanied by a letter explanatory of the treaty and stating it to have been made by "the undersigned, acting under instructions contained in your unofficial letter dated September 18, 1840;" that it was made at the annuity payment, when "the views and instructions of the Department" were "communicated to the Miami Indians in full council," and that "after full consideration of the subject they decided to reduce to treaty form a proposition or the terms upon which they would consent to cede their remaining lands in Indiana to the United States, subject, as they understand it, to the approval of the Department and the approval and ratification of the President and Senate of the United States before being of any binding force or efficiency as a treaty." With the original treaty I send a copy of the explanatory letter and of a communication from General Milroy giving the reasons for the money provisions made for the chief Richardville and the family of Chief Godfroy. (E, *)

It will be thus seen that the negotiation of a treaty was not anthorized; but if in the opinion of the President and Senate it shall be advisable to adopt and confirm it, I do not see any legal objection to such a course. The quantity of land ceded is estimated at about 500,000 acres, for which the consideration is fixed at \$550,000, or \$1.10 per acre, of which \$250,000 are payable presently and the balance in annual payments of \$15,000, which will be discharged in twenty years. In addition, we will be bound to remove them west of the Mississippi within five years, the period stipulated for their emigration, and to subsist them for one year after their arrival. These are the chief provisions in which the United States are interested. By the second (it is called in the treaty now submitted the "22," which, if the President should decide to lay it before the Senate, can be corrected by that body) article of the treaty of 6th November, 1838, there is reserved from the cession contained in that instrument 10 miles square for the band of Ma-to-sin-ia, in regard of which the seventh article says:

"It is further stipulated that the United States convey by patent to Me-shing-go-

me-zia, son of Ma-to-sin-ia, the tract of land reserved by the twenty-second article of the treaty of 6th of November, 1838, to the band of Ma-to-sin-ia."

This is a change as to the title of a reservation heretofore sanctioned and not now ceded, and so far as the United States are concerned does not vary the aspect of the present compact. There are reserved to the chief Richardville seven sections of land, and to him and the family of the deceased chief Godfroy are to be paid, respectively, considerable sums of money, which it seems from the statement of General Milroy were debts due to them and acknowledged by the tribe.

The treaty of November, 1838, which was ratified on the 8th February, 1839, extinguished the Indian title to about 177,000 acres of land and cost the United States 335,680, or nearly 22 per acre. Measured by this price the present arrangement would seem to be very advantageous. It is stated by Messrs. Milroy and Hamilton that more favorable terms will not be assented to by the Miamies under any circumstances, and considering the great importance of the adoption of this compact, however irregularly made, to the State of Indiana, as well as the belief that any postponement will probably swallow up what remains to these Indians in debts which they most improvidently contract and the conviction that nothing can save them from moral ruin but their removal west, I think it would be judicious in all views of the matter to adopt and ratify this treaty, and respectfully recommend that it, with the accompanying papers, be laid before the President, and, if he and you concur in my views, that the sanction of it by the Senate be asked.

Respectfully submitted.

T. HARTLEY CRAWFORD.

WASHINGTON, January 5, 1841.

To the Senate of the United States:

I communicate to the Senate sundry papers,* in further answer to its resolution of the 30th of December, 1839, which have been received from the governor of Florida since the adjournment of the last session of Congress.

M. VAN BUREN.

WASHINGTON, January 6, 1841.

Hon. R. M. JOHNSON,

President of the Senate.

SIR: The report of the Secretary of War herewith and the accompanying documents are respectfully submitted in reply to the resolution of the Senate of June 30, 1840, calling for information in relation to the number of soldiers enlisted in the late war and entitled to bounty land, etc.

M. VAN BUREN.

WASHINGTON, January 7, 1841.

Hon. R. M. JOHNSON,

President of the Senate.

SIR: The communication of the Secretary of War and the accompanying report of the colonel of Topographical Engineers are respectfully submitted in reply to the resolution of the 15th of June last, calling for a

plan and estimate for the improvement of Pennsylvania avenue west of the President's square and for the construction of a stone bridge across Rock Creek, etc.

M. VAN BUREN.

WASHINGTON, january 18, 1841.

To the Senate of the United States:

I herewith transmit to the Senate, in reply to their resolution of the 20th of July last, a report from the Secretary of State, with accompanying papers.*

M. VAN BUREN.

WASHINGTON, January 19, 1841.

To the House of Representatives of the United States:

I herewith transmit to the House of Representatives a report, with accompanying papers,[†] from the Secretary of State, in answer to the resolution of the House of the 16th of December last.

M. VAN BUREN.

WASHINGTON, January 22, 1841.

To the House of Representatives of the United States:

I transmit herewith to the House of Representatives of the United States a report from the Director of the Mint, exhibiting the operations of that institution during the year 1840, and I have to invite the special attention of Congress to that part of the Director's report in relation to the overvaluation given to the gold in foreign coins by the act of Congress of June 28, 1834, "regulating the value of certain foreign gold coin within the United States."

Applications have been frequently made at the Mint for copies of medals voted at different times by Congress to the officers who distinguished themselves in the War of the Revolution and in the last war (the dies for which are deposited in the Mint), and it is cubmitted to Congress whether authority shall be given to the Mint to strike off copies of those medals, in bronze or other metal, to supply those persons making application for them, at a cost not to exceed the actual expense of striking them off.

M. VAN BUREN.

WASHINGTON, January 29, 1841.

To the Senate and House of Representatives:

By the report of the Secretary of State herewith communicated and the accompanying papers it appears that an additional appropriation is

² Correspondence imputing malpractices to N. P. Trist. American consul at Havana, in regard U-granting papers to vessels engaged in the slave trade, etc.

f Relating to the origin of any political relations between the United States and the Empire of China, etc.

necessary if it should be the pleasure of Congress that the preparatory exploration and survey of the northeastern boundary of the United States should be completed.

M. VAN BUREN.

WASHINGTON, February 1, 1841.

To the Senate of the United States:

I respectfully transmit herewith a report and accompanying documents from the Secretary of War, in answer to a resolution of the 22d of December, 1840, requesting the President to transmit to the Senate any information in his possession relative to the survey directed by the act of the 12th of June, 1838, entitled "An act to ascertain and designate the boundary line between the State of Michigan and Territory of Wiskonsin."

M. VAN BUREN.

WASHINGTON, February 8, 1841.

To the Senate and House of Representatives:

I transmit herewith the copy of a report from the commissioners for the exploration and survey of the northeastern boundary, in addition to the documents sent to Congress, with reference to a further appropriation for the completion of the duty intrusted to the commission.

M. VAN BUREN.

Report of the commissioners appointed by the President of the United States under the act of Congress of 20th July, 1840, for the purpose of exploring and surveying the boundary line between the States of Maine and New Hampshire and the British Provinces.

NEW YORK, January 6, 1841.

Hon. JOHN FORSYTH,

Secretary of State.

SIR: The commissioners, having assembled in this city in conformity with your orders under date of 29th of July, beg leave respectfully to report—

That the extent of country and the great length of the boundary line included in the objects of their commission would have rendered it impossible to have completed the task assigned them within the limits of a single season. In addition to this physical impossibility, the work of the present year was entered upon under circumstances very unfavorable for making any great progress. The law under which they have acted was passed at the last period of a protracted session, when nearly half of the season during which working parties can be kept in the field had elapsed; and although no delay took place in the appointment of commissioners to carry it into effect, the organization of the board was not effected, in consequence of the refusal of one of the commissioners and the agent to accept of their nomination. The commissioners, acting under these disadvantages, have done all that lay in their power to accomplish the greatest practicable extent of work, and have obtained many results which can not but be important in the examination of the vexed and important question which has been committed to them; but after having fully and maturely considered the subject and interchanged the results of their respective operations they have come to the conclusion that it would be premature to embody the partial results which they have attained in a general report for the purpose of being laid before the political and scientific world. The meridian line of the St. Croix has not been carried to a distance of more than 50 miles from the monument at the source of that river, and the operations of the other commissioners, although they have covered a wide extent of country, have fulfilled but one part of the duty assigned them, namely, that of exploration; while even in the parts explored actual surveys will be necessary for the purpose of presenting the question in such form as can admit of no cavil. In particular, the results of the examination of the most northern part of the line appear to differ in some points from the conclusions of the late British commission. Satisfied that the latter have been reached in too hasty a manner and without a sufficient time having been expended upon comparative observations, they are cautioned by this example against committing a like error. In respect to the argumentative part of the report of the British commissioners, the duty of furnishing a prompt and immediate reply to such parts of it as rest upon the construction of treaties and the acts of diplomacy has been rendered far less important than it might at one time have appeared by the publication of the more important parts of the argument laid before the King of the Netherlands as umpire. This argument, the deliberate and studied work of men who well understood the subject, is a full exposition of the grounds on which the claim of the United States to the whole of the disputed territory rests. It has received the sanction of successive Administrations of opposite politics, and may therefore be considered, in addition to its original official character, as approved by the whole nation. To this publication your commission beg leave to refer as embodying an argument which may be styled unanswerable.

The operations of the parties under the command of the several commissioners were as follows:

The party under the direction of Professor Renwick left Portland in detachments on the 26th and 27th of August. The place of general rendezvous was fixed at Woodstock, or, failing that, at the Grand Falls of the St. John. The commissary of the party proceeded as speedily as possible to Oldtown, in order to procure boats and engage men. Professor Renwick passed by land through Brunswick, Gardiner, and Augusta. At the former place barometer No. I was compared with that of Professor Cleaveland, at Gardiner with that of Hallowel Gardiner, esq.; and arrangements were made with them to keep registers, to be used as corresponding observations with those of the expedition. At Augusta some additional articles of equipment were obtained from the authorities of the State, but the barometer which it had been hoped might have been procured was found to be unfit for service. At Houlton two tents and a number of knapsacks, with some gunpowder, were furnished by the politeness of General Eustis from the Government stores.

The boats and all the stores reached Woodstock on the 3d September, and all the party were collected except one engineer, who had been left behind at Bangor in the hopes of obtaining another barometer. A bateau was therefore left to bring him on. The remainder of the boats were loaded, and the party embarked on the St. John on the morning of the 4th of September. This, the main body, reached the Grand Falls at noon on the 8th of September. The remaining bateau, with the engineer, arrived the next evening, having ascended the rapids of the St. John in a time short beyond precedent. On its arrival it was found that the barometer, on whose receipt reliance had been placed, had not been completed in time, and although, as was learnt afterwards, it had been committed as soon as finished by the maker to the care of Major Graham, the other commissioners felt compelled to set out before he had joined them. The want of this barometer, in which defects observed in the others had been remedied, was of no little detriment.

A delay of eighteen days had occurred in Portland in consequence of the refusal of Messrs. Cleaveland and Jarvis to accept their appointments, and it was known from

the experience of the commissioners sent out in 1838 by the State of Maine that it would require at least three weeks to reach the line claimed by the United States from Bangor. It was therefore imperative to push forward, unless the risk of having the whole of the operations of this party paralyzed by the setting in of winter was to be encountered. It was also ascertained at the Grand Falls that the streams which were to be ascended were always shallow and rapid, and that at the moment they were extremely low, so that the boats would not carry more stores than would be consumed within the time required to reach the region assigned to Professor Renwick as his share of the duty and return. It became, therefore, necessary, as it had been before feared it must, to be content with an exploration instead of a close and accurate survey. Several of the men employed had been at the northern extremity of the meridian line, but their knowledge was limited to that single object. Inquiry was carefully made for guides through the country between the sources of the Grande Fourche of Restigouche and of Tuladi, but none were to be found. One Indian only had passed from the head of Green River to the Grande Fourche, but his knowledge was limited to a single path, in a direction not likely to shed any light on the object of the commission. He was, however, engaged. The French hunters of Madawaska had never penetrated beyond the sources of Green River, and the Indians who formerly resided on the upper waters of the St. John were said to have abandoned the country for more than twelve years.

The party was now divided into four detachments, the first to proceed down the Restigouche to the tide of the Bay of Chaleurs, the second to ascend the Grande Fourche of Restigouche to its source, the third to be stationed on Green River Mountain, the fourth to convey the surplus stores and heavy baggage to Lake Temiscouata and thence to ascend the Tuladi and Abagusquash to the highest accessible point of the latter. It was resolved that the second and fourth detachments should endeavor to cross the country and meet each other, following as far as possible the height of land. A general rendezvous was again fixed at Lake Temiscouata.

In compliance with this plan, the first and second detachments ascended the Grande River together, crossed the Wagansis portage, and reached the confluence of the Grande Fourche and southwest branch of Restigouche.

The first detachment then descended the united stream, returned by the same course to the St. John, and reached the portage at Temiscouata on the 7th October. All the intended objects of the detachment were happily accomplished.

The second detachment, under the personal direction of the commissioner, reached the junction of the north and south branches of the Grande Fourche on the 22d September. Two engineers, with two men to carry provisions, were then dispatched to cross the country to the meridian line, and thence to proceed westward to join the detachment at Kedgwick Lake. This duty was performed and many valuable observations obtained, but an accident, by which the barometer was broken, prevented all the anticipated objects of the mission from being accomplished.

All the stores which could possibly be spared were now placed in a depot at the junction of the south branch, and the commissioner proceeded with the boats thus lightened toward Kedgwick Lake. The lightening of the boats was rendered necessary in consequence of the diminution of the volume of the river and the occurrence of falls, over which it would have been impossible to convey them when fully loaded. For want of a guide, a branch more western than that which issues from the lake was entered. One of the boats was therefore sent round into the lake to await the return of the engineers dispatched to the meridian line. The stores, which were all that could be brought up in the state of the waters, were now found to be wholly insufficient to allow of committing the party to the unexplored country between this stream and Tuladi. Even the four days which must intervene before the return of the engineers could be expected would do much to exhaust them. The commissioner therefore resolved to proceed across the country, with no other companion

than two men, carrying ten days' provisions. It was hoped that four or five days might suffice for the purpose, but ten of great toil and difficulty were spent before Lake Tuladi was reached. The remainder of the detachment, united by the return of the engineers, descended the north branch of the Grande Fourche to the junction of the south branch, ascended the latter, and made the portage to Green River. In this the boats were completely worn out, and the last of their food exhausted just at the moment that supplies sent up the Green River to meet them arrived at their camp.

No arrangement which could have been made would have sufficed to prevent the risk of famine which was thus encountered by the second detachment. A greater number of boats would have required more men, and these would have eaten all they could have carried. No other actual suffering but great fatigue and anxiety were encountered; and it is now obvious that had the rains which were so abundant during the first week of October been snow (as they sometimes are in that climate) there would have been a risk of the detachment perishing.

The third detachment reached their station on Green River Mountain on the 13th September and continued there until the 12th October. A full set of barometric observations was made, the latitude well determined by numerous altitudes, and the longitude approximately by some lunar observations.

The fourth detachment, after depositing the stores intended for the return of the party in charge of the British commissary at Fort Ingall, who politely undertook the care of them, ascended the Tuladi, and taking its northern branch reached Lake Abagusquash. Here one of the engineers wounded himself severely and was rendered unfit for duty. The commissary then proceeded a journey of five days toward the east, blazing a path and making signals to guide the second detachment.

The difference between the country as it actually exists and as represented on any maps prevented the commissioner from meeting this party. It found the source of the central or main branch of Tuladi to the north of that of the Abagusquash, and following the height of land reached the deep and narrow valley of the Rimonski at the point where, on the British maps, that stream is represented as issuing from a ridge of mountains far north of the line offered to the King of the Netherlands as the bounds of the American claim. The commissary therefore found it impossible to ascend Rimouski to its source, and crossing its valley found himself again on a dividing ridge, where he soon struck a stream running to the southeast. This, from a comparison of courses and distances, is believed to be the source of the main branch of the Grande Fourche of Ristaymoli; and thus the second and fourth detachments had reached points within a very short distance of each other. The greater breadth of the dividing ridge has thus been explored, but it will remain to trace the limits of the valley of the Rimouski, which will form a deep indenture in the boundary line. This line having been explored, a party was formed, after the assemblage of the several divisions at Temiscouata, for the purpose of leveling it with the barometer; but the expedition was frustrated by a heavy snowstorm, which set in on the 12th October. This, the most important part of the whole northern line, therefore remains for future investigation. It can only be stated that strong grounds exist for the belief that its summits are not only higher than any point which has been measured, but that, although cut by the Rimouski, it exceeds in average elevation any part of the disputed territory.

The leveling of the Temiscouata portage appeared to be an object of great importance, not only on its own account, but as furnishing a base for future operations. As soon as a sufficient force had been assembled at Lake Temiscouata a party was therefore formed to survey the portage with a theodolite. Orders were also given by the commissioner that the first barometer which should be returned should be carried over the portage. It was believed that this double provision would have secured the examination of this point beyond the chance of failure. A snowstorm, however (the same which interrupted the last operation referred to), set in after the level had been run to the mountain of Biort, and one of the laboring men, worn out by his preceding fatigues, fell sick. The party being thus rendered insufficient, the engineer in command found himself compelled to return. The contemplated operation with the barometer was also frustrated, for on examination at Temiscouata it was found that all were unfit for further service. In order that the desired object might be accomplished, a new expedition was dispatched from New York on the 12th of November, furnished with four barometers. This party, by great exertions, reached St. André, on the St. Lawrence, on the eighth day and accomplished the object of its mission. The operation was rendered possible at this inclement season by its being confined to a beaten road and in the vicinity of human habitations.

The country which has been the object of this reconnoissance is, as may already be understood, of very difficult access from the settled parts of the State of Maine. It is also, at best, almost impenetrable except by the water courses. It furnishes no supplies except fish and small game, nor can these be obtained by a surveying party which can not be strong enough to allow for hunters and fishermen as a constituent part. The third detachment alone derived any important benefit from these sources. The best mode of supplying a party moving on the eastern section would be to draw provisions and stores from the St. Lawrence. It is, indeed, now obvious, although it is contrary to the belief of any of the persons professing to be acquainted with the subject, that had the commissioner proceeded from New York by the way of Montreal and Quebec he must have reached the district assigned to him a fortnight earlier and have accomplished twice as much work as his party was able to perform.

Although much remains to be done in this region, an extensive knowledge of a country hitherto unknown and unexplored has been obtained; and this not only sheds much light upon the boundary question in its present state, but will be of permanent service in case of a further *ex parte* examination, or of a joint commission being agreed upon by the Governments of Great Britain and the United States.

The season was too late for any efficient work, as the line to be explored was not reached before the 22d September. Not only were the rivers at their lowest ebb, but ice was met in the progress of the parties as early as the 12th September, and snow fell on the 21st and 22d September. The actual setting in of winter, which sometimes occurs in the first week of October, was therefore to be dreaded. From this time the country becomes unfit for traveling of any description until the streams are bound with solid ice and a crust formed on the snow of sufficient firmness to make it passable on snowshoes. The only road is that along the St. John River, and it would be almost impossible for a party distant more than 10 or 12 miles from that stream to extricate itself after the winter begins.

No duty could be well imagined more likely to be disagreeable than that assigned to Professor Renwick. The only feasible modes of approach lay for hundreds of miles through the acknowledged limits of the British territory, and the line he was directed to explore was included within the military post of that nation. It may be likened to the entry upon the land of a neighbor for the purpose of inquiring into his title. Under these circumstances of anticipated difficulty it becomes his duty, as well as his pleasure, to acknowledge the uniform attention and civilities he has experienced from all parties, whether in official or in private stations. All possibility of interruption by the local authorities was prevented by a proclamation of His Excellency Sir John Harvey, K. C. B., lieutenant-governor of the Province of New Brunswick, and the British warden, Colonel Maclauchlan, was personally instrumental in promoting the comforts of the commissioner and his assistants. Similar attentions were received from the officers of the garrison at Fort Ingall, and the commandant of the citadel of Quebec, and from His Excellency the Governor-General. Even the private persons whose property might be affected by the acknowledgment of the American claim exhibited a generous hospitality.

Messages and Papers of the Presidents

The party under the direction of Captain Talcott left the settlements on Halls Stream on the 6th of September. The main branch of this was followed to its source in a swamp, in which a branch of the St. Francis also had its origin. From this point the party followed the ridge dividing the Atlantic from the St. Lawrence waters until it was supposed that all the branches of Indian Stream had been headed. In this work the party was employed until the 14th September. It had now arrived at a point where the Magalloway River should be found to the left, according to the most authentic map of the country, especially that prepared by the New Hampshire commissioner appointed in 1836 to explore the boundary of that State, and accompanying that report.* The party accordingly bore well north to avoid being led from the true "height of land" by the dividing ridge between the Connecticut and Androscoggin rivers. After crossing several small streams, it came on the afternoon of the 15th to a rivulet about 12 feet wide running to the east, which was supposed to be the main Magalloway. The 16th was spent in exploring it to its source. The next day it was discovered that what had been taken for the Magalloway was a tributary of Salmon River, a large branch of the St. Francis, and consequently the party was considerably to the north of the boundary.

The supply of provisions did not allow the party to retrace its steps to the point where it had diverged from the true dividing ridge. The course was therefore changed until it bore a little south; but it was not until the 22d that the party found itself again on the dividing ridge, and then upon the waters of the Magalloway.

The party reached Arnold River, or Chaudiere, above Lake Megantic, on the 24th September. After having recruited and taken a fresh supply of provisions from the depot established there, the party was divided into two detachments. One returned westward to find the corner of the State of New Hampshire as marked by the commission in 1789 appointed to trace the boundary line.

It was there ascertained that the corner was on the true *dividing* ridge, and not from S to 10 miles south, as has been erroneously reported by the surveyor employed by the New Hampshire commissioners in 1836 and reiterated in several official papers. From the State corner the dividing ridge was followed to where it had been previously explored by the party. Thence a course was taken to the northeast so as to reach the head of Lake Megantic, and thence to Lake Magaumac, where on the Sth October the two detachments were again united. The detachment led by the assistant, Mr. Cutts, had successfully followed the dividing ridge from the camp of the 24th on Arn 3d River to this place.

It was now ascertained that the provisions remaining were not sufficient to subsist all of the company until the Kennebee road could be reached by following the *height of land*. It was thought advisable again to separate into two detachments—one to follow the ridge, supplied with provisions for twenty days, and the other to strike for the nearest settlement, which it was supposed could be reached in four or five days. This movement commenced on the 10th October, and the detachment, following the high land, reached the Kennebee road on the 23d, and on the following day provisions for the party for fifteen days were placed there and a like quantity at the mouth of the Metjarmette. It was intended that the two detachments should move simultaneously from these two points on the 26th to explore the boundary line as far as Lake Etchemin. A deep snow, which commenced falling on the night of the 25th, compelled the commissioner to abandon further explorations at that time; and there was not the slightest probability that they could be resumed before another year.

The result of these explorations may be stated as follows:

About 160 miles of country along or near the "*height of land*" have been traversed the traveled distances carefully estimated, and the courses measured with a compass. Barometrical observations were made as often as necessary for giving a profile of the

* Also see report No. 176. House of Representatives, Twenty-fifth Congress, third session.

1851

route from the head of Halls Stream to Arnold or the Chaudiere River, and thence to Lake Magaumac via the corner of the State of New Hampshire. Some further barometrical observations were made between the lake and the Kennebec road, but for a portion of that distance the barometer was unserviceable in consequence of air having entered the tube. Astronomical observations were made as often as there was an opportunity, but, owing to the prevalence of elouds, not as often as was desirable. They will serve for correcting the courses and estimated distances traveled. Barometrical observations for comparison were made at the intersection of the Kennebec road and height of land hourly from 7 a. m. to 5 p. m. while the parties were on the dividing ridge.

The only discovery of interest made by this party is that the Magalloway River does not head any of the branches of the Connecticut, as it was generally believed it did, and consequently our claim to Halls Stream is deprived of the support it would have had from the fact that *all* the other branches were headed by an Atlantic river, and consequently could not be reached by the line along the height of land from the northwest angle of Nova Scotia.

The other commissioner (Major Graham) did not receive his appointment until 16th August to fill the place left vacant by the nonacceptance of Professor Cleaveland, and to him was assigned the survey and examination of the due north line, commencing at the source of the river St. Croix and extending to the highlands which divide the waters that flow into the river St. Lawrence from those which flow into the Atlantic Ocean.

Immediately after receiving his appointment he took the necessary steps for organizing his party, and in addition to two officers of the Corps of Topographical Engineers, assigned to him by the commandant of the Corps for this service, he called to his aid two civil engineers possessing the requisite qualifications for the duties to be performed. So soon as the requisite instruments could be procured and put in proper order he left New York for Portland, Me., where he arrived on the 5th of September, expecting there to join his colleagues of the commission. They had, however, proceeded to the points designated for the commencement of their respective duties, the season being too far advanced to justify their incurring any further delay.

At Portland a short conference was had with Mr. Stubbs, the agent of the State Department, who furnished the necessary means for procuring an outfit for the party in provisions, camp equipage, etc.

The party then proceeded to Bangor, where it was occupied until the 12th in procuring the necessary supplies of provisions, camp equipage, transportation, etc., to enable it to take the field; and a few astronomical observations were made here for the purpose of testing the rates of the chronometers which were to be used upon this service, as well as of obtaining additional data for computing the longitude of this place, which, together with the latitude, had been determined by the commissioner by a very near approximation in the summer of 1838, while occupied upon the military reconnoissances of the northeastern frontier.

On the 12th the party left Bangor for Houlton, where it arrived on the evening of the 13th. A depot of provisions was established here for supplying the line of their future operations, and the services of the requisite number of men as axmen, chain bearers, instrument carriers, etc., were engaged.

Pending these preparations and the time necessarily occupied in cutting a roadway through the forest from a convenient point on the Calais road to the monument at the source of the river St. Croix, a series of astronomical observations was made, both by day and by night, by which the latitude and longitude of Houlton were satisfactorily determined and the rates of the chronometers further tested.

By the 24th of September the roadway was sufficiently opened to permit a camp to be established upon the experimental line traced by the United States and British surveyors in the year 1817, when an attempt was made to mark this portion of the boundary between the two countries agreeably to the provisions of the treaty of Ghent of 1815.

The provisions and camp equipage were transported upon a strong but roughly constructed sled, drawn by horses, whilst the instruments were carried by hand, the surface of the country over which this roadway was opened being too rough for any wheeled vehicle to pass.

The point decided upon as the true source of the river St. Croix by the United States and British commissioners appointed for that purpose under the fifth article of the treaty of 1794 was found and identified, both by the inscriptions upon the monument erected there to mark the spot and also by the testimony of a living witness of high respectability, who has known the locality since it was first designated by the commissioners under the treaty of 1794.

The avenue which had been cleared through a dense forest from the monument to a distance of 12 miles north of it by the surveyors in 1817 was easily recognized by the new and thick growth of young timber, which, having a width of from 40 to 50 feet, now occupied it. Axmen were at once set at work to reopen this avenue, under the supposition that the due north line would at least fall within its borders for a distance of 12 miles. In the meantime the first astronomical station and camp were established, and the transit instrument set up at a distance of 4,578 feet north of the monument, upon an eminence 451/2 feet above the level of its base. This position commanded a distinct view of the monument to the south, and of the whole line to the north for a distance of 11 miles, reaching to Parks Hill. Whilst the work of clearing the line of its young growth of timber was progressing a series of astronomical observations was commenced at this first camp, and continued both day and night without intermission (except when interrupted by unfavorable weather), with the sextant, the repeating circle of reflection, and the transit instrument, until the latitude and longitude of the monument and of this first camp were satisfactorily ascertained, and also the direction of the true meridian from the said monument established. For this latter purpose several observations were in the first place made upon the polar star (α Ursæ Minoris) when at its greatest eastern diurnal elongation, and the direction thus obtained was afterwards verified and corrected by numerous transit observations upon stars passing the meridian at various altitudes both north and south of the zenith. These were multiplied with every degree of care, and with the aid of four excellent chronometers, whose rates were constantly tested, not only by the transit observations, but also by equal altitudes of the sun in the day, to correct the time at noon and midnight, and by observed altitudes of east and west stars for correcting the same at various hours of the night.

The direction of this meridian, as thus established by the commissioner, was found to vary from the experimental line traced by the surveyors of 1817 by running in the first place to the west of their line, then crossing it, and afterwards deviating considerably to the east of it.

At the second principal station erected by the party, distant 6 miles and 3,952 feet north of the first camp, or 7 miles and 3,240 feet north of the monument, it found itself 60 feet to the west of the line of 1817. This appeared to be the maximum deviation to the west of that line as near as its trace could be identified, which was only marked by permanent objects recognized by the party at the termination of each mile from the monument. Soon after passing this station the line of 1817 was crossed, and the party did not afterwards touch it, but deviated more and more to the east of it as it progressed north by an irregular proportion to the distance advanced.

In order to obtain a correct profile or vertical section along the whole extent of this meridian line, in the hopes of furnishing data for accurate comparisons of elevations so far as they might be considered relevant to the subject in dispute between the two Governments, and also to afford an accurate base of comparison for the barometers

along an extended line which must traverse many ridges that will be objects of minute exploration for many miles of lateral extent, an officer was detailed to trace a line of levels from the base of the monument marking the source of the river St. Croix to tide water at Calais, in Maine, by which means the elevation of the base of the monument above the planes of mean low and mean high water, and also the elevations of several intermediate points of the river St. Croix on its expanded lake surface, have been accurately ascertained.

Another officer was at the same time charged with tracing a line of levels from the base of the same monument along the due north line as marked by the commissioner by which it is intended that every undulation with the absolute heights above the plane of mean low water at Calais shall be shown along the whole extent of that line.

At Parks Hill, distant only 12 miles from the monument, a second station for astronomical observations was established, and a camp suitable for that purpose was formed. On the 26th day of October, whilst occupied in completing the prolongation of the meridian line to that point and in establishing a camp there, the party was visited by a snowstorm, which covered the ground to a depth of 4 inches in the course of six hours. This was succeeded by six days of dark, stormy weather, which entirely interrupted all progress, and terminated by a rain, with a change to a milder temperature, which cleared away the snow. During this untoward event the parties made themselves as comfortable as practicable in their tents, and were occupied in computing many of the astronomical and other observations previously made.

On the 2d of November the weather became clear, and the necessary astronomical observations were immediately commenced at Parks Hill. From this elevated point the first station could be distinctly seen by means of small heliotropes during the day and bright lights erected upon it at night. Its direction, with that of several intermediate stations due south of Parks Hill, was verified by a new series of transit observations upon high and low stars, both north and south of the zenith. By the same means the line was prolonged to the north.

In one week after commencing the observations at Parks Hill the weather became again unfavorable. The sky was so constantly overcast as to preclude all astronomical observations, and the atmosphere so thick as to prevent a view to the north which would permit new stations to be established with sufficient accuracy in that direction. Unwilling to quit the field while there was a prospect of the weather becoming sufficiently favorable to enable the party to reach the latitude of Mars Hill, or even proceed beyond it, it was determined that some of the party should continue in the tents, and there occupy themselves with such calculations as ought to be made before quitting the field. The officers charged with the line of levels and with the reconnoissances in advance for the selection of new positions for stations continued their labors in the field, notwithstanding they were frequently exposed to slight rain and snow storms, as these portions of the work could go on without a clear sky.

On the 13th of November a severe snowstorm occurred, which in a single night and a portion of the following morning covered the surface of the whole country and the roofs of the tents to a depth of 16 inches. The northern extremity of the avenue which had been cleared by the surveyors of 1817 was now reached, and, in addition to the young growth which had sprung up since that period upon the previous part of the line, several miles had been cleared through the dense forest of heavy timber in order to proceed with the line of levels, which had reached nearly to the Meduxnakeag. The depth of snow now upon the ground rendered it impracticable to continue the leveling with the requisite accuracy any further, and that part of the work was accordingly suspended for the season. The thermometer had long since assumed a range extending during the night and frequently during a great portion of the day to many degrees below the freezing point.

The highlands bordering on the Aroostook, distant 40 miles to the north of the

party, were distinctly seen from an elevated position whenever the atmosphere was clear, and a long extent of intermediate country of inferior elevation to the position then occupied presented itself to the view, with the two peaks of Mars Hill rising abruptly above the general surface which surrounded their base. The eastern extremity of the base of the easternmost peak was nearly 2 degrees of arc, or ninetenths of a mile in space, to the west of the line as it passed the same latitude.

To erect stations opposite to the base of Mars Hill and upon the heights of the Aroostook, in order to obtain exact comparisons with the old line at these points, were considered objects of so much importance as to determine the commissioner to continue the operations in the field to the latest practicable period in hopes of accomplishing these ends.

On the 18th day of November the party succeeded in erecting a station opposite Mars Hill and very near the meridian line. It was thus proved that the line would pass from nine-tenths of a mile to 1 mile east of the eastern extremity of the base of the northeast peak of Mars Hill.

On the 30th of November a series of signals was commenced to be interchauged at night between the position of the transit instrument on Parks Hill and the highlands of the Aroostook. These were continued at intervals whenever the weather was sufficiently clear until by successive approximations a station was on the 9th of December established on the heights I mile south of that river and on the meridian line. The point thus reached is more than 50 miles from the monument at the source of the St. Croix, as ascertained from the land surveys made under the authority of the States of Maine and Massachusetts. The measurements of the party could not be extended to this last point, owing to the depth of the snow which lay upon the ground since the middle of November, but the distance derived from the land surveys must be a very near approximation to the truth. A permanent station was erected at the position established on the Aroostook heights and a measurement made from it due west to the experimental or exploring line of 1817, by which the party found itself 2,400 feet to the east of that line.

Between the 1st and 15th of December the observations were carried on almost exclusively during the night, and frequently with the thermometer ranging from o to 10 and 12 degrees below that point by Fahrenheit's scale. Although frequently exposed to this temperature in the performance of their duties in the open air at night, and to within a few degrees of that temperature during the hours of sleep, with no other protection than the tents and camp beds commonly used in the Army, the whole party, both officers and men, enjoyed excellent health.

During the day the tents in which the astronomical computations were carried on were rendered quite comfortable by means of small stoves, but at night the fire would become extinguished and the temperature reduced to within a few degrees of that of the outward air. Within the observatory tent the comfort of a fire could not be indulged in, in consequence of the too great liability to produce serious errors of observation by the smoke passing the field of the telescope. The astronomical observations were therefore always made in the open air or in a tent open to the heavens at top during the hours of observation, and without a fire.

On the 16th of December the tents were struck and this party retired from the field for the season, there being then more than 2 feet of snow on the ground. To the unremitting zeal antidst severe exposures, and to the scientific and practical attainments of the officers, both civil and military, who served under the orders of the commissioner on this duty, he acknowledges himself in a great measure indebted for the progress that he was enabled to make, notwithstanding the many difficulties encountered.

Observations were made during portions of three lunations of the transit of the moon's bright limb and of such tabulated stars as differed but little in right ascension and declination from the moon, in order to obtain additional data to those

furnished by chronometrical comparisons with the meridian of Boston for computing the longitude of this meridian line.

At the first station, 4,578 feet north of the monument, and also at the Parks Hill station, the dip of the magnetic needle was ascertained by a series of observations—in the one case upon two and in the other upon three separate needles. The horizontal declination was also ascertained at both these stations by a full set of observations upon six different needles.

The details of these and of all the astronomical observations alluded to will be prepared as soon as practicable for the use of the commission, should they be required. To His Excellency Major-General Sir John Harvey, K. C. B., lieutenant-governor of the Province of New Brunswick, Major Graham acknowledges himself greatly indebted for having in the most obliging manner extended to him every facility within his power for prosecuting the examinations. From Mr. Connell, of Woodstock, a member of the colonial parliament, and from Lieutenant-Colonel Maclauchlan, the British land agent, very kind attentions were received.

Major Graham has also great pleasure in acknowledging his obligations to General Eustis, commandant of the Eastern Department; to Colonel Pierce, commanding the garrison at Houlton, and to his officers; and also to Major Ripley, of the Ordnance Department, commanding the arsenal at Augusta, for the prompt and obliging manner in which they supplied many articles useful to the prosecution of the labors of his party.

The transit instrument with which the meridian line was traced had been loaned to the commission by the Hon. William A. Duer, president of Columbia College, New York, and the commissioners feel bound to return their acknowledgments for the liberality with which the use of this astronomical instrument was granted at a time when it would have been difficult, and perhaps impossible, to have procured one as well suited to the object.

All which is respectfully submitted.

JAS. RENWICK, JAMES D. GRAHAM, A. TALCOTT, *Commissioners.*

WASHINGTON, February 12, 1841.

To the Senate of the United States:

I transmit a report of the Secretary of State, containing the information asked for by the resolution of the Senate of the 5th instant, relative to the negroes taken on board the schooner *Amistad*.

M. VAN BUREN.

1857

QUESTIONS.

- 1. How is the District of Columbia governed? Page 1611.
- 2. Under what circumstances and by what authority has the President called the State militia into service? Page 1618.
- 3. Can the United States Supreme or Circuit Courts compel the Government to perform specific acts? Page 1720.
- 4. How was the title to Indian lands in general acquired by the Government, and were the bargains considered fair? Pages 1716, 1718.
- 5. How can business depression be relieved by the action of the Government? Page 1708.
- 6. What did Van Buren recommend as to ordnance and ammunition factories? Page 1607.
- What was Van Buren's idea as to the necessity of a standing army? Page 1607.
- 8. What presents were declined by Van Buren? Page 1809.
- 9. What were Van Buren's views of the tariff? Page 1752.

SUGGESTIONS.

The revulsion on account of the forms of banking during Jackson's administration culminated in panicky conditions in Van Buren's administration, and called forth considerable criticism of the previous "Wild-Cat" methods. For Van Buren's discussion of finances, see pages 1541, 1596, 1686, 1706, 1751, 1757, 1789. 1822.

Van Buren's decisive views in favor of slavery are set forth. Pages 1530 to 1537.

Read Van Buren's Foreign Policy. Pages 1590, 1702, 1747, 1820.

NOTE.

For further suggestions on Van Buren's administration, see Van Buren, Martin, Encyclopedic Index.

By reading the Foreign Policy of each President, and by scanning the messages as to the state of the nation, a thorough knowledge of the history of the United States will be acquired from the most authentic sources; because, as has been said, "Each President reviews the past, depicts the present and forecasts the future of the nation."

William Henry Harrison March 4 to April 4, 1841

SEE ENCYCLOPEDIC INDEX.

The Encyclopedic Index is not only an index to the other volumes, not only a key that unlocks the treasures of the entire publication, but it is in itself an alphabetically arranged brief history or story of the great controlling events constituting the History of the United States.

Under its proper alphabetical classification the story is told of every great subject referred to by any of the Presidents in their official Messages, and at the end of each article the official utterances of the Presidents themselves are cited upon the subject, so that you may readily turn to the page in the body of the work itself for this original information.

Next to the possession of knowledge is the ability to turn at will to where knowledge is to be found.

HOME AT NORTH BEND, OHIO, OF WILLIAM HENRY HARRISON With reproduction of official portrait, by Andrews, from the White House Collection

W. H. Harrifon

HARRISON

William Henry Harrison as President was a distinctive character. In personality he probably never had, and it is doubtful if he ever will have, an imitator or an equal. The country looked upon him at the time not alone as a great pioneer and warrior, but as a great and good man, who came very close to the people. The people selected him for the highest office within their gift, not only on account of that which he had accomplished in blazing the way to civilization and taming the savages in the Central West, or because he had assisted in repelling British intrusion, but because they regarded him as the personification of honor and as possessing the material for a great statesman. It has often been recorded in history and it is a common expression today that "William Henry Harrison was killed by office-seekers." A man who would place himself so near the people as to permit office-seekers to send him to an untimely grave must have had in a very marked degree the milk of human kindness, and a fountain of gratitude and personal affection, which should win admiration.

It was the elevation of such a man to the Presidential chair, after a campaign so characteristic as to leave its imprint upon time, that made the administration of William Henry Harrison notable.

Probably no man has ever occupied the Executive Mansion whose name was so universally perpetuated by namesakes, with the possible exception of George Washington. The children who were named after William Henry Harrison, if they could be lined up today, would make an army almost sufficient to have conducted successfully the war against Spain, or to fill all of the Federal offices of the country today.

I find that the state papers of President William Henry Harrison are confined to his inaugural address and a proclamation convening Congress to meet in extraordinary session on May 31, 1841. On the fourth of the following April he died. In his inaugural address he manifests an intense desire to conscientiously fulfill the duties of his high office. He proceeds to declare his intention of fulfilling all the pledges he had made and concludes his address with this somewhat pathetic sentence:

"Fellow citizens, being fully vested with that high office to which the partiality of my countrymen has called me, I now take an affectionate leave of you."

The above utterance seemed to be prophetic, in that it was his leavetaking, for he never again appeared in public.

As a warrior among Indians, William Henry Harrison has been placed upon the scroll of fame with Daniel Boone and Kenton. As an army officer, a trained soldier and tactician upon the field, history places him with Washington, whose unlimited confidence he possessed. As a patriot, William Henry Harrison will always be remembered. No one who has achieved the high office he held will probably ever have a greater degree of confidence or affection of the people. It is lamentable that the expectations of the country were so rudely dashed by his untimely death, as much was expected of, and no doubt much would have been realized by his administration.

At the time of the Harrison-Van Buren campaign political cartoons were just coming into general use in this country. Gen. William Henry Harrison, who had some time before retired to private life, was then living upon his farm at North Bend, Ohio, between Cincinnati and the Indiana line. In one of these campaign hand bills are pictures of various scenes upon the farm including the Log Cabin and the famous Cider Press, while the General himself is represented in his shirt sleeves, ploughing. He was called "The Cincinnatus of the West," and this epithet proved of advantage in the campaign.

He was living in the famous cabin at North Bend, and devoting himself to agriculture with the same energy and enthusiasm which he had displayed in the affairs of War and of State. Here he remained until called upon by his friends to become a candidate for the Presidency of the United States. He had married a daughter of John Cleves Symmes, the founder of Cincinnati, Ohio. He was in sympathy wholly with the Western pioneers, among whom he had lived so long.

His term as President lasted but thirty days, and his death was felt as a severe blow by his party, which had formed high expectations of his capacity in executive matters. Notwithstanding his notable career as a General and statesman, William Henry Harrison is likely to be remembered as the highest type of the pioneers, who succeeded the frontiersmen Kenton and Boone. His service to the great empire, which has since been divided into the States of Ohio, Indiana, Illinois and Michigan, will cause him to be affectionately remembered by thousands who barely know the names of other Presidents.

Com S. Heath.

ANNA SYMMES HARRISON

ANNA SYMMES was born near Morristown, N. L, and early in life was left motherless. Her father, disguised as a British officer, successfully carried her to her grandparents on Long Island, where she remained until the evacuation of New York. Trained in godliness, her whole life echoed her early teachings. When nearly twenty she married Captain, later General, and afterwards President Harrison. While he was Governor of the Indiana Territory she dispensed liberal hospitality, being greatly loved and admired, and here in her home in the old French Town of Vincennes many happy years were spent. Her husband being much away, she reared almost alone her ten children, afterwards seeing one infant, three grown daughters, four sons and ten grandchildren die during thirty years at North Bend. The thought of removing to Washington was distasteful to her, but as the President died one month after his inauguration, the removal became unnecessary.

William Henry Harrison

WILLIAM HENRY HARRISON, third and youngest son of Benjamin Harrison, one of the signers of the Declaration of Independence, was born at Berkeley, Charles City County, Va., February 9, 1773. Was educated at Hampden Sidney College, Virginia, and began the study of medicine, but before he had finished it accounts of Indian outrages on the western frontier led him to enter the Army, and he was commissioned an ensign in the First Infantry on August 16, 1791; joined his regiment at Fort Washington, Ohio. Was appointed lieutenant June 2, 1792, and afterwards joined the Army under General Anthony Wayne, and was made aid-de-camp to the commanding officer. For his services in the expedition, in December, 1793, that erected Fort Recovery he was thanked by name in general orders. Participated in the engagements with the Indians that began on June 30, 1794, and was complimented by General Wayne for gallantry in the victory on the Miami on August 20. On May 15, 1797, was made captain and given the command of Fort Washington. While there he married Anna, daughter of John Cleves Resigned his commission on June 1, 1798, peace having been Symmes. made with the Indians, and was immediately appointed by President John Adams secretary of the Northwest Territory, but in October, 1799, resigned to take his seat as Territorial Delegate in Congress. During his term part of the Northwest Territory was formed into the Territory of Indiana, including the present States of Indiana, Illinois, Michigan, and Wisconsin, and he was appointed its governor and superintendent of Indian affairs, which he accepted, and resigned his seat in Congress. Was reappointed successively by Presidents Jefferson and Madison. He organized the legislature at Vincennes in 1805. Held frequent councils with the Indians, and succeeded in averting many outbreaks. On September 30, 1809, concluded a treaty with several tribes by which they sold to the United States about 3,000,000 acres of land on the Wabash and White rivers. This and former treaties were condemned by Tecumseh and other chiefs, and an outbreak became imminent, which was averted by the conciliatory course of the governor. In the spring of 1811 Indian depredations became frequent, and Governor Harrison

1858

recommended the establishment of a military post at Tippecanoe, and the Government consented. On September 26 Harrison marched from Vincennes with about 900 men, including 350 regular infantry, completed Fort Harrison, near the site of Terre Haute, Ind., on October 28, and leaving a garrison there pressed on toward Tippecanoe. On November 6, when near that town, was met by messengers demanding a parley, and a council was proposed for the next day. At 4 o'clock the following morning a fierce attack was made by the savages; at daybreak the Indians were driven from the field. For this victory he was highly complimented by President Madison in his message of December 18, 1811, and was also thanked by the legislatures of Kentucky and Indiana. On August 25, 1812, soon after war was declared against Great Britain, was commissioned major-general of the militia of Kentucky, though not a citizen of that State. On August 22, 1812, was commissioned a brigadier-general in the Regular Army, and later was appointed to the chief command of the Northwestern army, with instructions to act in all cases according to his own discretion and judgment. No latitude as great as this had been given to any commander since Washington. On March 2, 1813, was commissioned a major-general. Was in command of Fort Meigs when General Proctor, with a force of British troops and Indians, laid unsuccessful siege to it from April 28 to May 9, 1813. Transporting his army to Canada, he fought the battle of the Thames on October 5, defeating General Proctor's army of 800 regulars and 1,200 Indians, the latter led by the celebrated Tecumseh, who was killed. This battle, together with Perry's victory on Lake Erie, gave the United States possession of the chain of lakes above Erie and put an end to the war in uppermost Canada. For this victory he was praised by President Madison in his annual message to Congress and by the legislatures of the different States. Through a misunderstanding with General John Armstrong, Secretary of War, he resigned his commission in the Army May 31, 1814. In 1814, and again in 1815, he was appointed on commissions that concluded Indian treaties, and in 1816 was chosen to Congress to fill a vacancy, serving till 1819. On March 30, 1818, Congress unanimously voted him a gold medal for his victory of the Thames. In 1819 he was chosen to the senate of Oliio, and in 1822 was an unsuccessful candidate for Congress. In 1824 was a Presidential elector, voting for Henry Clay, and in the same year was sent to the United States Senate, and succeeded Andrew Jackson as chairman of the Committee on Military Affairs. He resigned in 1828, having been appointed by President John Quincy Adams minister to the United States of Colombia. He was recalled at the outset of Jackson's Administration, and retired to his farm at North Bend, near Cincinnati, Ohio. In 1835 was nominated for the Presidency by Whig State conventions in Pennsylvania, New York, Ohio, and other States, but at the election on November 8, 1836, was defeated by Martin Van Buren, receiving

only 73 electoral votes to the latter's 170. December 4, 1839, he was nominated for the Presidency by the national Whig convention at Harrisburg, Pa., and was elected on November 10, 1840, receiving 234 electoral votes to Van Buren's 60. Was inaugurated March 4, 1841. Called Congress to meet in extra session on May 31. He died on Sunday morning, April 4, 1841. His body was interred in the Congressional Cemetery at Washington, but in June, 1841, it was removed to North Bend and placed in a tomb overlooking the Ohio River.

INAUGURAL ADDRESS.

Called from a retirement which I had supposed was to continue for the residue of my life to fill the chief executive office of this great and free nation, I appear before you, fellow-citizens, to take the oaths which the Constitution prescribes as a necessary qualification for the performance of its duties; and in obedience to a custom coeval with our Government and what I believe to be your expectations I proceed to present to you a summary of the principles which will govern me in the discharge of the duties which I shall be called upon to perform.

It was the remark of a Roman consul in an early period of that celebrated Republic that a most striking contrast was observable in the conduct of candidates for offices of power and trust before and after obtaining them, they seldom carrying out in the latter case the pledges and promises made in the former. However much the world may have improved in many respects in the lapse of upward of two thousand years since the remark was made by the virtuous and indignant Roman, I fear that a strict examination of the annals of some of the modern elective governments would develop similar instances of violated confidence.

Although the fiat of the people has gone forth proclaiming me the Chief Magistrate of this glorious Union, nothing upon their part remaining to be done, it may be thought that a motive may exist to keep up the delusion under which they may be supposed to have acted in relation to my principles and opinions; and perhaps there may be some in this assembly who have come here either prepared to condemn those I shall now deliver, or, approving them, to doubt the sincerity with which they are now uttered. But the lapse of a few months will confirm or dispel their fears. The outline of principles to govern and measures to be adopted by an Administration not yet begun will soon be exchanged for immutable history, and I shall stand either exonerated by my countrymen or classed with the intention to betray. However strong may be my present purpose to realize the expectations of a magnanimous and confiding people, I too well understand the dangerous temptations to which I shall be exposed from the magnitude of the power which it has been the pleasure of the people to commit to my hands not to place my chief confidence upon the aid of that Almighty Power which has hitherto protected me and enabled me to bring to favorable issues other important but still greatly inferior trusts heretofore confided to me by my country.

The broad foundation upon which our Constitution rests being the people—a breath of theirs having made, as a breath can unmake, change, or modify it-it can be assigned to none of the great divisions of government but to that of democracy. If such is its theory, those who are called upon to administer it must recognize as its leading principle the duty of shaping their measures so as to produce the greatest good to the greatest number. But with these broad admissions, if we would compare the sovereignty acknowledged to exist in the mass of our people with the power claimed by other sovereignties, even by those which have been considered most purely democratic, we shall find a most essential difference. All others lay claim to power limited only by their own will. The majority of our citizens, on the contrary, possess a sovereignty with an amount of power precisely equal to that which has been granted to them by the parties to the national compact, and nothing beyond. We admit of no government by divine right, believing that so far as power is concerned the Beneficent Creator has made no distinction amongst men; that all are upon an equality, and that the only legitimate right to govern is an express grant of power from the governed. The Constitution of the United States is the instrument containing this grant of power to the several departments composing the Government. On an examination of that instrument it will be found to contain declarations of power granted and of power withheld. The latter is also susceptible of division into power which the majority had the right to grant, but which they did not think proper to intrust to their agents, and that which they could not have granted, not being possessed by themselves. In other words, there are certain rights possessed by each individual American citizen which in his compact with the others he has never surrendered. Some of them, indeed, he is unable to surrender, being, in the language of our system, unalienable. The boasted privilege of a Roman citizen was to him a shield only against a petty provincial ruler, whilst the proud democrat of Athens would console himself under a sentence of death for a supposed violation of the national faith-which no one understood and which at times was the subject of the mockery of all-or the banishment from his home, his family, and his country with or without an alleged cause, that it was the act not of a single tyrant or hated aristocracy, but of his assembled countrymen. Far different is the power of our sovereignty. It can interfere with no one's faith, prescribe forms of worship for no one's observance, inflict no punishment but after well-ascertained

William Henry Harrison

guilt, the result of investigation under rules prescribed by the Constitution itself. These precious privileges, and those scarcely less important of giving expression to his thoughts and opinions, either by writing or speaking, unrestrained but by the liability for injury to others, and that of a full participation in all the advantages which flow from the Government, the acknowledged property of all, the American citizen derives from no charter granted by his fellow-man. He claims them because he is himself a man, fashioned by the same Almighty hand as the rest of his species and entitled to a full share of the blessings with which He has endowed them. Notwithstanding the limited sovereignty possessed by the people of the United States and the restricted grant of power to the Government which they have adopted, enough has been given to accomplish all the objects for which it was created. It has been found powerful in war, and hitherto justice has been administered, an intimate union effected, domestic tranquillity preserved, and personal liberty secured to the citizen. As was to be expected, however, from the defect of language and the necessarily sententious manner in which the Constitution is written, disputes have arisen as to the amount of power which it has actually granted or was intended to grant.

This is more particularly the case in relation to that part of the instrument which treats of the legislative branch, and not only as regards the exercise of powers claimed under a general clause giving that body the authority to pass all laws necessary to carry into effect the specified powers, but in relation to the latter also. It is, however, consolatory to reflect that most of the instances of alleged departure from the letter or spirit of the Constitution have ultimately received the sanction of a majority of the people. And the fact that many of our statesmen most distinguished for talent and patriotism have been at one time or other of their political career on both sides of each of the most warmly disputed questions forces upon us the inference that the errors, if errors there were, are attributable to the intrinsic difficulty in many instances of ascertaining the intentions of the framers of the Constitution rather than the influence of any sinister or unpatriotic motive. But the great danger to our institutions does not appear to me to be in a usurpation by the Government of power not granted by the people, but by the accumulation in one of the departments of that which was assigned to others. Limited as are the powers which have been granted, still enough have been granted to constitute a despotism if concentrated in one of the departments. This danger is greatly heightened, as it has been always observable that men are less jealous of encroachments of one department upon another than upon their own reserved rights. When the Constitution of the United States first came from the hands of the Convention which formed it, many of the sternest republicans of the day were alarmed at the extent of the power which had been granted to the Federal Government, and more particularly of that portion which

had been assigned to the executive branch. There were in it features which appeared not to be in harmony with their ideas of a simple representative democracy or republic, and knowing the tendency of power to increase itself, particularly when exercised by a single individual, predictions were made that at no very remote period the Government would terminate in virtual monarchy. It would not become me to say that the fears of these patriots have been already realized; but as I sincerely believe that the tendency of measures and of men's opinions for some years past has been in that direction, it is, I conceive, strictly proper that I should take this occasion to repeat the assurances I have heretofore given of my determination to arrest the progress of that tendency if it really exists and restore the Government to its pristine health and vigor, as far as this can be effected by any legitimate exercise of the power placed in my hands.

I proceed to state in as summary a manner as I can my opinion of the sources of the evils which have been so extensively complained of and the correctives which may be applied. Some of the former are unquestionably to be found in the defects of the Constitution; others, in my judgment, are attributable to a misconstruction of some of its provisions. Of the former is the eligibility of the same individual to a second term of the Presidency. The sagacious mind of Mr. Jefferson early saw and lamented this error, and attempts have been made, hitherto without success, to apply the amendatory power of the States to its correction. As, however, one mode of correction is in the power of every President, and consequently in mine, it would be useless, and perhaps invidious, to enumerate the evils of which, in the opinion of many of our fellowcitizens, this error of the sages who framed the Constitution may have been the source and the bitter fruits which we are still to gather from it if it continues to disfigure our system. It may be observed, however, as a general remark, that republics can commit no greater error than to adopt or continue any feature in their systems of government which may be calculated to create or increase the love of power in the bosoms of those to whom necessity obliges them to commit the management of their affairs; and surely nothing is more likely to produce such a state of mind than the long continuance of an office of high trust. Nothing can be more corrupting, nothing more destructive of all those noble feelings which belong to the character of a devoted republican patriot. When this corrupting passion once takes possession of the human mind, like the love of gold it becomes insatiable. It is the never-dying worm in his bosom, grows with his growth and strengthens with the declining years of its victim. If this is true, it is the part of wisdom for a republic to limit the service of that officer at least to whom she has intrusted the management of her foreign relations, the execution of her laws, and the command of her armies and navies to a period so short as to prevent his forgetting that he is the accountable agent, not the principal; the servant, not the

master. Until an amendment of the Constitution can be effected public opinion may secure the desired object. I give my aid to it by renewing the pledge heretofore given that under no circumstances will I consent to serve a second term.

But if there is danger to public liberty from the acknowledged defects of the Constitution in the want of limit to the continuance of the Executive power in the same hands, there is, I apprehend, not much less from a misconstruction of that instrument as it regards the powers actually given. I can not conceive that by a fair construction any or either of its provisions would be found to constitute the President a part of the legislative power. It can not be claimed from the power to recommend, since, although enjoined as a duty upon him, it is a privilege which he holds in common with every other citizen; and although there may be something more of confidence in the propriety of the measures recommended in the one case than in the other, in the obligations of ultimate decision there can be no difference. In the language of the Constitution, "all the legislative powers" which it grants "are vested in the Congress of the United States." It would be a solecism in language to say that any portion of these is not included in the whole.

It may be said, indeed, that the Constitution has given to the Executive the power to annul the acts of the legislative body by refusing to them his assent. So a similar power has necessarily resulted from that instrument to the judiciary, and yet the judiciary forms no part of the Legislature. There is, it is true, this difference between these grants of power: The Executive can put his negative upon the acts of the Legislature for other cause than that of want of conformity to the Constitution, whilst the judiciary can only declare void those which violate that instrument. But the decision of the judiciary is final in such a case, whereas in every instance where the veto of the Executive is applied it may be overcome by a vote of two-thirds of both Houses of Congress. The negative upon the acts of the legislative by the executive authority, and that in the hands of one individual, would seem to be an incongruity in our system. Like some others of a similar character, however, it appears to be highly expedient, and if used only with the forbearance and in the spirit which was intended by its authors it may be productive of great good and be found one of the best safeguards to the Union. At the period of the formation of the Constitution the principle does not appear to have enjoyed much favor in the State governments. It existed but in two, and in one of these there was a plural executive. If we would search for the motives which operated upon the purely patriotic and enlightened assembly which framed the Constitution for the adoption of a provision so apparently repugnant to the leading democratic principle that the majority should govern, we must reject the idea that they anticipated from it any benefit to the ordinary course of legislation. They knew too well the high degree of intelligence which existed among

the people and the enlightened character of the State legislatures not to have the fullest confidence that the two bodies elected by them would be worthy representatives of such constituents, and, of course, that they would require no aid in conceiving and maturing the measures which the circumstances of the country might require. And it is preposterous to suppose that a thought could for a moment have been entertained that the President, placed at the capital, in the center of the country, could better understand the wants and wishes of the people than their own immediate representatives, who spend a part of every year among them, living with them, often laboring with them, and bound to them by the triple tie of interest, duty, and affection. To assist or control Congress, then, in its ordinary legislation could not, I conceive, have been the motive for conferring the veto power on the President. This argument acquires additional force from the fact of its never having been thus used by the first six Presidents-and two of them were members of the Convention, one presiding over its deliberations and the other bearing a larger share in consummating the labors of that august body than any other person. But if bills were never returned to Congress by either of the Presidents above referred to upon the ground of their being inexpedient or not as well adapted as they might be to the wants of the people, the veto was applied upon that of want of conformity to the Constitution or because errors had been committed from a too hasty enactment.

There is another ground for the adoption of the veto principle, which had probably more influence in recommending it to the Convention than any other. I refer to the security which it gives to the just and equitable action of the Legislature upon all parts of the Union. It could not but have occurred to the Convention that in a country so extensive, embracing so great a variety of soil and climate, and consequently of products, and which from the same causes must ever exhibit a great difference in the amount of the population of its various sections, calling for a great diversity in the employments of the people, that the legislation of the majority might not always justly regard the rights and interests of the minority, and that acts of this character might be passed under an express grant by the words of the Constitution, and therefore not within the competency of the judiciary to declare void; that however enlightened and patriotic they might suppose from past experience the members of Congress might be, and however largely partaking, in the general, of the liberal feelings of the people, it was impossible to expect that bodies so constituted should not sometimes be controlled by local interests and sectional feelings. It was proper, therefore, to provide some umpire from whose situation and mode of appointment more independence and freedom from such influences might be expected. Such a one was afforded by the executive department constituted by the Constitution. A person elected to that high office, having his constituents in every section, State, and subdivision of the Union, must consider himself bound by

the most solemn sanctions to guard, protect, and defend the rights of all and of every portion, great or small, from the injustice and oppression of the rest. I consider the veto power, therefore, given by the Constitution to the Executive of the United States solely as a conservative power, to be used only first, to protect the Constitution from violation; secondly, the people from the effects of hasty legislation where their will has been probably disregarded or not well understood, and, thirdly, to prevent the effects of combinations violative of the rights of minorities. In reference to the second or these objects I may observe that I consider it the right and privilege of the people to decide disputed points of the Constitution arising from the general grant of power to Congress to carry into effect the powers expressly given; and I believe with Mr. Madison that "repeated recognitions under varied circumstances in acts of the legislative, executive, and judicial branches of the Government, accompanied by indications in different modes of the concurrence of the general will of the nation," as affording to the President sufficient authority for his considering such disputed points as settled.

Upward of half a century has elapsed since the adoption of the present form of government. It would be an object more highly desirable than the gratification of the curiosity of speculative statesmen if its precise situation could be ascertained, a fair exhibit made of the operations of each of its departments, of the powers which they respectively claim and exercise, of the collisions which have occurred between them or between the whole Government and those of the States or either of them. We could then compare our actual condition after fifty years' trial of our system with what it was in the commencement of its operations and ascertain whether the predictions of the patriots who opposed its adoption or the confident hopes of its advocates have been best realized. The great dread of the former seems to have been that the reserved powers of the States would be absorbed by those of the Federal Government and a consolidated power established, leaving to the States the shadow only of that independent action for which they had so zealously contended and on the preservation of which they relied as the last hope of liberty. Without denying that the result to which they looked with so much appreliension is in the way of being realized, it is obvious that they did not clearly see the mode of its accomplishment. The General Government has seized upon none of the reserved rights of the States. As far as any open warfare may have gone, the State authorities have amply maintained their rights. To a casual observer our system presents no appearance of discord between the different members which compose it. Even the addition of many new ones has produced no jarring. They move in their respective orbits in perfect harmony with the central head and with each other. But there is still an undercurrent at work by which, if not seasonably checked, the worst apprehensions of our antifederal patriots will be realized, and not only will the State authorities

be overshadowed by the great increase of power in the executive department of the General Government, but the character of that Government, if not its designation, be essentially and radically changed. This state of things has been in part effected by causes inherent in the Constitution and in part by the never-failing tendency of political power to increase itself. By making the President the sole distributer of all the patronage of the Government the framers of the Constitution do not appear to have anticipated at how short a period it would become a formidable instrument to control the free operations of the State governments. Of trifling importance at first, it had early in Mr. Jefferson's Administration become so powerful as to create great alarm in the mind of that patriot from the potent influence it might exert in controlling the freedom of the elective franchise. If such could have then been the effects of its influence, how much greater must be the danger at this time, quadrupled in amount as it certainly is and more completely under the control of the Executive will than their construction of their powers allowed or the forbearing characters of all the early Presidents permitted them to make. But it is not by the extent of its patronage alone that the executive department has become dangerous, but by the use which it appears may be made of the appointing power to bring under its control the whole revenues of the country. The Constitution has declared it to be the duty of the President to see that the laws are executed, and it makes him the Commander in Chief of the Armies and Navy of the United States. If the opinion of the most approved writers upon that species of mixed government which in modern Europe is termed monarchy in contradistinction to despotism is correct, there was wanting no other addition to the powers of our Chief Magistrate to stamp a monarchical character on our Government but the control of the public finances; and to me it appears strange indeed that anyone should doubt that the entire control which the President possesses over the officers who have the custody of the public money, by the power of removal with or without cause, does, for all mischievous purposes at least, virtually subject the treasure also to his disposal. The first Roman Emperor, in his attempt to seize the sacred treasure, silenced the opposition of the officer to whose charge it had been committed by a significant allusion to his sword. By a selection of political instruments for the care of the public money a reference to their commissions by a President would be quite as effectual an argument as that of Cæsar to the Roman knight. I am not insensible of the great difficulty that exists in drawing a proper plan for the safe-keeping and disbursement of the public revenues, and I know the importance which has been attached by men of great abilities and patriotism to the divorce, as it is called, of the Treasury from the banking institutions. It is not the divorce which is complained of, but the unhallowed union of the Treasury with the executive department, which has created such extensive alarm. To this danger to our republican institutions and that created by the influence

William Henry Harrison

given to the Executive through the instrumentality of the Federal officers I propose to apply all the remedies which may be at my command. It was certainly a great error in the framers of the Constitution not to have made the officer at the head of the Treasury Department entirely independent of the Executive. He should at least have been removable only upon the demand of the popular branch of the Legislature. I have determined never to remove a Secretary of the Treasury without communicating all the circumstances attending such removal to both Houses of Congress.

The influence of the Executive in controlling the freedom of the elective franchise through the medium of the public officers can be effectually checked by renewing the prohibition published by Mr. Jefferson forbidding their interference in elections further than giving their own votes, and their own independence secured by an assurance of perfect immunity in exercising this sacred privilege of freemen under the dictates of their own unbiased judgments. Never with my consent shall an officer of the people, compensated for his services out of their pockets, become the pliant instrument of Executive will.

There is no part of the means placed in the hands of the Executive which might be used with greater effect for unhallowed purposes than the control of the public press. The maxim which our ancestors derived from the mother country that "the freedom of the press is the great bulwark of civil and religious liberty" is one of the most precious legacies which they have left us. We have learned, too, from our own as well as the experience of other countries, that golden shackles, by whomsoever or by whatever pretense imposed, are as fatal to it as the iron bonds of despotism. The presses in the necessary employment of the Government should never be used "to clear the guilty or to varnish crime." A decent and manly examination of the acts of the Government should be not only tolerated, but encouraged.

Upon another occasion I have given my opinion at some length upon the impropriety of Executive interference in the legislation of Congress that the article in the Constitution making it the duty of the President to communicate information and authorizing him to recommend measures was not intended to make him the source in legislation, and, in particular, that he should never be looked to for schemes of finance. It would be very strange, indeed, that the Constitution should have strictly forbidden one branch of the Legislature from interfering in the origination of such bills and that it should be considered proper that an altogether different department of the Government should be permitted to do so. Some of our best political maxims and opinions have been drawn from our parent isle. There are others, however, which can not be introduced in our system without singular incongruity and the production of much mischief, and this I conceive to be one. No matter in which of the houses of Parliament a bill may originate nor by whom introduced—a minister or a member of the opposition—by the fiction of law, or rather of constitutional principle, the sovereign is supposed to have prepared it agreeably to his will and then submitted it to Parliament for their advice and consent. Now the very reverse is the case here, not only with regard to the principle, but the forms prescribed by the Constitution. The principle certainly assigns to the only body constituted by the Constitution (the legislative body) the power to make laws, and the forms even direct that the enactment should be ascribed to them. The Senate, in relation to revenue bills, have the right to propose amendments, and so has the Executive by the power given him to return them to the House of Representatives with his objections. It is in his power also to propose amendments in the existing revenue laws, suggested by his observations upon their defective or injurious operation. But the delicate duty of devising schemes of revenue should be left where the Constitution has placed it-with the immediate representatives of the people. For similar reasons the mode of keeping the public treasure should be prescribed by them, and the further removed it may be from the control of the Executive the more wholesome the arrangement and the more in accordance with republican principle.

Connected with this subject is the character of the currency. The idea of making it exclusively metallic, however well intended, appears to me to be fraught with more fatal consequences than any other scheme having no relation to the personal rights of the citizens that has ever been devised. If any single scheme could produce the effect of arresting at once that mutation of condition by which thousands of our most indigent fellow-citizens by their industry and enterprise are raised to the possession of wealth, that is the one. If there is one measure better calculated than another to produce that state of things so much deprecated by all true republicans, by which the rich are daily adding to their hoards and the poor sinking deeper into penury, it is an exclusive metallic currency. Or if there is a process by which the character of the country for generosity and nobleness of feeling may be destroyed by the great increase and necessary toleration of usury, it is an exclusive metallic currency.

Amongst the other duties of a delicate character which the President is called upon to perform is the supervision of the government of the Territories of the United States. Those of them which are destined to become members of our great political family are compensated by their rapid progress from infancy to manhood for the partial and temporary deprivation of their political rights. It is in this District only where American citizens are to be found who under a settled policy are deprived of many important political privileges without any inspiring hope as to the inture. Their only consolation under circumstances of such deprivation is that of the devoted exterior guards of a camp—that their sufferings secure tranquillity and safety within. Are there any of their countrymen, who would subject them to greater sacrifices, to any

1869

other humiliations than those essentially necessary to the security of the object for which they were thus separated from their fellow-citizens? Are their rights alone not to be guaranteed by the application of those great principles upon which all our constitutions are founded? We are told by the greatest of British orators and statesmen that at the commencement of the War of the Revolution the most stupid men in England spoke of "their American subjects." Are there, indeed, citizens of any of our States who have dreamed of their subjects in the District of Columbia? Such dreams can never be realized by any agency of mine. The people of the District of Columbia are not the subjects of the people of the States, but free American citizens. Being in the latter condition when the Constitution was formed, no words used in that instrument could have been intended to deprive them of that character. If there is anything in the great principle of unalienable rights so emphatically insisted upon in our Declaration of Independence, they could neither make nor the United States accept a surrender of their liberties and become the subjects-in other words, the slaves-of their former fellow-If this be true—and it will scarcely be denied by anyone who citizens. has a correct idea of his own rights as an American citizen-the grant to Congress of exclusive jurisdiction in the District of Columbia can be interpreted, so far as respects the aggregate people of the United States, as meaning nothing more than to allow to Congress the controlling power necessary to afford a free and safe exercise of the functions assigned to the General Government by the Constitution. In all other respects the legislation of Congress should be adapted to their peculiar position and wants and be conformable with their deliberate opinions of their own interests.

I have spoken of the necessity of keeping the respective departments of the Government, as well as all the other authorities of our country, within their appropriate orbits. This is a matter of difficulty in some cases, as the powers which they respectively claim are often not defined by any distinct lines. Mischievous, however, in their tendencies as collisions of this kind may be, those which arise between the respective communities which for certain purposes compose one nation are much more so, for no such nation can long exist without the careful culture of those feelings of confidence and affection which are the effective bonds to union between free and confederated states. Strong as is the tie of interest, it has been often found ineffectual. Men blinded by their passions have been known to adopt measures for their country in direct opposition to all the suggestions of policy. The alternative, then, is to destroy or keep down a bad passion by creating and fostering a good one, and this seems to be the corner stone upon which our American political architects have reared the fabric of our Government. The cement which was to bind it and perpetuate its existence was the affectionate attachment between all its members. To insure the continuance

of this feeling, produced at first by a community of dangers, of sufferings, and of interests, the advantages of each were made accessible to all. No participation in any good possessed by any member of our extensive Confederacy, except in domestic government, was withheld from the citizen of any other member. By a process attended with no difficulty, no delay, no expense but that of removal, the citizen of one might become the citizen of any other, and successively of the whole. The lines, too, separating powers to be exercised by the citizens of one State from those of another seem to be so distinctly drawn as to leave no room for misunderstanding. The citizens of each State unite in their persons all the privileges which that character confers and all that they may claim as citizens of the United States, but in no case can the same persons at the same time act as the citizen of two separate States, and he is therefore positively precluded from any interference with the reserved powers of any State but that of which he is for the time being a citizen. He may, indeed, offer to the citizens of other States his advice as to their management, and the form in which it is tendered is left to his own discretion and sense of propriety. It may be observed, however, that organized associations of citizens requiring compliance with their wishes too much resemble the *recommendations* of Athens to her allies, supported by an armed and powerful fleet. It was, indeed, to the ambition of the leading States of Greece to control the domestic concerns of the others that the destruction of that celebrated Confederacy, and subsequently of all its members, is mainly to be attributed, and it is owing to the absence of that spirit that the Helvetic Confederacy has for so many years been preserved. Never has there been seen in the institutions of the separate members of any confederacy more elements of discord. In the principles and forms of government and religion, as well as in the circumstances of the several Cantons, so marked a discrepancy was observable as to promise anything but harmony in their intercourse or permanency in their alliance, and yet for ages neither has been interrupted. Content with the positive benefits which their union produced, with the independence and safety from foreign aggression which it secured, these sagacious people respected the institutions of each other, however repugnant to their own principles and prejudices.

Our Confederacy, fellow-citizens, can only be preserved by the same forbearance. Our citizens must be content with the exercise of the powers with which the Constitution clothes them. The attempt of those of one State to control the domestic institutions of another can only result in feelings of distrust and jealousy, the certain harbingers of disunion, violence, and civil war, and the ultimate destruction of our free institutions. Our Confederacy is perfectly illustrated by the terms and principles governing a common copartnership. There is a fund of power to be exercised under the direction of the joint councils of the allied members, but that which has been reserved by the individual members is intangible by the common Government or the individual members composing it. To attempt it finds no support in the principles of our Constitution.

It should be our constant and earnest endeavor mutually to cultivate a spirit of concord and harmony among the various parts of our Confederacy. Experience has abundantly taught us that the agitation by citizens of one part of the Union of a subject not confided to the General Government, but exclusively under the guardianship of the local authorities, is productive of no other consequences than bitterness, alienation, discord, and injury to the very cause which is intended to be advanced. Of all the great interests which appertain to our country, that of union—cordial, confiding, fraternal union—is by far the most important, since it is the only true and sure guaranty of all others.

In consequence of the embarrassed state of business and the currency, some of the States may meet with difficulty in their financial concerns. However deeply we may regret anything imprudent or excessive in the engagements into which States have entered for purposes of their own, it does not become us to disparage the State governments, nor to discourage them from making proper efforts for their own relief. On the contrary, it is our duty to encourage them to the extent of our constitutional authority to apply their best means and cheerfully to make all necessary sacrifices and submit to all necessary burdens to fulfill their engagements and maintain their credit, for the character and credit of the several States form a part of the character and credit of the whole country. The resources of the country are abundant, the enterprise and activity of our people proverbial, and we may well hope that wise legislation and prudent administration by the respective governments, each acting within its own sphere, will restore former prosperity.

Unpleasant and even dangerous as collisions may sometimes be between the constituted authorities of the citizens of our country in relation to the lines which separate their respective jurisdictions, the results can be of no vital injury to our institutions if that ardent patriotism, that devoted attachment to liberty, that spirit of moderation and forbearance for which our countrymen were once distinguished, continue to be cherished. If this continues to be the ruling passion of our souls, the weaker feeling of the mistaken enthusiast will be corrected, the Utopian dreams of the scheming politician dissipated, and the complicated intrigues of the demagogue rendered harmless. The spirit of liberty is the sovereig: balm for every injury which our institutions may receive. On the contrary, no care that can be used in the construction of our Government, no division of powers, no distribution of checks in its several departments, will prove effectual to keep us a free people if this spirit is suffered to decay; and decay it will without constant nurture. To the neglect of this duty the best historians agree in attributing the ruin of all the republics with whose existence and fall their writings have made us acquainted.

The same causes will ever produce the same effects, and as long as the love of power is a dominant passion of the human bosom, and as long as the understandings of men can be warped and their affections changed by operations upon their passions and prejudices, so long will the liberties of a people depend on their own constant attention to its preservation. The danger to all well-established free governments arises from the unwillingness of the people to believe in its existence or from the influence of designing men diverting their attention from the quarter whence it approaches to a source from which it can never come. This is the old trick of those who would usurp the government of their country. In the name of democracy they speak, warning the people against the influence of wealth and the danger of aristocracy. History, ancient and modern, is full of such examples. Cæsar became the master of the Roman people and the senate under the pretense of supporting the democratic claims of the former against the aristocracy of the latter; Cromwell, in the character of protector of the liberties of the people, became the dictator of England, and Bolivar possessed himself of unlimited power with the title of his country's liberator. There is, on the contrary, no instance on record of an extensive and well-established republic being changed into an aristocracy. The tendencies of all such governments in their decline is to monarchy, and the antagonist principle to liberty there is the spirit of faction-a spirit which assumes the character and in times of great excitement imposes itself upon the people as the genuine spirit of freedom, and, like the false Christs whose coming was foretold by the Savior, seeks to, and were it possible would, impose upon the true and most faithful disciples of liberty. It is in periods like this that it behooves the people to be most watchful of those to whom they have intrusted power. And although there is at times much difficulty in distinguishing the false from the true spirit, a calm and dispassionate investigation will detect the counterfeit, as well by the character of its operations as the results that are produced. The true spirit of liberty. although devoted, persevering, bold, and uncompromising in principle, that secured is mild and tolerant and scrupulous as to the means it employs, whilst the spirit of party, assuming to be that of liberty, is harsh, vindictive, and intolerant, and totally reckless as to the character of the allies which it brings to the aid of its cause. When the genuine spirit of liberty animates the body of a people to a thorough examination of their affairs, it leads to the excision of every excrescence which may have fastened itself upon any of the departments of the government, and restores the system to its pristine health and beauty. But the reign of an intolerant spirit of party amongst a free people seldom fails to result in a dangerous accession to the executive power introduced and established amidst unusual professions of devotion to democracy.

The foregoing remarks relate almost exclusively to matters connected with our domestic concerns. It may be proper, however, that I should

give some indications to my fellow-citizeus of my proposed course of conduct in the management of our foreign relations. I assure them, therefore, that it is my intention to use every means in my power to preserve the friendly intercourse which now so happily subsists with every foreign nation, and that although, of course, not well informed as to the state of pending negotiations with any of them, I see in the personal characters of the sovereigns, as well as in the mutual interests of our own and of the governments with which our relations are most intimate, a pleasing guaranty that the harmony so important to the interests of their subjects as well as of our citizens will not be interrupted by the advancement of any claim or pretension upon their part to which our honor would not permit us to yield. Long the defender of my country's rights in the field, I trust that my fellow-citizens will not see in my earnest desire to preserve peace with foreign powers any indication that their rights will ever be sacrificed or the honor of the nation tarnished by any admission on the part of their Chief Magistrate unworthy of their former glory. In our intercourse with our aboriginal neighbors the same liberality and justice which marked the course prescribed to me by two of my illustrious predecessors when acting under their direction in the discharge of the duties of superintendent and commissioner shall be strictly observed. I can conceive of no more sublime spectacle, none more likely to propitiate an impartial and common Creator, than a rigid adherence to the principles of justice on the part of a powerful nation in its transactions with a weaker and uncivilized people whom circumstances have placed at its disposal.

Before concluding, fellow-citizens, I must say something to you on the subject of the parties at this time existing in our country. To me it appears perfectly clear that the interest of that country requires that the violence of the spirit by which those parties are at this time governed must be greatly mitigated, if not entirely extinguished, or consequences will ensue which are appalling to be thought of.

If parties in a republic are necessary to secure a degree of vigilance sufficient to keep the public functionaries within the bounds of law and duty, at that point their usefulness ends. Beyond that they become destructive of public virtue, the parent of a spirit antagonist to that of liberty, and eventually its inevitable conqueror. We have examples of republics where the love of country and of liberty at one time were the dominant passions of the whole mass of citizens, and yet, with the continuance of the name and forms of free government, not a vestige of these qualities remaining in the bosoms of any one of its citizens. It was the beautiful remark of a distinguished English writer that "in the Roman senate Octavius had a party and Antony a party, but the Commonwealth had none." Yet the senate continued to meet in the temple of liberty to talk of the sacredness and beauty of the Common wealth and gaze at the statues of the elder Brutus and of the Curtn and

Decii, and the people assembled in the forum, not, as in the days of Camillus and the Scipios, to cast their free votes for annual magistrates or pass upon the acts of the senate, but to receive from the hands of the leaders of the respective parties their share of the spoils and to shout for one or the other, as those collected in Gaul or Egypt and the lesser Asia would furnish the larger dividend. The spirit of liberty had fled, and, avoiding the abodes of civilized man, had sought protection in the wilds of Scythia or Scandinavia; and so under the operation of the same causes and influences it will fly from our Capitol and our forums. Α calamity so awful, not only to our country, but to the world, must be deprecated by every patriot and every tendency to a state of things likely to produce it immediately checked. Such a tendency has existed-does exist. Always the friend of my countrymen, never their flatterer, it becomes my duty to say to them from this high place to which their partiality has exalted me that there exists in the land a spirit hostile to their best interests-hostile to liberty itself. It is a spirit contracted in its views, selfish in its objects. It looks to the aggrandizement of a few even to the destruction of the interests of the whole. The entire remedy is with the people. Something, however, may be effected by the means which they have placed in my hands. It is union that we want, not of a party for the sake of that party, but a union of the whole country for the sake of the whole country, for the defense of its interests and its honor against foreign aggression, for the defense of those principles for which our ancestors so gloriously contended. As far as it depends upon me it shall be accomplished. All the influence that I possess shall be exerted to prevent the formation at least of an Executive party in the halls of the legislative body. I wish for the support of no member of that body to any measure of mine that does not satisfy his judgment and his sense of duty to those from whom he holds his appointment, nor any confidence in advance from the people but that asked for by Mr. Jefferson, "to give firmness and effect to the legal administration of their affairs."

I deem the present occasion sufficiently important and solemn to justify me in expressing to my fellow-citizens a profound reverence for the Christian religion and a thorough conviction that sound morals, religious liberty, and a just sense of religious responsibility are essentially connected with all true and lasting happiness; and to that good Being who has blessed us by the gifts of civil and religious freedom, who watched over and prospered the labors of our fathers and has hitherto preserved to us institutions far exceeding in excellence those of any other people, let us unite in fervently commending every interest of our beloved country in all future time.

Fellow-citizens, being fully invested with that high office to which the partiality of my countrymen has called me, I now take an affectionate leave of you. You will bear with you to your homes the remembrance of the pledge I have this day given to discharge all the high duties of my exalted station according to the best of my ability, and I shall enter upon their performance with entire confidence in the support of a just and generous people.

MARCH 4, 1841.

SPECIAL MESSAGE.

To the Senate of the United States:

MARCH 5, 1841.

I hereby withdraw all nominations made to the Senate on or before the 3d instant and which were not definitely acted on at the close of its session on that day.

W. H. HARRISON.

PROCLAMATION.

[From Statutes at Large (Little, Brown & Co.), Vol. XI, p. 786.]

BY THE PRESIDENT OF THE UNITED STATES OF AMERICA.

A PROCLAMATION.

Whereas sundry important and weighty matters, principally growing out of the condition of the revenue and finances of the country, appear to me to call for the consideration of Congress at an earlier day than its next annual session, and thus form an extraordinary occasion, such as renders necessary, in my judgment, the convention of the two Houses as soon as may be practicable:

I do therefore by this my proclamation convene the two Houses of Congress to meet in the Capitol, at the city of Washington, on the last Monday, being the 31st day, of May next; and I require the respective Senators and Representatives then and there to assemble, in order to receive such information respecting the state of the Union as may be given to them and to devise and adopt such measures as the good of the country may seem to them, in the exercise of their wisdom and discretion, to require.

In testimony whereof I have caused the seal of the United States to be hereunto affixed, and signed the same with my hand.

Done at the city of Washington, the 17th day of March, [SEAL.] A. D. 1841, and of the Independence of the United States the sixty-fifth. W. H. HARRISON.

By the President:

DANIEL WEBSTER, Secretary of State.

DEATH OF PRESIDENT HARRISON.

PUBLIC ANNOUNCEMENT.

[From the Daily National Intelligencer, April 5, 1841.]

WASHINGTON, April 4, 1841.

An all-wise Providence having suddenly removed from this life William Henry Harrison, late President of the United States, we have thought it our duty, in the recess of Congress and in the absence of the Vice-President from the seat of Government, to make this afflicting bereavement known to the country by this declaration under our hands.

He died at the President's house, in this city, this 4th day of April, A. D. 1841, at thirty minutes before 1 o'clock in the morning.

The people of the United States, overwhelmed, like ourselves, by an event so unexpected and so melancholy, will derive consolation from knowing that his death was calm and resigned, as his life has been patriotic, useful, and distinguished, and that the last utterance of his lips expressed a fervent desire for the perpetuity of the Constitution and the preservation of its true principles. In death, as in life, the happiness of his country was uppermost in his thoughts.

> DANIEL WEBSTER, Secretary of State. THOMAS EWING, Secretary of the Treasury. JOHN BELL, Secretary of War, J. J. CRITTENDEN, Attorney-General, FRANCIS GRANGER,

Postmaster-General.

[The Secretary of the Navy was absent from the city.]

ANNOUNCEMENT TO THE VICE-PRESIDENT.

[From the Daily National Intelligencer, April 5, 1841.]

WASHINGTON, April 4, 1841.

JOHN TYLER,

Vice-President of the United States.

SIR: It has become our most painful duty to inform you that William Henry Harrison, late President of the United States, has departed this life.

This distressing event took place this day at the President's mansion, in this city, at thirty minutes before 1 in the morning.

We lose no time in dispatching the chief clerk in the State Department as a special messenger to bear you these melancholy tidings.

We have the honor to be, with the highest regard, your obedient servants,

DANIEL WEBSTER, Secretary of State. THOMAS EWING, Secretary of the Treasury. JOHN BELL, Secretary of War. JOHN J. CRITTENDEN, Attorney-General. FRANCIS GRANGER, Postmaster-General.

ANNOUNCEMENT TO REPRESENTATIVES OF THE UNITED STATES ABROAD.

[From official records in the State Department.]

DEPARTMENT OF STATE, Washington, April 4, 1841.

SIR: It has become my most painful duty to announce to you the decease of William Henry Harrison, late President of the United States.

This afflicting event took place this day at the Executive Mansion, in this city, at thirty minutes before 1 o'clock in the morning.

I am, sir, your obedient servant,

DANL. WEBSTER.

ANNOUNCEMENT TO REPRESENTATIVES OF FOREIGN GOVERNMENTS IN THE UNITED STATES.

[From official records in the State Department.]

DEPARTMENT OF STATE, Washington, April 5, 1841.

SIR: It is my great misfortune to be obliged to inform you of an event not less afflicting to the people of the United States than distressing to my own feelings and the feelings of all those connected with the Government.

The President departed this life yesterday at thirty minutes before x o'clock in the morning.

You are respectfully invited to attend the funeral ceremonies, which will take place on Wednesday next, and with the particular arrangements for which you will be made acquainted in due time. Not doubting your sympathy and condolence with the Government and people of the country on this bereavement, I have the honor to be, sir, with high consideration, your obedient servant,

DANL. WEBSTER.

ANNOUNCEMENT TO THE ARMY.

[From official records in the War Department.]

DEPARTMENT OF WAR, Washington, April 5, 1841.

It is with feelings of the deepest sorrow that the Secretary of War announces to the Army the death of the President of the United States. William Henry Harrison is no more. His long and faithful services in many subordinate but important stations, his recent elevation to the highest in honor and power, and the brief term allotted to him in the enjoyment of it are circumstances of themselves which must awaken the liveliest sympathy in every bosom. But these are personal considerations; the dispensation is heaviest and most afflicting on public grounds. This great calamity has befallen the country at a period of general anxiety for its present, and some apprehension for its future, condition-at a time when it is most desirable that all its high offices should be filled and all its high trusts administered in harmony, wisdom, and The generosity of character of the deceased, the conspicuous vigor. honesty of his principles and purposes, together with the skill and firmness with which he maintained them in all situations, had won for him the affection and confidence of his countrymen; but at the moment when by their voice he was raised to a station in the discharge of the powers and duties of which the most beneficent results might justly have been anticipated from his great experience, his sound judgment, the high estimation in which he was held by the people, and his unquestioned devotion to the Constitution and to the Union, it has pleased an all-wise but mysterious Providence to remove him suddenly from that and every other earthly employment.

While the officers and soldiers of the Army share in the general grief which these considerations so naturally and irresistibly inspire, they will doubtless be penetrated with increased sensibility and feel a deeper concern in testifying in the manner appropriate to them the full measure of a nation's gratitude for the eminent services of the departed patriot and in rendering just and adequate honors to his memory because he was himself a soldier, and an approved one, receiving his earliest lessons in a camp, and, when in riper years called to the command of armies, illustrating the profession of arms by his personal qualities and contributing largely by his successes to the stock of his country's glory.

It is to be regretted that the suddenness of the emergency has made it necessary to announce this sad event in the absence of the Vice-President

from the seat of Government; but the greatest confidence is felt that he will cordially approve the sentiments expressed, and that he will in due time give directions for such further marks of respect not prescribed by the existing regulations of the Army as may be demanded by the occasion.

JOHN BELL, Secretary of War.

GENERAL ORDERS, NO. 20.

HEADQUARTERS OF THE ARMY, ADJUTANT-GENERAL'S OFFICE, Washington, April 7, 1841.

The death of the President of the United States having been officially announced from the War Department, the Major-General Commanding in Chief communicates to the Army the melancholy intelligence with feelings of the most profound sorrow. The long, arduous, and faithful military services in which President Harrison has been engaged since the first settlement of the Western country, from the rank of a subaltern to that of a commander in chief, are too well known to require a recital of them here. It is sufficient to point to the fields of Tippecanoe, the banks of the Miami, and the Thames, in Upper Canada, to recall to many of the soldiers of the present Army the glorious results of some of his achievements against the foes of his country, both savage and civilized.

The Army has on former occasions been called upon to mourn the loss of distinguished patriots who have occupied the Presidential chair, but this is the first time since the adoption of the Constitution it has to lament the demise of a President while in the actual exercise of the high functions of the Chief Magistracy of the Union.

The members of the Army, in common with their fellow-citizens of all classes, deeply deplore this national bereavement; but although they have lost a friend ever ready to protect their interests, his bright example in the paths of honor and glory still remains for their emulation.

The funeral honors directed to be paid by the troops in paragraph 523 of the General Regulations will be duly observed, and the troops at the several stations will be paraded at 10 o'clock a. m., when this order will be read, after which all labors for the day will cease; the national flag will be displayed at half-staff; at dawn of day thirteen guns will be fired, besides the half-hour guns as directed by the Regulations, and at the close of the day a national salute. The standards, guidons, and colors of the several regiments will be put in mourning for the period of six months, and the officers will wear the usual badge of mourning on the left arm above the elbow and on the hilt of the sword for the same period.

Byorder of Alexander Macomb, Major-General Commanding in Chief: R. JONES, Adjutant General.

ANNOUNCEMENT TO THE NAVY.

[From official records in the Navy Department.]

GENERAL ORDER.

NAVY DEPARTMENT, April 5, 1841.

The Department announces to the officers of the Navy and Marine Corps the death of William Henry Harrison, late President of the United States, which occurred at the Executive Mansion, in the city of Washington, on the morning of the 4th instant, and directs that, uniting with their fellow-citizens in the manifestations of their respect for the exalted character and eminent public services of the illustrious deceased, and of their sense of the bereavement the country has sustained by this afflicting dispensation of Providence, they wear the usual badge of mourning for six months.

The Department further directs that funeral honors be paid him at each of the navy-yards and on board each of the public vessels in commission by firing twenty-six minute guns, commencing at 12 o'clock m., on the day after the receipt of this order, and by wearing their flags at half-mast for one week. J. D. SIMMS,

J. D. SIMMS, Acting Secretary of the Navy.

OFFICIAL ARRANGEMENTS FOR THE FUNERAL.

[From official records in the State Department.]

WASHINGTON, April 4, 1841.

The circumstances in which we are placed by the death of the President render it indispensable for us, in the recess of Congress and in the absence of the Vice-President, to make arrangements for the funeral solemnities. Having consulted with the family and personal friends of the deceased, we have concluded that the funeral be solemnized on Wednesday, the 7th instant, at 12 o'clock. The religious services to be performed according to the usage of the Episcopal Church, in which church the deceased most usually worshiped. The body to be taken from the President's house to the Congress Burying Ground, accompanied by a military and a civic procession, and deposited in the receiving tomb.

The military arrangements to be under the direction of Major-General Macomb, the General Commanding in Chief the Army of the United States, and Major-General Walter Jones, of the militia of the District of Columbia.

Commodore Morris, the senior captain in the Navy now in the city, to have the direction of the naval arrangements.

The marshal of the District to have the direction of the civic procession, assisted by the mayors of Washington, Georgetown, and Alexandria, the clerk of the Supreme Court of the United States, and such other citizens as they may see fit to call to their aid.

John Quincy Adams, ex-President of the United States, members of Congress now in the city or its neighborhood, all the members of the diplomatic body resident in Washington, and all officers of Government and citizens generally are invited to attend.

And it is respectfully recommended to the officers of Government that they wear the usual badge of mourning.

> DANL. WEBSTER, Secretary of State.
> T. EWING, Secretary of the Treasury.
> JNO. BELL, Secretary of War.
> J. J. CRITTENDEN, Attorney-General.
> FR. GRANGER, Postmaster-General.

[The Secretary of the Navy was absent from the city.]

[From official records in the War Department.]

DISTRICT ORDERS.

WASHINGTON, April 5, 1841.

The foregoing notice from the heads of the Executive Departments of the Government informs you what a signal calamity has befallen us in the death of the President of the United States, and the prominent part assigned you in those funeral honors which may be peak a nation's respect to the memory of a departed patriot and statesman, whose virtue and talents as a citizen and soldier had achieved illustrious services, and whose sudden death has disappointed the expectation of still more important benefits to his country.

With a view to carry into effect the views of these high officers of Government in a manner befitting the occasion and honorable to the militia corps of this District, I request the general and field officers, the general staff, and the commandants of companies to assemble at my house to-morrow, Tuesday, April 6, precisely at 10 o'clock, to report the strength and equipment of the several corps of the militia and to receive final instructions for parade and arrangement in the military part of the funeral procession.

The commandants of such militia corps from the neighboring States as desire to unite in the procession are respectfully invited to report to me as soon as practicable their intention, with a view to arrange them in due and uniform order as a part of the general military escort.

The detail of these arrangements, to which all the military accessories, both of the regulars and militia, are expected to conform, will be published in due time for the information of all.

For the present it is deemed sufficient to say that the whole military part of the procession, including the regular troops of every arm and denomination and all the militia corps, whether of this District or of the States, will be consolidated in one column of escort, whereof Major-General Macomb, Commander of the Army of the United States, will take the general command, and Brigadier-General Roger Jones, Adjutant-General of the Army of the United States, will act as adjutant-general and officer of the day. WALTER JONES,

Maj. Gen., Comdg. the Militia of the District of Columbia.

ADJUTANT-GENERAL'S OFFICE, Washington, April 6, 1841.

The Major-General Commanding the Army of the United States and the major-general commanding the militia of the District of Columbia, having been charged by the executive officers of the Government with the military arrangements for the funeral honors to be paid to the patriot and illustrious citizen, William Henry Harrison, late President of the United States, direct the following order of arrangement:

ORDER OF THE PROCESSION.

FUNERAL ESCORT. (In column of march.)

Infantry.

Battalion of Baltimore volunteers. Company of Annapolis volunteers. Battalion of Washington volunteers.

Marines.

United States Marine Corps. Corps of commissioned officers of the Baltimore volunteers, headed by a major-general.

Cavalry.

Squadron of Georgetown Light Dragoons.

Artillery.

Troop of United States light artillery. Dismounted officers of volunteers, Marine Corps, Navy, and Army in the order named. Mounted officers of volunteers, Marine Corps, Navy, and Army in the order named. Major-General Walter Jones, commanding the militia. Aids-de-camp. Major-General Macomb, Commanding the Army. Aids-de-Camp.

1883

CIVIC PROCESSION.

United States marshal for the District of Columbia and clerk of the Supreme Court. The mayors of Washington, Georgetown, and Alexandria.

Clergy of the District of Columbia and elsewhere.

Physicians to the President.

Funeral car with the corpse.

Pallbearers.—R. Cutts, esq., for Maine; Hon. J. B. Moore, for New Hampshire; Hon. C. Cushing, Massachusetts; M. St. C. Clarke, esq., Rhode Island; W. B. Lloyd, esq., Counecticut; Hon. Hiland Hall, Vermont; General John Granger, New York; Hon. G. C. Washington, New Jersey; M. Willing, esq., Pennsylvania; Hon. A. Naudain, Delaware; David Hoffman, esq., Maryland; Major Camp, Virginia; Hon. E. D. White, North Carolina; John Carter, esq., South Carolina; General D. L. Clinch, Georgia; Th. Crittenden, esq., Kentucky; Colonel Rogers, Tennessee; Mr. Graham, Ohio; M. Durald, esq., Louisiana; General Robert Hanna, Indiana; Anderson Miller, esq., Mississippi; D. G. Garnsey, esq., Illinois; Dr. Perrine, Alabama; Major Russell, Missouri; A. W. Lyon, esq., Arkansas; General Howard, Michigan; Hon. J. D. Doty, Wisconsin; Hon. C. Downing, Florida; Hon. W. B. Carter, Iowa; R. Smith, esq., District of Columbia.

Family and relatives of the late President.

The President of the United States and heads of Departments.

Ex-President Adams.

The Chief Justice and associate justices of the Supreme Court and district judges of the United States.

The President of the Senate pro tempore and Secretary.

Senators and officers of the Senate.

Foreign ministers and suites.

United States and Mexican commissioners for the adjustment of claims under the convention with Mexico.

Members of the House of Representatives, and officers.

Governors of States and Territories and members of State legislatures.

Judges of the circuit and criminal courts of the District of Columbia, with the members of the bar and officers of the courts.

The judges of the several States.

The Comptrollers of the Treasury, Auditors, Treasurer, Register, Solicitor, and Commissioners of Land Office, Pensions, Indian Affairs, Patents, and Public Buildings.

The clerks, etc., of the several Departments, preceded by their respective chief clerks, and all other civil officers of the Government.

Officers of the Revolution.

Officers and soldiers of the late war who served under the command of the

late President.

Corporate authorities of Washington.

Corporate authorities of Georgetown.

Corporate authorities of Alexandria.

Such societies and fraternities as may wish to join the procession, to report to the marshal of the District, who will assign them their respective positions.

Citizens and strangers.

The troops designated to form the escort will assemble in the avenue north of the President's house, and form line precisely at 11 o'clock a. m. on Wednesday, the 7th instant, with its right (Captain Ringgold's troop of light artillery) resting opposite the western gate.

The procession will move precisely at 12 o'clock m., when minute guns will be fired by detachments of artillery stationed near St. John's church and the City Hall, and by the Columbian Artillery at the Capitol. At

Messages and Papers of the Presidents

the same hour the bells of the several churches in Washington, Georgetown, and Alexandria will be tolled.

At sunrise to-morrow, the 7th instant, a Federal salute will be fired from the military stations in the vicinity of Washington, minute guns between the hours of 12 and 3, and a national salute at the setting of the sun.

The usual badge of mourning will be worn on the left arm and on the hilt of the sword.

The Adjutant-General of the Army is charged with the military arrangements of the day, aided by the Assistant Adjutants-General on duty at the Headquarters of the Army.

The United States marshal of the District has the direction of the civic procession, assisted by the mayors of the cities of the District and the clerk of the Supreme Court of the United States.

By order:

ROGER JONES, Adjutant-General United States Army.

CERTIFICATE OF THE DEATH OF PRESIDENT HARRISON.

[From official records, written on parchment, in the State Department.]

WASHINGTON, April 4, A. D. 1841.

William Henry Harrison, President of the United States, departed this life at the President's house, in this city, this morning, being Sunday, the 4th day of April, A. D. 1841, at thirty minutes before 1 o'clock in the morning; we whose names are hereunto subscribed being in the house, and some of us in his immediate presence, at the time of his decease.

W. W. SEATON. DANL. WEBSTER. Mayor of Washington. THOMAS MILLER, M. D., Attending Physician. ASHTON ALEXANDER, M. D., Consulting Physician. WM. HAWLEY, Rector of St. John's Church. A. HUNTER, Marshal of the District of Columbia. WM. THOS. CARROLL, Clerk of Supreme Court U.S. FLETCHER WEBSTER, Chief Clerk in the State Dept. Let this be duly recorded and placed among the rolls.

REPORT OF THE PHYSICIANS.

[From the Daily National Intelligencer, April 5, 1841.]

WASHINGTON, April 4, 1841.

Hon. D. WEBSTER,

Secretary of State.

DEAR SIR: In compliance with the request made to us by yourself and the other gentlemen of the Cabinet, the attending and consulting physicians have drawn up the abstract of a report on the President's case, which I herewith transmit to you.

Very respectfully, your obedient servant,

THO. MILLER, Attending Physician.

On Saturday, March 27, 1841, President Harrison, after several days' previous indisposition, was seized with a chill and other symptoms of fever. The next day pneumonia, with congestion of the liver and derangement of the stomach and bowels, was ascertained to exist. The age and debility of the patient, with the immediate prostration, forbade a resort to general blood letting. Topical depletion, blistering, and appropriate internal remedies subdued in a great measure the disease of the lungs and liver, but the stomach and intestines did not regain a healthy condition. Finally, on the 3d of April, at 3 o'clock p. m., profuse diarrhea came on, under which he sank at thirty minutes to 1 o'clock on the morning of the 4th.

The last words uttered by the President, as heard by Dr. Worthington, were these: "Sir, I wish you to understand the true principles of the Government. I wish them carried out. I ask nothing more."

THO. MILLER, M. D., Attending Physician.

FRED. MAY, M. D., N. W. WORTHINGTON, M. D., J. C. HALL, M. D., ASHTON ALEXANDER, M. D., *Consulting Physicians.*

OATH OF OFFICE ADMINISTERED TO PRESIDENT JOHN TYLER IN THE PRESENCE OF THE CABINET.*

[From the Daily National Intelligencer, April 7, 1841.]

I do solemnly swear that I will faithfully execute the office of President of the United States, and will to the best of my ability preserve, protect, and defend the Constitution of the United States.

April 6, 1841.

JOHN TYLER.

DISTRICT OF COLUMBIA,

City and County of Washington, ss:

I, William Cranch, chief judge of the circuit court of the District of Columbia, certify that the above-named John Tyler personally appeared before me this day, and although he deems himself qualified to perform the duties and exercise the

PROCLAMATION.

TO THE PEOPLE OF THE UNITED STATES.

A RECOMMENDATION.

WASHINGTON, April 13, 1841.

When a Christian people feel themselves to be overtaken by a great public calamity, it becomes them to humble themselves under the dispensation of Divine Providence, to recognize His righteous government over the children of men, to acknowledge His goodness in time past, as well as their own unworthiness, and to supplicate His merciful protection for the future.

The death of William Henry Harrison, late President of the United States, so soon after his elevation to that high office, is a bereavement peculiarly calculated to be regarded as a heavy affliction and to impress all minds with a sense of the uncertainty of human things and of the dependence of nations, as well as individuals, upon our Heavenly Parent.

I have thought, therefore, that I should be acting in conformity with the general expectation and feelings of the community in recommending, as I now do, to the people of the United States of every religious denomination that, according to their several modes and forms of worship, they observe a day of fasting and prayer by such religious services as may be suitable on the occasion; and I recommend Friday, the 14th day of May next, for that purpose, to the end that on that day we may all with one accord join in humble and reverential approach to Him in whose hands we are, invoking Him to inspire us with a proper spirit and temper of heart and mind under these frowns of His providence and still to bestow His gracious benedictions upon our Government and our country.

JOHN TYLER.

[For "A resolution manifesting the sensibility of Congress upon the event of the death of William Henry Harrison, late President of the United States," see p. 1908.]

1887

QUESTION.

1. What three unsatisfactory schemes of finance have been tried by the United States? Page 1898.

SUGGESTIONS.

The untimely death of William Henry Harrison one year and four months after his inauguration prevented the making of much history during his administration; but his able inaugural address is an excellent summary of the history of the country at the time. Pages 1860 to 1876.

Read Harrison's Foreign Policy. Page 1873.

NOTE.

For further suggestions on Harrison's administration, see Harrison, William Henry, Encyclopedic Index.

By reading the Foreign Policy of each President, and by scanning the messages as to the state of the nation, a thorough knowledge of the history of the United States will be acquired from the most authentic sources; because, as has been said, "Each President reviews the past, depicts the present and forecasts the future of the nation."

John Tyler

April 4, 1841, to March 4, 1845

SEE ENCYCLOPEDIC INDEX.

The Encyclopedic Index is not only an index to the other volumes, not only a key that unlocks the treasures of the entire publication, but it is in itself an alphabetically arranged brief history or story of the great controlling events constituting the History of the United States.

Under its proper alphabetical classification the story is told of every great subject referred to by any of the Presidents in their official Messaces, and at the end of each article the official utterances of the Presidents themselves are cited upon the subject, so that you may readily turn to the page in the body of the work itself for this original information.

Next to the possession of knowledge is the ability to turn at will to where knowledge is to be found.

Ti Viero President

TYLER

No president of the Republic has created greater extremes of opinion respecting his merits than John Tyler; and perhaps another generation must pass before his administration can be justly or impartially weighed. He came of an old English family, which settled in Virginia, in the early days of that colony, and he was the fifth John Tyler in the line of descent in his section of the State. Some have traced the family origin to Watt Tyler, the celebrated English agitator, who became famous by his rebellion near the close of the 14th Century. John Tyler seems to have foreseen even in his early manhood the inevitable clash to come between the slaveholding and non-slaveholding States. As a pro-slavery man he accepted and followed the lead of John C. Calhoun in the nullification branch of the Democratic party; and he soon became a power to be reckoned with in the politics of the country. His prominence was such that he was put on the ticket with General W. H. Harrison in 1840, when the "Tippecanoe and Tyler" campaign developed into one of the most exciting episodes of American politics. This campaign produced a singular combination, the Whigs, the "National Republicans" and the "Democratic Republicans," uniting on a ticket incongruous in its candidates, but claimed with frantic enthusiasm, to represent the cherished views of both the North and the South.

Tyler was expected to uphold and conserve the tenets of the Staterights party, and to see that the Constitution was strictly construed in all matters affecting the institution of slavery.

In one month after the inauguration, General Harrison died, and Tyler became President. Instead of reorganizing the Cabinet on lines of his own, he adopted the policy of retaining the existing Cabinet, although many, and possibly all, of them felt more or less distrust of Mr. Tyler's fidelity to the platform on which the party had come into power. The truth is, that the combination ticket of Harrison and Tyler was the usual party trick, intended to unite discordant elements, and having the sole object of obtaining votes enough to insure success. Slavery agitation had already then become exciting if not violent. Harrison was recognized as an anti-slavery man, while Tyler was notoriously allied in sentiment with the extreme section of the pro-slavery party of the South. His nomination, therefore, in 1840, on the Whig ticket, was to reap the fruits of disaffection in the Democratic party rather than to make sure of fealty to Whig principles or to reward Mr. Tyler for any services rendered to that party.

When Tyler vetoed the National Bank Bill in 1841, his party abandoned him with curses and maledictions accompanied with unpardonable vehemence and violence. In all other respects his administration proved to be eminently successful. A bankruptcy law, admittedly necessary to relieve the failures following the panic of 1837, was passed, and a tariff law looking to both revenue and protection was approved in 1842. Just before the expiration of his term in 1845, Texas was admitted into the Union with the mutual consent of the parties in interest, and on the true principles of peaceable and healthful expansion, under which the inhabitants of the new territory became at once clothed with every constitutional right, and the State itself took its place as an equal member of the federal union. The Northeastern boundary question which had long threatened the public peace was honorably and satisfactorily settled during his administration.

President Tyler's critics of that day aspersed his name with immoderate abuse and seem to have delighted in calumniating his character, but in the clearer light of subsequent history, it is admitted that much of this detraction may be fairly attributed to the smarting anguish of party disappointments, stimulated and aggravated by the fierce and unreasonable passions which disgraced the politics of that period.

It is now perfectly clear that the advantages of the independent treasury system, then recently adopted under the administration of Mr. Van Buren, are far better for both government and people than any benefits to be derived from the fiscal agencies of a national bank. Time, indeed, sets all things even. And Tyler's friends may now, with some justification, claim that his treason to party proved to be a blessing to his country.

When the great war of the Rebellion began in 1861, he came as a delegate from Virginia to a "Peace Convention" at Washington, with the vain hope of averting the horrors which he had already seen in the prophetic visions of his youth, but it was too late.

He returned home from his fruitless mission to join the fortunes of his State just then being hurried on with frantic zeal into a war more fruitless still.

John Tyler was not without faults, but he was better than many who, with shameless contumely, have aspersed his name.

He disregarded the behests of his party; and no man can survive this act of disobedience, however justified he may be in the eyes of God or of sensible men. The more ignorant or corrupt his party, the more swift and certain in his ruin.

J. O. Hondorson

LETITIA CHRISTIAN TYLER

LETITIA CHRISTIAN, of Virginia, President Tyler's first wife, was extremely delicate, and lived scarcely two years after his inauguration. She was lovely and gentle, highly accomplished and beautiful, greatly beloved by her husband and family, but seldom seen in public. Therefore during his administration the White House had several mistresses. The duties of hostess sometimes devolved upon his married daughter, but were generally assumed by his daughter-in-law, Mrs. Robert Tyler, to whom were relegated the duties of permanent hostess until, in 1844, the President married Miss Julia Gardiner. The ceremony took place at the Church of the Ascension in New York City, and was the first instance of the marriage of a President, which fact excited intense interest throughout the United States. Mrs. Julia Tyler, for the remaining eight months of the term, filled her position creditably and gracefully. She died in 1880, having long outlived her husband.

John Tyler

JOHN TYLER, second son of Judge John Tyler, governor of Virginia from 1808 to 1811, and Mary Armistead, was born at Greenway, Charles City County, Va., March 29, 1790. He was graduated at William and Mary College in 1807. At college he showed a strong interest in ancient history; was also fond of poetry and music, and was a skillful performer In 1809 he was admitted to the bar, and had already on the violin. begun to obtain a good practice when he was elected to the legislature. Took his seat in that body in December, 1811. Was here a firm supporter of Mr. Madison's Administration; and the war with Great Britain, which soon followed, afforded him an opportunity to become conspicuous as a forcible and persuasive orator. March 29, 1813, he married Letitia, daughter of Robert Christian, and a few weeks afterwards was called into the field at the head of a company of militia to take part in the defense of Richmond, threatened by the British. This military service lasted but a month. He was reelected to the legislature annually until, in November, 1816, he was chosen to fill a vacancy in the United States House of Representatives. Was reelected to the Fifteenth and Sixteenth Congresses. In 1821, his health being seriously impaired, he declined a reelection and retired to private life. In 1823 he was again elected to the Virginia legislature. Here he was a friend to the candidacy of William H. Crawford for the Presidency. In 1824 lie was a candidate to fill a vacancy in the United States Senate, but was defeated. He opposed in 1825 the attempt to remove William and Mary College to Richmond, and was afterwards made successively rector and chancellor of the college, which prospered signally under his management. In December, 1825, he was chosen by the legislature to the governorship of Virginia, and in the following year was reelected by a unanimous In December, 1826, the friends of Clay and Adams combined vote. with the Democrats opposed to John Randolph and elected Mr. Tyler to the United States Senate. In February, 1830, after taking part in the Virginia convention for revising the State constitution, he returned to his seat in the Senate, and found himself first drawn toward Jackson by the veto message (May 27) upon the Maysville turnpike bill; supported Jackson in the Presidential election of 1832, but broke with the Administration on the question of the removal of the deposits from the United

Messages and Papers of the Presidents

States Bank, and voted for Mr. Clay's resolution to censure the President. He was nominated by the State-rights Whigs for Vice-President in 1835, and at the election on November 8, 1836, received 47 electoral votes; but no candidate having a majority of electoral votes, the Senate elected Richard M. Johnson, of Kentucky. The legislature of Virginia having instructed the Senators from that State to vote for expunging the resolutions of censure upon President Jackson, Mr. Tyler refused to obey the instructions, resigned his seat, and returned home February 29, 1836. On January 10, 1838, he was chosen president of the Virginia Colonization Society. In the spring of 1838 he was returned to the Virginia legislature. In January, 1839, he was a candidate for reelection to the United States Senate; the result was a deadlock, and the question was indefinitely postponed before any choice had been made. December 4, 1839, the Whig national convention, at Harrisburg, Pa., nominated him for Vice-President on the ticket with William Henry Harrison, and at the election on November 10, 1840, he was elected, receiving 234 electoral votes to 48 for Richard M. Johnson, of Kentucky. By the death of President Harrison April 4, 1841, Mr. Tyler became President of the United States. He took the oath of office on April 6. Among the more important events of his Administration were the "Ashburton treaty" with Great Britain, the termination of the Indian war in Florida, the passage of the resolutions by Congress providing for the annexation of Texas, and the treaty with China. On May 27, 1844, he was nominated for President at a convention in Baltimore, but although at first he accepted the nomination, he subsequently withdrew his name. On June 26, 1844, Mr. Tyler married Miss Julia Gardiner, of New York, his first wife having died September 9, 1842. After leaving the White House he took up his residence on his estate, Sherwood Forest, near Greenway, Va., on the bank of the James River. Was president of the Peace Convention held at Washington February 4, 1861. Afterwards, as a delegate to the Virginia State convention, he advocated the passage of an ordinance of secession. In May, 1861, he was unanimously elected a member of the provisional congress of the Confederate States. In the following autumn he was elected to the permanent congress, but died at Richmond January 18, 1862, before taking his seat, and was buried in Hollywood Cemetery, in that city.

INAUGURAL ADDRESS.

To the People of the United States.

WASHINGTON, April 9, 1841.

FELLOW-CITIZENS: Before my arrival at the seat of Government the painful communication was made to you by the officers presiding over the several Departments of the deeply regretted death of William Henry Harrison, late President of the United States. Upon him you had

1889

conferred your suffrages for the first office in your gift, and had selected him as your chosen instrument to correct and reform all such errors and abuses as had manifested themselves from time to time in the practical operation of the Government. While standing at the threshold of this great work he has by the dispensation of an all-wise Providence been removed from amongst us, and by the provisions of the Constitution the efforts to be directed to the accomplishing of this vitally important task have devolved upon myself. This same occurrence has subjected the wisdom and sufficiency of our institutions to a new test. For the first time in our history the person elected to the Vice-Presidency of the United States, by the happening of a contingency provided for in the Constitution, has had devolved upon him the Presidential office. The spirit of faction, which is directly opposed to the spirit of a lofty patriotism, may find in this occasion for assaults upon my Administration; and in succeeding, under circumstances so sudden and unexpected and to responsibilities so greatly augmented, to the administration of public affairs I shall place in the intelligence and patriotism of the people my only sure reliance. My earnest prayer shall be constantly addressed to the all-wise and all-powerful Being who made me, and by whose dispensation I am called to the high office of President of this Confederacy, understandingly to carry out the principles of that Constitution which I have sworn "to protect, preserve, and defend."

The usual opportunity which is afforded to a Chief Magistrate upon his induction to office of presenting to his countrymen an exposition of the policy which would guide his Administration, in the form of an inaugural address, not having, under the peculiar circumstances which have brought me to the discharge of the high duties of President of the United States, been afforded to me, a brief exposition of the principles which will govern me in the general course of my administration of public affairs would seem to be due as well to myself as to you.

In regard to foreign nations, the groundwork of my policy will be justice on our part to all, submitting to injustice from none. While I shall sedulously cultivate the relations of peace and anity with one and all, it will be my most imperative duty to see that the honor of the country shall sustain no blemish. With a view to this, the condition of our military defenses will become a matter of anxious solicitude. The Army, which has in other days covered itself with renown, and the Navy, not inappropriately termed the right arm of the public defense, which has spread a light of glory over the American standard in all the waters of the earth, should be rendered replete with efficiency.

In view of the fact, well avouched by history, that the tendency of all human institutions is to concentrate power in the hands of a single man, and that their ultimate downfall has proceeded from this cause, I deem it of the most essential importance that a complete separation should take place between the sword and the purse. No matter where or how the public moneys shall be deposited, so long as the President can exert the power of appointing and removing at his pleasure the agents selected

for their custody the Commander in Chief of the Army and Navy is in fact the treasurer. A permanent and radical change should therefore be decreed. The patronage incident to the Presidential office, already great, is constantly increasing. Such increase is destined to keep pace with the growth of our population, until, without a figure of speech, an army of officeholders may be spread over the land. The unrestrained power exerted by a selfishly ambitious man in order either to perpetuate his authority or to hand it over to some favorite as his successor may lead to the employment of all the means within his control to accomplish his object. The right to remove from office, while subjected to no just restraint, is inevitably destined to produce a spirit of crouching servility with the official corps, which, in order to uphold the hand which feeds them, would lead to direct and active interference in the elections, both State and Federal, thereby subjecting the course of State legislation to the dictation of the chief executive officer and making the will of that officer absolute and supreme. I will at a proper time invoke the action of Congress upon this subject, and shall readily acquiesce in the adoption of all proper measures which are calculated to arrest these evils, so full of danger in their tendency. I will remove no incumbent from office who has faithfully and honestly acquitted himself of the duties of his office, except in such cases where such officer has been guilty of an active partisanship or by secret means-the less manly, and therefore the more objectionable-has given his official influence to the purposes of party, thereby bringing the patronage of the Government in conflict with the freedom of elections. Numerous removals may become necessary under this rule. These will be made by me through no acerbity of feeling-I have had no cause to cherish or indulge unkind feelings toward any-but my conduct will be regulated by a profound sense of what is due to the country and its institutions; nor shall I neglect to apply the same unbending rule to those of my own appointment. Freedom of opinion will be tolerated, the full enjoyment of the right of suffrage will be maintained as the birthright of every American citizen; but I say emphatically to the official corps, "Thus far and no farther." I have dwelt the longer upon this subject because removals from office are likely often to arise, and I would have my countrymen to understand the principle of the Executive action.

In all public expenditures the most rigid economy should be resorted to, and, as one of its results, a public debt in time of peace be sedulously avoided. A wise and patriotic constituency will never object to the imposition of necessary burdens for useful ends, and true wisdom dictates the resort to such means in order to supply deficiencies in the revenue, rather than to those doubtful expedients which, ultimating in a public debt, serve to embarrass the resources of the country and to lessen its ability to meet any great emergency which may arise. All sinccures should be abolished. The appropriations should be direct and explicit, so as to leave as limited a share of discretion to the disbursing agents as may be found compatible with the public service. A strict responsibility on the part of all the agents of the Government should be maintained and peculation or defalcation visited with immediate expulsion from office and the most condign punishment.

The public interest also demands that if any war has existed between the Government and the currency it shall cease. Measures of a financial character now having the sanction of legal enactment shall be faithfully enforced until repealed by the legislative authority. But I owe it to myself to declare that I regard existing enactments as unwise and impolitic and in a high degree oppressive. I shall promptly give my sanction to any constitutional measure which, originating in Congress, shall have for its object the restoration of a sound circulating medium, so essentially necessary to give confidence in all the transactions of life, to secure to industry its just and adequate rewards, and to reestablish the public prosperity. In deciding upon the adaptation of any such measure to the end proposed, as well as its conformity to the Constitution, I shall resort to the fathers of the great republican school for advice and instruction, to be drawn from their sage views of our system of government and the light of their ever-glorious example.

The institutions under which we live, my countrymen, secure each person in the perfect enjoyment of all his rights. The spectacle is exhibited to the world of a government deriving its powers from the consent of the governed and having imparted to it only so much power as is necessary for its successful operation. Those who are charged with its administration should carefully abstain from all attempts to enlarge the range of powers thus granted to the several departments of the Government other than by an appeal to the people for additional grants, lest by so doing they disturb that balance which the patriots and statesmen who framed the Constitution designed to establish between the Federal Government and the States composing the Union. The observance of these rules is enjoined upon us by that feeling of reverence and affection which finds a place in the heart of every patriot for the preservation of union and the blessings of union-for the good of our children and our children's children through countless generations. An opposite course could not fail to generate factions intent upon the gratification of their selfish ends, to give birth to local and sectional jealousies, and to ultimate either in breaking asunder the bonds of union or in building up a central system which would inevitably end in a bloody scepter and an iron crown.

In conclusion I beg you to be assured that I shall exert myself to carry the foregoing principles into practice during my administration of the Government, and, confiding in the protecting care of an everwatchful and overruling Providence, it shall be my first and highest duty to preserve unimpaired the free institutions under which we live and transmit them to those who shall succeed me in their full force and vigor.

JOHN TYLER.

[For proclamation of President Tyler recommending, in consequence of the death of President Harrison, a day of fasting and prayer, see p. 1887.]

SPECIAL SESSION MESSAGE.

WASHINGTON, June 1, 1841.

To the Senate and House of Representatives of the United States.

FELLOW-CITIZENS: You have been assembled in your respective halls of legislation under a proclamation bearing the signature of the illustrious citizen who was so lately called by the direct suffrages of the people to the discharge of the important functions of their chief executive office. Upon the expiration of a single month from the day of his installation he has paid the great debt of nature, leaving behind him a name associated with the recollection of numerous benefits conferred upon the country during a long life of patriotic devotion. With this public bereavement are connected other considerations which will not escape the attention of Congress. The preparations necessary for his removal to the seat of Government in view of a residence of four years must have devolved upon the late President heavy expenditures, which, if permitted to burthen the limited resources of his private fortune, may tend seriously to the embarrassment of his surviving family; and it is therefore respectfully submitted to Congress whether the ordinary principles of justice would not dictate the propriety of its legislative interposition. By the provisions of the fundamental law the powers and duties of the high station to which he was elected have devolved upon me, and in the dispositions of the representatives of the States and of the people will be found, to a great extent, a solution of the problem to which our institutions are for the first time subjected.

In entering upon the duties of this office I did not feel that it would be becoming in me to disturb what had been ordered by my lamented predecessor. Whatever, therefore, may have been my opinion originally as to the propriety of convening Congress at so early a day from that of its late adjournment, I found a new and controlling inducement not to interfere with the patriotic desires of the late President in the novelty of the situation in which I was so unexpectedly placed. My first wish under such circumstances would necessarily have been to have called to my aid in the administration of public affairs the combined wisdom of the two Houses of Congress, in order to take their counsel and advice as to the best mode of extricating the Government and the country from the embarrassments weighing heavily on both. I am, then, most happy in finding myself so soon after my accession to the Presidency surrounded by the immediate representatives of the States and people.

No important changes having taken place in our foreign relations since the last session of Congress, it is not deemed necessary on this occasion to go into a detailed statement in regard to them. I am happy to say that I see nothing to destroy the hope of being able to preserve peace. The ratification of the treaty with Portugal has been duly exchanged between the two Governments. This Government has not been inattentive to the interests of those of our citizens who have claims on the Government of Spain founded on express treaty stipulations, and a hope is indulged that the representations which have been made to that Government on this subject may lead ere long to beneficial results.

A correspondence has taken place between the Secretary of State and the minister of Her Britannic Majesty accredited to this Government on the subject of Alexander McLeod's indictment and imprisonment, copies of which are herewith communicated to Congress.

In addition to what appears from these papers, it may be proper to state that Alexander McLeod has been heard by the supreme court of the State of New York on his motion to be discharged from imprisonment, and that the decision of that court has not as yet been pronounced.

The Secretary of State has addressed to me a paper upon two subjects interesting to the commerce of the country, which will receive my consideration, and which I have the honor to communicate to Congress.

So far as it depends on the course of this Government, our relations of good will and friendship will be sedulously cultivated with all nations. The true American policy will be found to consist in the exercise of a spirit of justice, to be manifested in the discharge of all our international obligations to the weakest of the family of nations as well as to the most powerful. Occasional conflicts of opinion may arise, but when the discussions incident to them are conducted in the language of truth and with a strict regard to justice the scourge of war will for the most part be avoided. The time ought to be regarded as having gone by when a resort to arms is to be esteemed as the only proper arbiter of national differences.

The census recently taken shows a regularly progressive increase in our population. Upon the breaking out of the War of the Revolution our numbers scarcely equaled 3,000,000 souls; they already exceed 17,000,000, and will continue to progress in a ratio which duplicates in a period of about twenty-three years. The old States contain a territory sufficient in itself to maintain a population of additional millions, and the most populous of the new States may even yet be regarded as but partially settled, while of the new lands on this side of the Rocky Mountains, to say nothing of the immense region which stretches from the base of those mountains to the mouth of the Columbia River, about 770,000,000 acres, ceded and unceded, still remain to be brought into market. We hold out to the people of other countries an invitation to come and settle among 'us as members of our rapidly growing family, and for the blessings which we offer them we require of them to look upon our country as their country and to unite with us in the great task of preserving our institutions and thereby perpetuating our liberties. No motive exists for foreign conquest; we desire but to reclaim our almost illimitable wildernesses and to introduce into their depths the lights of civilization. While we shall at all times be prepared to vindicate the national honor, our most earnest desire will be to maintain an unbroken peace.

In presenting the foregoing views I can not withhold the expression of the opinion that there exists nothing in the extension of our Empire over our acknowledged possessions to excite the alarm of the patriot for the safety of our institutions. The federative system, leaving to each State the care of its domestic concerns and devolving on the Federal Government those of general import, admits in safety of the greatest expansion; but at the same time I deem it proper to add that there will be found to exist at all times an imperious necessity for restraining all the functionaries of this Government within the range of their respective powers, thereby preserving a just balance between the powers granted to this Government and those reserved to the States and to the people.

From the report of the Secretary of the Treasury you will perceive that the fiscal means, present and accruing, are insufficient to supply the wants of the Government for the current year. The balance in the Treasury on the 4th day of March last not covered by outstanding drafts, and exclusive of trust funds, is estimated at \$860,000. This includes the sum of \$215,000 deposited in the Mint and its branches to procure metal for coining and in process of coinage, and which could not be withdrawn without inconvenience, thus leaving subject to draft in the various depositories the sum of \$645,000. By virtue of two several acts of Congress the Secretary of the Treasury was authorized to issue on and after the 4th day of March last Treasury notes to the amount of \$5,413,000, making an aggregate available fund of \$6,058,000 on hand.

But this fund was chargeable, with outstanding Treasury notes redeemable in the current year and interest thereon, to the estimated amount of \$5,280,000. There is also thrown upon the Treasury the payment of a large amount of demands accrued in whole or in part in former years, which will exhaust the available means of the Treasury and leave the accruing revenue, reduced as it is in amount, burthened with debt and charged with the current expenses of the Government.

The aggregate amount of outstanding appropriations on the 4th day of March last was \$33,429,616.50, of which \$24,210,000 will be required during the current year; and there will also be required for the use of the War Department additional appropriations to the amount of \$2,511,132.98, the special objects of which will be seen by reference to the report of the Secretary of War. The anticipated means of the Treasury are greatly inadequate to this demand. The receipts from customs for the last three quarters of the last year and first quarter of the present year amounted to \$12,100,000; the receipts for lands for the same time to \$2,742,450, shewing an average revenue from both sources of \$1,236,870 per month.

A gradual expansion of trade, growing out of a restoration of confidence, together with a reduction in the expenses of collecting and punctuality on the part of collecting officers, may cause an addition to the monthly receipts from the customs. They are estimated for the residue of the year from the 4th of March at \$12,000,000. The receipts from the public lands for the same time are estimated at \$2,500,000, and from miscellaneous sources at \$170,000, making an aggregate of available fund within the year of \$15,315,000, which will leave a probable deficit of \$11,406,132.98. To meet this some temporary provision is necessary until the amount can be absorbed by the excess of revenues which are anticipated to accrue at no distant day.

There will fall due within the next three months Treasury notes of the issues of 1840, including interest, about \$2,850,000. There is chargeable in the same period for arrearages for taking the Sixth Census \$294,000, and the estimated expenditures for the current service are about \$8,100,000, making the aggregate demand upon the Treasury prior to the 1st of September next about \$11,340,000.

The ways and means in the Treasury and estimated to accrue within the above-named period consist of about \$694,000 of funds available on the 28th ultimo, an unissued balance of Treasury notes authorized by the act of 1841 amounting to \$1,955,000, and estimated receipts from all sources of \$3,800,000, making an aggregate of about \$6,450,000, and leaving a probable deficit on the 1st of September next of \$4,845,000.

In order to supply the wants of the Government, an intelligent constituency, in view of their best interests, will without hesitation submit to all necessary burthens. But it is nevertheless important so to impose them as to avoid defeating the just expectations of the country growing out of preexisting laws. The act of the 2d of March, 1833, commonly called the "compromise act," should not be altered except under urgent necessities, which are not believed at this time to exist. One year only remains to complete the series of reductions provided for by that law, at which time provisions made by the same law, and which then will be brought actively in aid of the manufacturing interests of the Union, will not fail to produce the most beneficial results. Under a system of discriminating duties imposed for purposes of revenue, in unison with the provisions of existing laws, it is to be hoped that our policy will in the future be fixed and permanent, so as to avoid those constant fluctuations which defeat the very objects they have in view. We shall thus best maintain a position which, while it will enable us the more readily to meet the advances of other countries calculated to promote our trade and commerce, will at the same time leave in our own hands the means of retaliating with greater effect unjust regulations.

In intimate connection with the question of revenue is that which makes provision for a suitable fiscal agent, capable of adding increased facilities in the collection and disbursement of the public revenues, rendering more secure their custody, and consulting a true economy in the great, multiplied, and delicate operations of the Treasury Department. Upon such an agent depends in an eminent degree the establishment of a currency of uniform value, which is of so great importance to all the essential interests of society, and on the wisdom to be manifested in its creation much depends. So intimately interwoven are its operations, not only with the interests of individuals, but of States, that it may be regarded to a great degree as controlling both. If paper be used as the chief medium of circulation, and the power be vested in the Government of issuing it at pleasure, either in the form of Treasury drafts or any other, or if banks be used as the public depositories, with liberty to regard all surpluses from day to day as so much added to their active capital, prices are exposed to constant fluctuations and industry to severe suffering. In the one case political considerations directed to party purposes may control, while excessive cupidity may prevail in the other. The public is thus constantly liable to imposition. Expansions and contractions may follow each other in rapid succession-the one engendering a reckless spirit of adventure and speculation, which embraces States as well as individuals, the other causing a fall in prices and accomplishing an entire change in the aspect of affairs. Stocks of all sorts rapidly decline, individuals are ruined, and States embarrassed even in their efforts to meet with punctuality the interest on their debts. Such, unhappily, is the condition of things now existing in the United States. These effects may readily be traced to the causes above referred The public revenues, being removed from the then Bank of the to. United States, under an order of a late President, were placed in selected State banks, which, actuated by the double motive of conciliating the Government and augmenting their profits to the greatest possible extent. enlarged extravagantly their discounts, thus enabling all other existing banks to do the same; large dividends were declared, which, stimulating the cupidity of capitalists, caused a rush to be made to the legislatures of the respective States for similar acts of incorporation, which by many of the States, under a temporary infatuation, were readily granted, and thus the augmentation of the circulating medium, consisting almost exclusively of paper, produced a most fatal delusion. An illustration derived from the land sales of the period alluded to will serve best to show the effect of the whole system. The average sales of the public lands for a period of ten years prior to 1834 had not much exceeded \$2,000,000 per annum. In 1834 they attained in round numbers to the amount of \$6,000,000; in the succeeding year of 1835 they reached \$16,000,000, and the next year of 1836 they amounted to the enormous sum of \$25,000,000, thus crowding into the short space of three years upward of twenty-three years' purchase of the public domain. So apparent had become the necessity of arresting this course of things that the executive department assumed the highly questionable power of discriminating in the funds to be used in payment by different classes of public debtors-a discrimination which was doubtless designed to correct this most ruinous state of things by the exaction of specie in all payments for the public lands, but which could not at once arrest the tide which had so strongly set in. Hence the demands for specie became

1897

unceasing, and corresponding prostration rapidly ensued under the necessities created with the banks to curtail their discounts and thereby to reduce their circulation. I recur to these things with no disposition to censure preexisting Administrations of the Government, but simply in exemplification of the truth of the position which I have assumed. If, then, any fiscal agent which may be created shall be placed, without due restrictions, either in the hands of the administrators of the Government or those of private individuals, the temptation to abuse will prove to be resistless. Objects of political aggrandizement may seduce the first, and the promptings of a boundless cupidity will assail the last. Aided by the experience of the past, it will be the pleasure of Congress so to guard and fortify the public interests in the creation of any new agent as to place them, so far as human wisdom can accomplish it, on a footing of perfect security. Within a few years past three different schemes have been before the country. The charter of the Bank of the United States expired by its own limitations in 1836. An effort was made to renew it, which received the sanction of the two Houses of Congress, but the then President of the United States exercised his *veto* power and the measure was defeated. A regard to truth requires me to say that the President was fully sustained in the course he had taken by the popular voice. His successor to the chair of state unqualifiedly pronounced his opposition to any new charter of a similar institution, and not only the popular election which brought him into power, but the elections through much of his term, seemed clearly to indicate a concurrence with him in sentiment on the part of the people. After the public moneys were withdrawn from the United States Bank they were placed in deposit with the State banks, and the result of that policy has been before the country. To say nothing as to the question whether that experiment was made under propitious or adverse circumstances, it may safely be asserted that it did receive the unqualified condemnation of most of its early advocates, and, it is believed, was also condemned by the popular sentiment. The existing subtreasury system does not seem to stand in higher favor with the people, but has recently been condemned in a manner too plainly indicated to admit of a doubt. Thus in the short period of eight years the popular voice may be regarded as having successively condemned each of the three schemes of finance to which I have adverted. As to the first, it was introduced at a time (1816) when the State banks, then comparatively few in number, had been forced to suspend specie payments by reason of the war which had previously prevailed with Great Britain. Whether if the United States Bank charter, which expired in 1811, had been renewed in due season it would have been enabled to continue specie payments during the war and the disastrous period to the commerce of the country which immediately succeeded is, to say the least, problematical, and whether the United States Bank of 1816 produced a

restoration of specie payments or the same was accomplished through the instrumentality of other means was a matter of some difficulty at that time to determine. Certain it is that for the first years of the operation of that bank its course was as disastrous as for the greater part of its subsequent career it became eminently successful. As to the second, the experiment was tried with a redundant Treasury, which continued to increase until it seemed to be the part of wisdom to distribute the surplus revenue among the States, which, operating at the same time with the specie circular and the causes before adverted to, caused them to suspend specie payments and involved the country in the greatest embar-And as to the third, if carried through all the stages of its rassment. transmutation from paper and specie to nothing but the precious metals, to say nothing of the insecurity of the public moneys, its injurious effects have been anticipated by the country in its unqualified condemnation. What is now to be regarded as the judgment of the American people on this whole subject I have no accurate means of determining but by appealing to their more immediate representatives. The late contest, which terminated in the election of General Harrison to the Presidency, was decided on principles well known and openly declared, and while the subtreasury received in the result the most decided condemnation, yet no other scheme of finance seemed to have been concurred in. To you, then, who have come more directly from the body of our common constituents, I submit the entire question, as best qualified to give a full exposition of their wishes and opinions. I shall be ready to concur with you in the adoption of such system as you may propose, reserving to myself the ultimate power of rejecting any measure which may, in my view of it, conflict with the Constitution or otherwise jeopardize the prosperity of the country-a power which I could not part with even if I would, but which I will not believe any act of yours will call into requisition.

I can not avoid recurring, in connection with this subject, to the necessity which exists for adopting some suitable measure whereby the unlimited creation of banks by the States may be corrected in future. Such result can be most readily achieved by the consent of the States, to be expressed in the form of a compact among themselves, which they can only enter into with the consent and approbation of this Government-a consent which might in the present emergency of the public demands justifiably be given by Congress in advance of any action by the States, as an inducement to such action, upon terms well defined by the act of tender. Such a measure, addressing itself to the calm reflection of the States, would find in the experience of the past and the condition of the present much to sustain it; and it is greatly to be doubted whether any scheme of finance can prove for any length of time successful while the States shall continue in the unrestrained exercise of the power of creating banking corporations. This power can only be limited by their consent.

With the adoption of a financial agency of a satisfactory character the hope may be indulged that the country may once more return to a state of prosperity. Measures auxiliary thereto, and in some measure inseparably connected with its success, will doubtless claim the attention of Congress. Among such, a distribution of the proceeds of the sales of the public lands, provided such distribution does not force upon Congress the necessity of imposing upon commerce heavier burthens than those contemplated by the act of 1833, would act as an efficient remedial measure by being brought directly in aid of the States. As one sincerely devoted to the task of preserving a just balance in our system of Government by the maintenance of the States in a condition the most free and respectable and in the full possession of all their power, I can no otherwise than feel desirous for their emancipation from the situation to which the pressure on their finances now subjects them. And while I must repudiate, as a measure founded in error and wanting constitutional sanction, the slightest approach to an assumption by this Government of the debts of the States, yet I can see in the distribution adverted to much to recommend it. The compacts between the proprietor States and this Government expressly guarantee to the States all the benefits which may arise from the sales. The mode by which this is to be effected addresses itself to the discretion of Congress as the trustee for the States, and its exercise after the most beneficial manner is restrained by nothing in the grants or in the Constitution so long as Congress shall consult that equality in the distribution which the compacts require. In the present condition of some of the States the question of distribution may be regarded as substantially a question between direct and indirect taxation. If the distribution be not made in some form or other, the necessity will daily become more urgent with the debtor States for a resort to an oppressive system of direct taxation, or their credit, and necessarily their power and influence, will be greatly diminished. The payment of taxes after the most inconvenient and oppressive mode will be exacted in place of contributions for the most part voluntarily made, and therefore comparatively unoppressive. The States are emphatically the constituents of this Government, and we should be entirely regardless of the objects held in view by them in the creation of this Government if we could be indifferent to their good. The happy effects of such a measure upon all the States would immediately be manifested. With the debtor States it would effect the relief to a great extent of the citizens from a heavy burthen of direct taxation, which presses with severity on the laboring classes, and eminently assist in restoring the general prosperity. An immediate advance would take place in the price of the State securities, and the attitude of the States would become once more, as it should ever be, lofty and erect. With States laboring under no extreme pressure from debt, the fund which they would derive from this source would enable them to improve their condition in an eminent degree. So far 62

as this Government is concerned, appropriations to domestic objects approaching in amount the revenue derived from the land sales might be abandoned, and thus a system of unequal, and therefore unjust, legislation would be substituted by one dispensing equality to all the members of this Confederacy. Whether such distribution should be made directly to the States in the proceeds of the sales or in the form of profits by virtue of the operations of any fiscal agency having those proceeds as its basis, should such measure be contemplated by Congress, would well deserve its consideration. Nor would such disposition of the proceeds of the sales in any manner prevent Congress from time to time from passing all necessary preemption laws for the benefit of actual settlers, or from making any new arrangement as to the price of the public lands which might in future be esteemed desirable.

I beg leave particularly to call your attention to the accompanying report from the Secretary of War. Besides the present state of the war which has so long afflicted the Territory of Florida, and the various other matters of interest therein referred to, you will learn from it that the Secretary has instituted an inquiry into abuses, which promises to develop gross enormities in connection with Indian treaties which have been negotiated, as well as in the expenditures for the removal and subsistence of the Indians. He represents also other irregularities of a serious nature that have grown up in the practice of the Indian Department, which will require the appropriation of upward of \$200,000 to correct, and which claim the immediate attention of Congress.

In reflecting on the proper means of defending the country we can not shut our eyes to the consequences which the introduction and use of the power of steam upon the ocean are likely to produce in wars between maritime states. We can not yet see the extent to which this power may be applied in belligerent operations, connecting itself as it does with recent improvements in the science of gunnery and projectiles; but we need have no fear of being left, in regard to these things, behind the most active and skillful of other nations if the genius and enterprise of our fellow-citizens receive proper encouragement and direction from Government.

True wisdom would nevertheless seem to dictate the necessity of placing in perfect condition those fortifications which are designed for the protection of our principal cities and roadsteads. For the defense of our extended maritime coast our chief reliance should be placed on our Navy, aided by those inventions which are destined to recommend themselves to public adoption, but no time should be lost in placing our principal cities on the scaboard and the Lakes in a state of entire security from foreign assault. Separated as we are from the countries of the Old World, and in much unaffected by their policy, we are happily relieved from the necessity of maintaining large standing armies in times of peace. The policy which was adopted by Mr. Monroe shortly after the conclusion of

the late war with Great Britain of preserving a regularly organized staff sufficient for the command of a large military force should a necessity for one arise is founded as well in economy as in true wisdom. Provision is thus made, upon filling up the rank and file, which can readily be done on any emergency, for the introduction of a system of discipline both promptly and efficiently. All that is required in time of peace is to maintain a sufficient number of men to guard our fortifications, to meet any sudden contingency, and to encounter the first shock of war. Our chief reliance must be placed on the militia; they constitute the great body of national guards, and, inspired by an ardent love of country, will be found ready at all times and at all seasons to repair with alacrity to its defense. It will be regarded by Congress, I doubt not, at a suitable time as one of its highest duties to attend to their complete organization and discipline.

The state of the navy pension fund requires the immediate attention of Congress. By the operation of the act of the 3d of March, 1837, entitled "An act for the more equitable administration of the navy pension fund," that fund has been exhausted. It will be seen from the accompanying report of the Commissioner of Pensions that there will be required for the payment of navy pensions on the 1st of July next \$88,706.06¹/₃, and on the 1st of January, 1842, the sum of \$69,000. In addition to these sums, about \$6,000 will be required to pay arrears of pensions which will probably be allowed between the 1st of July and the 1st of January, 1842, making in the whole \$163,706.06¹/₃. To meet these payments there is within the control of the Department the sum of \$28,040, leaving a deficiency of \$139,666.06¹/₃. The public faith requires that immediate provision should be made for the payment of these sums.

In order to introduce into the Navy a desirable efficiency, a new system of accountability may be found to be indispensably necessary. To mature a plan having for its object the accomplishment of an end so important and to meet the just expectations of the country require more time than has yet been allowed to the Secretary at the head of the Department. The hope is indulged that by the time of your next regular session measures of importance in connection with this branch of the public service may be matured for your consideration.

Although the laws regulating the Post-Office Department only require from the officer charged with its direction to report at the usual annual session of Congress, the Postmaster-General has presented to me some facts connected with the financial condition of the Department which are deemed worthy the attention of Congress. By the accompanying report of that officer it appears the existing liabilities of that Department beyond the means of payment at its command can not be less than \$500,000. As the laws organizing that branch of the public service confine the expenditure to its own revenues, deficiencies therein can not be presented under the usual estimates for the expenses of Government. It must therefore be left to Congress to determine whether the moneys now due the contractors shall be paid from the public Treasury or whether that Department shall continue under its present embarrassments. It will be seen by the report of the Postmaster-General that the recent lettings of contracts in several of the States have been made at such reduced rates of compensation as to encourage the belief that if the Department was relieved from existing difficulties its future operations might be conducted without any further call upon the general Treasury.

The power of appointing to office is one of a character the most delicate and responsible. The appointing power is evermore exposed to be led into error. With anxious solicitude to select the most trustworthy for official station, I can not be supposed to possess a personal knowledge of the qualifications of every applicant. I deem it, therefore, proper in this most public manner to invite on the part of the Senate a just scrutiny into the character and pretensions of every person I may bring to their notice in the regular form of a nomination for office. Unless persons every way trustworthy are employed in the public service, corruption and irregularity will inevitably follow. I shall with the greatest cheerfulness acquiesce in the decision of that body, and, regarding it as wisely constituted to aid the executive department in the performance of this delicate duty, I shall look to its "consent and advice" as given only in furtherance of the best interests of the country. I shall also at the earliest proper occasion invite the attention of Congress to such measures as in my judgment will be best calculated to regulate and control the Executive power in reference to this vitally important subject.

I shall also at the proper season invite your attention to the statutory enactments for the suppression of the slave trade, which may require to be rendered more efficient in their provisions. There is reason to believe that the traffic is on the increase. Whether such increase is to be ascribed to the abolition of slave labor in the British possessions in our vicinity and an attendant diminution in the supply of those articles which enter into the general consumption of the world, thereby augmenting the demand from other quarters, and thus calling for additional labor, it were needless to inquire. The highest considerations of public honor as well as the strongest promptings of humanity require a resort to the most vigorous efforts to suppress the trade.

In conclusion I beg to invite your particular attention to the interests of this District; nor do I doubt but that in a liberal spirit of legislation you will seek to advance its commercial as well as its local interests. Should Congress deem it to be its duty to repeal the existing subtreasury law, the necessity of providing a suitable place of deposit of the public moneys which may be required within the District must be apparent to all.

I have felt it due to the country to present the foregoing topics to

your consideration and reflection. Others with which it might not seem proper to trouble you at an extraordinary session will be laid before you at a future day. I am happy in committing the important affairs of the country into your hands. The tendency of public sentiment, I am pleased to believe, is toward the adoption, in a spirit of union and harmony, of such measures as will fortify the public interests. To cherish such a tendency of public opinion is the task of an elevated patriotism. That differences of opinion as to the means of accomplishing these desirable objects should exist is reasonably to be expected. Nor can all be made satisfied with any system of measures; but I flatter myself with the hope that the great body of the people will readily unite in support of those whose efforts spring from a disinterested desire to promote their happiness, to preserve the Federal and State Governments within their respective orbits; to cultivate peace with all the nations of the earth on just and honorable grounds; to exact obedience to the laws; to intrench liberty and property in full security; and, consulting the most rigid economy, to abolish all useless expenses. JOHN TYLER.

SPECIAL MESSAGES.

CITY OF WASHINGTON, June 2, 1841.

To the Senate and House of Representatives:

I transmit herewith a report from the Secretary of the Treasury, exhibiting certain transfers of appropriations that have been made in that Department in pursuance of the power vested in the President of the United States by the act of Congress of the 3d of March, 1809, entitled "An act further to amend the several acts for the establishment and regulation of the Treasury, War, and Navy Departments."

JOHN TYLER.

To the Senate of the United States: WASHINGT

I transmit to the Senate the inclosed communication* from the Secretary of State, in answer to a resolution of the Senate of the 12th instant.

JOHN TYLER.

WASHINGTON, June 17, 1841.

To the Senate of the United States:

I transmit to the Senate the inclosed communication from the Secretary of State, in answer to a resolution of the Senate of the 12th instant. JOHN TYLER.

*Relating to the commissioners appointed to investigate the condition of the public works in Washington, D. C., and transmitting copy of the letter of instructions issued to them.

WASHINGTON, June 17, 1841.

tates: WASHINGTON, June 1

WASHING

The PRESIDENT.

DEPARTMENT OF STATE, June 15, 1841.

SIR: In answer to the resolution of the Senate of the 12th instant, calling for "any orders which may have been issued to the officers of the Army and Navy in relation to political offenses in elections," etc., I inclose a copy of the circular letter addressed, under the direction of the President, by this Department to the heads of the other Departments, and know of no other order to which the resolution can be supposed to have reference.

I have the honor to be, your obedient servant,

DANIEL WEBSTER.

CIRCULAR.

DEPARTMENT OF STATE, March 20, 1841.

SIR: The President is of opinion that it is a great abuse to bring the patronage of the General Government into conflict with the freedom of elections, and that this abuse ought to be corrected wherever it may have been permitted to exist, and to be prevented for the future.

He therefore directs that information be given to all officers and agents in your department of the public service that partisan interference in popular elections, whether of State officers or officers of this Government, and for whomsoever or against whomsoever it may be exercised, or the payment of any contribution or assessment on salaries, or official compensation for party or election purposes, will be regarded by him as cause of removal.

It is not intended that any officer shall be restrained in the free and proper expression and maintenance of his opinions respecting public men or public measures, or in the exercise to the fullest degree of the constitutional right of suffrage. But persons employed under the Government and paid for their services out of the public Treasury are not expected to take an active or officious part in attempts to influence the minds or votes of others, such conduct being deemed inconsistent with the spirit of the Constitution and the duties of public agents acting under it; and the President is resolved, so far as depends upon him, that while the exercise of the elective franchise by the people shall be free from undue influences of official station and authority, opinion shall also be free among the officers and agents of the Government.

The President wishes it further to be announced and distinctly understood that from all collecting and disbursing officers promptitude in rendering accounts and entire punctuality in paying balances will be rigorously exacted. In his opinion it is time to return in this respect to the early practice of the Government, and to hold any degree of delinquency on the part of those intrusted with the public money just cause of immediate removal. He deems the severe observance of this rule to be essential to the public service, as every dollar lost to the Treasury by unfaithfulness in office creates a necessity for a new charge upon the people.

I have the honor to be, sir, your obedient servant,

DANIEL WEBSTER.

WASHINGTON, D. C., June 18, 1841.

To the Senate of the United States:

I transmit to the Senate a report from the Secretary of the Navy, with accompanying documents,* in answer to their resolution of the 12th instant.

JOHN TYLER.

^{*}Correspondence of the minister in England with the officers of the Mediterranean Squadron, in consequence of which the squadron left that station, and the dispatches of Captain Bolton to the Secretary of the Navy connected with that movement.

To the Senate of the United States:

WASHINGTON, June, 1841.

I have the honor to transmit to the Senate the accompanying letter* from the Secretary of the Treasury, in pursuance of its resolution of the 8th instant.

JOHN TYLER.

WASHINGTON, June 22, 1841. To the Senate and House of Representatives of the United States:

I have the honor to submit the accompanying correspondence between myself and the Hon. J. Burnet, J. C. Wright, and others, who arrived some days ago in this city as a committee on behalf of the people of Cincinnati for the purpose, with the assent of the family, of removing the remains of the late President of the United States to North Bend for interment. I have thought it to be my duty thus to apprise Congress of the contemplated proceedings.

JOHN TYLER.

WASHINGTON CITY, June 16, 1841.

The PRESIDENT OF THE UNITED STATES.

DEAR SIR: The undersigned were appointed by the citizens and the city council of Cincinnati and by many of the surviving soldiers of the late war to apply to the widow and family of our distinguished fellow-citizen, the late President of the United States, for permission to remove his remains from the city of Washington to the State of Ohio for interment. They have made the application directed, and have received permission to perform that sacred trust. They have now the honor of reporting to you their arrival in this city, and of asking your approbation of the measure contemplated and your cooperation in carrying it into effect.

We are fully aware of the high estimate you placed on the talents and virtues of our lamented friend and fellow-citizen, the late Chief Magistrate of the Union, whose friendship and confidence you possessed many years. We saw the tear fall from your eye and mingle with the tears of the nation when the inscrutable will of Heaven removed him from us.

Knowing these things, we approach you with confidence, well assured that you will justly appreciate our motive for undertaking the mournful duty we have been deputed to perform, and that the same kind feeling which has marked your course through life will prompt you on this occasion to afford us your countenance, and, if necessary, your cooperation.

If it meet your approbation, the committee will do themselves the honor of waiting upon you at the President's house at any hour you may please to designate.

With high respect, we are, your friends and fellow-citizens,

J. BURNET. J. C. WRIGHT. [AND 10 OTHERS.]

WASHINGTON, June 17, 1841.

J. BURNET, J. C. WRIGHT, AND OTHERS OF THE COMMITTEE.

GENTLEMEN: Your letter of the 16th was duly handed me, and I lose no time in responding to the feelings and sentiments which you have expressed for yourselves and those you represent, and which you have correctly ascribed to me in regard to

* Relating to allowances since March 4, 1841, of claims arising under the invasion of East Florida in 1812. the lamented death of the late President. As a citizen I respected him; as a patriot I honored him; as a friend he was near and dear to me. That the people of Cincinnati should desire to keep watch over his remains by entombing them near their city is both natural and becoming; that the entire West, where so many evidences of his public usefulness are to be found, should unite in the same wish was to have been expected; and that the surviving soldiers of his many battles, led on by him to victory and to glory, should sigh to perform the last melancholy duties to the remains of their old commander is fully in consonance with the promptings of a noble and generous sympathy. I could not, if I was authorized to do so, oppose myself to their wishes. I might find something to urge on behalf of his native State in my knowledge of his continued attachment to her through the whole period of his useful life; in the claims of his relatives there, whose desire it would be that the mortal remains of the illustrious son should sleep under the same turf with those of his distinguished father, one of the signers of the Declaration of Independence; in the wish of the citizens of his native county to claim all that is now left of him for whom they so lately cast their almost unanimous suffrage; to say nothing of my own feelings, allied as I am by blood to many of his near relatives, and with our names so closely associated in much connected with the late exciting political contest. These considerations might present some reasonable ground for opposing your wishes; but the assent which has been given by his respected widow and nearest relatives to the request of the people of Cincinnati admits of no opposition on my part, neither in my individual nor official character.

I shall feel it to be my duty, however, to submit our correspondence to the two Houses of Congress, now in session, but anticipating no effort from that quarter to thwart the wishes expressed by yourselves in consonance with those of the widow and nearest relatives of the late President. I readily promise you my cooperation toward enabling you to fulfill the sacred trust which brought you to this city.

I tender to each of you, gentlemen, my cordial salutations. JOHN TYLER.

NOTE.-The remains of the late President of the United States were removed from Washington to North Bend, Ohio, June 26, 1841.]

To the Senate of the United States:

In compliance with the resolution of the Senate of the 14th instant, I have the honor to submit the accompanying reports from the Secretary of State and Secretary of the Treasury, which embrace all the information possessed by the executive department upon that subject.*

JOHN TYLER.

WASHINGTON, June 30, 1841.

To the House of Representatives of the United States:

The accompanying memorial in favor of the passage of a bankrupt law, signed by nearly 3,000 of the inhabitants of the city of New York, has been forwarded to me, attended by a request that I would submit it to the consideration of Congress. I can not waive a compliance with a request urged upon me by so large and respectable a number of my fellow-citizens. That a bankrupt law, carefully guarded against fraudulent practices and embracing as far as practicable all classes of societythe failure to do which has heretofore constituted a prominent objection

* Payment or assumption of State stocks by the General Government.

1907

WASHINGTON, June 29, 1841.

to the measure—would afford extensive relief I do not doubt. The distress incident to the derangements of some years past has visited large numbers of our fellow-citizens with hopeless insolvency, whose energies, both mental and physical, by reason of the load of debt pressing upon them, are lost to the country. Whether Congress shall deem it proper to enter upon the consideration of this subject at its present extraordinary session it will doubtless wisely determine. I have fulfilled my duty to the memorialists in submitting their petition to your consideration.

JOHN TYLER.

To the Senate of the United States:

I have the honor herewith to submit to the Senate the copy of a letter addressed by myself to Mrs. Harrison in compliance with the resolutions of Congress, and her reply thereto. JOHN TYLER.

[The same message was sent to the House of Representatives.]

Mrs. ANNA HARRISON.

My DEAR MADAM: The accompanying resolutions, adopted by the Senate and House of Representatives of the United States, will convey to you an expression of the deep sympathy felt by the representatives of the States and of the people in the sad bereavement which yourself and the country have sustained in the death of your illustrious husband. It may now be justly considered that the public archives constitute his enduring monument, on which are inscribed in characters not to be effaced the proudest evidences of public gratitude for services rendered and of sorrow for his death. A great and united people shed their tears over the bier of a devoted patriot and distinguished public benefactor.

In conveying to you, my dear madam, the profound respect of the two Houses of Congress for your person and character, and their sincere condolence on the late afflicting dispensation of Providence, permit me to mingle my feelings with theirs and to tender you my fervent wishes for your health, happiness, and long life.

JOHN TYLER.

A RESOLUTION manifesting the sensibility of Congress upon the event of the death of William Henry Harrison, late President of the United States.

The melancholy event of the death of William Henry Harrison, the late President of the United States, having occurred during the recess of Congress, and the two Houses sharing in the general grief and desiring to manifest their sensibility upon the occasion of that public bereavement: Therefore,

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the chairs of the President of the Senate and of the Speaker of the House of Representatives be shrouded in black during the residue of the session, and that the President pro lempore of the Senate, the Speaker of the House of Representatives, and the members and officers of both Houses wear the usual badge of mourning for thirty days.

Resolved, That the President of the United States be requested to transmit a copy of these resolutions to Mrs. Harrison, and to assure her of the profound respect of the two Houses of Congress for her person and character, and of their sincere condolence on the late afflicting dispensation of Providence.

WASHINGTON, July 1, 1841.

WASHINGTON, June 13, 1841.

His Excellency JOHN TYLER,

President United States, Washington City, D. C.

DEAR SIR: I have received with sentiments of deep emotion the resolutions of the Senate and House of Representatives which you have done me the honor of forwarding, relative to the decease of my lamented husband.

I can not sufficiently express the thanks I owe to the nation and its assembled representatives for their condolence, so feelingly expressed, of my individual calamity and the national bereavement; but, mingling my tears with the sighs of the many patriots of the land, pray to Heaven for the enduring happiness and prosperity of our beloved country.

ANNA HARRISON.

NORTH BEND, June 24, 1841.

WASHINGTON, July 3, 1841. To the Senate of the United States:

In compliance with a resolution of the Senate of the 9th instant [ultimo], I communicate to that body a report from the Secretary of State, conveying copies of the correspondence,* which contains all the information called for by said resolution.

JOHN TYLER.

To the Senate of the United States:

I transmit a report from the Secretary of State, in answer to the resolution of the Senate of the 2d instant, calling for information as to the progress and actual condition of the commission[†] under the convention with the Mexican Republic. JOHN TYLER.

WASHINGTON, July 14, 1841.

To the Speaker and Members of the House of Representatives:

In compliance with a resolution of the House of Representatives of the 21st ultimo, I have the honor to submit the accompanying communication [†] from the Secretary of State. JOHN TYLER.

To the House of Representatives:

I herewith transmit to the House of Representatives, in reply to their resolution of the 21st ultimo, a report § from the Secretary of State, with accompanying papers.

*Relating to the duties levied on American tobacco imported into the States composing the German Commercial and Custom-House Union

†Appointed under the convention of April 11, 1839, for adjusting the claims of citizens of the United States upon the Republic of Mexico.

Stating that there is no correspondence in his office showing that any American citizens are British prisoners of state in Van Diemens Land; transmitting correspondence with the British minister on the subject of the detention or imprisonment of citizens of the United States on account of occurrences in Canada, instructions issued to the special agent appointed to inquire nto such detention or imprisonment, and report of said special agent.

1000

WASHINGTON, July 9, 1841.

WASHINGTON, July 16, 1841.

JOHN TYLER.

Transmitting correspondence with Great Britain relative to the seizure of American vessels by British armed cruisers under the preteuse that they were engaged in the slave trade; also correspondence with N. P. Trist, United States consul at Habana, upon the subject of the slave trade, etc.

WASHINGTON, July 19, 1841.

To the Senate and House of Representatives of the United States:

The act of Congress of the 10th of March, 1838, entitled "An act supplementary to an act entitled 'An act in addition to the act for the punishment of certain crimes against the United States and to repeal the acts therein mentioned,' approved 20th of April, 1818,'' expired by its own limitation on the 10th of March, 1840. The object of this act was to make further provision for preventing military expeditions or enterprises against the territory or dominions of any prince or state or of any colony, district, or people conterminous with the United States and with whom they are at peace, contrary to the act of April 20, 1818, entitled "An act in addition to the act for the punishment of certain crimes against the United States and to repeal the acts therein mentioned."

The act of Congress of March 10, 1838, appears to have had a very salutary effect, and it is respectfully recommended to Congress that it be now revived or its provisions be reenacted.

JOHN TYLER.

WASHINGTON, July 27, 1841.

To the Senate and House of Representatives of the United States:

I transmit herewith to Congress a communication from the Secretary of State, on the subject of appropriations required for outfits and salaries of diplomatic agents of the United States.

JOHN TYLER.

WASHINGTON, August 2, 1841.

To the House of Representatives of the United States:

On the 18th of February, 1832, the House of Representatives adopted a resolution in the following words:

Resolved, That the President of the United States be authorized to employ Horatio Greenough, of Massachusetts, to execute in marble a full-length pedestrian statue of Washington, to be placed in the center of the Rotunda of the Capitol; the head to be a copy of Houdon's Washington, and the accessories to be left to the judgment of the artist.

On the 23d of the same month the Secretary of State, by direction of the President, addressed to Mr. Greenough a letter of instructions for carrying into effect the resolution of the House.

On the 14th of July, 1832, an appropriation of the sum of \$5,000 was made "to enable the President of the United States to contract with a skillful artist to execute in marble a pedestrian statue of George Washington, to be placed in the center of the Rotunda of the Capitol," and several appropriations were made at the succeeding sessions in furtherance of the same object.

Mr. Greenough, having been employed upon the work for several years at Florence, completed it some months ago.

By a resolution of Congress of the 27th of May, 1840, it was directed "that the Secretary of the Navy be authorized and instructed to take measures for the importation and erection of the statue of Washington by Greenough." In pursuance of this authority the Navy Department held a correspondence with Commodore Hull, commanding on the Mediterranean station, who entered into an agreement with the owners or master of the ship *Sea* for the transportation of the statue to the United States. This ship, with the statue on board, arrived in this city on the 31st ultimo, and now lies at the navy-yard.

As appropriations have become necessary for the payment of the freight and other expenses, I communicate to Congress such papers as may enable it to judge of the amount required. JOHN TYLER.

Hon. JOHN WHITE,

Speaker of the House of Representatives.

SIR: I herewith transmit a communication* received from the Postmaster-General, to which I would invite the attention of Congress.

JOHN TYLER.

AUGUST 3, 1841.

To the House of Representatives:

I herewith transmit a report from the Secretary of the Treasury, to whom I referred the resolution of the House calling for a communication[†] addressed to him by the French minister.

JOHN TYLER.

To the House of Representatives:

In compliance with a resolution of the House of Representatives of the 16th of July, 1841, I communicate reports ‡ from the several Executive Departments, containing the information requested by said resolution.

JOHN TYLER.

WASHINGTON, August 25, 1841.

WASHINGTON, August 6, 1841.

To the Senate of the United States:

I herewith transmit to the Senate, in pursuance of their resolution of the 22d ultimo, copies of the several reports of the commissioners appointed in March last to examine into certain matters connected with the public buildings in this city and the conduct of those employed in their erection.

JOHN TYLER.

1911

AUGUST 3, 1841.

^{*}Asking for a further appropriation for completing the new General Post-Office building.

[†] Relating to the commerce and navigation between France and the United States.

[‡]Transmitting list of officers deriving their appointments from the nomination of the President and the concurrence of the Senate who were removed from office since March 4, 1841, and also those who were removed from March 4, 1829, to March 4, 1841.

WASHINGTON, August 27, 1841.

To the House of Representatives of the United States:

I transmit herewith a letter from the Secretary of the Treasury, bearing date this day, with the accompanying papers, in answer to the resolution of the House of Representatives of the 16th ultimo, relative to removals from office, etc.

These statements should have accompanied those from the other Departments on the same subject transmitted in my message to the House on the 7th ultimo,* but which have been delayed for reasons stated in the letter of the Secretary of the Treasury above referred to.

JOHN TYLER.

WASHINGTON, D. C., September 1, 1841.

To the Senate of the United States:

I submit to the Senate, for its consideration and constitutional action, a treaty concluded at Oeyoowasha, on Minneesota (or St. Peters) River, in the Territory of Iowa, on the 31st day of July last, between James Duane Doty, commissioner on the part of the United States, and the Seeseeahto, Wofpato, and Wofpakoota bands of the Dakota (or Sioux) Nation of Indians.

The accompanying communication from the Secretary of War fully sets forth the considerations which have called for the negotiation of this treaty, and which have induced me to recommend its confirmation, with such exceptions and modifications as the Senate may advise.

JOHN TYLER.

DEPARTMENT OF WAR, August 31, 1841.

The PRESIDENT OF THE UNITED STATES.

SIR: I transmit herewith a treaty concluded with certain bands of the Dahcota Nation of Indians, commonly called Sioux, which has been received at this Department from His Excellency James D. Doty, governor of Wisconsin, who was appointed a commissioner on the part of the United States for the purpose of negotiating the treaty; and I desire to submit the following facts and opinions inducing me to request its favorable consideration:

It was known on my entering upon the duties of the Department of War that some provision must speedily be made for the Winnebago Indians in the Northwest. By the treaty with those Indians in 1837 it was provided that they should move temporarily upon a narrow strip of country west of the Mississippi River, called the neutral ground, from the object of its purchase in 1830. That strip of country is only 40 miles in width, 20 miles of it having been purchased from the Sac and Fox Indians and 20 miles from the Sioux, the object of the purchase having been to place a barrier between those tribes, which had been for many years at war and parties of which were continually meeting and destroying each other upon or adjacent to the country purchased.

When the delegation of Winnebago chiefs was in Washington negotiating a sale of all their lands east of the Mississippi River, in 1837, a permanent location for those Indians was not fixed upon, and a temporary expedient was adopted, and acceded to

*Not found. Evidently refers to message of August 6, 1841, on preceding page.

by the Indians, by which they agreed, within eight months from the ratification of the treaty, to move upon and occupy a portion of the neutral ground until they should select a permanent home.

Owing to the small extent of country thus temporarily assigned to the Winnebagoes, utterly destitute of all preparation for the reception of them, slenderly supplied with game, and, above all, the circumstance that the Sac and Fox Indians were continually at war with the Sioux, the object of the purchase having utterly failed, the neutral ground, so called, proving literally the fighting ground of the hostile tribes-owing to all these circumstances the Winnebagoes were extremely reluctant to comply with the treaty. It was in part a dictate of humanity to give them more time for removal than that allotted in the treaty, in the hope of effecting their permanent removal beyond the Missouri or elsewhere; but as no steps were taken to select their future home, and as the white settlers in Wisconsin were fast crowding upon the Indians, overrunning the country, as usual, in search of town sites, water privileges, and farming districts, it became absolutely necessary to make some efforts toward carrying the treaty into effect. Owing to the excited state of the Indians and the apprehension of disturbance, the Eighth Regiment of Infantry, in 1840, more than two years, instead of eight months, after the ratification of the treaty, was ordered upon the Winnebago frontier, the greater part of the Fifth Regiment being already there, and in the presence of that force the Indians were required to comply with the treaty. They reluctantly removed from the banks of the Wisconsin River and crossed the Mississippi, but did not go to that portion of the neutral ground agreed upon, which commenced 20 miles from the river, but instead of it they spread themselves along the bank of the Mississippi, some of them recrossing that river and ascending the Chippewa and Black rivers. Only a small portion of the tribe has yet removed to the portion of the neutral ground assigned to them, and it is perhaps fortunate that local attachments have not been formed, since, from the position of the country, it was not and never could have been intended as their permanent home.

After a careful examination of the country in the Northwest the importance of providing for the Winnebago Indians, though immediate, became secondary in a more national and wider prospect of benefits in future years by arrangements which presented themselves to my mind as not only practicable, but of easy accomplishment.

A glance at the map and at the efforts hitherto made in emigration will show an extensive body of Indians accumulated upon the Southwestern frontier, and, looking to the numbers yet to be emigrated from within the circle of territory soon to become States of the American Union, it will appear upon very many considerations to be of the utmost importance to separate the Indians and to interpose a barrier between the masses which are destined to be placed upon the western frontier, instead of accumulating them within limits enabling them to unite and in concert spread desolation over the States of Missouri and Arkansas to, perhaps, the banks of the Mississippi.

Entertaining these views, it was determined to open negotiations with the Sioux Indians north and northwest of the purchase of 1830, the neutral ground, so called, with the purpose of purchasing sufficient territory beyond the reasonable limits of Iowa to provide a resting place for the Winnebagoes, intending to treat also with the Sac and Fox Indians and with the Potawatamies north of the State of Missouri, and thus enable our citizens to expand west of the Missouri River north of the State.

It is difficult to state in a condensed report all the reasons now imperatively urging the adoption of these measures. Besides the absolute necessity of providing a home for the Winnebagoes, the eitizens of Iowa and of Missouri are crowding upon the territory of the Sac and Fox Indians and already producing those irritations which in former times have led to bloody wars. It is not to be for a moment concealed that our enterprising and hardy population must and will occupy the territory adjacent to that purchased in 1837 from the Sacs and Foxes, and the only possible mode of its being done in peace is by another purchase from those Indians. But the position of the Potawatamies will then become relatively what that of the Sac and Fox Indians now is, with the difference that access to their country by the Missouri River will hasten its occupancy by our people. The only mode of guarding against future collision, near at hand if not provided against, is by emigrating not only the Sac and Fox Indians, but also the Potawatamies.

Great efforts have been made to induce those Indians, as also the Winnebagoes, to move south of the Missouri, but without effect, their opposition to it being apparently insurmountable, the Potawatamies expressing the most decided aversion to it on being urged to join other bands of Potawatamies on the Marais de Cygue, declaring that they would rather at once go to California, being determined not to unite with those bands, but to maintain an independence of them. By the purchase from the Sioux no doubt is entertained that their prejudices may be advantageously accommodated, for among the objects in contemplation before adverted to it is to my mind of primary importance so to dispose of those Indians as to enable this Government to interpose a State between the Northern and Southern Indians along the Missouri River, and thus, by dividing the Indians on the frontier and separating the divisions, prevent a combination and concert of action which future progress in eivilization might otherwise enable them to effect in the prosecution of revenge for real or imagined grievances.

Great importance is attached to this view of the subject, but scarcely less to the means provided by the treaty for inducing the remnants of other Northern tribes to remove to a climate congenial to their habits and disposition.

From the earliest efforts at emigration certain Northern Indians have strenuously objected to a removal south of the Missouri on account of the climate; and where tribes have been induced to dispose of all right to live east of the Mississippi within the United States, many individuals, dreading their southern destination, have wandered to the north and are now living in Canada, annually in the receipt of presents from the British Government, and will be ready without doubt to side with that power in any future conflict with this Government. In this manner considerable numbers of the Delawares and Shawnees and other Indians have disappeared from our settlements—a fact of great importance, and which I apprehend has not been heretofore sufficiently considered. There are many Potawatamies and Ottawas, as also Winnebagoes and Menomonees, who may be easily induced to move into Canada by seductive bribes, in the use of which the British Government has always displayed a remarkable foresight.

Of the Chippewas and Ottawas now in the northern part of Michigan it is believed there are over 5,000 under treaty obligations to remove to the Southwest, the greater portion of whom openly declared their determination to cross the line into Canada and put themselves under the protection of the British Government in preference to a removal to that country. These Indians may be accommodated by the arrangements in contemplation, not only to their own satisfaction, but under circumstances promising the greatest permanent advantages to the United States, and separating them from all inducements and even the possibility of entering the British service. I am not without hope, also, that through this treaty some suitable and acceptable arrangement may be made with the New York Indians by which they may be removed with safety to themselves and benefit to the people of that State. The very peculiar situation of these Indians is well known; that while they are under treaty obligation to remove, the treaty being by the Constitution the supreme law of the land and perfecting in this instance the title of the land they occupy in a private land company, there is yet every reason to sympathize with them and the highest moral inducements for extending every possible relief to them within the legitimate

powers of the Government. I have been assured from sources entitled to my fullest confidence that although these Indians have hitherto expressed the most decided aversion to a removal south of the Missouri, there will probably be no difficulty in persuading them to occupy a more northern region in the West. I have every reason for believing that a benevolent interest in their behalf among a portion of our own people, which, it is supposed, has heretofore presented an obstacle to their emigration, will be exerted to effect their removal if a portion of the Sioux country can be appropriated to them.

It will be perceived, therefore, that a multitude of objects thus rest upon the success of this one treaty, now submitted for examination and approbation.

Of the Sioux Indians I will but remark that they occupy an immense country spreading from the Mississippi north of the neutral ground west and northwest, crossing the Missouri River more than 1,200 miles above the city of St. Louis. They are divided into bands, which have various names, the generic name for the whole being the Dahcota Nation. These bands, though speaking a common language, are independent in their occupancy of portions of country, and separate treaties may be made with them. Treaties are already subsisting with some of the bands both on the Mississippi and Missouri. The treaty now submitted is believed to be advantageous, and from its provisions contemplates the reduction of those wandering Indians from their nomadic habits to those of an agricultural people.

If some of the provisions seem not such as might be desired, it will be recollected that many interests have to be accommodated in framing an Indian treaty which can only be fully known to the commissioner, who derives his information directly from the Indians in the country which is the object of the purchase.

It is proper to add that I had instructed the commissioner expressly not to take into consideration what are called traders' claims, in the hope of correcting a practice which, it is believed, has been attended with mischievous consequences; but the commissioner has by a letter of explanations fully satisfied me that in this instance it was absolutely necessary to accommodate those claims as an indispensable means of obtaining the assent of the Indians to the treaty. This results, doubtless, from their dependence upon the traders for articles, in a measure necessaries, which are for the most part furnished without competition, and of the proper value of which the Indians are ignorant.

To compensate in some degree for the article in this treaty providing for the payment of traders' claims, very judicious guards are introduced into the treaty, calculated effectually to exclude that source of interest adverse to the Government in all future time within the purchase under this treaty.

There are other articles in the treaty which I have not been able fully to realize as judicious or necessary, but for reasons already stated they deserve respectful consideration.

Notwithstanding the article stipulating that a rejection of any of the provisions of the treaty should render the whole null and void, I would respectfully recommend such modified acceptance of the treaty as in the wisdom of the Senate may seem just and proper, conditioned upon the assent of the Indians subsequently to be obtained, the Senate making provision for its reference back to the Indians if necessary.

It will be seen that the treaty provides for a power of regulation in the Indian Territory by the United States Government under circumstances not hitherto attempted, presenting an opportunity for an experiment well worthy of mature consideration.

I ought not to dismiss this subject without adverting to one other important consideration connected with the integrity of our Northwest Indians and Territory. The Sioux treaty will effectually withdraw from British influence all those who are a party to it by making them stipendiaries of the United States and by operating John Tyler

a change in their wandering habits and establishing them at known and fixed points under the observation of Government agents, and as the British can only have access to that region by the way of Fond du Lac, one or two small military posts in a direction west and south from that point, it is believed, will completely control all intercourse with the Indians in that section of country.

Very respectfully, your obedient servant,

WASHINGTON, September 8, 1841.

To the Senate of the United States:

I have the honor, in compliance with the resolution of the Senate of the 8th June, to communicate a letter * from the Secretary of the Treasury and the correspondence accompanying it. JOHN TYLER.

WASHINGTON, September 13, 1841.

To the Senate of the United States:

In compliance with a resolution of the Senate of the 14th July last, I communicate to the Senate a report from the Secretary of State, accompanied by copies of the correspondence † called for by said resolution. JOHN TYLER.

VETO MESSAGES.

WASHINGTON, August 16, 1841.

To the Senate of the United States:

The bill entitled "An act to incorporate the subscribers to the Fiscal Bank of the United States," which originated in the Senate, has been considered by me with a sincere desire to conform my action in regard to it to that of the two Houses of Congress. By the Constitution it is made my duty either to approve the bill by signing it or to return it with my objections to the House in which it originated. I can not conscientiously give it my approval, and I proceed to discharge the duty required of me by the Constitution—to give my reasons for disapproving.

The power of Congress to create a national bank to operate *per sc* over the Union has been a question of dispute from the origin of the Government. Men most justly and deservedly esteemed for their high intellectual endowments, their virtue, and their patriotism have in regard to it entertained different and conflicting opinions; Congresses have differed; the approval of one President has been followed by the disapproval of another; the people at different times have acquiesced in decisious both for and against. The country has been and still is deeply agitated

JNO. BELL.

^{*}Relating to the deposits of public moneys in banks by disbursing offices and agents.

[†]Relating to the origin, progress, and conclusion of the treaty of November 20, 1838, between Sardinia and the United States.

by this unsettled question. It will suffice for me to say that my own opinion has been uniformly proclaimed to be against the exercise of any such power by this Government. On all suitable occasions during a period of twenty-five years the opinion thus entertained has been unreservedly expressed. I declared it in the legislature of my native State; in the House of Representatives of the United States it has been openly vindicated by me; in the Senate Chamber, in the presence and hearing of many who are at this time members of that body, it has been affirmed and reaffirmed in speeches and reports there made and by votes there recorded; in popular assemblies I have unhesitatingly announced it, and the last public declaration which I made-and that but a short time before the late Presidential election-I referred to my previously expressed opinions as being those then entertained by me. With a full knowledge of the opinions thus entertained and never concealed, I was elected by the people Vice-President of the United States. By the occurrence of a contingency provided for in the Constitution and arising under an impressive dispensation of Providence I succeeded to the Presidential office. Before entering upon the duties of that office I took an oath that I would "preserve, protect, and defend the Constitution of the United States." Entertaining the opinions alluded to and having taken this oath, the Senate and the country will see that I could not give my sanction to a measure of the character described without surrendering all claim to the respect of honorable men, all confidence on the part of the people, all self-respect, all regard for moral and religious obligations, without an observance of which no government can be prosperous and no people can be happy. It would be to commit a crime which I would not willfully commit to gain any earthly reward, and which would justly subject me to the ridicule and scorn of all virtuous men.

I deem it entirely unnecessary at this time to enter upon the reasons which have brought my mind to the convictions I feel and entertain on this subject. They have been over and over again repeated. If some of those who have preceded me in this high office have entertained and avowed different opinions, I yield all confidence that their convictions were sincere. I claim only to have the same measure meted out to myself. Without going further into the argument, I will say that in looking to the powers of this Government to collect, safely keep, and disburse the public revenue, and incidentally to regulate the commerce and exchanges, I have not been able to satisfy myself that the establishment by this Government of a bank of discount in the ordinary acceptation of that term was a necessary means or one demanded by propriety to execute those powers. What can the local discounts of the bank have to do with the collecting, safe-keeping, and disbursing of the revenue? So far as the mere discounting of paper is concerned, it is quite immaterial to this question whether the discount is obtained at a State bank or a United States bank. They are both equally local, both beginning

and both ending in a local accommodation. What influence have local discounts granted by any form of bank in the regulating of the currency and the exchanges? Let the history of the late United States Bank aid us in answering this inquiry.

For several years after the establishment of that institution it dealt almost exclusively in local discounts, and during that period the country was for the most part disappointed in the consequences anticipated from its incorporation. A uniform currency was not provided, exchanges were not regulated, and little or nothing was added to the general circulation, and in 1820 its embarrassments had become so great that the directors petitioned Congress to repeal that article of the charter which made its notes receivable everywhere in payment of the public dues. It had up to that period dealt to but a very small extent in exchanges, either foreign or domestic, and as late as 1823.its operations in that line amounted to a little more than \$7,000,000 per annum. A very rapid augmentation soon after occurred, and in 1833 its dealings in the exchanges amounted to upward of \$100,000,000, including the sales of its own drafts; and all these immense transactions were effected without the employment of extraordinary means. The currency of the country became sound, and the negotiations in the exchanges were carried on at the lowest possible rates. The circulation was increased to more than \$22,000,000 and the notes of the bank were regarded as equal to specie all over the country, thus showing almost conclusively that it was the capacity to deal in exchanges, and not in local discounts, which furnished these facilities and advantages. It may be remarked, too, that notwithstanding the immense transactions of the bank in the purchase of exchange, the losses sustained were merely nominal, while in the line of discounts the suspended debt was enormous and proved most disastrous to the bank and the country. Its power of local discount has in fact proved to be a fruitful source of favoritism and corruption, alike destructive to the public morals and to the general weal.

The capital invested in banks of discount in the United States, created by the States, at this time exceeds \$350,000,000, and if the discounting of local paper could have produced any beneficial effects the United States ought to possess the soundest currency in the world; but the reverse is lamentably the fact.

Is the measure now under consideration of the objectionable character to which I have alluded? It is clearly so unless by the sixteenth fundamental article of the eleventh section it is made otherwise. That article is in the following words:

The directors of the said corporation shall establish one competent office of discount and deposit in any State in which two thousand shares shall have been subscribed or may be held, whenever, upon application of the legislature of such State, Congress may by law require the same. And the said directors may also establish one or more competent offices of discount and deposit in any Territory or District of the United States, and in any State with the assent of such State, and when established the said office or offices shall be only withdrawn or removed by the said directors prior to the expiration of this charter with the previous assent of Congress: *Provided*, In respect to any State which shall not, at the first session of the legislature thereof held after the passage of this act, by resolution or other usual legislative proceeding, unconditionally assent or dissent to the establishment of such office or offices within it, such assent of the said State shall be thereafter presumed: *And provided*, *nevertheless*, That whenever it shall become necessary and proper for carrying into execution any of the powers granted by the Constitution to establish an office or offices in any of the States whatever, and the establishment thereof shall be directed by law, it shall be the duty of the said directors to establish such office or offices accordingly.

It will be seen that by this clause the directors are invested with the fullest power to establish a branch in any State which has yielded its assent; and having once established such branch, it shall not afterwards be withdrawn except by order of Congress. Such assent is to be implied and to have the force and sanction of an actually expressed assent, "provided, in respect to any State which shall not, at the first session of the legislature thereof held after the passage of this act, by resolution or other usual legislative proceeding, unconditionally assent or dissent to the establishment of such office or offices within it, such assent of said State shall be thereafter presumed." The assent or dissent is to be expressed unconditionally at the first session of the legislature, by some formal legislative act; and if not so expressed its assent is to be *implied*, and the directors are thereupon invested with power, at such time thereafter as they may please, to establish branches, which can not afterwards be withdrawn except by resolve of Congress. No matter what may be the cause which may operate with the legislature, which either prevents it from speaking or addresses itself to its wisdom, to induce delay, its assent is to be implied. This iron rule is to give way to no circumstances; it is unbending and inflexible. It is the language of the master to the vassal; an unconditional answer is claimed forthwith, and delay, postponement, or incapacity to answer produces an implied assent which is ever after irrevocable. Many of the State elections have already taken place without any knowledge on the part of the people that such a question was to come up. The representatives may desire a submission of the question to their constituents preparatory to final action upon it, but this high privilege is denied; whatever may be the motives and views entertained by the representatives of the people to induce delay, their assent is to be presumed, and is ever afterwards binding unless their dissent shall be unconditionally expressed at their first session after the passage of this bill into a law. They may by formal resolution declare the question of assent or dissent to be undecided and postponed, and yet, in opposition to their express declaration to the contrary, their assent is to be implied. Cases innumerable might be cited to manifest the irrationality of such an inference. Let one or two in addition suffice. The popular branch of the legislature may express its dissent by an unanimous vote, and its resolution may be defeated by a tie vote of the senate, and yet the assent

is to be implied. Both branches of the legislature may concur in a resolution of decided dissent, and yet the governor may exert the veto power conferred on him by the State constitution, and their legislative action be defeated, and yet the assent of the legislative authority is implied, and the directors of this contemplated institution are authorized to establish a branch or branches in such State whenever they may find it conducive to the interest of the stockholders to do so; and having once established it they can under no circumstances withdraw it except by act of Congress. The State may afterwards protest against such unjust inference, but its authority is gone. Its assent is implied by its failure or inability to act at its first session, and its voice can never afterwards be heard. To inferences so violent and, as they seem to me, irrational I can not yield my consent. No court of justice would or could sanction them without reversing all that is established in judicial proceeding by introducing presumptions at variance with fact and inferences at the expense of reason. A State in a condition of duress would be *presumed* to speak as an individual manacled and in prison might be presumed to be in the enjoyment of freedom. Far better to say to the States boldly and frankly, Congress wills and submission is demanded.

It may be said that the directors may not establish branches under such circumstances; but this is a question of power, and this bill invests them with full authority to do so. If the legislature of New York or Pennsylvania or any other State should be found to be in such condition as I have supposed, could there be any security furnished against such a step on the part of the directors? Nay, is it not fairly to be presumed that this proviso was introduced for the sole purpose of meeting the contingency referred to? Why else should it have been introduced? And I submit to the Senate whether it can be believed that any State would be likely to sit quietly down under such a state of things. In a great measure of public interest their patriotism may be successfully appealed to, but to infer their assent from circumstances at war with such inference I can not but regard as calculated to excite a feeling at fatal enmity with the peace and harmony of the country. I must therefore regard this clause as asserting the power to be in Congress to establish offices of discount in a State not only without its assent, but against its dissent, and so regarding it I can not sanction it. On general principles the right in Congress to prescribe terms to any State implies a superiority of power and control, deprives the transaction of all pretense to compact between them, and terminates, as we have seen, in the total abrogation of freedom of action on the part of the States. But, further, the State may express, after the most solemn form of legislation, its dissent, which may from time to time thereafter be repeated in full view of its own interest, which can never be separated from the wise and beneficent operation of this Government, and yet Congress may by virtue of the last proviso overrule its law, and upon grounds which to such State will appear to rest on a

Messages and Papers of the Presidents

constructive necessity and propriety and nothing more. I regard the bill as asserting for Congress the right to incorporate a United States bank with power and right to establish offices of discount and deposit in the several States of this Union with or without their consent—a principle to which I have always heretofore been opposed and which can never obtain my sanction; and waiving all other considerations growing out of its other provisions, I return it to the House in which it originated with these my objections to its approval.

JOHN TYLER.

WASHINGTON, September 9, 1841.

To the House of Representatives of the United States:

It is with extreme regret that I feel myself constrained by the duty faithfully to execute the office of President of the United States and to the best of my ability to "preserve, protect, and defend the Constitution of the United States" to return to the House in which it originated the bill "to provide for the better collection, safe-keeping, and disbursement of the public revenue by means of a corporation to be styled the Fiscal Corporation of the United States," with my written objections.

In my message sent to the Senate on the 16th day of August last. returning the bill "to incorporate the subscribers to the Fiscal Bank of the United States," I distinctly declared that my own opinion had been uniformly proclaimed to be against the exercise "of the power of Congress to create a national bank to operate per se over the Union," and, entertaining that opinion, my main objection to that bill was based upon the highest moral and religious obligations of conscience and the Constitution. I readily admit that whilst the qualified veto with which the Chief Magistrate is invested should be regarded and was intended by the wise men who made it a part of the Constitution as a great conservative principle of our system, without the exercise of which on important occasions a mere representative majority might urge the Government in its legislation beyond the limits fixed by its framers or might exert its just powers too hastily or oppressively, yet it is a power which ought to be most cautiously exerted, and perhaps never except in a case eminently involving the public interest or one in which the oath of the President, acting under his convictions, both mental and moral, imperiously requires its exercise. In such a case he has no alternative. He must either exert the negative power intrusted to him by the Constitution chiefly for its own preservation, protection, and defense or commit an act of gross moral turpitude. Mere regard to the will of a majority must not in a constitutional republic like ours control this sacred and solemn duty of a sworn officer. The Constitution itself I regard and cherish as the embodied and written will of the whole people of the United States. is their fixed and fundamental law, which they unanimously prescribe to the public functionaries, their mere trustees and servants. This their

will and the law which they have given us as the rule of our action have no guard, no guaranty of preservation, protection, and defense, but the oaths which it prescribes to the public officers, the sanctity with which they shall religiously observe those oaths, and the patriotism with which the people shall shield it by their own sovereign will, which has made the Constitution supreme. It must be exerted against the will of a mere representative majority or not at all. It is alone in pursuance of that will that any measure can reach the President, and to say that because a majority in Congress have passed a bill he should therefore sanction it is to abrogate the power altogether and to render its insertion in the Constitution a work of absolute supererogation. The duty is to guard the fundamental will of the people themselves from (in this case, I admit, unintentional) change or infraction by a majority in Congress; and in that light alone do I regard the constitutional duty which I now most reluctantly discharge. Is this bill now presented for my approval or disapproval such a bill as I have already declared could not receive my sanction? Is it such a bill as calls for the exercise of the negative power under the Constitution? Does it violate the Constitution by creating a national bank to operate per se over the Union? Its title, in the first place, describes its general character. It is "an act to provide for the better collection, safe-keeping, and disbursement of the public revenue by means of a corporation to be styled the Fiscal Corporation of the United States." In style, then, it is plainly national in its character. Its powers, functions, and duties are those which pertain to the *collecting*, keeping, and disbursing the public revenue. The means by which these are to be exerted is a corporation to be styled the Fiscal Corporation of the United States. It is a corporation created by the Congress of the United States, in its character of a national legislature for the whole Union, to perform the *fiscal* purposes, meet the *fiscal* wants and exigencies, supply the *fiscal* uses, and exert the *fiscal* agencies of the Treasury of the United States. Such is its own description of itself. Do its provisions contradict its title? They do not. It is true that by its first section it provides that it shall be established in the District of Columbia; but the amount of its capital, the manner in which its stock is to be subscribed for and held, the persons and bodies, corporate and politic, by whom its stock may be held, the appointment of its directors and their powers and duties, its fundamental articles, especially that to establish agencies in any part of the Union, the corporate powers and business of such agencies, the prohibition of Congress to establish any other corporation with similar powers for twenty years, with express reservation in the same clause to modify or create any bank for the District of Columbia, so that the aggregate capital shall not exceed five millions, without enumerating other features which are equally distinctive and characteristic, clearly show that it can not be regarded as other than a bank of the United States, with powers seemingly more limited than

have heretofore been granted to such an institution. It operates per se over the Union by virtue of the unaided and, in my view, assumed authority of Congress as a national legislature, as distinguishable from a bank created by Congress for the District of Columbia as the local legislature of the District. Every United States bank heretofore created has had power to deal in bills of exchange as well as local discounts. Both were trading privileges conferred, and both were exercised by virtue of the aforesaid power of Congress over the whole Union. The question of power remains unchanged without reference to the extent of privilege granted. If this proposed corporation is to be regarded as a local bank of the District of Columbia, invested by Congress with general powers to operate over the Union, it is obnoxious to still stronger objections. It assumes that Congress may invest a local institution with general or national powers. With the same propriety that it may do this in regard to a bank of the District of Columbia it may as to a State bank. Yet who can indulge the idea that this Government can rightfully, by making a State bank its fiscal agent, invest it with the absolute and unqualified powers conferred by this bill? When I come to look at the details of the bill, they do not recommend it strongly to my adoption. A brief notice of some of its provisions will suffice.

First. It may justify substantially a system of discounts of the most objectionable character. It is to deal in bills of exchange drawn in one State and payable in another without any restraint. The bill of exchange may have an unlimited time to run, and its renewability is nowhere guarded against. It may, in fact, assume the most objectionable form of accommodation paper. It is not required to rest on any actual, real, or substantial exchange basis. A drawer in one place becomes the accepter in another, and so in turn the accepter may become the drawer upon a mutual understanding. It may at the same time indulge in mere local discounts under the name of bills of exchange. A bill drawn at Philadelphia on Camden, N. J., at New York on a border town in New Jersey, at Cincinnati on Newport, in Kentucky, not to multiply other examples, might, for anything in this bill to restrain it, become a mere matter of local accommodation. Cities thus relatively situated would possess advantages over cities otherwise situated of so decided a character as most justly to excite dissatisfaction.

Second. There is no limit prescribed to the premium in the purchase of bills of exchange, thereby correcting none of the evils under which the community now labors, and operating most injuriously upon the agricultural States, in which the irregularities in the rates of exchange are most severely felt. Nor are these the only consequences. A resumption of specie payments by the banks of those States would be liable to indefinite postponement; for as the operation of the agencies of the interior would chiefly consist in selling bills of exchange, and the purchases could only be made in specie or the notes of banks paying specie, the State banks would either have to continue with their doors closed or exist at the mercy of this national monopoly of brokerage. Nor can it be passed over without remark that whilst the District of Columbia is made the seat of the principal bank, its citizens are excluded from all participation in any benefit it might afford by a positive prohibition on the bank from all discounting within the District.

These are some of the objections which prominently exist against the details of the bill. Others might be urged of much force, but it would be unprofitable to dwell upon them. Suffice it to add that this charter is designed to continue for twenty years without a competitor; that the defects to which I have alluded, being founded on the fundamental law of the corporation, are irrevocable, and that if the objections be well founded it would be overhazardous to pass the bill into a law.

In conclusion I take leave most respectfully to say that I have felt the most anxious solicitude to meet the wishes of Congress in the adoption of a fiscal agent which, avoiding all constitutional objections, should harmonize conflicting opinions. Actuated by this feeling, I have been ready to yield much in a spirit of conciliation to the opinions of others; and it is with great pain that I now feel compelled to differ from Congress a second time in the same session. At the commencement of this session, inclined from choice to defer to the legislative will, I submitted to Congress the propriety of adopting a fiscal agent which, without violating the Constitution, would separate the public money from the Executive control and perform the operations of the Treasury without being burdensome to the people or inconvenient or expensive to the Government. It is deeply to be regretted that this department of the Government can not upon constitutional and other grounds concur with the legislative department in this last measure proposed to attain these desirable objects. Owing to the brief space between the period of the death of my lamented predecessor and my own installation into office, I was, in fact, not left time to prepare and submit a definitive recommendation of my own in my regular message, and since my mind has been wholly occupied in a most anxious attempt to conform my action to the legislative will. In this communication I am confined by the Constitution to my objections simply to this bill, but the period of the regular session will soon arrive, when it will be my duty, under another clause of the Constitution, "to give to Congress information of the state of the Union and recommend to their consideration such measures as" I "shall judge necessary and expedient." And I most respectfully submit, in a spirit of harmony, whether the present differences of opinion should be pressed further at this time, and whether the peculiarity of my situation does not entitle me to a postponement of this subject to a more auspicious period for deliberation. The two Houses of Congress have distinguished themselves at this extraordinary session by the performance of an immense mass of labor at a season very unfavorable

Messages and Papers of the Presidents

both to health and action, and have passed many laws which I trust will prove highly beneficial to the interests of the country and fully answer its just expectations. It has been my good fortune and pleasure to concur with them in all measures except this. And why should our difference on this alone be pushed to extremes? It is my anxious desire that it should not be. I too have been burdened with extraordinary labors of late, and I sincerely desire time for deep and deliberate reflection on this the greatest difficulty of my Administration. May we not now pause until a more favorable time, when, with the most anxious hope that the Executive and Congress may cordially unite, some measure of finance may be deliberately adopted promotive of the good of our common country?

I will take this occasion to declare that the conclusions to which I have brought myself are those of a settled conviction, founded, in my opinion, on a just view of the Constitution; that in arriving at it I have been actuated by no other motive or desire than to uphold the institutions of the country as they have come down to us from the hands of our godlike ancestors, and that I shall esteem my efforts to sustain them, even though I perish, more honorable than to win the applause of men by a sacrifice of my duty and my conscience.

JOHN TYLER.

PROCLAMATION.

[From Statutes at Large (Little, Brown & Co.), Vol. XI, p. 786.]

BY THE PRESIDENT OF THE UNITED STATES OF AMERICA.

A PROCLAMATION.

Whereas it has come to the knowledge of the Government of the United States that sundry secret lodges, clubs, or associations exist on the northern frontier; that the members of these lodges are bound together by secret oaths; that they have collected firearms and other military materials and secreted them in sundry places; and that it is their purpose to violate the laws of their country by making military and lawless incursions, when opportunity shall offer, into the territories of a power with which the United States are at peace; and

Whereas it is known that traveling agitators, from both sides of the line, visit these lodges and harangue the members in secret meeting, stimulating them to illegal acts; and

Whereas the same persons are known to levy contributions on the ignorant and credulous for their own benefit, thus supporting and enriching themselves by the basest means; and

Whereas the unlawful intentions of the members of these lodges have

already been manifested in an attempt to destroy the lives and property of the inhabitants of Chippewa, in Canada, and the public property of the British Government there being :

Now, therefore, I, John Tyler, President of the United States, do issue this my proclamation, admonishing all such evil-minded persons of the condign punishment which is certain to overtake them; assuring them that the laws of the United States will be rigorously executed against their illegal acts, and that if in any lawless incursion into Canada they fall into the hands of the British authorities they will not be reclaimed as American citizens nor any interference made by this Government in their behalf. And I exhort all well-meaning but deluded persons who may have joined these lodges immediately to abandon them and to have nothing more to do with their secret meetings or unlawful oaths, as they would avoid serious consequences to themselves. And I expect the intelligent and well-disposed members of the community to frown on all these unlawful combinations and illegal proceedings, and to assist the Government in maintaining the peace of the country against the mischievous consequences of the acts of these violators of the law.

Given under my hand, at the city of Washington, the 25th day of Sep-[SEAL.] tember, A. D. 1841, and of the Independence of the United States the sixty-sixth.

JOHN TYLER.

By the President:

DANIEL WEBSTER, Secretary of State.

EXECUTIVE ORDER.

GENERAL ORDERS.

WAR DEPARTMENT, Adjutant-General's Office, Washington, July 5, 1841.

Brevet Majox-General Winfield Scott having been appointed by the President, by and with the consent and advice of the Senate, the Major General of the Army of the United States, he is directed to assume the command and enter upon his duties accordingly.

By command of the President of the United States:

R. JONES,

Adjutant-General

FIRST ANNUAL MESSAGE.

WASHINGTON, December 7, 1841.

To the Senate and House of Representatives of the United States:

In coming together, fellow-citizens, to enter again upon the discharge of the duties with which the people have charged us severally, we find great occasion to rejoice in the general prosperity of the country. We are in the enjoyment of all the blessings of civil and religious liberty, with unexampled means of education, knowledge, and improvement. Through the year which is now drawing to a close peace has been in our borders and plenty in our habitations, and although disease has visited some few portions of the land with distress and mortality, yet in general the health of the people has been preserved, and we are all called upon by the highest obligations of duty to renew our thanks and our devotion to our Heavenly Parent, who has continued to vouchsafe to us the eminent blessings which surround us and who has so signally crowned the year with His goodness. If we find ourselves increasing beyond example in numbers, in strength, in wealth, in knowledge, in everything which promotes human and social happiness, let us ever remember our dependence for all these on the protection and merciful dispensations of Divine Providence.

Since your last adjournment Alexander McLeod, a British subject who was indicted for the murder of an American citizen, and whose case has been the subject of a correspondence heretofore communicated to you, has been acquitted by the verdict of an impartial and intelligent jury, and has under the judgment of the court been regularly discharged.

Great Britain having made known to this Government that the expedition which was fitted out from Canada for the destruction of the steamboat *Caroline* in the winter of 1837, and which resulted in the destruction of said boat and in the death of an American citizen, was undertaken by orders emanating from the authorities of the British Government in Canada, and demanding the discharge of McLeod upon the ground that if engaged in that expedition he did but fulfill the orders of his Government, has thus been answered in the only way in which she could be answered by a government the powers of which are distributed among its several departments by the fundamental law. Happily for the people of Great Britain, as well as those of the United States, the only mode by which an individual arraigned for a criminal offense before the courts of either can obtain his discharge is by the independent action of the judieiary and by proceedings equally familiar to the courts of both countries.

If in Great Britain a power exists in the Crown to cause to be entered a *nolle prosequi*, which is not the case with the Executive power of the United States upon a prosecution pending in a State court, yet *there* no

more than here can the chief executive power rescue a prisoner from custody without an order of the proper tribunal directing his discharge. The precise stage of the proceedings at which such order may be made is a matter of municipal regulation exclusively, and not to be complained of by any other government. In cases of this kind a government becomes politically responsible only when its tribunals of last resort are shown to have rendered unjust and injurious judgments in matters not doubtful. To the establishment and elucidation of this principle no nation has lent its authority more efficiently than Great Britain. Alexander McLeod. having his option either to prosecute a writ of error from the decision of the supreme court of New York, which had been rendered upon his application for a discharge, to the Supreme Court of the United States. or to submit his case to the decision of a jury, preferred the latter, deeming it the readiest mode of obtaining his liberation; and the result has fully sustained the wisdom of his choice. The manner in which the issue submitted was tried will satisfy the English Government that the principles of justice will never fail to govern the enlightened decision of an American tribunal. I can not fail, however, to suggest to Congress the propriety, and in some degree the necessity, of making such provisions by law, so far as they may constitutionally do so, for the removal at their commencement and at the option of the party of all such cases as may hereafter arise, and which may involve the faithful observance and execution of our international obligations, from the State to the Federal judiciary. This Government, by our institutions, is charged with the maintenance of peace and the preservation of amicable relations with the nations of the earth, and ought to possess without question all the reasonable and proper means of maintaining the one and preserving the other. While just confidence is felt in the judiciary of the States, yet this Government ought to be competent in itself for the fulfillment of the high duties which have been devolved upon it under the organic law by the States themselves.

In the month of September a party of armed men from Upper Canada invaded the territory of the United States and forcibly seized upon the person of one Grogan, and under circumstances of great harshness hurriedly carried him beyond the limits of the United States and delivered him up to the authorities of Upper Canada. His immediate discharge was ordered by those authorities upon the facts of the case being brought to their knowledge—a course of procedure which was to have been expected from a nation with whom we are at peace, and which was not more due to the rights of the United States than to its own regard for justice. The correspondence which passed between the Department of State and the British envoy, Mr. Fox, and with the governor of Vermont, as soon as the facts had been made known to this department, are herewith communicated.

I regret that it is not in my power to make known to you an equally

satisfactory conclusion in the case of the Caroline steamer, with the circumstances connected with the destruction of which, in December, 1837, by an armed force fitted out in the Province of Upper Canada, you are already made acquainted. No such atonement as was due for the public wrong done to the United States by this invasion of her territory, so wholly irreconcilable with her rights as an independent power, has yet been made. In the view taken by this Government the inquiry whether the vessel was in the employment of those who were prosecuting an unauthorized war against that Province or was engaged by the owner in the business of transporting passengers to and from Navy Island in hopes of private gain, which was most probably the case, in no degree alters the real question at issue between the two Governments. This Government can never concede to any foreign government the power, except in a case of the most urgent and extreme necessity, of invading its territory, either to arrest the persons or destroy the property of those who may have violated the municipal laws of such foreign government or have disregarded their obligations arising under the law of nations. The territory of the United States must be regarded as sacredly secure against all such invasions until they shall voluntarily acknowledge their inability to acquit themselves of their duties to others. And in announcing this sentiment I do but affirm a principle which no nation on earth would be more ready to vindicate at all hazards than the people and Government of Great Britain. If upon a full investigation of all the facts it shall appear that the owner of the Caroline was governed by a hostile intent or had made common cause with those who were in the occupancy of Navy Island, then so far as he is concerned there can be no claim to indemnity for the destruction of his boat which this Government would feel itself bound to prosecute, since he would have acted not only in derogation of the rights of Great Britain, but in clear violation of the laws of the United States; but that is a question which, however settled, in no manner involves the higher consideration of the violation of territorial sovereignty and jurisdiction. To recognize it as an admissible practice that each Government in its turn, upon any sudden and unauthorized cutbreak which, on a frontier the extent of which renders it impossible for either to have an efficient force on every mile of it, and which outbreak, therefore, neither may be able to suppress in a day, may take vengeance into its own hands, and without even a remonstrance, and in the absence of any pressing or overruling necessity may invade the territory of the other, would inevitably lead to results equally to be deplored by both. When border collisions come to receive the sanction or to be made or the authority of either Government general war must be the inevitable result. While it is the ardent desire of the United States to cultivate the relations of peace with all nations and to fulfill all the duties of good neighborhood toward those who possess territories adjoining their own, that very desire would lead them to deny the right of any foreign power

INCIDENTS OF THE SEMINOLE INDIAN WAR

INCIDENTS IN THE SEMINOLE WAR.

For account of the war with the Seminole Indians, see Encyclopedie Index article under Seminole Wars. One of the panels in the preceding illustration shows the capture of Osecola, the leader of the Seminoles. Osecola, a halfbreed, rallied the Indian forces under his leadership soon after the ontbreak of the war in 1834, but it was not until December 28, 1835, that his strength was realized. On that day, a large band of Seminoles followed Osecola to the place shown on the other preceding panel, and there surprised and killed Major Dade and all of the force of 110 men under him. Osecola was finally captured by General Jessup, while the Indian was under the protection of a flag of truee, the United States commander justifying his action by the fact that Osecola himself had broken treaties on several occasions. to invade their boundary with an armed force. The correspondence between the two Governments on this subject will at a future day of your session be submitted to your consideration; and in the meantime I can not but indulge the hope that the British Government will see the propriety of renouncing as a rule of future action the precedent which has been set in the affair at Schlosser.

I herewith submit the correspondence which has recently taken place between the American minister at the Court of St. James, Mr. Stevenson, and the minister of foreign affairs of that Government on the right claimea by that Government to visit and detain vessels sailing under the American flag and engaged in prosecuting lawful commerce in the African seas. Our commercial interests in that region have experienced considerable increase and have become an object of much importance, and it is the duty of this Government to protect them against all improper and vexatious interruption. However desirous the United States may be for the suppression of the slave trade, they can not consent to interpolations into the maritime code at the mere will and pleasure of other governments. We deny the right of any such interpolation to any one or all the nations of the earth without our consent. We claim to have a voice in all amendments or alterations of that code, and when we are given to understand, as in this instance, by a foreign government that its treaties with other nations can not be executed without the establishment and enforcement of new principles of maritime police, to be applied without our consent, we must employ a language neither of equivocal import or susceptible of misconstruction. American citizens prosecuting a lawful commerce in the African seas under the flag of their country are not responsible for the abuse or unlawful use of that flag by others; nor can they rightfully on account of any such alleged abuses be interrupted, molested, or detained while on the ocean, and if thus molested and detained while pursuing honest voyages in the usual way and violating no law themselves they are unquestionably entitled to indemnity. This Government has manifested its repugnance to the slave trade in a manner which can not be misunderstood. By its fundamental law it prescribed limits in point of time to its continuance, and against its own citizens who might so far forget the rights of humanity as to engage in that wicked traffic it has long since by its municipal laws denounced the most condign punishment. Many of the States composing this Union had made appeals to the civilized world for its suppression long before the moral sense of other nations had become shocked by the iniquities of the traffic. Whether this Government should now enter into treaties containing mutual stipulations upon this subject is a question for its mature deliberation. Certain it is that if the right to detain American ships on the high seas can be justified on the plea of a necessity for such detention arising out of the existence of treaties between other nations, the same plea may be extended and enlarged by the new stipulations of new treaties

to which the United States may not be a party. This Government will not cease to urge upon that of Great Britain full and ample remuneration for all losses, whether arising from detention or otherwise, to which American citizens have heretofore been or may hereafter be subjected by the exercise of rights which this Government can not recognize as legitimate and proper. Nor will I indulge a doubt but that the sense of justice of Great Britain will constrain her to make retribution for any wrong or loss which any American citizen engaged in the prosecution of lawful commerce may have experienced at the hands of her cruisers or This Government, at the same time, will relax other public authorities. no effort to prevent its citizens, if there be any so disposed, from prosecuting a traffic so revolting to the feelings of humanity. It seeks to do no more than to protect the fair and honest trader from molestation and injury; but while the enterprising mariner engaged in the pursuit of an honorable trade is entitled to its protection, it will visit with condign punishment others of an opposite character.

I invite your attention to existing laws for the suppression of the African slave trade, and recommend all such alterations as may give to them greater force and efficacy. That the American flag is grossly abused by the abandoned and profligate of other nations is but too probable. Congress has not long since had this subject under its consideration, and its importance well justifies renewed and anxious attention.

I also communicate herewith the copy of a correspondence between Mr. Stevenson and Lord Palmerston upon the subject, so interesting to several of the Southern States, of the rice duties, which resulted honorably to the justice of Great Britain and advantageously to the United States.

At the opening of the last annual session the President informed Congress of the progress which had then been made in negotiating a convention between this Government and that of England with a view to the final settlement of the question of the boundary between the territorial limits of the two countries. I regret to say that little further advancement of the object has been accomplished since last year, but this is owing to circumstances no way indicative of any abatement of the desire of both parties to hasten the negotiation to its conclusion and to settle the question in dispute as early as possible. In the course of the session it is my hope to be able to announce some further degree of progress toward the accomplishment of this highly desirable end.

The commission appointed by this Government for the exploration and survey of the line of boundary separating the States of Maine and New Hampshire from the conterminous British Provinces is, it is believed, about to clope its field labors and is expected soon to report the results of its examinations to the Department of State. The report, when received, will be laid before Congress.

The failure on the part of Spain to pay with punctuality the interest

due under the convention of 1834 for the settlement of claims between the two countries has made it the duty of the Executive to call the particular attention of that Government to the subject. A disposition has been manifested by it, which is believed to be entirely sincere, to fulfill its obligations in this respect so soon as its internal condition and the state of its finances will permit. An arrangement is in progress from the result of which it is trusted that those of our citizens who have claims under the convention will at no distant day receive the stipulated payments.

A treaty of commerce and navigation with Belgium was concluded and signed at Washington on the 29th of March, 1840, and was duly sanctioned by the Senate of the United States. The treaty was ratified by His Belgian Majesty, but did not receive the approbation of the Belgian Chambers within the time limited by its terms, and has therefore become void.

This occurrence assumes the graver aspect from the consideration that in 1833 a treaty negotiated between the two Governments and ratified on the part of the United States failed to be ratified on the part of Bel-The representative of that Government at Washington informs gium. the Department of State that he has been instructed to give explanations of the causes which occasioned delay in the approval of the late treaty by the legislature, and to express the regret of the King at the occurrence.

The joint commission under the convention with Texas to ascertain the true boundary between the two countries has concluded its labors, but the final report of the commissioner of the United States has not been received. It is understood, however, that the meridian line as traced by the commission lies somewhat farther east than the position hitherto generally assigned to it, and consequently includes in Texas some part of the territory which had been considered as belonging to the States of Louisiana and Arkansas.

The United States can not but take a deep interest in whatever relates to this young but growing Republic. Settled principally by emigrants from the United States, we have the happiness to know that the great principles of civil liberty are there destined to flourish under wise institutions and wholesome laws, and that through its example another evidence is to be afforded of the capacity of popular institutions to advance the prosperity, happiness, and permanent glory of the human race. The great truth that government was made for the people and not the people for government has already been established in the practice and by the example of these United States, and we can do no other than contemplate its further exemplification by a sister republic with the deepest interest.

Our relations with the independent States of this hemisphere, formerly under the dominion of Spain, have not undergone any material change

within the past year. The incessant sanguinary conflicts in or between those countries are to be greatly deplored as necessarily tending to disable them from performing their duty as members of the community of nations and rising to the destiny which the position and natural resources of many of them might lead them justly to anticipate, as constantly giving occasion also, directly or indirectly, for complaints on the part of our citizens who resort thither for purposes of commercial intercourse, and as retarding reparation for wrongs already committed, some of which are by no means of recent date.

The failure of the Congress of Ecuador to hold a session at the time appointed for that purpose, in January last, will probably render abortive a treaty of commerce with that Republic, which was signed at Quito on the 13th of June, 1839, and had been duly ratified on our part, but which required the approbation of that body prior to its ratification by the Ecuadorian Executive.

A convention which has been concluded with the Republic of Peru, providing for the settlement of certain claims of citizens of the United States upon the Government of that Republic, will be duly submitted to the Senate.

The claims of our citizens against the Brazilian Government originating from captures and other causes are still unsatisfied. The United States have, however, so uniformly shown a disposition to cultivate relations of amity with that Empire that it is hoped the unequivocal tokens of the same spirit toward us which an adjustment of the affairs referred to would afford will be given without further avoidable delay.

The war with the Indian tribes on the peninsula of Florida has during the last summer and fall been prosecuted with untiring activity and zeal. A summer campaign was resolved upon as the best mode of bringing it to a close. Our brave officers and men who have been engaged in that service have suffered toils and privations and exhibited an energy which in any other war would have won for them unfading laurels. In despite of the sickness incident to the climate, they have penetrated the fastnesses of the Indians, broken up their encampments, and harassed them unceasingly. Numbers have been captured, and still greater numbers have surrendered and have been transported to join their brethren on the lands elsewhere allotted to them by the Government, and a strong hope is entertained that under the conduct of the gallant officer at the head of the troops in Florida that troublesome and expensive war is destined to a speedy termination. With all the other Indian tribes we are enjoying the blessings of peace. Our duty as well as our best interests prompts us to observe in all our intercourse with them fidelity in fulfilling our engagements, the practice of strict justice, as well as the constant exercise of acts of benevolence and kindness. These are the great instruments of civilization, and through the use of them alone can the untutored child of the forest be induced to listen to its teachings.

John Tyler

The Secretary of State, on whom the acts of Congress have devolved the duty of directing the proceedings for the taking of the sixth census or enumeration of the inhabitants of the United States, will report to the two Houses the progress of that work. The enumeration of persons has been completed, and exhibits a grand total of 17,069.453, making an increase over the census of 1830 of 4,202,646 inhabitants, and showing a gain in a ratio exceeding $32\frac{1}{2}$ per cent for the last ten years.

From the report of the Secretary of the Treasury you will be informed of the condition of the finances. The balance in the Treasury on the 1st of January last, as stated in the report of the Secretary of the Treasury submitted to Congress at the extra session, was 987,345.03. The receipts into the Treasury during the first three quarters of this year from all sources amount to \$23,467,072.52; the estimated receipts for the fourth quarter amount to \$6,943,095.25, amounting to \$30,410,167.77, and making with the balance in the Treasury on the 1st of January last \$31,397,512.80. The expenditures for the first three quarters of this year amount to \$24,734.346.97. The expenditures for the fourth quarter as estimated will amount to \$7,290,723.73, thus making a total of \$32,025,070.70, and leaving a deficit to be provided for on the 1st of January next of about \$627,557.90.

Of the loan of \$12,000,000 which was authorized by Congress at its late session only \$5,432,726.88 have been negotiated. The shortness of time which it had to run has presented no inconsiderable impediment in the way of its being taken by capitalists at home, while the same cause would have operated with nuch greater force in the foreign market. For that reason the foreign market has not been resorted to; and it is now submitted whether it would not be advisable to amend the law by inaking what remains undisposed of payable at a more distant day.

Should it be necessary, in any view that Congress may take of the subject, to revise the existing tariff of duties, I beg leave to say that in the performance of that most delicate operation moderate counsels would seem to be the wisest. The Government under which it is our happiness to live owes its existence to the spirit of compromise which prevailed among its framers; jarring and discordant opinions could only have been reconciled by that noble spirit of patriotism which prompted conciliation and resulted in harmony. In the same spirit the compromise bill, as it is commonly called, was adopted at the session of 1833. While the people of no portion of the Union will ever hesitate to pay all necessary taxes for the support of Government, yet an innate repugnance exists to the imposition of burthens not really necessary for that object. In imposing duties, however, for the purposes of revenue a right to discriminate as to the articles on which the duty shall be laid, as well as the amount, necessarily and most properly exists; otherwise the Government would be placed in the condition of having to levy the same duties upon all articles, the productive as well as the unproductive. The slightest duty upon some might have the effect of causing their importation to cease, whereas others, entering extensively into the consumption of the country, might bear the heaviest without any sensible diminution in the amount imported. So also the Government may be justified in so discriminating by reference to other considerations of domestic policy connected with our manufactures. So long as the duties shall be laid with distinct reference to the wants of the Treasury no well-founded objection can exist against them. It might be esteemed desirable that no such augmentation of the taxes should take place as would have the effect of annulling the land-proceeds distribution act of the last session, which act is declared to be inoperative the moment the duties are increased beyond 20 per cent, the maximum rate established by the compromise act. Some of the provisions of the compromise act, which will go into effect on the 30th day of June next, may, however, be found exceedingly inconvenient in practice under any regulations that Congress may adopt. I refer more particularly to that relating to the home valuation. A difference in value of the same articles to some extent will necessarily exist at different ports, but that is altogether insignificant when compared with the conflicts in valuation which are likely to arise from the differences of opinion among the numerous appraisers of merchandise. In many instances the estimates of value must be conjectural, and thus as many different rates of value may be established as there are appraisers. These differences in valuation may also be increased by the inclination which, without the slightest imputation on their honesty, may arise on the part of the appraisers in favor of their respective ports of entry. I recommend this whole subject to the consideration of Congress with a single additional remark. Certainty and permanency in any system of governmental policy are in all respects eminently desirable, but more particularly is this true in all that affects trade and commerce, the operations of which depend much more on the certainty of their returns and calculations which embrace distant periods of time than on high bounties or duties, which are liable to constant fluctuations.

At your late session I invited your attention to the condition of the currency and exchanges and urged the necessity of adopting such measures as were consistent with the constitutional competency of the Government in order to correct the unsoundness of the one and, as far as practicable, the inequalities of the other. No country can be in the enjoyment of its full measure of prosperity without the presence of a medium of exchange approximating to uniformity of value. What is necessary as between the different nations of the earth is also important as between the inhabitants of different parts of the same country. With the first the precious metals constitute the chief medium of circulation, and such also would be the case as to the last but for inventions comparatively modern, which have furnished in place of gold and silver a paper circulation. I do not propose to enter into a comparative analysis of the merits of the two systems. Such belonged more properly to the period of the introduction of the paper system. The speculative philosopher might find inducements to prosecute the inquiry, but his researches could only lead him to conclude that the paper system had probably better never have been introduced and that society might have been much happier without it. The practical statesman has a very different task to perform. He has to look at things as they are, to take them as he finds them, to supply deficiencies and to prune excesses as far as in The task of furnishing a corrective for derangements of the him lies. paper medium with us is almost inexpressibly great. The power exerted by the States to charter banking corporations, and which, having been carried to a great excess, has filled the country with, in most of the States, an irredeemable paper medium, is an evil which in some way or other requires a corrective. The rates at which bills of exchange are negotiated between different parts of the country furnish an index of the value of the local substitute for gold and silver, which is in many parts so far depreciated as not to be received except at a large discount in payment of debts or in the purchase of produce. It could earnestly be desired that every bank not possessing the means of resumption should follow the example of the late United States Bank of Pennsylvania and go into liquidation rather than by refusing to do so to continue embarrassments in the way of solvent institutions, thereby augmenting the difficulties incident to the present condition of things. Whether this Government, with due regard to the rights of the States, has any power to constrain the banks either to resume specie payments or to force them into liquidation, is an inquiry which will not fail to claim your considera-In view of the great advantages which are allowed the corporation. tors, not among the least of which is the authority contained in most of their charters to make loans to three times the amount of their capital, thereby often deriving three times as much interest on the same amount of money as any individual is permitted by law to receive, no sufficient apology can be urged for a long-continued suspension of specie payments. Such suspension is productive of the greatest detriment to the public by expelling from circulation the precious metals and seriously hazarding the success of any effort that this Government can make to increase commercial facilities and to advance the public interests.

This is the more to be regretted and the indispensable necessity for a sound currency becomes the more manifest when we reflect on the vast amount of the internal commerce of the country. Of this we have no statistics nor just data for forming adequate opinions. But there can be no doubt but that the amount of transportation coastwise by sea, and the transportation inland by railroads and canals, and by steamboats and other modes of conveyance over the surface of our vast rivers and immense lakes, and the value of property carried and interchanged by these means form a general aggregate to which the foreign commerce of the country, large as it is, makes but a distant approach.

In the absence of any controlling power over this subject, which, by forcing a general resumption of specie payments, would at once have the effect of restoring a sound medium of exchange and would leave to the country but little to desire, what measure of relief falling within the limits of our constitutional competency does it become this Government to adopt? It was my painful duty at your last session, under the weight of most solemn obligations, to differ with Congress on the measures which it proposed for my approval, and which it doubtless regarded as corrective of existing evils. Subsequent reflection and events since occurring have only served to confirm me in the opinions then entertained and frankly expressed. I must be permitted to add that no scheme of governmental policy unaided by individual exertions can be available for ameliorating the present condition of things. Commercial modes of exchange and a good currency are but the necessary means of commerce and intercourse, not the direct productive sources of wealth. Wealth can only be accumulated by the earnings of industry and the savings of frugality, and nothing can be more ill judged than to look to facilities in borrowing or to a redundant circulation for the power of discharging pecuniary obligations. The country is full of resources and the people full of energy, and the great and permanent remedy for present embarrassments must be sought in industry, economy, the observance of good faith, and the favorable influence of time. In pursuance of a pledge given to you in my last message to Congress, which pledge I urge as an apology for adventuring to present you the details of any plan, the Secretary of the Treasury will be ready to submit to you, should you require it, a plan of finance which, while it throws around the public treasure reasonable guards for its protection and rests on powers acknowledged in practice to exist from the origin of the Government, will at the same time furnish to the country a sound paper medium and afford all reasonable facilities for regulating the exchanges. When submitted, you will perceive in it a plan amendatory of the existing laws in relation to the Treasury Department, subordinate in all respects to the will of Congress directly and the will of the people indirectly, self-sustaining should it be found in practice to realize its promises in theory, and repealable at the pleasure of Congress. It proposes by effectual restraints and by invoking the true spirit of our institutions to separate the purse from the sword, or, more properly to speak, denies any other control to the President over the agents who may be selected to carry it into execution but what may be indispensably necessary to secure the fidelity of such agents, and by wise regulations keeps plainly apart from each other private and public funds. It contemplates the establishment of a board of control at the seat of government, with agencies at prominent commercial points or wherever else Congress shall direct, for the safe-keeping and disbursement of the public moneys

and a substitution at the option of the public creditor of Treasury notes in lieu of gold and silver. It proposes to limit the issues to an amount not to exceed \$15,000,000 without the express sanction of the legislative power. It also authorizes the receipt of individual deposits of gold and silver to a limited amount, and the granting certificates of deposit divided into such sums as may be called for by the depositors. It proceeds a step further and authorizes the purchase and sale of domestic bills and drafts resting on a real and substantial basis, payable at sight or having but a short time to run, and drawn on places not less than 100 miles apart, which authority, except in so far as may be necessary for Government purposes exclusively, is only to be exerted upon the express condition that its exercise shall not be prohibited by the State in which the agency is situated. In order to cover the expenses incident to the plan, it will be authorized to receive moderate premiums for certificates issued on deposits and on bills bought and sold, and thus, as far as its dealings extend, to furnish facilities to commercial intercourse at the lowest possible rates and to subduct from the earnings of industry the least possible sum. It uses the State banks at a distance from the agencies as auxiliaries without imparting any power to trade in its name. It is subjected to such guards and restraints as have appeared to be necessary. It is the creature of law and exists only at the pleasure of the Legislature. It is made to rest on an actual specie basis in order to redeem the notes at the places of issue, produces no dangerous redundancy of circulation, affords no temptation to speculation, is attended by no inflation of prices, is equable in its operation, makes the Treasury notes (which it may use along with the certificates of deposit and the notes of specie-paying banks) convertible at the place where collected, receivable in payment of Government dues, and without violating any principle of the Constitution affords the Government and the people such facilities as are called for by the wants of both. Such, it has appeared to me, are its recommendations, and in view of them it will be submitted, whenever you may require it, to your consideration.

I am not able to perceive that any fair and candid objection can be urged against the plan, the principal outlines of which I have thus presented. I can not doubt but that the notes which it proposes to furnish at the voluntary option of the public creditor, issued in lieu of the revenue and its certificates of deposit, will be maintained at an equality with gold and silver everywhere. They are redeemable in gold and silver on demand at the places of issue. They are receivable everywhere in payment of Government dues. The Treasury notes are limited to an amount of one-fourth less than the estimated annual receipts of the Treasury, and in addition they rest upon the faith of the Government for their redemption. If all these assurances are not sufficient to make them available, then the idea, as it seems to me, of furnishing a sound paper medium of exchange may be entirely abandoned.

If a fear be indulged that the Government may be tempted to run into excess in its issues at any future day, it seems to me that no such apprehension can reasonably be entertained until all confidence in the representatives of the States and of the people, as well as of the people themselves, shall be lost. The weightiest considerations of policy require that the restraints now proposed to be thrown around the measure should not for light causes be removed. To argue against any proposed plan its liability to possible abuse is to reject every expedient, since everything dependent on human action is liable to abuse. Fifteen millions of Treasury notes may be issued as the maximum, but a discretionary power is to be given to the board of control under that sum, and every consideration will unite in leading them to feel their way with caution. For the first eight years of the existence of the late Bank of the United States its circulation barely exceeded \$4,000,000, and for five of its most prosperous years it was about equal to \$16,000,000; furthermore, the authority given to receive private deposits to a limited amount and to issue certificates in such sums as may be called for by the depositors may so far fill up the channels of circulation as greatly to diminish the necessity of any considerable issue of Treasury notes. A restraint upon the amount of private deposits has seemed to be indispensably necessary from an apprehension, thought to be well founded, that in any emergency of trade confidence might be so far shaken in the banks as to induce a withdrawal from them of private deposits with a view to insure their unquestionable safety when deposited with the Government, which might prove eminently disastrous to the State banks. Is it objected that it is proposed to authorize the agencies to deal in bills of exchange? It is answered that such dealings are to be carried on at the lowest possible premium, are made to rest on an unquestionably sound basis, are designed to reimburse merely the expenses which would otherwise devolve upon the Treasury, and are in strict subordination to the decision of the Supreme Court in the case of the Bank of Augusta against Earle, and other reported cases, and thereby avoids all conflict with State jurisdiction, which I hold to be indispensably requisite. It leaves the banking privileges of the States without interference, looks to the Treasury and the Union, and while furnishing every facility to the first is careful of the interests of the last. But above all, it is created by law, is amendable by aw, and is repealable by law, and, wedded as I am to no theory, but looking solely to the advancement of the public good, I shall be among the very first to urge its repeal if it be found not to subserve the purposes and objects for which it may be created. Nor will the plan be submitted in any overweening confidence in the sufficiency of my own judgment, but with much greater reliance on the wisdom and patriotism of Congress. I can not abandon this subject without urging upon you in the most emphatic manner, whatever may be your action on the suggestions which I have felt it to be my duty to submit, to relieve the Chief Executive

Magistrate, by any and all constitutional means, from a controlling power over the public Treasury. If in the plan proposed, should you deem it worthy of your consideration, that separation is not as complete as you may desire, you will doubtless amend it in that particular. For myself, I disclaim all desire to have any control over the public moneys other than what is indispensably necessary to execute the laws which you may pass.

Nor can I fail to advert in this connection to the debts which many of the States of the Union have contracted abroad and under which they continue to labor. That indebtedness amounts to a sum not less than \$200,000,000, and which has been retributed to them for the most part in works of internal improvement which are destined to prove of vast importance in ultimately advancing their prosperity and wealth. For the debts thus contracted the States are alone responsible. I can do nomore than express the belief that each State will feel itself bound by every consideration of honor as well as of interest to meet its engagements with punctuality. The failure, however, of any one State to do so should in no degree affect the credit of the rest, and the foreign capitalist will have no just cause to experience alarm as to all other State stocks because any one or more of the States may neglect to provide with punctuality the means of redeeming their engagements. Even such States, should there be any, considering the great rapidity with which their resources are developing themselves, will not fail to have the means at no very distant day to redeem their obligations to the uttermost farthing; nor will I doubt but that, in view of that honorable conduct which has evermore governed the States and the people of the Union, they will each and all resort to every legitimate expedient before they will forego a faithful compliance with their obligations.

From the report of the Secretary of War and other reports accompanying it you will be informed of the progress which has been made in the fortifications designed for the protection of our principal cities, roadsteads, and inland frontier during the present year, together with their true state and condition. They will be prosecuted to completion with all the expedition which the means placed by Congress at the disposal of the Executive will allow.

I recommend particularly to your consideration that portion of the Secretary's report which proposes the establishment of a chain of military posts from Council Bluffs to some point on the Pacific Ocean within our limits. The benefit thereby destined to accrue to our citizens engaged in the fur trade over that wilderness region, added to the importance of cultivating friendly relations with savage tribes inhabiting it, and at the same time of giving protection to our frontier settlements and of establishing the means of safe intercourse between the American settlements at the mouth of the Columbia River and those on this side of the Rocky Mountains, would seem to suggest the importance of carrying into effect the recommendations upon this head with as little delay as may be practicable.

The report of the Secretary of the Navy will place you in possession of the present condition of that important arm of the national defense. Every effort will be made to add to its efficiency, and I can not too strongly urge upon you liberal appropriations to that branch of the public service. Inducements of the weightiest character exist for the adoption of this course of policy. Our extended and otherwise exposed maritime frontier calls for protection, to the furnishing of which an efficient naval force is indispensable. We look to no foreign conquests, nor do we propose to enter into competition with any other nation for supremacy on the ocean; but it is due not only to the honor but to the security of the people of the United States that no nation should be permitted to invade our waters at pleasure and subject our towns and villages to conflagration or pillage. Economy in all branches of the public service is due from all the public agents to the people, but parsimony alone would suggest the withholding of the necessary means for the protection of our domestic firesides from invasion and our national honor from disgrace. I would most earnestly recommend to Congress to abstain from all appropriations for objects not absolutely necessary; but I take upon myself, without a moment of hesitancy, all the responsibility of recommending the increase and prompt equipment of that gallant Navy which has lighted up every sea with its victories and spread an imperishable glory over the country.

The report of the Postmaster-General will claim your particular attention, not only because of the valuable suggestions which it contains, but because of the great importance which at all times attaches to that interesting branch of the public service. The increased expense of transporting the mail along the principal routes necessarily claims the public attention, and has awakened a corresponding solicitude on the part of the Government. The transmission of the mail must keep pace with those facilities of intercommunication which are every day becoming greater through the building of railroads and the application of steam power, but it can not be disguised that in order to do so the Post-Office Department is subjected to heavy exactions. The lines of communication between distant parts of the Union are to a great extent occupied by railroads, which, in the nature of things, possess a complete monopoly, and the Department is therefore liable to heavy and unreasonable charges. This evil is destined to great increase in future, and some timely measure may become necessary to guard against it.

I feel it my duty to bring under your consideration a practice which has grown up in the administration of the Government, and which, I am deeply convinced, ought to be corrected. I allude to the exercise of the power which usage rather than reason has vested in the Presidents of removing incumbents from office in order to substitute others more in favor with the dominant party. My own conduct in this respect has been governed by a conscientious purpose to exercise the removing power

only in cases of unfaithfulness or inability, or in those in which its exercise appeared necessary in order to discountenance and suppress that spirit of active partisanship on the part of holders of office which not only withdraws them from the steady and impartial discharge of their official duties, but exerts an undue and injurious influence over elections and degrades the character of the Government itself, inasmuch as it exhibits the Chief Magistrate as being a party through his agents in the secret plots or open workings of political parties.

In respect to the exercise of this power nothing should be left to discretion which may safely be regulated by law, and it is of high importance to restrain as far as possible the stimulus of personal interests in public elections. Considering the great increase which has been made in public offices in the last quarter of a century and the probability of further increase, we incur the hazard of witnessing violent political contests, directed too often to the single object of retaining office by those who are in or obtaining it by those who are out. Under the influence of these convictions I shall cordially concur in any constitutional measure for regulating and, by regulating, restraining the power of removal.

I suggest for your consideration the propriety of making without further delay some specific application of the funds derived under the will of Mr. Smithson, of England, for the diffusion of knowledge, and which have heretofore been vested in public stocks until such time as Congress should think proper to give them a specific direction. Nor will you, I feel confident, permit any abatement of the principal of the legacy to be made should it turn out that the stocks in which the investments have been made have undergone a depreciation.

In conclusion I commend to your care the interests of this District, for which you are the exclusive legislators. Considering that this city is the residence of the Government and for a large part of the year of Congress, and considering also the great cost of the public buildings and the propriety of affording them at all times careful protection, it seems not unreasonable that Congress should contribute toward the expense of an efficient police.

JOHN TYLER.

SPECIAL MESSAGES.

WASHINGTON, December 7, 1841.

To the Senate of the United States:

I transmit herewith a report from the Secretary of War, in compliance with a resolution of the Senate of the 3d of March last, calling for a comparative statement of the condition of the public defenses, of all the preparations and means of defense, and of the actual and authorized strength of the Army on the 1st of January, 1829, and the 1st of January, 1841. JOHN TYLER.

To the Senate of the United States:

I transmit herewith a report from the War Department, in compliance with so much of the resolution of the Senate of March 3, 1841, respecting the military and naval defenses of the country, as relates to the defenses under the superintendence of that Department.

JOHN TYLER.

WASHINGTON, December 8, 1841.

WASHINGTON, December 7, 1841.

To the House of Representatives of the United States:

In answer to the resolution of the House of Representatives of the 4th of September last, requesting information touching the relations between the United States and the Republic of Texas, I transmit a report from the Secretary of State, to whom the resolution was referred. JOHN TYLER.

WASHINGTON, December 8, 1841.

To the House of Representatives of the United States:

I transmit herewith a report from the Secretary of the Treasury, exhibiting certain transfers of appropriations which have been made in that Department in pursuance of the power vested in the President of the United States by the act of Congress of the 3d of March, 1809, entitled "An act further to amend the several acts for the establishment and regulation of the Treasury, War, and Navy Departments."

JOHN TYLER.

WASHINGTON, December 29, 1841.

To the Senate of the United States:

I herewith transmit to the Senate a report* from the Secretary of State, in answer to their resolution of the 27th instant.

JOHN TYLER.

WASHINGTON, January 4, 1842.

To the House of Representatives of the United States:

I herewith communicate a report and statement from the Secretary of State, in answer to a resolution of the House of the 19th of June, 1841, requesting the aggregate amount of each description of persons within the several districts of the United States by counties and principal towns.

JOHN TYLER.

^{*}Stating that no proposition has been made by either the United States or Great Britain relative to the mutual right of search.

John Tyler

WASHINGTON, January 10, 1842.

To the Senate of the United States:

I transmit to the Senate, for its consideration with a view to ratification, a convention between the United States and the Republic of Peru, signed at Lima on the 17th of March last, providing for the adjustment and satisfaction of certain claims of citizens of the United States against the Government of that Republic.

For the purpose of acquainting the Senate with the nature and amount of those demands and with the course of the negotiation, I also communicate a copy of such parts of the correspondence of the agents of the two Governments as relate thereto. JOHN TYLER.

WASHINGTON, January 17, 1842.

To the Senate of the United States:

I transmit to the Senate a report from the Secretary of State, relative to the proceedings and final decision of the commissioners under the convention with the Republic of Texas upon the subject of the boundary between the United States and that Republic.

JOHN TYLER.

[The same message was sent to the House of Representatives.]

WASHINGTON, January 18, 1842.

To the House of Representatives:

I transmit to the House of Representatives, in answer to the resolution of the 14th instant, a report^{*} from the Secretary of State and the papers by which it was accompanied.

JOHN TYLER.

WASHINGTON, January 19, 1842. To the Senate of the United States:

I transmit to the Senate herewith a report from the Secretary of State, with accompanying papers, in answer to their resolution of the 11th instant.

JOHN TYLER.

To the House of Representatives:

I transmit herewith a report[‡] of the Secretary of War, in answer to the resolution of the House of Representatives of the 9th August, 1841. JOHN TYLER.

JANUARY 27, 1842.

^{*}Relating to American citizens captured near Santa Fe, Mexico, by the Mexican army,

[†]Transmitting correspondence relative to the action of the authorities of Nassau, New Providence, in the imprisonment of slaves charged with mutiny and murder, the refusal to surrender them to the United States consul for trial in the United States, and the liberation of slaves, all of said slaves being a part of the cargo of the United States brig *Crobe*.

[‡]Relating to the origin of the Seminole war, slaves captured during said war by United States troops, etc.

To the Senate of the United States:

I transmit herewith to the Senate copies of a report and letter from the commissioners appointed by the President for the exploration and survey of the boundary line between the States of Maine and New Hampshire and the conterminous British Provinces, showing the progress made in that work during the past season, and submitting an estimate, to which I invite the attention of Congress, of the funds that will be requisite for completing the surveys yet to be made on the boundary, and the office work consequent thereon, and for completing the maps of surveys already made.

JOHN TYLER.

[The same message was sent to the House of Representatives.]

NEW YORK, January 4, 1842.

WASHINGTON, February 5, 1842.

Hon. DANIEL WEBSTER,

Secretary of State:

The undersigned, commissioners appointed by the President of the United States for the purpose of exploring and surveying the boundary line between the States of Maine and New Hampshire and the British Provinces in North America, respectfully report—

That in pursuance of the duties of their appointment they have in the course of the late season performed the following surveys and explorations:

I. The meridian line of the monument at the source of the St. Croix has, under the direction of J. D. Graham, been carefully and accurately traced from the station in the vicinity of Houlton where the labors of the year 1840 terminated to a point 4 miles north of the St. John River in the vicinity of the Grand Falls, being a distance of 81 miles from the monument. The timber has been removed along this line to a width necessary for its accurate prolongation and for the requisite astronomical observations at various points upon it, and a correct profile, or vertical section, has also been obtained by means of the spirit level the whole of the distance above mentioned.

Besides the astronomical observations necessary to obtain and continue the due north direction upon this line, numerous magnetic observations have also been made at a number of points upon it, in order to show the physical causes which must operate to produce serious discrepancies between a meridian line properly traced and such a one as has actually separated the jurisdiction of the two Governments since the attempt in the years 1817 and 1818 to define and mark this portion of the boundary under the provisions of the treaty of Ghent, although no portion of that line was ever ratified or made binding upon the parties to the treaty.

Upon this portion of the survey there have been chained, including measured offsets to the old line and to other important points, 85 miles.

Four hundred and fifty-two transit observations of heavenly bodies have been made, aided by three excellent chronometers, for the determination of the true meridian direction, most of which also served for the computation of the correct time.

For the determination of the longitude of this meridian west of the Royal Observatory of Greenwich and the latitudes of four important points upon it there were made eighty-five complete sets of astronomical observations, including altitudes of the sun and stars and the meridian transits of the moon and moon-culminating stars.

The number of barometric observations made upon the line and in its vicinity is 5,767; besides which there were made at Calais, for comparison with the level of mean tide on the St. Croix, 1,336 similar observations.

There have been determined in altitude above or below the level of the monument, by means of the spirit level, 1,716 points, and the altitudes of 1,816 other points have been similarly observed in order to verify the altitude of the monument above the level of mean tide at Calais.

For the determination of the magnetic variation at a number of points on the meridian line, more than 200 observations have been made upon four different needles, and for the determination of the magnetic dip at four principal stations on the same meridian 300 observations have been made upon two different needles.

Under the directions of the same commissioner the line claimed by Great Britain from Mars Hill and that recently chosen by Messrs. Mudge and Featherstonhaugh have been surveyed westward from the meridian line to the highlands near the head waters of the Aroostook, and the necessary data obtained for the construction of a correct map of that portion of country.

Upon this survey, without reckoning the distances traveled for approaching many important points of observation, there have been actually measured with the chain and coursed with proper instruments 267 miles, including the Aroostook River from its mouth to the point where it receives the Lapawnipeag Stream, a profile of the country from the head waters of the Moluncus to the St. John at Fish River, and such other important lines as were necessary for obtaining the correct topography of the country, and the altitudes of many points upon the line claimed by Great Britain as the boundary, in the vicinity of the Aroostook, have been obtained.

Ten principal points have been determined in latitude and longitude by means of 115 sets of astronomical observations, aided by three good chronometers, and seventeen other points have been determined by triangulation with a portable theodolite. Two hundred and five points have been determined in altitude by means of 1,319barometric observations, and seventeen by means of the theodolite and spirit level. One hundred and ninety-two observations have been made for determining the variation of the magnetic needle at three important points.

The field duties above mentioned are considered to furnish sufficient data for a correct map of the line reported upon by the late British commissioners, Colonel Mudge and Mr. Featherstonhaugh, between the St. John River and the head of the Aroostook, besides some lateral explorations of considerable extent that will have an important bearing upon this branch of the subject. The work accomplished is full as much as could have been properly done in a single season, marked, as the last was, by an unusual drought of long continuance, which rendered it impossible to ascend, even with light cances, some of the smaller streams, especially those forming the northwesternmost sources of the Aroostook. These might be profitably explored another season.

2. The division under the direction of A. Talcott has, besides verifying a part of the line of r840 and tracing the course of Indian Stream (a branch of the Connecticut) to its source, explored and surveyed the line of highlands which extends from the Kennebec road to the Temiscouata portage, and so much of the line claimed by Great Britain as extends from the Kennebec road to the eastward as far as the head of the Aroostook River.

In the course of this survey, without counting the lines of approach or ground traveled over more than once, 703 miles have been passed over and such notes taken as will form the basis of a map. Of these 703 miles, 335 are upon the lines respectively claimed as boundaries by the Governments of the United States and Great Britain. In the course of these surveys, in order to the geographical determination of the position of the line, the latitudes of 54 points have been determined by means of 114 sets of altitudes of heavenly bodies, and the sets of subsidiary observations for time and for the determination of longitude by chronometers amount to 245. The number of points at which observations have been made by barometers for the purpose of determining their altitudes is 930, of which 669 are upon the boundaries respectively claimed by the two countries. The number of separate sets of barometric readings made at these points amounts to 1,981, while those made at the fixed stations, with which the former are to be compared, amount to 1,671.

3. The division under the direction of J. Renwick has explored or surveyed the line of highlands from the southeastern extremity of Lake Matapediac to the vicinity of the river Du Loup, where the line of survey has been connected with that of A. Talcott. In this survey a gap is yet left of a few miles on the western side of the valley of the Rimouski near its source.

In the course of the operations of this division 586 miles have been passed over and such notes taken as will form the basis of a map. Of these 586 miles, 275 have been actually measured, 209 are upon the boundary claimed by the United States, and about 30 upon the line pointed out by the proclamation of the King of Great Britain of the 7th of October, 1763, as the southern boundary of the Province of Quebec, making in all 239 miles of the height of land.

In the course of these surveys, in order to the geographical determination of the position of the line, the latitudes of 47 points have been determined by means of 85 sets of altitudes of heavenly bodies, and the sets of subsidiary observations for time and for the determination of longitude by chronometers amount to 130. The number of points at which observations have been made by barometers for the purpose of determining their altitudes is 407, of which 267 are upon the boundary claimed by the United States. The number of separate sets of barometric readings made at these points amounts to 1,153, while those made at the fixed stations amount to 837.

The division of Major Graham not having returned from the field until within a few days, neither the reduction of the astronomical observations nor any of the office work preparatory to a general map has yet been commenced by his division.

The office work of the divisions of A. Talcott and J. Renwick has been steadily carried on since the return of those commissioners from the field in the month of October, and great progress has been made in the calculations and plotting preparatory to the construction of maps, and necessary as materials for a general report.

In this state of the work of the several divisions the undersigned find themselves under the necessity of communicating to the State Department that the further progress of their operations is about to be arrested by the exhaustion of the appropriation, and of stating that unless speedy provision be made for the supply of the necessary funds the report of their operations can not be made up in time to be laid before Congress at its present session.

The position of the finances of the commission may be seen by the following statement:

Of the appropriation of \$75,000 there have been drawn	
By J. Renwick	\$21,000
By A. Talcott	24, 200
By J. D. Graham	25,000
Total drawn Leaving in the Treasury of the United States \$4.800.	70, 200
By a careful estimate it is found that to finish the office work of the several divi- sions there will be required over and above any balances in the hands of the several commissioners—	
For the division of J. Renwick	\$3,000
For the division of A. Talcott For the division of J. D. Graham, including some arrearages due for instru-	5,800
ments and to assistant engineers attached to this division	6, 500
Making in all $$15,300$, and leaving to be provided for the completion of the work late season $$10,500$.	of the

The undersigned can not refrain from stating that the necessity of applying for further funds was unexpected by each of them individually, as it is painful to them collectively. There are, however, reasons that in their opinion are incontrovertible

which have led to an expenditure thus exceeding their estimate submitted to the Secretary of State the 11th of January, 1841:

r. The estimate for the expenses of the division under the direction of Major Graham amounted to $$22,5\infty$. This referred only, however, to the continuation of the survey of the meridian line; and as the country had been represented by the most authentic maps as generally rising from the monument to the north, it was inferred that the timber to be cut away in opening this line through a dense forest would be of the description generally found upon elevated and dry lands, and the labor supposed to be requisite was estimated accordingly. So far, however, from this being the case, 26 miles out of the 32 between the base of Parks Ridge, near Houlton, and the river Des Chutes (6 miles north of the latitude of Mars Hill) have actually been found to be below the level of the monument and intersected by swamps covered with a thick growth of cedar and other timber common to such land, extremely difficult to cut away. More than double the labor estimated had therefore to be performed in accomplishing this and all similar portions of the work, and a corresponding increase of expense was unavoidable.

In addition to this increased labor upon the meridian line, the division of Major Graham has executed the surveys between that line and the head waters of the Aroostook, already given in detail, the expenses for which were not estimated or included in the sum above mentioned.

The cost of this survey, including the instruments that were required for it, has amounted to \$5,500, and while this sum should be added to the original estimate for this division, the expenses of the divisions of the other two commissioners have not in any manner been thereby diminished, for the actual quantity of work performed by them has exceeded what was supposed from the best maps extant to be necessary upon the whole of the lines claimed by the two Governments, respectively, exclusive of the meridian line, as will hereafter be shown.

There was another cause which tended in a great degree to augment the expenses of this division in proportion to the progress of the work, which it was not within the power of human agency to control, and which we should not omit to mention here.

The severe drought which prevailed throughout this region of country during the month of August and the greater part of September caused the fires which are annually set to the fallen timber upon newly cleared lands to spread far and wide into the growing forest, and so rapid was its progress and so serious its ravages as to compel the inhabitants in many cases to fly for the preservation of life. Some check was experienced in the duties along the meridiau line from the flames that actually embraced it, but a far more serious one from the dense smoke which filled the atmosphere almost incessantly for six weeks, and so obstructed the view as to render it impossible to fix the stations in advance with the requisite precision.

While the party charged with the astronomical operations was thus deprived of the opportunity of making scarcely any progress for six weeks, the expense of maintaining it could not in any way be diminished, because there was a daily hope that such a change in the weather might occur as would have removed this difficulty.

In order to make amends as far as practicable for so much time unavoidably lost, this division continued to prosecute its field duties north of the forty-seventh degree of latitude until several weeks after the severities of winter had commenced, with no other protection than their tents, the commissioner in charge of it believing that the expectations of the Government and of the country generally would but be fulfilled by the investigations in relation to this important line being pushed to the utmost attainable point. But for this it would have been impossible to have reached the St John River the late season.

There remains to be surveyed along this meridian line, in order to reach the northwest angle of Nova Scotia as claimed by the United States, about 64 miles, to accomplish which will require another season of active field duty. 2. In the estimate for the work of the division of A. Talcott and J. Renwick it was assumed that the length of the boundary remaining on the line claimed by the United States was 320 miles, and upon the lines claimed by Great Britain 170 miles.

Of the latter, about one-half was undertaken by Major Graham's division, * leaving for the estimated distance to be surveyed by the divisions of Λ . Talcott and J. Renwick 405 miles.

It will appear by the statement hereinbefore given that the joint surveys of these two divisions upon the lines of highlands have actually amounted to 574 miles. Upon the principle of their estimate, the probable cost of this would have amounted to \$49,746.37, and with the addition for instruments and for the additional cost of the more remote parts of the line to \$57,079.70.

The actual cost, including the foregoing estimate for the completion of the work, is \$54,000.

It will appear, therefore, that when the increased extent of the work performed over that made the basis of the estimate is considered, the cost of performing it, so far from having exceeded the estimate, has fallen short of it by \$3,000.

The reason of the discrepancy between the real extent of the line, as actually measured, and that which formed the basis of the calculation is that the latter was made by reference to the best existing maps, which were considered to be entitled to a certain degree of credit. Upon the close examination which the operations of the late season have afforded, these maps have been ascertained to be exceedingly erroneous. Well-known streams have been found to extend in either direction many miles beyond the points at which their sources have been laid down on the maps, and great rivers and lakes have, as it were, been discovered, of which no delineation had ever been given by geographers. The extent of these errors in remote and difficultly accessible points may be inferred from what has been found to occur in the part of the region which is most accessible, best known, and most frequently traversed.

On the Temisconata portage, a road traveled weekly by the mail of Her Britannic Majesty, continually passed by the officers of her various services, which had been carefully surveyed by civil engineers preparatory to its reconstruction, and which has been traveled by the surveyors of both countries under the joint commission, it had hitherto been believed, and it was so represented on all maps, both English and American, that the line dividing the waters crossed the road three times. The surveys of the late season show that the boundary claimed by the United States crosses this road five times, and it became necessary to explore the culminating points of the valleys of four streams, instead of two, as had been anticipated. Instances of the same sort, but which do not admit of verbal description, have occurred on every part of the lines of highlands.

The two commissioners whose operations are under consideration no doubt had it in their power to have suspended their operations and returned so soon as the portion of the appropriation placed at their disposal was so far exhausted as to leave no more than would be needed to complete their office work; but they feel satisfied that they would not have been justified in so doing so long as any portion of the line remained unsurveyed or the weather would permit a party to keep the field. Thus, although in the original plan for the partition of the work it was estimated that their lines would probably be connected in the parallel of the river Oucile, about 30 miles south of Temiscouata portage, when it was found that, from unforeseen delays i:, the transportation of the party of J. Renwick by sea to their work, and on the river

^{*} It has already been stated that in the survey of the portion of this line allotted to Major Graham there were actually measured upon it, with the chain, 276 miles, and this did not constitute more than one-half the labor and expense incident to all the dutics enumerated and performed by his division on his portion, so much did the work required upon this portion of it exceed what was estimated for the whole of it.

St. Lawrence from one station to another, it became doubtful whether he could pass the Temiscouata portage before the woods became impassable, his colleague continued his parties in the field until the junction was effected. In this way, while the expenses of the division of J. Renwick have not been materially diminished, those of the division of A. Talcott have been largely increased; but a portion of the general work has been accomplished which might otherwise have been left incomplete.

The undersigned, in conclusion, beg leave respectfully to urge the importance of a speedy appropriation to enable them to make up their report. A delay of any continuance will be productive of evil, either by enhancing the cost of office work or by rendering it difficult in consequence of the dispersion of the engineers and surveyors by whom the field notes have been taken. Upon the completion only of such a report will it be possible to render apparent how much of the whole task has been accomplished and how much remains to be performed; and the Department will then have it in its power to decide whether the part that has not been completed is of such importance to the question at issue as to require further operations upon it.

All which is respectfully submitted.

JAS. RENWICK, A. TALCOTT, J. D. GRAHAM, *Commissioners*.

WASHINGTON, January 25, 1842.

Hon. DANIEL WEBSTER, Secretary of State.

SIR: The undersigned, commissioners appointed by the President of the United States for the purpose of surveying and exploring the boundary line between the States of Maine and New Hampshire and the British Provinces, beg leave, in compliance with your directions, to submit an estimate for the operations of the commission for the ensuing year.

So much of your directions as regards the state of the survey and the amount required to complete the office work preparatory to a report has already been laid before you in their report of the 4th January, 1842, prepared in anticipation of your orders. By reference thereto it will appear that the delineation of the meridian of the source of St. Croix has not, in spite of every effort on the part of the commissioner to whom it was assigned, been pursued farther than SI miles from the monument. Sixty-four miles, therefore, of the said meridian line remain to be surveyed before this part of their task is completed. The other two commissioners, while they would not have hesitated to join in a final report in case the state of the survey of the meridian line would have permitted it, are aware that the hasty manner in which their work was performed, in anticipation of completing the object of their appointment during the past year, leaves room for a more accurate examination of some parts of the lines they have surveyed. Some portions, also, of the lines intrusted to them, respectively, were not reached; and, in addition, a part of the survey which was contemplated in their original instructions from your predecessor was not included in their estimates for the past year, in consequence of its having only a collateral relation to the main object.

Thus the surveys respectively undertaken by Messrs. Talcott and Graham of the lines claimed on the part of Great Britain and by Messrs. Mudge and Featherstonhaugh, although brought near to each other, have not been united, and a part of the highlands claimed by the United States near the source of the Rimouski was not reached by the parties of Professor Renwick.

The height of a part of the line explored by Captain Talcott in 1840, lying at the source of Arnolds River, was not determined for the want of a barometer.

Two or three miles in length of the line of highlands near the source of the river **Du Loup** require to be reexamined.

The longitudes of Lake Megantic, Lake Etchemin, the source of the Metjarmette,

upon the line of Captain Talcott, and of some one point on the line of Professor Renvick ought to be ascertained with greater precision than the time that could be allowed during the last season would permit.

The instructions of Mr. Forsyth contemplated an exploration of the highlands described in the proclamation of 1763 as beginning on the north shore of the Bay of Chaleurs. The existence of a continuous elevated region from the tide of that bay to the termination of the exploring meridian line has been ascertained in a manner satisfactory to the commission, but the heights have not been measured on that part of it which lies nearest to the Bay of Chaleurs.

Under these circumstances the undersigned are of opinion that as no delay in the presentation of a final report will arise from further explorations of the parts of the territory thus pointed out and the more accurate examination of the uncertain matters, it would add to the confidence which may be placed in their results that a party be employed under the direction of each of the above-named commissioners upon the said work. For this object it is estimated—

I. That $$25,\infty\infty$ in all, say $$12,5\infty$ to be expended under the direction of each of the two above-named commissioners, will suffice. A less sum than this will not keep two parties in the field during the working season; a larger sum could not advantageously be expended on this part of the work.

2. In estimating the amount necessary for completing the delineation of the meridian of the source of the river St. Croix, it will be borne in mind that numerous astronomical observations must be made in aid of the operations with the transit instrument, in order constantly to preserve the true north direction, a condition of the utmost consequence, not alone as affecting the extent of territory that will be embraced by it, but more particularly because the character and position of the highlands alluded to in the treaty of 1783 would be exhibited in a very different light as encountered by a line running *due north*, as is required by the treaty, and by one varying even in a slight degree from that direction. This principle has already been exhibited in a striking manner by the trace of the meridian line as far as it has now progressed, for instead of encountering highlands in the latitude of Mars Hill having a claim to be considered those described in the treaty as the intended boundary between the two countries, the line as recently traced actually passes that latitude at an elevation of less than 10 feet above the level of the monument, and the greatest elevation encountered by this line in passing over any spur connected with Mars Hill is 63 feet above the level of the monument. In advance of this spur the line becomes again depressed below the level of the monument at several points before it reaches the Aroostook.

These, however, are only a few of the many facts that might be adduced from the surveys already made to show how important it is to the question at issue that every necessary means to avail of the aids of science should be adopted in order to preserve scrupulously the direction specified in the treaty while tracing this line. It must also be remembered that in the further prosecution of this duty a wilderness has to be traversed, totally uninhabited and totally without roads. The only means of progressing through it and of transporting the necessary provisions and the instruments indispensable to accuracy will be by means of cances, for supplying two or three depots at points where Grand River and the waters of the Restigouche intersect the line, leaving the whole transportation along the meridian to be performed by packmen, or men carrying burdens on their backs. That the usual avenue to give an unimpeded view along the line must be opened through a dense forest, which in the neighborhood of all streams crossing it will still be found to consist of that swampy growth described in the report from the undersigned of the 4th of January instant as requiring so much labor to cut through it.

With all these circumstances in view, the following estimate for the completion of the survey of the meridian line and for some further surveys between that line

John Tyler

and the source of the Aroostook is submitted; and it is intended to embrace the expense of completing both the field and the office work that will require to be done in order to a final accomplishment of the duties.

Estimate for the meridian line.

1.	Pay of 4 assistant engineers from May 1, 1842, to March 31, 1843, being 304 days at \$4 per day each	; \$1,864.	00
2.	Pay of 3 other assistant engineers from May 1, 1842, to December 31, 1842, being 275 days, at \$3 per day each		
3.	Hire of 30 men as axmen, and for preparing, constructing, and crecting stations and signals in advance, from June 1 to November 30, 1842, being 183 days, at \$1 each per day.		
4.	Hire of 30 other men as instrument carriers, chain bearers, canoe men, and packmen for 183 days, as above, at \$1 per day each		00
5.	Hire of 1 carpenter and 2 cooks 183 days, as above, at \$1.25 per day each	686.	25
Ğ.	Subsistence of 1 commissioner, 7 assistant engineers, 1 carpenter, 2 cooks, and 60 men, as above, being in all 71 persons, while in the field, 183 days at 50 cents per day each, including transportation of provisions to Grand Falls of St. John, or first depot	496.	50
7.	Purchase of barometers and repairs of instruments heretofore used		00
8.	Salary of commissioner	3,000.	00
9.	Contingencies, including stationary, office rent, and fuel, and transpor-		
1	tation of engineers and commissioner to and from the field		00
	Total required for the meridian line		

All which is respectfully submitted.

JAS. RENWICK, A. TALCOTT, J. D. GRAHAM,

RECAPITULATION.

r .	Amount of estimate for completing the surveys yet required to be made on the boundary, as above stated	\$55, 801, 75
2.	Amount of estimate rendered with report of January 4, 1842, for complet- ing maps of surveys already made, etc	
	Aggregate amount required	

To the House of Representatives:

WASHINGTON, February 9, 1842.

In answer to a resolution of the House of Representatives of the 7th of February, 1842, in the following words-

Resolved, That the President of the United States inform this House under what authority the commission, consisting of George Poindexter and others, for the investigation of the concerns of the New York custom-house was raised; what were the purposes and objects of said commission; how many persons have in any way been connected with it, and the compensation received or to be received by each; and the aggregate amount of every description of said commission, and out of what fund the said expenditures have been or are to be paid—

I have to state that the authority for instituting the commission mentioned in said resolution is the authority vested in the President of the United States to "take care that the laws be faithfully executed, and to give to Congress from time to time information on the state of the Union, and to recommend to their consideration such measures as he shall judge necessary and expedient."

The expediency, if not the necessity, of inquiries into the transactions of our custom-houses, especially in cases where abuses and malpractices are alleged, must be obvious to Congress, and that investigations of this kind were expected to be made appears from the provision in the twentyfirst section of the act of 1799, "which enjoins collectors of the customs to submit their books, papers, and accounts to the inspection of such persons as shall be appointed for that purpose."

The purposes and objects of the commission will be explained by the commission itself, a copy of which, together with information on the other subjects mentioned in the resolution, will at the proper time be laid before Congress. JOHN TYLER.

To the Senate of the United States:

In compliance with the request of the governor of the Territory of Iowa, I have the honor to submit the accompanying memorials* and joint resolutions* of the council and house of representatives of that Territory to your consideration.

JOHN TYLER.

WASHINGTON, February 14, 1842.

WASHINGTON, February 11, 1842.

To the House of Representatives of the United States:

In compliance with a resolution of the House of Representatives of the 3d instant, I transmit herewith a report \ddagger from the Secretary of State, with copies of the papers requested by the resolution.

JOHN TYLER.

WASHINGTON, February 16, 1842.

To the House of Representatives:

I transmit herewith a communication addressed to me by the Secretary of War, in relation to certain contracts entered into by a board of medical officers appointed for that purpose for the purchase of sites on the western waters for the erection of marine hospitals; and concurring fully in his views of the subject, I recommend that either an appropriation of \$44,721 be made for the purpose of satisfying the claims of the individuals with whom the contracts were made or that the Department of War be authorized to reconvey to them their lands and annul the contracts.

JOHN TYLER.

WASHINGTON, February 18, 1842.

To the Senate and House of Representatives of the United States:

I have the honor to invite the attention of Congress to the accompanying letter, addressed to me by the Secretary of State. You will doubtless

^{*}Asking an appropriation to defray the expenses growing out of the dispute between the United States, within the Territory of Jowa, and the State of Missouri relative to the southern boundary line, an appropriation to defray the expenses of a convention for the formation of a State constitution, etc.

[†]Relating to letters written in March, 1847, by Andrew Stevenson, United States minister at the Court of Great Britain, to Isaac Hull, commander of the United States squadron in the Mediterranean, which caused a part of that squadron to return to the United States.

perceive the importance of furnishing a uniform rule for the guidance of the public officers in the matter referred to in the Secretary's letter.*

JOHN TYLER.

WASHINGTON, February 19, 1842.

To the House of Representatives:

In compliance with the resolution of the House of Representatives of the 8th instant, I have the honor to submit the accompanying communication † from the Secretary of State and the correspondence on the subject referred to by the resolution of the House. JOHN TYLER.

WASHINGTON, February 21, 1842.

To the Senate of the United States:

I transmit to the Senate herewith a report from the Secretary of State, with an accompanying paper,[‡] in answer to their resolution of the 18th instant. JOHN TYLER.

WASHINGTON, February 26, 1842.

To the House of Representatives:

The resolution of the House of Representatives of the 21st instant, requesting the President of the United States to communicate to that body, "if not incompatible with the public interest, the state of the negotiation between the United States and the Government of Great Britain in relation to the northeastern boundary of the State of Maine, and also all correspondence on that subject between the two Governments not hitherto communicated," has been transmitted to me. Desirous always to lay before Congress and the public everything affecting the state of the country to the fullest extent consistent with propriety and prudence, I have to inform the House of Representatives that in my judgment no communication could be made by me at this time on the subject of its resolution without detriment or danger to the public interests.

JOHN TYLER.

WASHINGTON, February 28, 1842.

To the House of Representatives:

I have the honor to submit copies of the correspondence§ and other documents called for by the resolution of the House of Representatives of the 2d February.

^{*}Relating to the mode of paying salaries, etc., of ministers and other diplomatic agents of the United States at the several Courts of Europe.

[†]Relating to the colonial history of New York.

[‡]Extract of a letter from the Department of State to the United States minister at London relative to the case of the brig *Creole*.

[§]Relating to an act of the legislature of South Carolina providing for the imprisonment of free negroes found on board vessels entering any of the ports of that State, complaints of the British Government relative to the operation of said act, etc.

I am not informed of the existence of any official opinion of the late Judge Johnson on the unconstitutionality of the act or acts of the State of South Carolina upon the subject referred to in the resolution.

JOHN TYLER.

To the House of Representatives:

WASHINGTON, March 8, 1842.

I feel it to be my duty to invite your attention to the accompanying communication from the Secretary of the Treasury, in relation to the probable demands which will be made upon the Treasury for the present quarter. It will be seen that, without arresting the requisitions which will be made by the War and Navy Departments for the months of March, April, and May, there will be an unprovided-for deficit of upward of three millions.

I can not bring myself, however, to believe that it will enter into the view of any department of the Government to arrest works of defense now in progress of completion or vessels under construction or preparation for sea. Having due regard to the unsettled condition of our foreign relations and the exposed situation of our inland and maritime frontier, I should feel myself wanting in my duty to the country if I could hesitate in urging upon Congress all necessary appropriations for placing it in an attitude of strength and security. Such recommendation, however, has heretofore been made in full reliance as well on Congress as on the well-known patriotism of the people, their high sense of national honor, and their determination to defend our soil from the possibility, however remote, of a hostile invasion.

The diminution in the revenue arising from the great diminution of duties under what is commonly called the compromise act necessarily involves the Treasury in embarrassments, which have been for some years palliated by the temporary expedient of issuing Treasury notes an expedient which, affording no permanent relief, has imposed upon Congress from time to time the necessity of replacing the old by a new issue. The amount outstanding on the 4th of March, 1840, varies in no great degree from the amount which will be outstanding on the 1st of January next, while in the interim the new issues are rendered equivalent to the redemption of the old, and at the end of the fiscal year leave an augmented pressure on the finances by the accumulation of interest.

The contemplated revision of the tariff of duties may, and doubtless will, lead in the end to a relief of the Treasury from these constantly recurring embarrassments, but it must be obvious that time will be necessary to realize the full anticipations of financial benefit from any modification of the tariff laws. In the meantime I submit to Congress the suggestions made by the Secretary, and invite its prompt and speedy action. JOHN TYLER.

WASHINGTON, March 8, 1842.

To the Senate and House of Representatives:

In my message of the 7th of December I suggested to Congress the propriety, and in some degree the necessity, of making proper provisions by law within the pale of the Constitution for the removal at their commencement and at the option of the party of all such cases as might arise in State courts involving national questions or questions touching the faithful observance and discharge of the international obligations of the United States from such State tribunal to the Federal judiciary. I am urged to repeat at this time this recommendation by the receipt of intelligence, upon which I can rely, that a subject of Great Britain residing in Upper Canada has been arrested upon a charge of connection with the expedition fitted out by the Canadian authorities by which the Caroline was destroyed, and will in all probability be subjected to trial in the State courts of New York. It is doubtful whether in this state of things, should his discharge be demanded by the British Government, this Government is invested with any control over the subject until the case shall have reached the court of final resort of the State of New York and been decided in that court; and although such delay ought not, in a national point of view to give cause of umbrage to Great Britain, yet the prompt and instant rendering of justice to foreign nations should be placed among our highest duties. I can not, therefore, in consideration of what properly becomes the United States, and in anticipation of any demand from a foreign government for the discharge of one of its subjects, forego the duty of repeating my recommendation to Congress for the immediate adoption of some suitable legislative provision on this subject.

JOHN TYLER.

WASHINGTON, March 11, 1842.

To the House of Representatives:

In compliance with a resolution of the House of Representatives of the 23d ultimo, I communicate to that body a report from the Secretary of State, conveying copies of the correspondence* which contains the information called for by said resolution.

JOHN TYLER.

WASHINGTON, March 12, 1842.

To the Senate of the United States:

I have reason to think that the rejection of Silas Reed as surveyorgeneral of Illinois and Missouri on the evening of the last day of the session of the Senate at the last session of Congress was founded in a misapprehension of facts, which, while it deprived the public of the services

*Relating to complaints of Spain and Portugal that the operation of the revenue act of September 11, 1841, infringed treaty stipulations.

Messages and Papers of the Presidents

of a useful officer, left him to suffer a considerable degree of injustice in his reputation. After mature reflection upon all the circumstances of his case, and particularly of facts which have become known since his rejection, I have felt it my duty to submit his nomination for the same office anew to the Senate for its advice and consent.

I therefore nominate Silas Reed to be surveyor-general of Illinois and Missouri, in place of Joseph C. Brown, removed.

JOHN TYLER.

To the Senate of the United States:

I take the earliest moment to correct an error into which I inadvertently fell in my message of the 12th instant, nominating Silas Reed to be surveyor-general for Illinois and Missouri. In that message I represent the nominee as being rejected by the Senate on the evening of the last day of the last session of Congress, when upon a more accurate inquiry I find that he was rejected on the 14th of August, 1841, and his successor nominated on the 23d August and confirmed on the 13th September, which was the last day of the last session of Congress, and which fact had become identified in my memory, upon which I drew when I wrote the message, with the fact of his rejection.

I hasten to make the correction, not deeming it, however, of much moment in regard to the real merits of the nomination; for whether the rejection occurred on the last or any other day of the session, if done under a misapprehension or mistake of the facts, the Senate, I doubt not, will take equal pleasure in correcting the error.

JOHN TYLER.

WASHINGTON, March 17, 1842.

To the Senate of the United States:

In answer to the resolution of the Senate of the 2d ultimo, requesting information in regard to the demarcation of the boundary line between the United States and the Republic of Texas, I transmit a report from the Secretary of State and the papers by which it was accompanied.

JOHN TYLER.

WASHINGTON, March 17, 1842.

To the Senate of the United States:

I have the honor to submit the accompanying report and documents* from the Postmaster-General, in compliance with the resolution of the Senate of the 16th February. JOHN TYLER.

*Statements of the quantity and cost of labor and materials for the new public buildings in Washington, D. C., etc.

1957

MARCH 15, 1842.

WASHINGTON, March 23, 1842.

To the House of Representatives of the United States:

A resolution adopted by the House of Representatives on the 16th instant, in the following words, viz, "*Resolved*, That the President of the United States and the heads of the several Departments be requested to communicate to the House of Representatives the names of such of the members (if any) of the Twenty-sixth and Twenty-seventh Congresses who have been applicants for office, and for what offices, distinguishing between those who have applied in person and those whose applications were made by friends, whether in person or by writing," has been transmitted to me for my consideration.

If it were consistent with the rights and duties of the executive department, it would afford me great pleasure to furnish in this, as in all cases in which proper information is demanded, a ready compliance with the wishes of the House of Representatives. But since, in my view, general considerations of policy and propriety, as well as a proper defense of the rights and safeguards of the executive department, require of me as the Chief Magistrate to refuse compliance with the terms of this resolution, it is incumbent on me to urge, for the consideration of the House of Representatives, my reasons for declining to give the desired information.

All appointments to office made by a President become from the date of their nomination to the Senate official acts, which are matter of record and are at the proper time made known to the House of Representatives and to the country. But applications for office, or letters respecting appointments, or conversations held with individuals on such subjects are not official proceedings, and can not by any means be made to partake of the character of official proceedings unless after the nomination of such person so writing or conversing the President shall think proper to lay such correspondence or such conversations before the Senate. Applications for office are in their very nature confidential, and if the reasons assigned for such applications or the names of the applicants were communicated, not only would such implied confidence be wantonly violated, but, in addition, it is quite obvious that a mass of vague, incoherent, and personal matter would be made public at a vast consumption of time, money, and trouble without accomplishing or tending in any manner to accomplish, as it appears to me, any useful object connected with a sound and constitutional administration of the Government in any of its branches.

But there is a consideration of a still more effective and lofty character which is with me entirely decisive of the correctness of the view that I have taken of this question. While I shall ever evince the greatest readiness to communicate to the House of Representatives all proper information which the House shall deem necessary to a due discharge of its constitutional obligations and functions, yet it becomes me, in defense of the Constitution and laws of the United States, to protect the executive

Messages and Papers of the Presidents

department from all encroachment on its powers, rights, and duties. In my judgment a compliance with the resolution which has been transmitted to me would be a surrender of duties and powers which the Constitution has conferred exclusively on the Executive, and therefore such compliance can not be made by me nor by the heads of Departments by The appointing power, so far as it is bestowed on the my direction. President by the Constitution, is conferred without reserve or qualification. The reason for the appointment and the responsibility of the appointment rest with him alone. I can not perceive anywhere in the Constitution of the United States any right conferred on the House of Representatives to hear the reasons which an applicant may urge for an appointment to office under the executive department, or any duty resting upon the House of Representatives by which it may become responsible for any such appointment.

Any assumption or misapprehension on the part of the House of Representatives of its duties and powers in respect to appointments by which it encroaches on the rights and duties of the executive department is to the extent to which it reaches dangerous, impolitic, and unconstitutional.

For these reasons, so perfectly convincing to my mind, I beg leave respectfully to repeat, in conclusion, that I can not comply with the request contained in the above resolution. JOHN TYLER.

WASHINGTON, March 25, 1842.

To the Senate and House of Representatives of the United States:

Notwithstanding the urgency with which I have on more than one occasion felt it my duty to press upon Congress the necessity of providing the Government with the means of discharging its debts and maintaining inviolate the public faith, the increasing embarrassments of the Treasury impose upon me the indispensable obligation of again inviting your most serious attention to the condition of the finances. Fortunately for myself in thus bringing this important subject to your view for a deliberate and comprehensive examination in all its bearings, and I trust I may add for a final adjustment of it to the common advantage of the whole Union, I am permitted to approach it with perfect freedom and candor. As few of the burdens for which provision is now required to be made have been brought upon the country during my short administration of its affairs, I have neither motive nor wish to make them a matter of crimination against any of my predecessors. I am disposed to regard, as I am bound to treat, them as facts which can not now be undone, and as deeply interesting to us all, and equally imposing upon all the most solemn duties; and the only use I would make of the errors of the past is by a careful examination of their causes and character to avoid if possible the repetition of them in future. The condition of the country, indeed, is such as may well arrest the conflict of parties.

The conviction seems at length to have made its way to the minds of all that the disproportion between the public responsibilities and the means provided for meeting them is no casual nor transient evil. It is, on the contrary, one which for some years to come, notwithstanding a resort to all reasonable retrenchments and the constant progress of the country in population and productive power, must continue to increase under existing laws, unless we consent to give up or impair all our defenses in war and peace. But this is a thought which I am persuaded no patriotic mind would for a moment entertain. Without affecting an alarm, which I do not feel, in regard to our foreign relations, it may safely be affirmed that they are in a state too critical and involve too many momentous issues to permit us to neglect in the least, much less to abandon entirely, those means of asserting our rights without which negotiation is without dignity and peace without security.

In the report of the Secretary of the Treasury submitted to Congress at the commencement of the present session it is estimated that after exhausting all the probable resources of the year there will remain a deficit of about \$14,000,000. With a view partly to a permanent system of revenue and partly to immediate relief from actual embarrassment, that officer recommended, together with a plan for establishing a Government exchequer, some expedients of a more temporary character, viz, the issuing of Treasury notes and the extension of the time for which the loan authorized to be negotiated by the act of the last session should be taken. Congress accordingly provided for an issue of Treasury notes to the amount of \$5,000,000, but subject to the condition that they should not be paid away below par.

No measure connected with the last of the two objects above mentioned was introduced until recently into the House of Representatives. Should the loan bill now pending before that body pass into a law for its present amount, there would still remain a deficit of \$2,500,000. It requires no argument to show that such a condition of the Treasury is incompatible not only with a high state of public credit, but with anything approaching to efficiency in the conduct of public affairs. It must be obvious even to the most inexperienced minds that, to say nothing of any particular exigency, actual or imminent, there should be at all times in the Treasury of a great nation, with a view to contingencies of ordinary occurrence, a surplus at least equal in amount to the above deficiency. But that deficiency, serious as it would be in itself, will, I am compelled to say, rather be increased than diminished without the adoption of measures adequate to correct the evil at once. The stagnation of trade and business, in some degree incident to the derangement of the national finances and the state of the revenue laws, holds out but little prospect of relief, in the ordinary course of things, for some time to come.

Under such circumstances I am deeply impressed with the necessity of meeting the crisis with a vigor and decision which it imperatively demands at the hands of all intrusted with the conduct of public affairs. The gravity of the evil calls for a remedy proportioned to it. No slight palliatives or occasional expedients will give the country the relief it Such measures, on the contrary, will in the end, as is now manineeds. fest to all, too surely multiply its embarrassments. Relving, as I am bound to do, on the representatives of a people rendered illustrious among nations by having paid off its whole public debt, I shall not shrink from the responsibility imposed upon me by the Constitution of pointing out such measures as will in my opinion insure adequate relief. I am the more encouraged to recommend the course which necessity exacts by the confidence which I have in its complete success. The resources of the country in everything that constitutes the wealth and strength of nations are so abundant, the spirit of a most industrious, enterprising, and intelligent people is so energetic and elastic, that the Government will be without the shadow of excuse for its delinquency if the difficulties which now embarrass it be not speedily and effectually removed.

From present indications it is hardly doubtful that Congress will find it necessary to lay additional duties on imports in order to meet the ordinary current expenses of the Government. In the exercise of a sound discrimination having reference to revenue, but at the same time necessarily affording incidental protection to manufacturing industry, it seems equally probable that duties on some articles of importation will have to be advanced above 20 per cent. In performing this important work of revising the tariff of duties, which in the present emergency would seem to be indispensable, I can not too strongly recommend the cultivation of a spirit of mutual harmony and concession, to which the Government itself owes its origin, and without the continued exercise of which jarring and discord would universally prevail.

An additional reason for the increase of duties in some instances beyond the rate of 20 per cent will exist in fulfilling the recommendations already made, and now repeated, of making adequate appropriations for the defenses of the country.

By the express provision of the act distributing the proceeds of the sales of the public lands among the States its operation is *ipso facto* to cease so soon as the rate of the duties shall exceed the limits prescribed in the act.

In recommending the adoption of measures for distributing the proceeds of the public lands among the States at the commencement of the last session of Congress such distribution was urged by arguments and considerations which appeared to me then and appear to me now of great weight, and was placed on the condition that it should not render necessary any departure from the act of 1833. It is with sincere regret that I now perceive the necessity of departing from that act, because I am well aware that expectations justly entertained by some of the States

HENRY CLAY ADDRESSING THE SENATE

HENRY CLAY

He was a man of large natural ability, but he lacked the training of a systematic education. He learned early to appreciate his heaven-born endowments and to rely upon them for success in his chosen career. Of sanguine temperament, quick perception, irresistible energy and enthusiastic disposition, he was well fitted to be a party advocate, and was the greatest parliamentary leader in our history. He knew men well, but he had no knowledge of books. The gaming table had for him allurements that he could not find in the library. According to the manners of his time, he drank to excess. His warm heart made him a multitude of friends; his impulsive action and positive bearing raised up enemies; yet at his death he left not an enemy behind him. He was withal a man of inflexible integrity. Straitened in pecuniary circumstances during a large part of his congressional career, he nevertheless held himself aloof from all corruption. Other Americans have been intellectually greater, others have been more painstaking, others still have been greater benefactors to their country; yet no man has been loved as the people of the United States loved Henry Clay.

RHODES.

Born in backwoods poverty in 1777, he obtained a piecemeal schooling, studied law, was admitted to the bar in 1797, sent to the Kentucky legislature in 1803, to the United States Senate in 1808; afterwards served in the lower house, being elected Speaker five times; Secretary of State 1825-29 under J. Q. Adams; U. S. Senator 1831-1842; unsuccessful presidential candidate 1832 and 1844; U. S. Senator 1849 to 1852. When Calhoun and his South Carolina nullifiers found that Jackson meant to punish treason with hanging, it was Clay who arranged a compromise. He was the guiding spirit in all those measures which averted civil war from 1820 to 1850.

See the articles entitled "Compromises of the Constitution," "Compromise of 1833," "Compromise of 1850," "Missouri Compromise," in the Encyclopedic Index. will be disappointed by any occasion which shall withhold from them the proceeds of the lands. But the condition was plainly expressed in the message and was inserted in terms equally plain in the law itself, and amidst the embarrassments which surround the country on all sides and beset both the General and the State Governments it appears to me that the object first and highest in importance is to establish the credit of this Government and to place it on durable foundations, and thus afford the most effectual support to the credit of the States, equal at least to what it would receive from a direct distribution of the proceeds of the sales of the public lands.

When the distribution law was passed there was reason to anticipate that there soon would be a real surplus to distribute. On that assumption it was in my opinion a wise, a just, and a beneficent measure. But to continue it in force while there is no such surplus to distribute and when it is manifestly necessary not only to increase the duties, but at the same time to borrow money in order to liquidate the public debt and disembarrass the public Treasury, would cause it to be regarded as an unwise alienation of the best security of the public creditor, which would with difficulty be excused and could not be justified.

Causes of no ordinary character have recently depressed American credit in the stock market of the world to a degree quite unprecedented. I need scarcely mention the condition of the banking institutions of some of the States, the vast amount of foreign debt contracted during a period of wild speculation by corporations and individuals, and, above all, the doctrine of repudiation of contracts solemnly entered into by States, which, although as yet applied only under circumstances of a peculiar character and generally rebuked with severity by the moral sense of the community, is yet so very licentious and, in a Government depending wholly on opinion, so very alarming that the impression made by it to our disadvantage as a people is anything but surprising. Under such circumstances it is imperatively due from us to the people whom we represent that when we go into the money market to contract a loan we should tender such securities as to cause the money lender, as well at home as abroad, to feel that the most propitious opportunity is afforded him of investing profitably and judiciously his capital. A government which has paid off the debts of two wars, waged with the most powerful nation of modern times, should not be brought to the necessity of chaffering for terms in the money market. Under such circumstances as I have adverted to our object should be to produce with the capitalist a feeling of entire confidence, by a tender of that sort of security which in all times past has been esteemed sufficient, and which for the small amount of our proposed indebtedness will unhesitatingly be regarded as amply adequate. While a pledge of all the revenues amounts to no more than is implied in every instance when the Government contracts a debt, and although it ought in ordinary circumstances to be entirely

Messages and Papers of the Presidents

satisfactory, yet in times like these the capitalist would feel better satisfied with the pledge of a specific fund, ample in magnitude to the payment of his interest and ultimate reimbursement of his principal. Such is the character of the land fund. The most vigilant money dealer will readily perceive that not only will his interest be secure on such a pledge, but that a debt of \$18,000,000 or \$20,000,000 would by the surplus of sales over and above the payment of the interest be extinguished within any reasonable time fixed for its redemption. To relieve the Treasurv from its embarrassments and to aid in meeting its requisitions until time is allowed for any new tariff of duties to become available, it would seem to be necessary to fund a debt approaching to \$15,000,000; and in order to place the negotiation of the loan beyond a reasonable doubt I submit to Congress whether the proceeds of the sales of the public lands should not be pledged for the payment of the interest, and the Secretary of the Treasury be authorized out of the surplus of the proceeds of such sales to purchase the stock, when it can be procured on such terms as will render it beneficial in that way, to extinguish the debt and prevent the accumulation of such surplus while its distribution is suspended.

No one can doubt that were the Federal Treasury now as prosperous as it was ten years ago and its fiscal operations conducted by an efficient agency of its own, coextensive with the Union, the embarrassments of the States and corporations in them would produce, even if they continned as they are (were that possible), effects far less disastrous than those now experienced. It is the disorder here, at the heart and center of the system, that paralyzes and deranges every part of it. Who does not know the permanent importance, not to the Federal Government alone, but to every State and every individual within its jurisdiction, even in their most independent and isolated individual pursuits, of the preservation of a sound state of public opinion and a judicious administration here? The sympathy is instantaneous and universal. To attempt to remedy the evil of the deranged credit and currency of the States while the disease is allowed to rage in the vitals of this Government would be a hopeless undertaking.

It is the full conviction of this truth which emboldens me most earnestly to recommend to your early and serious consideration the measures now submitted to your better judgment, as well as those to which your attention has been already invited. The first great want of the country, that without answering which all attempts at bettering the present condition of things will prove fruitless, is a complete restoration of the credit and finances of the Federal Government. The source and foundation of all credit is in the confidence which the Government inspires, and just in proportion as that confidence shall be shaken or diminished will be the distrust among all classes of the community and the derangement and demoralization in every branch of business and all the interests of the country. Keep up the standard of good faith and punctuality in the

operations of the General Government, and all partial irregularities and disorders will be rectified by the influence of its example; but suffer that standard to be debased or disturbed, and it is impossible to foresee to what a degree of degradation and confusion all financial interests, public and private, may sink. In such a country as this the representatives of the people have only to will it, and the public credit will be as high as it ever was.

My own views of the measures calculated to effect this great and desirable object I have thus frankly expressed to Congress under circumstances which give to the entire subject a peculiar and solemn interest. The Executive can do no more. If the credit of the country be exposed to question, if the public defenses be broken down or weakened, if the whole administration of public affairs be embarrassed for want of the necessary means for conducting them with vigor and effect, I trust that this department of the Government will be found to have done all that was in its power to avert such evils, and will be acquitted of all just blame on account of them. JOHN TYLER.

Jonn Thatte

WASHINGTON, March 25, 1842.

To the Senate of the United States:

I have the honor herewith to submit a report* from the Secretary of the Navy, in compliance with your resolution of the 18th February, 1842.

JOHN TYLER.

WASHINGTON, March 30, 1842.

To the House of Representatives of the United States:

I transmit to the House of Representatives two extracts from a note of the chargé d'affaires of the Republic of Texas accredited to this Government to the Department of State, one suggesting in behalf of his Government such modifications of the existing laws of the United States as will impart greater facility to the trade between the two countries, particularly to that which passes across their frontier, and the other expressing a desire for some regulation on the part of this Government by means of which the communication by post between the United States and Texas may be improved.

As the wishes of the Texan Government in relation to those subjects can only be gratified by means of laws to be passed by Congress, they are accordingly referred to the consideration of the two Houses.

JOHN TYLER.

[The same message was sent to the Senate.]

^{*}Transmitting list of agents, etc., employed by the Navy Department without express authority of law, etc.

To the Senate:

WASHINGTON, April 1, 1842.

In part compliance with a resolution of the Senate of the 20th of July, 1841, I transmit herewith a report * from the Department of War.

JOHN TYLER.

WASHINGTON, April 1, 1842.

To the House of Representatives of the United States:

In compliance with your resolution of the 21st of March, I have the honor to submit the accompanying communication † from the Secretary of the Navy. JOHN TYLER.

WASHINGTON, April 4, 1842.

To the House of Representatives of the United States:

In part compliance with a resolution of the House of Representatives of the 21st March, 1842, I herewith communicate a report[‡] from the Secretary of State. JOHN TYLER.

WASHINGTON, April 7, 1842.

To the House of Representatives of the United States:

I herewith transmit to the House of Representatives copies of a letter addressed to the Secretary of State by the chairman of the board of commissioners appointed to explore and survey the boundary line between the States of Maine and New Hampshire and the adjoining British Provinces, together with the report of the operations of that commission to the 31st ultimo, and a profile of the meridian line from the source of the St. Croix River as far as surveyed, illustrative of the report.

JOHN TYLER.

[The same message was sent to the Senate.]

DEPARTMENT OF STATE, Washington, March 31, 1842.

Hon. DANIEL WEBSTER,

Secretary of State.

SIR: By directions of the board of commissioners for exploring and surveying the northeastern boundary, I have handed you the papers hereinafter specified, viz:

1. The report of the operations of the commission up to the present date.

2. A profile of the meridian line of the source of the St. Croix as far as surveyed, intended to illustrate the report.

3. A portfolio of drawings intended for the same purpose.

*Transmitting list of removals from and appointments to office in the Department of War from March 4, 1829, to September 30, 1841.

† Relating to appointments to office in the Navy and Marine Corps since April 4, 1841.

Transmitting list of appointments by the President or Secretary of State since April 4, 1841.

4. A roll marked Appendix No. 1, containing the narrative of the field operations of the division of Professor Renwick.

5. A tin case containing the detail of the surveys of the division of Professor Renwick.

In reply to your inquiry in relation to the disposition of the said papers, I are directed respectfully to suggest that all which it is absolutely necessary to lay before Congress are the items I and 2, which, with a general map now in preparation, will contain all that will be of any general public interest.

The portfolio (No. 3) and the box of maps and profiles (No. 5) should remain on file in the Department; and while a part of the drawings in the former may be useful for illustration, the latter will be superseded by the general map, in which will be embodied all that they contain of importance to the question at issue.

Appendix No. 1, specified as No. 4 in the above list, will probably be demanded hereafter to give authenticity to the conclusions of the report (No. 1). It ought not, however, to be communicated until the Appendices Nos. 2 and 3, containing the operations of the divisions of Messrs. Graham and Talcott, are handed in; and of the three no more than a limited number of copies will be useful.

I have the honor to be, with much respect, your most obedient servant,

JAS. RENWICK, Chairman.

Report of the commissioners appointed by the President of the United States for the purpose of surveying and exploring the boundary line between the States of Maine and New Hampshire and the British Provinces.

WASHINGTON, March 28, 1842.

Hon. DANIEL WEBSTER,

Secretary of State.

SIR: The duties assigned to the undersigned by the instructions of your predecessor were twofold:

First. To explore and survey the lines respectively claimed by the Governments of the United States and Great Britain.

Second. To examine and report upon the arguments contained in the report of Messrs. Featherstonhaugh and Mudge addressed to the secretary of state of Her Britannic Majesty for foreign affairs under date of 16th April, 1840.

I.

In order to the more exact and successful performance of the duties included under the first of the above heads, the boundary line was divided by their instructions into three separate portions, one of which was assigned to each of the commissioners; and while they were instructed to assemble in a board for the purpose of comparing their respective surveys, in view of the performance of the duties included in the second of the above divisions their explorations have been separately conducted. Each of the commissioners has employed the methods and course of action most appropriate in his opinion to the successful fulfillment of his appointed task, and • the nature of the surveys assigned to one of them has been of a character widely different from those of his colleagues. The commissioners, therefore, while uniting in a general report of the progress made up to this time in the duties of their appointment, beg leave to submit, in the form of appendices, the narrative of their several operations, with so much of the records of their observations and calculations as they have severally judged necessary to authenticate the conclusions at which they have arrived. The progress which has been made in the labors of the commissioners enables them at this time to lay before you—

1. A description of the physical features of the disputed territory.

2. A comparison of the heights of the line claimed by the United States with those of the line styled the "axis of maximum elevation" by Messrs. Featherstonhaugh and Mudge. In laying the latter before you they have, in order to avoid delay, made use in part of the published results obtained by those gentlemen, and although they have already detected errors in their inferences they do not consider that by accepting them for the moment as the basis of comparison they can be accused of exhibiting the line claimed by Great Britain in an unfavorable light.

I.-DESCRIPTION OF THE DISPUTED TERRITORY.

The seacoast of the State of Maine is rugged and hilly. The primitive rocks of which its geological structure is chiefly composed are broken into ridges which run parallel to the great streams, and therefore in a direction from north to south. These ridges terminate in an irregular line, which to the east of the Penobscot may be identified nearly with the military road to Houlton. From the northern summit of these ridges an extensive view of the disputed territory can in many places be obtained. This is the case at the military post at Houlton, whence a wide extent of country may be seen. A still more perfect view may be obtained from the summit. of Parks Hill, at a point about 400 yards south of the road from Houlton to Woodstock and about half a mile east of the exploring meridian line. At the time when that line was run by the British and American surveyors, under the fifth article of the treaty of Ghent, the top of this hill was covered with wood, and they were obliged to content themselves with the view from Park's barn, which is at least 200 feet beneath the summit. At the present moment the latter is cleared, and the view from west-southwest to northeast is unimpeded except by a single clump of trees, which cuts off the view for a few degrees in the northwest direction; but by a change of position every part of the horizon between these points is to be seen. Toward the west are seen ridges parallel to the Penobscot, over which Katahdin towers to a great height, bearing by compass N. 85° W. In a direction N. 75° W. are seen two distant peaks, one of which was identified as the Traveller. All of these eminences lie south of the line claimed by Great Britain. In the north-northwest direction there appear two ridges of comparatively small elevation, which were pointed out as the Aroostook Mountains, but have since been ascertained to lie near the sources of the Meduxnikeag. These lie in the line claimed by Great Britain in 1817.

Between these and the other mountains there is evidently no connection, and the rest of the country, as seen from the hill, bears the aspect of a wooded plain. It will be sufficient to refer to this view to be satisfied that all the impressions which have been circulated of a continuous chain of elevations extending along the line claimed by Great Britain are utterly fallacious.

Toward the north the country exhibits the same general features. One vast and apparently unbroken plain extends to the utmost limits of the visible horizon. In the midst of this, and at a distance of nearly 30 miles, Mars Hill alone breaks the monotonous prospect, and from its isolated position assumes to the eye an importance to which its altitude of less than 1,800 feet would not otherwise entitle it. No other eminences are to be seen in this direction, except a round peak bearing a few degrees west of north and some distant ridges about an equal distance to the east. The first of these has been ascertained by the surveys of Major Graham to be an isolated hill near the peak known as Quaquajo. The eastern ridges are probably those measured between the Tobique and the Bay of Chaleurs by the British commissioners. A sketch of this view from Parks Hill is annexed to the report, and lest any doubt be entertained of its accuracy it is proper to state that the unassisted vision was not relied upon, but that the outlines were carefully delineated by means of the camera lucida.

From this view it might be inferred that the northern part of the admitted possessions of the United States to the east of the Penobscot and the disputed territory as far as visible constitute a vast table-land slightly inclined toward the southeast.

On descending into the valley of the St. John the appearances change. The tableland is cut to a great depth by that stream, and from its bed the broken edges of the great plain look like ridges whose height is exaggerated to the senses in consequence of their being densely clothed with wood. The same is the case with all the branches of this river, which also cut the table-land to greater or less depths according to their distance from the stream into which they discharge themselves.

The want of a true highland or mountainous character in this region is obvious from the aspect it presents in the two different points of view. Mountainous regions are most imposing when seen from a distance and from heights. On a nearer approach, and from the valleys which intersect them, the elevations, so important in the distant view, are hidden by their own slopes or lose the appearance of relative elevation in consequence of the absolute heights of the valleys themselves. In conformity with this character, the line claimed by the United States for the most part presents, when seen at a distance, the appearance of lofty and deeply serrated ridges, while to one who traverses it it is a labyrinth of lakes, morasses, and short but steep elevations which hide its peaks from the valleys and streams.

The line claimed by Great Britain, on the other hand, when seen from a distance is as level as the surface of the ocean, with no greater appearance of elevation and depression than would represent its billows; while, seen from its own valleys, the heights assume an importance which their elevation above the valleys when actually measured does not warrant. The characteristics of the region through which the line of Messrs. Mudge and Featherstonhaugh passes are therefore the opposite of those usually remarked in highland countries, while those of the line claimed by the United States are the same as are always observed in such regions.

This character of a table-land deeply cut by streams is well exhibited in the section of their "axis of maximum elevation" by the British commissioners. In that will be seen the mountains near the source of the Aroostook, Alleguash, and Penobscot on the one hand, and of the Tobique on the other, while the intervening space is occupied by a curve resembling an inverted arch, of which the St. John occupies the keystone. In a country of this character any line whatever would present the appearance of a succession of eminences, and might by as liberal a construction of the term as has been made by Messrs. Mudge and Featherstonhaugh be called highlands.

The sameness of this general character is broken only by a single chain of hills.* This is a prolongation of Mars Hill toward the north, and, being both of less height and breadth than that mountain, is hidden by it from the view of a spectator on Parks Hill. Mars Hill is itself an isolated eminence, and is in fact nearly an island, for the Presque Isle and Gissiguit rivers, running the one to the north and the other to the south of it, have branches which take their rise in the same swamp on its northwestern side. To the north of the Des Chutes the ground again rises, and although cut by several streams, and particularly by the Aroostook, the chain is prolonged by isolated eminences as far as the White Rapids, below the Grand Falls of the St. John, where it crosses that river. It may thence be traced in a northern direction to the Sugar Loaf Mountain, on the Wagansis portage, where it terminates.

To this broken chain belongs the elevation of 918 feet given by Messrs. Mudge and Featherstonhaugh to an eminence in the neighborhood of the Aroostook Falls. An accurate profile of so many of these eminences as fall in the line of the connected meridian is herewith submitted. This chain of eminences is not prolonged to the westward, as it is entirely unconnected with any other height aspiring to the name of mountain in that direction.

^{*} A chain is made up of mountains whose bases touch each other.-BALFI.

It is not in any sense a dividing ridge, being cut by all the streams in the country, and in particular to a great depth by the St. John and the Aroostook.

A section of this line was given in a report to the British commissioner under the fifth article of the treaty of Ghent by Colonel Bouchette, the surveyor-general of the Province of Canada. His heights were determined by the barometer, and estimated from the assumed level of the monument at the source of the St. Croix.

It would now appear that the section of Colonel Bouchette is very inaccurate, and that the heights as reported by him are not only much beyond the truth, but that the continually ascending slope ascribed by him to the country from the monument at the source of the St. Croix to the point where the due north line crosses the St. John is entirely erroneous. He, however, adroitly availed himself of this inaccurate section to attempt to prove the existence of a continuous chain of mountains from Katahdin to the Great Falls of the St. John, and thence around the southwestern branches of the Restigouche until it met the heights rising from the north shore of the Bay of Chaleurs. For this reason his view taken from Park's barn and that made by Mr. Odell from the same point were urged for admission as evidence on oath by the British agent, and the map of Mr. Johnson, which contradicted this evidence, was carefully excluded. It can not be concealed that could Colonel Bouchette's idea founded on erroneous premises have been established by indisputable facts it would have been the most fatal argument that has ever been adduced against the American claim, for he would have argued that the meridian line of the St. Croix would at Mars Hill have first intersected highlands which, rising from the north shore of the Bay of Chaleurs, would have appeared to divide until within a few miles of the Grand Falls of the St. John waters which fall into the St. Lawrence from those which fall into the Atlantic, and would have been the south boundary of the Province of Ouebec.

Mars Hill would then have appeared to be in truth as well as in claim the northwest angle of the Province of Nova Scotia; and although the rest of the line would not have fulfilled the conditions the United States might by an arbitrator have been compelled to accept this point as the beginning of their boundary. Nor, in the unexplored state of the country, is it by any means certain that the American agent, who does not seem to have seen the drift of the proceedings of Colonel Bouchette, would have been prepared with the adverse facts, which are now known to be undeniable. It may therefore be considered fortunate for the claim of the United States that the survey was afterwards intrusted to a surveyor who, in pursuit of the double object of encroachment on the United States and the enlargement of his native Province at the expense of Canada, signally failed in the proof of either of his positions.

The knowledge now acquired shows that the idea of Colonel Bouchette is unsupported by the facts of the case, for the highlands which rise from the north shore of the Bay of Chalcurs do not meet those in which the most southerly branch of the Restigouche takes its rise.

The British commissioners, although they give a profile of this ridge, do not pretend to have examined it except at Mars Hill, near the Aroostook, and at the Grand Falls of the St. John. It must be remarked that these profiles (the original one of Colonel Bouchette and that exhibited by themselves) are contrasted—one British authority with another—for the purpose of invalidating the ground on which the American claim is founded.

It is not our business to reconcile these conflicting authorities, but it is our duty to recall the recollections of the fact that no part of the American argument laid before the King of the Netherlands was founded on this or any other estimate of heights. Many elevations, indeed, were measured with great pains on the part of the Americans as well as of Great Britain.

On behalf of the United States Captain Partridge made many barometric observations, while Mr. Johnson took an extensive series of vertical and horizontal angles.

His operations were performed in the presence of Mr. Odell, the surveyor on behalf of Great Britain, who doubtless made similar ones, as he visited the same stations with a better instrument and for the same avowed purpose. Mr. Odell's observations were not presented by the British agent, and those of Mr. Johnson were objected to. If received, they would have set aside the pretensions that a continuous ridge of mountains existed between the Metjarmette portage and Mars Hill. They are, however, superseded by the operations of the undersigned, which have yielded satisfactory evidence that no chain of highlands in the sense of the British commissioners, or even an "axis of maximum elevation," exists where it is laid down on their map. Nor can it be doubted that the operations of Mr. Johnson had a decided advantage in point of probable accuracy over theirs. The exploring meridian line used as a base was measured with a tolerable degree of accuracy, and from the three heights chosen by him the whole country is visible.

On the other hand, the course of Messrs. Mudge and Featherstonhaugh being confined, except where they ascended Mars Hill, to the valleys of the streams, they were for the most part excluded from a prospect. In describing the view from Mars Hill, however, they have pictured in most accurate terms the true features of the country:

"The character of the country may be well discerned and understood from this insulated hill. It presents to the eye one mass of dark and gloomy forest to the utmost limits of sight, covering by its umbrageous mantle the principal rivers, minor streams, and scanty vestiges of the habitation of man."

This description can only agree with that of a vast table-land into which the streams cut so deep and form such narrow valleys as to be invisible.

But if a chain of highlands, or even an "axis of maximum elevation," had existed as they lay it down, within 20 miles, it would have been visible, and it need not be said that they would not have failed to describe it. The inconsistency between their map and this true and forcible description of the features of the country is apparent.

The same general character of table-land is found to the north of the St. John above the Grand Falls. Its first important northern tributary is the Grand River. In ascending this stream the level of the table-land is soon reached. The river runs between banks of very moderate elevation and on a regular slope, and although running with great rapidity upon a pebbly bed it is yet so tortuous that while its distance from its mouth to the Wagansis portage in a straight line is no more than 13 miles the meanders of its channel amount to 30.

On the Wagansis portage the table-land is terminated by a ridge whose summit is elevated 264 feet above the wagansis* of Grand River. It was at first believed that this, although of small elevation, was a dividing ridge, and that it might correspond to one construction which has, although inaccurately, been put on the treaty of 1783. This belief was speedily removed, for the rivulet on its northern side was found to be cut off from the Restigouche by the Sugar Loaf Mountain, and is therefore a branch either of the Grand River or of the stream which falls into the St. John immediately above the Grand Falls. The height of land which divides this rivulet from the wagan of the Restigouche is not elevated above the former more than 117 feet. There is, in fact, at this place a gap 5 or 6 miles in breadth in the great system of mountains which extend from the Gulf of St. Lawrence at the Bay des Chaleurs to the river St. Lawrence near the Temiscouata portage. At the northern verge of the table-land which has been described, and near the month of Green River, rises to the height of about 1,600 feet a mountain known from the name of that stream. This is, like Mars Hill, isolated, and affords an extensive view. To the north and west the prospect is bounded by a continuous line of horizon, which, instead of being

^{*}Wagan is a term in the Abenaki language signifying way. Sis is a diminutive particle. Wagansis is therefore the little way; and it seems probable that the name of Grand River, the usual epithet for the St. John, 'as been improperly applied to the small stream which bears it on the map.

obviously below the level of the eye, as in the view of the disputed territory from Mars Hill, is evidently of even greater height than the Green River Mountain itself.

On entering into this region from the south by any of the navigable streams which traverse it, it presents a more decidedly mountainous character than the country to the south. The Grande Fourche of Restigonche is bordered by two continuous chains of mountains, rising when it first issues from them to the height of a thousand feet above its surface. The stream having a rapid fall, the relative elevation becomes less until, in the neighborhood of the lake in which its north branch first collects its waters, the relative elevation is not more than four or five hundred feet.

On traversing this elevated country it presents a different aspect from what is seen either from a distance or where it is entered from the rivers. Frequent ridges are crossed; the tops of these are often occupied by swamps filled with a thick growth of cedars. Deep and small basins occur, which are occupied by lakes that give rise to rivers flowing to the St. Lawrence or to the St. John. These are intermingled with thickets of dwarf spruce, and the streams are sometimes bordered by marshes covered by low alders, and sometimes cut deep into rocky channels. In this apparent labyrinth one positive circumstance marks the line of division, or the true height of land: The streams which run to the St. John are all of the first description—sluggish—while those which discharge themselves into the St. Lawrence are rapid, and have the character of torrents.

On the western side of the disputed territory are ridges of rocky hills running nearly north and south, and thus tending toward the St. Lawrence, which they in some places reach and shut out the view of the interior.

It thus becomes difficult to find a station whence the heights of land can be viewed and its character exhibited. It has therefore been hitherto possible for those who have argued in support of the claims of Great Britain to represent without meeting with contradiction that the streams which fall into the St. John had their rise in a country possessed of none of that mountainous character which they urged was essential to the epithet of highlands. There are, however, points where a different character is apparent, and some of these are easy of access. Thus, on the main mail road, along the Southeast Branch of the St. Lawrence a mile northeast of the church of L'Islette, a rocky eminence is passed, whence may be seen a bold group of mountains which have been identified with the sources of the Ouelle, the Kamouraska and Black rivers. A view of this group is herewith presented.

From the height to the cast of river Du Loup a view may be seen on a clear day extending round 137° of the horizon, beginning with the highlands of Bic, bearing N. 58° E., and terminating in a conical mountain bearing S. 15° W.

The nearest and more conspicuous of these highlands (named those of St. Andre) are on the river Fourche, a branch of the river Du Loup, whose waters they divide from those of the St. Francis. A view of these is also submitted herewith.

A similar view of the same panorama of highlands is obtained from Hare Island, in the St. Lewrence, an outline of which, taken with the camera lucida, is likewise submitted. About a quarter of a mile to the south of the point where the Temisconata portage crosses Mount Biort the highlands may be seen at the head of Rimonski, bearing nearly east, thence extending round by the north to the mountains of St. Andre, bearing nearly west, forming about one-half of the entire horizon. The entire panorama from the latter point, taken with the camera lucida, along with copies of some dagaerreotypes made at the same place, are herewith submitted. Of the part of the line which extends to the northeast from the source of the Etchemin for a distance of many miles, a view may be almost constantly seen from the citadel of Quebee and from the tops of the houses in that city. One still more satisfactory may be obtained from the road between Quebee and the Falls of Montmorency, in the neighborhood of the village of Belport. The latter views are in particular referred to, as they are within the reach of numerons eivil and military officers of the British Government, who must assent to the evidence of their own senses, which will prove that this region, the position of the path pursued during the present year by Captain Talcott's parties, is to all intents a range of highlands.

The boundary presents from these positions the aspect of a continuous and deeply serrated ridge.

The geological character of the country can not be admitted as having any bearing upon the subject under consideration. It never entered into the views of the framers of the treaty of 1783, and therefore could afford no illustrations of their intentions.

Were it admissible, however, it might be cited as an additional argument that the dividing height which incloses the waters of the Connecticut continues unchanged in its features until it is cut off by the deep channel of the St. Lawrence.

Opportunities for observations of this character were most frequent on the Temiscouata portage and on the banks of the St. Lawrence itself. It was only on the former place that the relative geological heights of the rocks could be observed by means of their outcrop.

The whole of the portage passes over stratified rocks dipping rapidly to the southeast. They were found to be alternate groups of common and talcose slate and of a rock made up principally of angular fragments of white quartz (grauwacke). These are in all respects identical with rocks which have been observed by one of the commissioners in place in Berkshire County, Mass., and in Columbia and Rensselaer counties, N. Y., and the description of geologists at various intervening points, as well as the observations of Captain Talcott's parties, would tend to establish the fact that the formations are continuous.

From these data it would appear probable that the rocks are a prolongation of the western slope of the great range called by Mr. Featherstonhaugh, in his report as United States geologist, the Atlantic ridge. This formation, which is but a few miles in width where it crosses the Hudson, appears gradually to widen as it proceeds to the north, and was on the St. Lawrence found to prevail both at the river Du Loup and at Grand Metis, dipping in the two places in opposite directions and covered in the interval by the thick diluvial deposits which form the valley of the Trois Pistoles. To render the analogy more complete, in the valley of the outlet of the Little Lake (Temiscouata) was found a vein of metalliferous quartz charged with peroxide of iron, evidently arising from the decomposition of pyrites, being in fact the same as the matrix of the gold which has been traced in the Temiscouata Lake, about a mile to the south of Fort Ingall, lie great masses of granular carbonate of line, identically resembling the white marbles of Pennsylvania, Westchester County, N. Y., and Berkshire County, Mass.

If the latter be in place, which, although probable, was not ascertained beyond all question, the primitive carbonate of lime has exactly the same relation to the slaty rocks which it bears in the latter locality.

The formations which have been spoken of appear to occupy the whole extent of the country explored by the parties of Professor Renwick. Everywhere the streams were found cutting through rocks of slate. On the summits of many of the hills were found weathered masses of angular quartz rocks, showing that while the slate had yielded to the action of the elements, the harder and less friable rock had kept its place. The ridges which intervene between the St. Lawrence at the river Du Loup and Lake Temisconata have the character, so well described by Élie de Beaumont, of mountains elevated by some internal force.

To the eastward of Lake Temiscouata, on the other hand, the country has the aspect of having once been a table-land, elevated on the average about 1,700 feet above the level of the sea, and of having been washed by some mighty flood, which, wearing away the softer rocks, had cut it into valleys, forming a complex system incapable of being described in words and only to be understood by inspection of a map.

2.— COMPARISON OF THE ELEVATIONS OF THE BOUNDARY LINE CLAIMED BY THE UNITED STATES WITH THOSE OF THE "AXIS OF MAXIMUM ELEVA-TION" OF MESSRS. FEATHERSTONHAUGH AND MUDGE.

For the purpose of exhibiting the relative claims of the two lines to the exclusive epithet of "the highlands" in the most clear and definite manner, each of them will be considered as divided into three portions, which will be contrasted with each other by pairs. The first portion of each of the lines is that which lies nearest to the point of bifurcation; the residue of the American line is divided at the source of the Ouelle; the remainder of the line of Messrs. Featherstonhaugh and Mudge at that of the Aroostook. Metjarmette portage is taken as the point of bifurcation, whence waters run to the Penobscot, the St. John, and the St. Lawrence.

On t	American line from the Metjarmette portage to Lake Etchemin- F	eet.
1	e maximum height is 1	1,718
2	e minimum height is 1	1,218

The minimum measured height is that of Lake Etchemin, which is lower than the actual source of that stream, and whose omission as not upon the dividing ridge would make the minimum greater. This height was determined by the parties of A. Talcott, esq., by two distinct and separate sets of observations, one of which was continued hourly for several days; and no doubt can exist that it is as accurate a measure as the barometer is capable of affording. In the report of Messrs. Featherstonhaugh and Mudge this height is set down as no more than 957 feet, but it is determined from a single observation. That it is erroneous must be considered as demonstrated. In the map presented by those gentlemen they have made use of this erroneous determination for a purpose which, even were it correct, would not be warranted, for they on its authority leave out-all the symbols by which heights are represented, and substitute therefor a dotted line with the inscription "Fictitious hills of Mr. Burnham's map." The actual character of this part of the American line is an undulating country.

On the line of Messrs. Featherstonhaugh and Mndge between the Mctjarmette	
portage and the Cocumgamoe Mountains-	Feet.
The maximum elevation is	2,302
The minimum elevation is	987

This part of the line of Messrs. Featherstonhaugh and Mudge derives its apparent advantage from the fact that it crosses the summit and occupies the eastern slope of the highlands claimed by the United States. Notwithstanding this, the difference in their elevation is not such as to give it any decided superiority in its highland character.

On the American line from Lake Etchemin to the river Ouelle-	Feet.
The maximum height is	2,854
The minimum height is	1,306
On the line of Messrs. Featherstonhaugh and Mudge from the Cocumgamoc	
Mountains to the head waters of the Aroostook \rightarrow	
The maximum height is	1,268
The minimum height is	880

On the parts of the line thus contrasted the maximum height of that claimed by Great Britain is less elevated than the lowest gap of that claimed by the United States.

On the third portion of the American line :

The maximum height is	1,841
The minimum height is	1,014
The greatest elevation of the whole of the third part of the American line,	
therefore, is	2, 231
The minimum is	651
	•

The termination of the exploring meridian line falls into this part of the American line. Its height of 1,519 feet was determined by two separate observations, compared with others taken on Lake Johnson. The height of the latter was calculated at 1,007 feet from a series of observations continued for seventeen days, and is believed to be as accurate as the method of the barometer is susceptible of.

This height of the termination of that line is estimated by Messrs. Featherstonhaugh and Mudge at no more than 388 feet, and that of the lake at no more than 363. In this estimate they reject the indications of their own barometers, because the results of them would have contradicted the previous impressions which seem to have governed all their operations, viz, that the point claimed by the United States as the northwest angle of Nova Scotia is not in an elevated region of country.*

On the third part of the British line from the sources of the Aroostook to the Grand Falls of the St. John no height is reported as measured by the British commissioners which exceeds 1,050 feet, while the greatest height on their profile is 1,150 feet. The minimum height on their profile, excluding the Aroostook at its mouth and its intersection with the meridian line, is 243 feet, and the mean of the numbers entered by them both on their map and profile is 665 feet.

It will therefore appear that if the profile of Messrs. Featherstonhaugh and Mudge be correct the lowest gap on the third part of the American line is about as high as the mean elevation of the part of the British line with which it is compared.

The line claimed by the United States therefore possesses throughout in a preeminent degree the highland character according to the sense at one time contended for in the argument of Great Britain, and is, to use the term of the British commissioners, "the axis of maximum elevation," the mean of all the heights measured upon it being 1,459 feet, while that of those measured on the line of Messrs. Featherstonhaugh and Mudge is no more than 1,085 feet.

It is regretted that the computations of the barometric and other observations for the determination of the heights of that portion of the country between the valley of the St. John and the sources of the Aroostook, explored by the division of Major Graham, could not be completed in time to be made use of for this report in the description of that portion of the line claimed for Great Britain by Messrs. Featherstonhaugh and Mndge. This delay has been solely caused by a want of reasonable time to complete this portion of the work, the commissioner having direction of the division charged with it having only returned from the field in the month of January.

Sufficient information is known, however, to have been derived from those surveys to justify the assertion that, instead of the strongly marked range of highlands represented by the British commissioners as constituting a part of their "axis of

^{*}A continuous line of leveling was carried by one of the parties of Major Graham's division, by means of two spirit levels checking one another, from tide water at Calais, in Maine, to the monument at the source of the St. Croix, and thence along the true meridian line to its intersection with the river St. John. The surface of the St. John at this point of intersection was thus found to be 419½ feet above the level of mean tide at Calais. The basin of the river immediately above the Grand Falls may be stated as of the same elevation in round numbers, as there is very little current in the river between those two points.

Messages and Papers of the Presidents

maximum elevation," the country in the vicinity of the Aroostook lying between its sources and the valley of the St. John is devoid of the character they have attributed to it. When properly represented upon a map it will appear as an extended undulating surface of moderate elevation above the level of the Aroostook River, sparsely interspersed with occasional detached elevations rising to heights of 600 to 900 and 1,400 feet above the level of the sea, but forming no continuous or connected chain whatever in the direction represented by the British commissioners, or that could be construed into the character of highlands such as are described in the treaty of 1783.*

In addition to the surveys upon the boundary line claimed by the United States, an exploring line was run under the direction of Professor Renwick, as is more particularly described in Appendix No. 1. This line extended to an eminence on the eastern side of Lake Matapediac, elevated 1,743 feet above the level of the sea. The views obtained from this eminence established the fact that a chain of highlands extended thence to the north shore of the Bay des Chaleurs. They are believed to terminate in an eminence, which from its imposing appearance has been called by the Scotch settlers at its foot Ben Lomond. This was measured during the operations of the summer of 1840, and found to rise from the tide of the bay to the height of 1,024 feet. This exploring line, coupled with the more accurate surveys, appears to establish the fact of the existence of a continuous chain of eminences entitled to

* NOTE.—Since the above was written Major Graham's map and the computations of the barometric heights above alluded to have been completed.

This map exhibits in their proper positions the numerous altitudes which were determined throughout the country watered by the Aroostook and its principal tributaries, extending laterally to the heights which bound the basin of that river on either side; along the due west line traced in the year 1835 by Captain Yule, of the royal engineers, between Mars Hill and a point near the forks of the Great Machias River; along and in the vicinity of the road recently opened by the State of Maine from Lewis's (a point in latitude 46° 12′ 20″, between the head branches of the Medux-nikkag and the Masardis or St. Croix of the Aroostook) to the month of Fish River, in latitude 47° 15′ 15″, being a distance, actually measured, of 79 miles; and along the new military road, embracing $40\frac{12}{15}$ miles of the distance from Fort Fairfield to Honlton and including the adjacent heights

The number of elevations within the territory watered by the Aroostook and claimed by Great Britain that have thus been carefully measured amounts to upward of 200.

This survey shows that although the prominent eminences which occur along that portion of the "axis of maximum elevation" of Messrs. Mudge and Featherstonhangh which lies between the mouth and the source of the Aroostook correspond very nearly in height and position by our measurements with those reported by themselves, yet these eminences are separated one from another by spaces of comparatively low and very often swampy country, so extended as to preclude the idea of a continuous range of highlands in the direction represented upon the map of those commissioners.

If a range or chain of highlands is to be made to appear by drawing a strongly marked line over widely extended valleys or districts of comparatively low country so as to reach and connect the most prominent eminences which may fall within the assumed direction, then such a range or chain of highlands may here be made as plausibly in any other direction as in that chosen by Hesers. Mudge and Featherstonhaugh, for the detached elevated peaks are so distributed as under a big principle to favor any one direction as much as much as another, and might thus be made to subserve in an equal degree whatever conflicting theories the object in view might cause to be originated.

We may also refer, in further illustration of the character of the country through which a portion of this pretended "axis of maximum elevation" is made to pass, to a panorama view taken in October, 1847, by one of Major Graham's assistants from the summit of Blue Hill, where crossed by the true meridian of the monument, at the source of the St. Croix. This position is 1,100 feet above the level of the sea and 47½ miles north of the monument. It commands a most satisfactory view of the whole country embraced within a radius of 40 to 60 miles, including, as the landscape shows, Parks Hill to the south; Katahdin, the Traveller, and Mars Hill to the southwest; Quaquajo, the Horseback, the Haystack, and one or two peaks beyond the Aroostook to the west; the heights upon the Fish River and the southern margin of the Eagle Lakes to the northwest, and those south of the St. John (except a small angle obstructed by the Aroostook Kill) to the north.

The character of the great basin of the Aroostook, dotted with the detached peaks which rise abruptly from it at intervals of many miles apart, is here exhibited through at least two-thirds of its extent in so satisfactory a manner as in itself to preclude the idea of an "axis of maximum clevation" composed of anything like a connected or continuous chain in this region of country. MAY 1, 1842

the epithet of highlands from the north shore of the Bay des Chaleurs at its western extremity to the sources of the Connecticut River. Returning from the latter point, they exhibit the aspect of well-marked ranges of mountains as far as the sources of the Metjarmette. Thence to the sources of the Etchemin extends an undulating country whose mean height is 1,300 or 1,500 feet above the level of the sea. The boundary line is thence prolonged to the Temiscouata portage over well-defined ridges to the eastern side of Lake Temiscouata. At the sources of two of the streams which run into this lake the minimum heights of 651 feet and 676 feet have been observed.

With these exceptions, the sources of the streams which rise to the north of the Temiscouata portage and between the lake of that name and Lake Matapediac average more than 900 feet above the level of the sea. For the purpose of describing this portion of the line claimed by the United States, we may take this height of 900 feet as the elevation of a horizontal plane or base. On this are raised knolls, eminences, and short ridges whose heights above this assumed base vary from 300 to 1,300 feet. The more elevated of these are universally designated by the hunters who occasionally visit the country and the lumberers who search it for timber as mountains clothed to the summit with wood, which, in consequence of the rigor of the climate, attains but a feeble growth. They have an aspect of much greater altitude than they in reality possess, but their character as highlands is indisputable. This term, which the first English visitors ascribed without hesitation to the hills of New Jersey,* whose altitude is about 300 feet above the level of the sea, is much better merited by a group of eminences rising from 300 to 1,300 feet above a base itself 900 feet in height, and which exceed in elevation the well-known highlands of the Hudson River.

Not to rest merely on instances drawn from the language of those of English birth who first sottled or traded on the coast of the present United States, there are in the immediate vicinity of the region in question a range of eminences the highest of which is no more than 1,206 feet above the level of the sea. These, on the authority of a distinguished officer of Her Britannic Majesty's navy,† are named the "highlands of Bic," and have long been thus known by all the navigators of the St. Lawrence who use the English tongue.

To sum up the results of the field operations of the commissioners:

(1) The meridian has been traced by astronomic observations from the monument, established by the consent of both nations in 1798, at the source of the St. Croix to a point 4 miles beyond the left bank of the St. John in the neighborhood of the Grand Falls. In the course of this not only has no highland dividing waters which run into the St. Lawrence from those which run into the Atlantic been reached, but no common source or reservoir of two streams running in opposite directions.[‡] No place has, therefore, been found which by any construction proposed or attempted to be put on the words of the treaty of 1783 can be considered as the northwest angle of Nova Scotia. This point must, in consequence, lie in the further prolongation of the meridian line to the north.

(2) The streams whose title to the name of the northwesternmost head of the Connecticut River is in dispute have been explored, and the line of the highlands has been traced from their sources to the point at which the lines respectively claimed by the two nations diverge from each other.

(3) The line claimed by Messrs. Featherstonhaugh and Mudge, on the part of Great Britain, has been in a great measure explored.

* The highlands of Neversink.

[†]Captain Byfield.

[‡] The levelings carried along this meridian line by means of spirit levels, alluded to in the note at bottom of page 121, passed Mars Hill at a depression of 12 feet *below* the level of the base of the monument which stands texcept at seasons of extreme drought in the water at the source of the St. Croix.

(4) The line of highlands claimed by the United States has, with some small exceptions, been thoroughly examined, and its prolongation as far as the north shore of the Bay of Chaleurs reconnoitered. The parts of the line which have not been actually reached have been seen from a distance, and streams flowing from them crossed and leveled. From the former indication it is probable that the average height of those parts exceeds that of the neighboring parts of the line. From the heights of the streams it is certain that the lowest gaps in the unexplored portion of the line can not be less elevated than 1,000 feet above the level of the sea.

That part of this line of highlands which lies east of the sources of the Rimouski fulfills to the letter the words of the royal proclamation of 1763 and the contemporaneous commission of Governor Wilmot. The first of those instruments defines the mouth of the river St. Lawrence by a line drawn from Cape Rozier to the St. John River (on the Labrador coast), and therefore all to the eastward of that line is "the sea." The height of land thus traced by the commission, rising from the north shore of the Bay des Chaleurs at its western extremity, divides waters which fall into the river St. Lawrence from those which fall into the sea, and is the southern boundary of the Province established by the proclamation of 1763 under the name of Quebec. The identity of the line defined in the proclamation of 1763 and the boundary of the United States in the treaty of 1783 has been uniformly maintained on the part of the United States, and is not merely admitted but strenuously argued for in the report of Messrs. Featherstonhaugh and Mudge.

The undersigned therefore report that they have explored and in a great measure surveyed and leveled a line of highlands in which the northwest angle of Nova Scotia lies, and which in their opinion is the true boundary between the States of Maine and New Hampshire and the British Provinces.

II.—Examination of the Argument Contained in the Report of Messrs. Mudge and Featherstonhaugh.

The progress which has been made in the first portion of the duties of the commissioners has been set forth in the preceding part of this report.

Although, as will be there seen, the task of running the meridian line of the monument marking the source of the St. Croix and of exploring and surveying the lines of highlands respectively claimed by the Governments of the United States and Great Britain has not been completed, yet enough has been done to furnish materials for an examination of the argument preferred by Messrs. Mudge and Featherstonhaugh in support of the novel form in which the claim of Great Britain has been presented by them.

In the surveys made by direction of the commissioners under the fifth article of the treaty of Glient the difficult character of the country had prevented any other method of exploration than that of ascending rivers to their sources. It was believed on the part of the United States that the determination of the position of these sources was sufficient for the demarcation of the line of highlands in relation to which the controversy exists, and no attempt was made to meet the British argument by the exhibition of the fact that the lines joining these sources run in some cases along ridges and in other cases pass over elevations to which in any sense of the term the epithet of "highlands" may be justly applied. The denial of this mode of determining the line of highlands by Great Britain has made it important that both the lines claimed by Great Eritain and by the United States should be explored and leveled-a task which until recently had not been attempted on either part. The examination of the lines claimed by the two nations, respectively, has been in a great measure accomplished, as will be seen from the reports of the field operations of the commission, while such of these determinations as have a direct bearing on the argument will be eited in their proper place in this report.

It is to be regretted that the document now under consideration exhibits many instances of an unfriendly spirit. Charges of direct and implied fraud are made, and language is used throughout that is irritating and insulting. It is fondly hoped that these passages do not express the sentiments of the British nation, as in a state of feeling such as this report indicates little hope could be entertained of an amicable adjustment of this question. Any inference to be drawn from the language of the report under consideration is contradicted by the official declarations of the British Government, and may therefore be considered as the individual act of the authors, not as the deliberate voice of the nation by which they were employed.

It might have been easy to have retorted similar charges, and thus have excited in the Government of Great Britain feelings of irritation similar to those which pervaded the whole population of the United States on the reception of that report. While, however, it is due to the honor of the United States to declare that no desire of undue aggrandizement has been felt, no claim advanced beyond what a strict construction of their rights will warrant, it is trusted that the pretensions of Great Britain, however unfounded in fact or principle, have been advanced with a like disregard to mere extension of territory, and urged with the same good faith which has uniformly characterized the proceedings of the United States.

It is not to be wondered that the claims of Great Britain have been urged with the atmost pertinacity and supported by every possible form of argument. The territory in question is of great value to her, by covering the only mode of communication which can exist for nearly six months in the year, not only between two valuable colonies, but between the most important of all her possessions and the mother country. The time is not long past when the use of this very communication was not an unimportant part of the means by which that colony was restrained from an attempt to assert its independence. It is not, therefore, surprising that the feelings of British statesmen and of those who desired to win their favor have been more obvious in the several arguments which have appeared on that side of the question than a sober view of the true principles, on which alone a correct opinion of the case can be founded.

To the United States in their collective capacity the territory in dispute is, on the other hand, of comparatively little moment. No other desire is felt throughout the greater part of the Union than that the question should be settled upon just principles. No regret could, therefore, be widely felt if it should be satisfactorily shown that the title of Great Britain to this region is indisputable. But should it be shown, as is beyond all question the fact, that the title is in truth in the United States, national honor forbids that this title should be abandoned. To the States of Maine and Massachusetts, who are the joint proprietors of the unseated lands, the territory is of a certain importance from the value of the land and timber, and to the latter, within whose jurisdiction it falls, as a future means of increasing her relative importance in the Union, and a just and proper feeling on the part of their sister States must prevent their yielding to any unfounded claim or the surrender of any territory to which a title can be established without an equivalent satisfactory to those States.

To show the basis on which the title rests-

It is maintained on the part of the United States that the territory they held on the continent of North America prior to the purchase of Louisiana and the Floridas was possessed by a title derived from their own Declaration of Independence on the 4th of July, 1776, the assertion of that independence in a successful war, and its acknowledgment by Great Britain as a preliminary to any negotiation for a treaty of peace. It is admitted on the part of Great Britain that a territory designated by certain limits was *granted* to the United States in the treaty of 1783. As a matter of national pride, the question whether the territory of the original United States was held by the right of war or by virtue of a grant from the British Crown is not unimportant; as a basis of title it has not the least bearing on the subject. From the date of the treaty of 1783 all pretensions of the British Crown to jurisdiction or property within the limits prescribed by the provisions of that instrument ceased, and when a war arose in 1812 between the two nations it was terminated by the treaty of Ghent, in which the original boundaries were confirmed and acknowledged on both sides.

The treaty of 1783, therefore, is, in reference to this territory, the only instrument of binding force upon the two parties; nor can any other document be with propriety brought forward in the discussion except for the purpose of explaining and rendering definite such of the provisions of that treaty as are obscure or apparently uncertain.

The desire of full and ample illustration, which has actuated both parties, has led to the search among neglected archives for documents almost innumerable, and their force and bearing upon the question have been exhibited in arguments of great ability. Such has been the talent shown in this task of illustration and so copious have been the materials employed for the purpose that the great and only important question, although never lost sight of by the writers themselves, has to the eye of the casual observer been completely hidden. In the report under consideration this-distinction between treaties of binding force and documents intended for mere illustration has not been regarded, and the vague as well as obviously inaccurate delineations of a French or a Venetian map maker are gravely held forth as of equal value for a basis of argument as the solemn and ratified acts of the two nations.

In pursuance of this desire of illustration, every known document which could in any form support either claim has been advanced and set forth in the statements laid before His Majesty the King of the Netherlands when acting as umpire under the fifth article of the treaty of Ghent. If not yet given entire to the public,* they are in the possession of both Governments in a printed form, together with the opinion of the arbiter in respect to them; and although it is necessary that the arguments then adduced in favor of the American claim should be in part repeated, and although new illustrations of the correctness of that argument have since been brought to light, the present document will be confined as closely as possible to the provisions of the treaty itself, and will adduce no more of illustration than is barely sufficient to render the terms of that treaty certain and definite.

The boundaries of the United States are described in the treaty of 1783 in the following words: \dagger

"And that all disputes which might arise in future on the subject of the boundaries of the said United States may be prevented it is hereby agreed and declared that the following are and shall be their boundaries, viz: From the northwest angle of Nova Scotia, viz, that angle which is formed by a line drawn due north from the source of St. Croix River to the highlands; along the said highlands which divide those rivers that empty themselves into the river St. Lawrence from those which fall into the Atlantic Ocean to the northwesternmost head of Connecticut River; thence down along the middle of that river to the forty-fifth degree of north latitude; from thenee by a line due west on said latitude until it strikes the river Iroquois, or Cataraquy; thence along the middle of said river into Lake Ontario; through the middle of said lake until it strikes the communication by water between that lake and Lake Erie; thence along the middle of said communication into Lake Erie through the middle of said lake until it arrives at the water communication between that lake and Lake Huron; thence along the middle of said water communication into the Lake Huron; thence through the middle of said lake to the water communication between that

*A considerable part of the papers, together with the argument, has been published by Mr. Gallatin in his Right of the United States to the Northeastern Boundary. New York, 1840. 8 vo pp. 180.

† The words here appearing julitatics are not italicized in the original treaty.

lake and Lake Superior; thence through Lake Superior northward of the Isles Royal and Phelipeaux to the Long Lake; thence through the middle of said Long Lake and the water communication between it and the Lake of the Woods to the said Lake of the Woods; thence through the said lake to the most northwestern point thereof. and from thence on a due west course to the river Mississippi; thence by a line to be drawn along the middle of the said river Mississippi until it shall intersect the northernmost part of the thirty-first degree of north latitude; south by a line to be drawn due east from the determination of the line last mentioned in the latitude of 31° north of the equator to the middle of the river Apalachicola, or Catahouche; thence along the middle thereof to its junction with the Flint River; thence straight to the head of St. Marys River, and thence down along the middle of St. Marys River to the Atlantic Ocean; east by a line to be drawn along the middle of the river St. Croix from its mouth in the Bay of Fundy to its source and from its source directly north to the aforesaid highlands which divide the rivers that fall into the Atlantic Ocean from those which fall into the river St. Lawrence; comprehending all islands within 20 leagues of any part of the shores of the United States and lying between lines to be drawn due east from the points where the aforesaid boundaries between Nova Scotia on the one part and East Florida on the other shall respectively touch the Bay of Fundy and the Atlantic Ocean, excepting such islands as now are or heretofore have been within the limits of the said Province of Nova Scotia."

So far as the present question is concerned, five points of discussion are presented by this article of the treaty of 1783:

I. What stream is to be understood by the name of the river St. Croix?

II. The determination of the line due north from the source of that river.

III. What is the position of the northwest angle of Nova Scotia?

IV. The delineation of the line passing through the highlands from that angle to the northwest head of Connecticut River.

V. What is to be considered as the northwestern head of Connecticut River?

I.--RIVER ST. CROIX.

Doubts in respect to the particular river intended to be understood by the name of the St. Croix having arisen, an article was inserted in the treaty of commerce signed in London in November, 1794, by Lord Grenville on the part of Great Britain and by John Jay on the part of the United States.* This article, the fifth of that treaty, provided for the appointment of a joint commission with full powers to decide that question. This commission was constituted in conformity, and the award was accepted by both Governments.[†] The river designated in this award became thenceforth the true St. Croix, however erroneous may have been the grounds on which it was decided so to be. When, therefore, in the fourth article of the treaty of Ghent it is declared that the due north line from the source of the St. Croix has not been surveyed, and when in this and the other articles of the same treaty all other uncertain parts of the boundary are recited, the validity of the decision of the commissioners under the fifth article of Jay's treaty is virtually acknowledged. Nay, more; the acknowledgment is completed by the stipulation in the second article of the treaty of Ghent that "all territory, places, and possessions taken by either party during the war," with certain exceptions, shall be forthwith restored to their previous possessors.⁺ The only exceptions are the islands in Passamaquoddy Bay; and had it been believed that any uncertainty in respect to the adjacent territory existed it would not have been neglected. Nay, more; all the settlements lying within the line claimed by Great Britain before the commission created by the treaty of 1794 had been taken, and were in her actual possession at the time the treaty of Ghent took effect, and were forthwith restored to the jurisdiction of the United States.

‡ See Note 111, pp. 1995, 1996.

Messages and Papers of the Presidents

When, also, it became necessary to proceed to the investigation of the second point of the discussion, the agents and surveyors of both parties proceeded as a matter of course to the point marked in 1798 as the source of the St. Croix.* This point is therefore fixed and established beyond the possibility of cavil, and the faith of both Governments is pledged that it shall not be disturbed.

II.-DUE NORTH LINE FROM THE SOURCE OF THE ST. CROIX.

The treaty of 1783 provides that the boundary from the source of the St. Croix shall be drawn "directly north." In relation to this expression no possible doubt can arise. It is neither susceptible of more than a single meaning nor does it require illustration from any extrinsic source. The undersigned, therefore, do not consider that so much of the argument of Messrs. Mudge and Featherstonhaugh as attempts to show that this line ought to be drawn in any other direction than due north requires any reply on the part of the United States. Admitting that the words had been originally used as a mistranslation of terms in the Latin grant of James I to Sir William Alexander, the misconception was equally shared by both parties to the treaty of 1783; and it will be shown hereafter that this misconception, if any, had its origin in British official papers. Were it capable of proof beyond all possibility of denial that the limit of the grant to Sir William Alexander was intended to be a line drawn toward the northwest instead of the north it would not affect the question. So far as that grant was used by American negotiators to illustrate the position of the northwest angle of Nova Scotia it would have failed to fulfill the object, but such failure in illustration does not involve the nullity of the treaty itself.

That the translation which has hitherto been universally received as correct of the terms in the grant to Sir William Alexander is the true one, and that the new construction which is now attempted to be put upon it is inaccurate, will be shown in another place,[†] where will also be exhibited an error committed in rendering the sense of another part of that instrument. The consideration of the correctness or incorrectness of the several translations can form no part of the present argument. While, therefore, it is denied that Messrs. Mudge and Featherstonhaugh have succeeded in showing that the grant to Sir William Alexander has been mistranslated, it is maintained that an error in the translation of this document can have no effect in setting aside the simple and positive terms of the treaty of 1783. That treaty and its confirmation in the treaty of Ghent must be admitted to be null and void before that line can be drawn in any other direction than "due north,"

III.--NORTHWEST ANGLE OF NOVA SCOTIA.

The term northwest angle of Nova Scotia was used in the secret instructions of Congress and is adopted in the treaty of 1783. In the instructions it is named without any explanation, as if it were a point perfectly well known. In one sense it was so, for although it never had been marked by a monument, nor perhaps visited by the foot of man, its position could be laid down upon a map; nay, was so on many existing maps, and the directions for finding it on the ground were clear and explicit. These directions are to be found in the royal proclamation of October, 1763, and in the commission to Montague Wilmot, governor of Nova Scotia, of cotemporaneous date. Any uncertainty in regard to the position of this angle which may have existed in relation to the meaning of the first of these instruments is removed by the act of Parliament of 1774, commonly called the Quebec act.

Before citing these instruments it will be proper to refer to the circumstances under which the two first were issued.

Great Britain, after a successful war, found herself in possession of the whole

*See Note IV, p. 1996. | See Note V, pp. 1996-2000.

eastern side of the continent of North America. So much of this as lay to the south of the St. Lawrence and the forty-fifth parallel of north latitude had been previously made the subject of charters from the British Crown under a claim of right from priority of discovery.* The possession of this wide tract was not uncontested, and various other European nations had attempted to found settlements within the limits of the British charters. In such cases it was held as a matter of law that where the occupation or defense of the territory granted had been neglected the right had ceased, and the country, when recovered by conquest or restored by treaty, was again vested in the Crown, to be made the subject of new grants or governed as a royal colony. Thus, when the settlements made by the Dutch and Swedes, which by the fortune of war had become wholly vested in Holland, were reduced, the Crown exercised its rights by conveying them to the Duke of York, although covered in a great part, if not wholly, by previous charters; and when these countries were again occupied by the Dutch and restored by the treaty of Breda it was thought necessary that the title of the Duke of York should be restored by a fresh grant. In both of these charters to that prince was included the Province of Sagadahock, within whose chartered limits was comprised the territory at present in dispute. This Province, confined on the sea between the rivers St. Croix and Kennebec, had for its opposite limits the St. Lawrence, or, as the grant expresses it, "extending from the river of Kenebeque and so upward by the shortest course to the river Canada northward." The shortest course from the source of the Kennebec to the St. Lawrence is by the present Kennebec road. This grant therefore covered the whole space along the St. Lawrence from about the mouth of the Chaudiere River to the eastern limit of the grant to Sir William Alexander. By the accession of James II, or, as some maintain, by the act of attainder, it matters not which, this Province reverted to the Crown, and was by it granted, in 1691, to the colony of Massachusetts. In the same charter Nova Scotia also was included. This has been called a war grant, as in fact it was, and the colony of Massachusetts speedily availed themselves of it by conquering the whole of the territory conveyed except the island of Cape Breton. The latter, too, fell before the unassisted arms of the New England Provinces in 1745, at a time when Great Britain was too deeply engaged in the contest of a civil war to give aid either in money or in men to her transatlantic possessions.

The colony of Massachusetts, therefore, could not be charged with any want of energy in asserting her chartered rights to the territory in question. It is, in fact, due to her exertions that both Nova Scotia and New Brunswick came at so early a period into the possession of the British Crown. In 1654 the French settlements as far as Port Royal, at the head of the Bay of Fundy, were reduced by Major Sedgwick, but by the treaty of Breda they were restored to France.

In 1690 Sir William Phips, governor of Massachusetts, with a force of 700 men, raised in that colony, again conquered the country, and although on his return the French dislodged the garrison possession was forthwith resumed by an expedition under Colonel Church. Acadie, however, or Nova Scotia, was ceded again to France by the treaty of Ryswick. After several spirited but unsuccessful attempts during the War of the Succession, General Nicholson, with a force of five regiments, four of which were levied in Massachusetts, reduced Port Royal, and by its capitulation the present Provinces of Nova Scotia and New Brunswick were permanently annexed to the British Crown.‡ Finally the militia of Massachusetts, during the War of 1776, took possession of the territory, and occupied it until the date of the treaty of

† See Note VI, p. 2000.

Ilaliburton's History, Vol. I, pp. 83-87.

^{*}Sebastian Cabot, in the employ of Henry VII, discovered the continent of North America 24th June, 1497, and explored it from Hudsons Bay to Florida in 1498. Columbus discovered South America 1st August, 1498, while the voyage of Vespueci, whose name has been given to the continent, was not performed until 1499.—HUMBOLDT.

1783. This occupation was not limited by the St. Croix, cr even by the St. John, but included the whole of the southern part of New Brunswick, while the peninsula of Nova Scotia was only preserved to Great Britain by the fortification of the isthmus which unites it to the mainland.*

The recession of Acadie, or Nova Scotia, to France by the treaty of Ryswick divested Massachusetts only of the territory granted her in the charter of 1691 under the latter name. Her war title to Sagadahock was confirmed by a conquest with her own unaided arms; and even the cession of Nova Scotia was a manifest injustice to her, as she was at the moment in full possession of it. It, however, suited the purpose of Great Britain to barter this part of the conquest of that colony for objects of more immediate interest.

Admitting that England did convey a part or the whole of Sagadahock to France under the vague name of Acadie or Nova Scotia,[†] the conquest by Massachusetts in 1710 renewed her rights to this much at least, and although the Crown appropriated to itself the lion's share of the spoils by making Nova Scotia a royal province, it did not attempt to disturb her possession of Sagadahock. So far from so doing, the commission of the royal governors was limited to the west by the St. Croix, although it was stated in a saving clause that the Province of Nova Scotia extended of right to the Penobscot. From that time until the breaking out of the Revolutionary War, a space of more than sixty years, the Province of Sagadahock was left in the undisturbed possession of Massachusetts under the charter of 1691.

In defiance of this charter the French proceeded to occupy the right bank of the St. Lawrence, which at the time of the capture of Quebec and the cession in the treaty of 1763 was partially held by settlements of Canadians. The Crown therefore acted upon the principle that the right of Massachusetts to the right bank of the St. Lawrence had thus become void, and proceeded by proclamation to form the possessions of France on both banks of the St. Lawrence into a royal colony under the name of the Province of Quebec.

This was not done without a decided opposition on the part of Massachusetts, but any decision in respect to her claims was rendered needless by the breaking out of the War of Independence. It is only proper to remark that this opposition was in fact made and that her claim to the right bank of the St. Lawrence was only abandoned by the treaty of 1783. The country of which it was intended to divest her by the proclamation of 1763 is described in a letter of her agent, Mr. Mauduit, to the general court of that colony as "the narrow tract of land which lies beyond the sources of all your rivers and is watered by those which run into the St. Lawrence."

It is assigned by him as a reason why the Province of Massachusetts should assent to the boundary assigned to the Province of Quebec by the proclamation that "it would not be of any great consequence to you" (Massachusetts), "but is absolutely necessary to the Crown to preserve the continuity of the Province of Quebec." The part of the Province of Quebec whose continuity with the rest of that colony was to be preserved is evidently the district of Gaspe, of which Nova Scotia, a royal colony, was divested by the same proclamation. For this continuity no more was necessary than a road along the St. Lawrence itself, and the reason would have been absurd if applied to any country lying beyond the streams which fall into that river, for up to the present day no communication between parts of Canada exists through any part of the disputed territory. The narrow territory thus advised to be relinquished extends, according to the views of Messrs. Mudge and Featherstonhaugh, from the Great Falls of the St. John to Quebec, a distance in a straight line of 160 miles. It has a figure not far from triangular, of which this line is the perpendicular and the shore of the St. Lawrence from the Chaudiere to the Metis the base. It contains about 16,000 square miles. It would have been a perversion of language in Mr.

* Haliburton's History, Vol. I, pp. 244-289.

† See Note VII, pp. 2000, 2001.

Mauduit to describe this to his employers as a narrow tract. But the space whose cession he really intended to advise is in every sense a narrow tract, for its length along the St. Lawrence is about 200 miles, and its average breadth to the sources of the streams 30. It contains 6,000 square miles, and is described by him in a manner that leaves no question as to its extent being "watered by streams" which "run into the St. Lawrence." It therefore did not include any country watered by streams which run into the St. John.

It is believed that this is the first instance in which the term *narrow* has ever been applied to a triangle almost right angled and nearly isosceles, and it is not a little remarkable that this very expression was relied upon in the statement to the King of the Netherlands as one of the strongest proofs of the justice of the American claim.

Admitting, however, for the sake of argument, that the Crown did demand this territory, and that the mere advice of an agent without powers was binding on Massachusetts, the fact would have no direct bearing upon the point under consideration. The relinquishment by Massachusetts of the whole of the territory west of the meridian of the St. Croix would not have changed the position of the northwest angle of Nova Scotia, nor the title of the United States collectively under the treaty of 1783 to a boundary to be drawn from that angle, however it might have affected the right of property of that State to the lands within it.

And here it is to be remarked that the Government of the United States is twofold—that of the individual States and that of the Federal Union. It would be possible, therefore, that all right of property in unscated lands within a State's jurisdiction might be in the General Government, and this is in fact the case in all the new States. Even had Massachusetts divested herself of the title (which she has not) the treaty of 1783 would have vested it in the Confederation. She had at least a color of title, under which the Confederation claimed to the boundaries of Nova Scotia on the east and to the southern limits of the Province of Quebee on the north, and this claim was allowed by Great Britain in the treaty of 1783 in terms which are at least admitted to be identical in meaning with those of the proclamation creating the latter Province.*

To illustrate the subject further:

Of the seventeen British colonies in North America, thirteen succeeded in asserting their independence; the two Floridas were conquered and ceded to Spain; while of her magnificent American domain only Quebec and Nova Scotia were left to Great Britain. The thirteen colonies, now independent States, claimed all that part of the continent to the eastward of the Mississippi and north of the bounds of Florida which was not contained within the limits of the last-named colonies, and this claim was fully admitted by the boundary agreed to in the treaty of 1783. Within the limits thus assigned it was well known that there were conflicting claims to parts which had more than once been covered by royal charters; it was even possible that there were portions of the wide territory the right to which was asserted by the United States and admitted by Great Britain that had not been covered by any royal grant; but the jurisdiction in respect to disputed rights and the title to land not conveyed forever ceased to be in the British Crown—first by a successful assertion of independence in arms, and finally by the positive terms of a solemn treaty.

If it should be admitted, for argument's sake, that the elaim of Massachusetts, as inherited by the State of Maine, to the disputed territory is unfounded, it is a circumstance that can not enter into a discussion between Great Britain and the United States of America. Massachusetts did elaim, under at least the color of a title, not merely to "the highlands," but to the St. Lawrence itself, and the claim was admitted as far as the former by the treaty of 1783. If it should hereafter appear that this claim can not be maintained, the territory which is not covered by her

* Report of Messrs. Featherstonhaugh and Mudge, p. 6.

Messages and Papers of the Presidents

title, if within the boundary of the treaty of 1783, can not revert to Great Britain, which has ceded its rights to the thirteen independent States, but to the latter in their confederate capacity, and is thus the property of the whole Union. As well might Great Britain set up a claim to the States of Alabama and Mississippi, which, although claimed by the State of Georgia, were found not to be covered by its royal charter, as to any part of the territory contained within the line defined by the treaty of 1783, under pretense that the rights of Massachusetts are not indefeasible.

While, therefore, it is maintained that whether the title of Massachusetts be valid or not is immaterial to the present question, it may be further urged that not even the shadow of a pretense existed for divesting her of her rights by the proclamation of 1763, except to territory which by neglect she had permitted France to occupy. On this point the French are the best authority, for it can not be pretended that the Crown of England intended in forming the Province of Quebec to go beyond the utmost limits of the claim of France to her colony of Canada. The assertions on the part of France in the argument preceding the War of 1756 were :

First. That both banks of the St. Lawrence are included in Canada.

Second. That with the exception of Miscou and Cape Breton, her grants extended to leagues from the river.

Third. That the commissions of the governors of Canada in the most formal and precise manner extended their jurisdiction to the sources of the rivers which discharge themselves into the St. Lawrence.

Now the distance of 10 French leagues and that of the sources of the rivers, on an average, are nearly identical, and this narrow tract, of which alone the Crown could with any shadow of justice assume the right of disposing, is that of which Massachusetts was intended to be divested by the proclamation of 1763.

It was because Great Britain held that these claims on the part of France were too extensive that the War of 1756 was waged. In this war at least one-half of the force which under Wolfe took Louisburg and reduced Quebec, and under Amherst forced the French armies in Canada to a capitulation, was raised and paid by the colonies. The creation of the Province of Quebec, covering a part of their chartered limits, was therefore a just subject of complaint.

The bounds assigned to the new Province of Quebec to the south by the proclamation of 7th October, 1763, are as follows:

"The line, crossing the river St. Lawrence and the Lake Champlain in 45° of north latitude, passes along the highlands which divide the rivers that empty themselves into the St. Lawrence from those which fall into the sea, and also along the north coast of the Bay des Chalcurs and the Gulf of St. Lawrence to Cape Rosieres," etc.

In the same month of October, 1763, the limits of the royal Province of Nova Scotia are fixed, in the commission to Governor Wilmot, on the west "by the said river St. Croix to its source, and by a line drawn due north from thence to the southern boundary of our Province of Quebec; to the northward, by the same boundary, as far as the western extremity of the Bay des Chaleurs."

Here, then, we find the first mention in an English dress of the line to be drawn due north from the source of the St. Croix. There is no evidence that it was a translation of the terms in the grant to Sir William Alexander, but if it were it was made not by Americans, but by Englishmen; and not only made, but set forth under the high authority of the royal sign manual and authenticated by the great seal of the United Kingdom of England and Scotland.

The due north line from the source of the St. Croix, meeting the south bounds of the Province of Quebec, forms two angles. One of these was the northeast angle of the Province of Sagadahock; the other is the northwest angle of Nova Scotia. It might be debated which of the streams that fall into Passamaquoddy Bay was the true St. Croix, but such a question could be settled by reference to evidence, and has been thus settled by the award of the commissioners under the fifth article of

Jay's treaty. Among the many branches of a stream it may for a moment be doubted which is to be considered as its principal source, but this can be ascertained by proper methods, and it has been ascertained and marked with a monument by the same commissioners. The tracing of a meridian line may be a difficult operation in practical surveying, but it can be effected by proper instruments and adequate skill, and this task has in fact been performed by one of the present commissioners, after being attempted by the surveyors under the fifth article of the treaty of Ghent. The highlands are defined in the commission of Governor Wilmot and the proclamation of 1763 beyond the possibility of doubt. They are on the north shore of the Bay of Chaleurs as described in the one instrument, and on the western extremity of that bay as described by the other. They can therefore be found, and they have been found.

The Congress of 1779 and the framers of the treaty of 1783 were therefore warranted in speaking of the northwest angle of Nova Scotia as if it were a known point. It could have been laid down with precision on any good map; it could be discovered by the use of adequate methods and the expenditure of a sufficient appropriation; it was, in fact, as well known as the forty-fifth and thirty-second parallels of latitude, which are named in the same article of the treaty, or as the boundaries of very many of the States which had united in the Confederation. These were defined by the course and sources of rivers-by parallels of latitude and circles of longitude, either of indefinite extent or setting out from some prescribed point whose position was to be determined. At the time of making these grants, as in the case before us, many of the boundaries had never been visited by civilized men. Some of these lines had, indeed, been sought and traced upon the ground in pursuance of orders from the privy council of Great Britain or the high court of chancery, and the recollection of the operation was fresh in the memory of both parties. Thus in 1750 it was ordered by the latter tribunal that the boundary on the lower counties on the Delaware (now the State of that name) and the Province of Maryland should be marked out. The boundary was an arc of a circle described around the town of Newcastle, with a given radius, and a meridian line tangent thereto. This was a far more difficult operation than to draw a meridian line from a given point, such as the source of a river. It was thought in 1763 worthy of the attention of the first assistant in the Royal Observatory at Greenwich, and the American Rittenhouse was associated with him. This operation was not only of great contemporary fame, but is still quoted in English books among the data whence we derive our knowledge of the magnitude and figure of the earth. So also the same astronomer (Mason) had but a few years before the War of Independence commenced the tracing of a parallel of latitude from the former line to the westward, thus marking the respective limits of Pennsylvania, Maryland, and Virginia. With such examples before them the framers of the treaty of 1783 were warranted in considering the northwest angle of Nova Scotia as a point sufficiently definite to be made not merely one of the landmarks of the new nation, but the corner at which the description of its boundaries should begin. It has been well remarked by one of the commentators* on the report of Messrs. Featherstonhaugh and Mudge that if the treaty of 1783 be a grant the grantors are bound by rule of law to mark out that corner of their own land whence the description of the grant commences. The British Government therefore ought, if it be, as it is maintained on its part, a grant, to have traced the line of highlands dividing their Provinces of Nova Scotia and Canada. Had this been done in conformity with the proclamation of 1763 and the commission to Governor Wilmot, the northwest angle of Nova Scotia would be given by the trace of the meridian of the St. Croix. So far from doing this, the question has been complicated by the denial that the boundaries defined in that proclamation and in the treaty of 1783 were intended to be identical. The argument on this point was so ingenious that the arbiter under the fifth article of the treaty of

*Hon. John Holmes, of Maine.

Messages and Papers of the Presidents

Ghent did not consider the American case as made out, * and this doubt was the principal ground on which his decision rested. It is therefore an earnest of a more favorable state of feeling that the sophistry with which this fact had been veiled, at least in part, is now withdrawn, and that the commission whose report is under consideration frankly admit this identity.[†] This admission being made, it is obvious that the origin of the highlands of the treaty must be sought on the north shore of the Bay des Chaleurs and at its western extremity, and it follows that the point where this line of highlands is cut by the meridian of the monument at the source of the St. Croix is the northwest angle of Nova Scotia of the treaty of 1783, and must lie to the north of the Restigouche, or in the very spot claimed by the United States.

The British Government has not only failed in marking out the corner of their territory at which the boundary of the United States begins, but has in practice adopted a very different point as the northwest angle of the Province of New Brunswick, which now occupies the place of ancient Nova Scotia in its contiguity to the American lines. Up to the time of the discussion before the King of the Netherlands the commissions of the governors of New Brunswick had been, so far as the western and northern boundaries are concerned, copies of that to Governor Wilmot. The undersigned have no means of ascertaining when or how the form of these commissions was changed, but it was found during the exploration of the country that the jurisdiction of New Brunswick, limited at least to the north of the St. John by the exploring meridian line, did not leave the Bay of Chaleurs at its western extremity and follow thence the old bounds of the Province of Quebec. It, on the contrary, was ascertained that it was limited by the Restigouche as far as the confluence of its southwestern branch, formerly known by the name of Chacodi, and thence followed the latter up to the point where it is crossed by the exploring meridian line. On all the territory thus severed from the ancient domain of Nova Scotia permits to cut timber were found to have been issued by Canadian authorities, and the few settlers derived their titles to land from the same source.

Although this demarcation involves a double deviation from the proclamation of 1763 (first, in following a river instead of highlands; second, in taking a small branch instead of pursuing the main supply of the Bay of Chaleurs), the northwest angle of Nova Scotia may be considered as at last fixed by British authority at a point many miles north of the point claimed to be such in the statements laid before the King of the Netherlands on the part of Great Britain, and 48 miles to the north of where the line of "abraded highlands" of Messrs. Featherstonhaugh and Mudge crosses the St. John. Were it not that the American claim would be weakened by any change in the strong ground on which it has always rested, it might be granted that this is in fact the long-lost northwest angle of Nova Scotia, and the highlands allowed to be traced from that point through the sources of the branches of the St. John and the St. Lawrence.

In proof of the position now assigned to this angle of New Brunswick, and consequently of ancient Nova Scotia, in the absence of documents which the archives of Great Britain alone can furnish, the map published by the Society for the Encouragement of Useful Knowledge, the several maps of the surveyor-general of the Province of Canada, and the most recent map of the Provinces of Nova Scotia and New Brunswick, by John Wyld, geographer to the Queen of Great Britain, may be cited.

It may therefore be concluded that the northwest angle of Nova Scotia is no longer an unknown point. It can be found by a search conducted in compliance with the proclamation of 1763 and the contemporaneous commission of Governor Wilmot, and the researches of the present commission show that it can not be far distant from the point originally assigned to it in the exploring meridian line. The identity of the first of these documents with the boundary of the treaty of 1783 is admitted,

† Report of Messrs, Featherstonhaugh and Mudge, pp. 6, 23.

^{*} See Note VIII, p. 2001.

John Tyler

and the latter is word for word the same with the description of the eastern boundary of the United States in the same treaty. Moreover, a northwest angle has been assigned to the Province of New Brunswick by British authority, which, did it involve no dereliction of principle, might without sensible loss be accepted on the part of the United States.

IV.—HIGHLANDS OF THE TREATY OF 1783.

The highlands of the treaty of 1783 are described as those "which divide those rivers that empty themselves into the river St. Lawrence from those which fall into the Atlantic Ocean." It has been uniformly and consistently maintained on the part of the United States that by the term "highlands" was intended what is in another form of the same words called the height of land. The line of highlands in this sense was to be sought by following the rivers described in the treaty to their source and drawing lines between these sources in such manner as to divide the surface waters. It was believed that the sources of such rivers as the Connecticut and the St. John must lie in a country sufficiently elevated to be entitled to the epithet of highlands, although it should appear on reaching it that it had the appearance of a plain. Nay, it was even concluded, although, as now appears, incorrectly-and it was not feared that the conclusion would weaken the American argument-that the line from the northwest angle of Nova Scotia, at least as far as the sources of Tuladi, did pass through a country of that description. Opposite ground was taken in the argument of Great Britain by her agent, but however acute and ingenious were the processes of reasoning by which this argument was supported, it remained in his hands without application, for the line claimed by him on the part of his Government was one having the same physical basis for its delineation as that claimed by the agent of the United States, namely, one joining the culminating points of the valleys in which streams running in opposite directions took their rise. The argument appears to have been drawn while he hoped to be able to include Katahdin and the other great mountains in that neighborhood in his claimed boundary, and he does not appear to have become aware how inapplicable it was in every sense to the line by which he was, for want of a better, compelled to abide. The British Government, however, virtually abandoned the construction of their agent in the convention signed in London the 27th September, 1827.*

In this it was stipulated that Mitchell's and Map A should be admitted to the exclusion of all others "as the only maps that shall be considered as evidence" of the topography of the country, and in the latter of these maps, constructed under the joint direction of the British and American negotiators by the astronomer of the British Government, it was agreed that nothing but the water courses should be represented. Finally, it was admitted in the report of Messrs. Featherstonhaugh and Mudge that the terms highlands and height of land are identical. The decision of the King of the Netherlands, to which Great Britain gave her assent in the first instance, recognizes the correctness of the views entertained in the American statements.[†] All discussion on this subject is, however, rendered unnecessary by the knowledge which the undersigned have obtained of the country. The line surveyed by them not only divides rivers, but possesses in a precument degree the character by which in the British argument highlands are required to be distinguished.

It is sufficient for the present argument that the identity of the lines pointed out by the proclamation of 1763 and the act of 1774 with the boundary of the treaty of 1783 be admitted. Such has been the uniform claim of the Government of the United States and the State of Massachusetts, and such is the deliberate verdict of the British commissioners.⁴ The words of the proclamation of 1763 have already

> ^{*}See Note IX, p. 2001, [†]See Note X, pp. 2001, 2002, [‡]Report of Featherstonhaugh and Mudge, pp. 0, 23.

been cited. By reference to them it will be seen that the origin of "the highlands" is to be sought on the north shore of the Bay of Chaleurs. If they are not to be found there, a gap exists in the boundary of the proclamation, which it is evident could not have been intended. It has been thought by some that the gap did actually exist, but this idea was founded on an imperfect knowledge of the country. The Bay of Chaleurs seems, in fact, to have been better known to the framers of the proclamation of 1763 and the act of 1774 than to any subsequent authorities, whether British or American. Researches made in the year 1840 show that at the head of the tide of the Bay of Chalcurs a mountain rises immediately on the northern bank, which from its imposing appearance has been called by the Scotch settlers at its foot Ben Lomond. This, indeed, has by measurement been found to be no more than 1,024 feet in height, but no one can deny its title to the name of a highland. From this a continuous chain of heights has been ascertained to exist, bounding in the first instance the valley of the Matapediac to the sources of that stream, which they separate from those of the Metis. The height of land then passes between the waters of Metis and Restigouche, and, bending around the sources of the latter to the sources of the Rimouski, begins there to separate waters which fall into the St. Lawrence from those which fall into the St. John, which they continue to do as far as the point where they merge in the line admitted by both parties.

These highlands have all the characteristics necessary to constitute them the highlands of the treaty. Throughout their whole northern and western slopes flow streams which empty themselves into the St. Lawrence. Beginning at the Bay of Chalcurs, they in the first place divide, as it is necessary they should, waters which fall into that bay; they next separate the waters of Restigouche from those of Metis; they then make a great detour to the south and inclose the valley of Rimouski, separating its waters from those of Matapediac and Restigouche, the Green River of St. John and Tuladi; they next perform a circuit around Lake Temiscouata, separating its basin from those of the Otty and Trois Pistoles, until they reach the Temiscouata portage at Mount Paradis. This portage they cross five times, and finally, bending backward to the north, inclose the stream of the St. Francis, whose waters they divide from those of Trois Pistoles, Du Loup, and the Green River of the St. Lawrence. Leaving the Temiscouata portage at the sixteenth milepost, a region positively mountainous is entered, which character continues to the sources of the Etchemin. It there assumes for a short space the character of a rolling country, no point in which, however, is less than 1,200 feet above the level of the sea. It speedily resumes a mountainous character, which continues unaltered to the sources of the Connecticut.

Now it is maintained that all the streams and waters which have been named as flowing from the southern and eastern sides of this line are in the intended sense of the treaty of 1783 rivers which empty themselves into the Atlantic. The first argument adduced in support of this position is that the framers of that treaty, having, as is admitted, Mitchell's map before them, speak only of two classes of rivers-those which discharge themselves into the St. Lawrence River and those which fall into the Atlantic Ocean; yet upon this map were distinctly seen the St. John and the Restigouche. The latter, indeed, figures twice—once as a tributary to the Bay of Miramichi and once as flowing to the Bay of Chalcurs.* It can not reasonably be pretended that men honestly engaged in framing an article to prevent "all disputes which might arise in future" should have intentionally passed over and left undefined these important rivers, when by the simplest phraseology they might have described them had they believed that in any future time a question could have arisen whether they were included in one or the other of the two classes of rivers they named. Had it been intended that the due north line should have stopped short of the St. John, the highlands must have been described as those which divide rivers

which fall into the St. Lawrence and the St. John from those which fall into the Atlantic Ocean. The mouth of the St. Lawrence had been defined in the proclamation of 1763 by a line drawn from the river St. John (on the Labrador coast) to Cape Rozier. If, then, it had been intended that the meridian line should not have crossed the Restigouche, the phraseology must have been highlands which divide rivers which fall into the river and Gulf of St. Lawrence from those which fall into the Atlantic Ocean. Where such obvious modes of expressing either of these intentions existed, it is not to be believed that they would have been omitted; but had they been proposed to be introduced the American negotiators would have been compelled by their instructions to refuse them. Such expressions would have prescribed a boundary different not only in fact, but in terms, from that of the proclamation of 1763 and the contemporaneous commission to Governor Wilmot. Either, then, the British plenipotentiaries admitted the American claim to its utmost extent or they fraudulently assented to terms with the intention of founding upon them a claim to territory which if they had openly asked for must have been denied them. The character of the British ministry under whose directions that treaty was made forbids the belief of the latter having been intended. The members of that ministry had been when in opposition the constant advocates of an accommodation with the colonies or of an honorable peace after all hopes of retaining them in their allegiance had ceased. They showed on coming into power a laudable anxiety to put an end to the profitless effusion of human blood, and they wisely saw that it would be of more profit to their country to convert the new nation into friends by the free grant of terms which sooner or later must have been yielded than to widen the breach of kindred ties by an irritating delay. The debates which ensued in the British Parliament when the terms of the treaty were made known show the view which the party that had conducted the war entertained of this question. The giving up of the very territory now in dispute was one of the charges made by them against their successors, and that it had been given up by the treaty was not denied. Nav. the effect of this admission was such as to leave the administration in a minority in the House of Commons, and thus became at least one of the causes of the resignation of the ministry* by which the treaty had been made. At this very moment more maps than one were published in London which exhibit the construction then put upon the treaty by the British public. The boundary exhibited upon these maps is identical with that which the United States now claim and have always claimed.

The full avowal that the boundary of the treaty of 1783 and of the proclamation of 1763 and act of 1774 are identical greatly simplifies the second argument. It has been heretofore maintained on the part of Great Britain that the word "sea" of the two latter-named instruments was not changed in the first to "Atlantic Ocean" without an obvious meaning. All discussion on this point is obviated by the admission. But it is still maintained that the Bay of Fundy is not a part of the Atlantic Ocean because it happens to be named in reference to the St. Croix in the same article of the treaty. To show the extent to which such an argument, founded on a mere verbal quibble, may be carried, let it be supposed that at some future period two nations on the continent of North America shall agree on a boundary in the following terms: By a line drawn through the Mississippi from its month in the Gulf of Mexico to its source; thence a parallel of latitude until it meet the highlands which divide the waters that empty themselves into the Pacific Ocean from those which fall into the Atlantic. Could it be pretended that because the month of the Mississippi is said to be in the Gulf of Mexico the boundary must be transferred from the Rocky Mountains to the Alleghanies? Yet this would be as reasonable as the pretensions so long set up by the British agents and commissioners.

It can not be denied that the line claimed by the United States fulfills at least one

of the conditions. The streams which flow from one side of it fall without exception into the river St. Lawrence. The adverse line claimed by Great Britain in the reference to the King of the Netherlands divides until within a few miles of Mars Hill waters which fall into the St. John from those of the Penobscot and Kennebec. The latter do not discharge their waters directly into the ocean, but Sagadahock and Penobscot bays intervene, and the former falls into the Bay of Fundy; hence, according to the argument in respect to the Bay of Fundy, this line fulfills neither condition.

The line of Messrs. Featherstonhaugh and Mudge is even less in conformity to the terms of the treaty. In order to find mountains to form a part of it they are compelled to go south of the source of branches of the Penobscot; thence from mountains long well known, at the sources of the Alleguash, well laid down on the rejected map of Mr. Johnson, it becomes entangled in the stream of the Aroostook, which it crosses more than once. In neither part does it divide waters at all. It then, as if to make its discrepancy with the line defined in the proclamation of 1763 apparent, crosses the St. John and extends to the *south* shore of the Bay of Chaleurs, although that instrument fixes the boundary of the Province of Quebec on the north shore of the bay. In this part of its course it divides waters which fall into the said bay from those which fall into the St. John. But the proclamation with whose terms this line is said to be identical directs that the highlands shall divide waters which fall into the St. Lawrence from those which fall into the sea. If the branches of the Bay of Chaleurs fulfill the first condition, which, however, is denied, the St. John must fulfill the latter. It therefore falls into the Atlantic Ocean, and as the identity of the boundary of the treaty with that of the proclamation of 1763 and act of 1774 is admitted, then is the St. John an Atlantic river, and the line claimed by the United States fulfills both conditions, and is the only line to the west of the meridian of the St. Croix which can possibly do so.

The choice of a line different from that presented to the choice of the King of the Netherlands is no new instance of the uncertainty which has affected all the forms in which Great Britain has urged her claim.

In fact, nothing shows more conclusively the weakness of the ground on which the British claim rests than the continual changes which it has been necessary to make in order to found any feasible argument upon it.* In the discussion of 1798 it was maintained on the part of Great Britain that the meridian line must cross the St. John River; in the argument before the commissioners under the fifth article of the treaty of Ghent it was denied that it ever could have been the intention of the framers of the treaty of 1783 that it should. Yet the mouthpiece by which both arguments were delivered was one and the same person. The same agent chose as the termination of what he attempted to represent as a continuous range of hills an isolated mountain, Mars Hill; and the commissioners whose report is under consideration place a range of abraded highlands, "the maximum axis of elevation," in a region over which British engineers have proposed to carry a railroad as the most level and lowest line which exists between St. Andrews and Quebec.[†]

On the other hand, the American claim, based on the only practicable interpretation of the treaty of 1783, has been consistent throughout: "Let the meridian line be extended until it meets the southern boundary of the Province of Quebee, as defined by the proclamation of 1763 and the act of Parliament of 1774."

No argument can be drawn against the American claim from the secret instructions of Congress dated August, 1779. All that is shown by these instructions is the willingness to accept a more convenient boundary—one defined by a great natural feature, and which would have rendered the difficult operation of tracing the line

^{*} See Note NII, p. 2002,

[†] Prospectus of St. Andrews and Quebec Railroad, 1836; and Survey of Captain Yule, 1835.

of highlands and that of determining the meridian of the St. Croix by astronomic methods unnecessary. The words of the instructions are:

"And east by a line to be drawn along the middle of the St. John from its source to its mouth in the Bay of Fundy, or by a line to be settled and adjusted between that part of the State of Massachusetts Bay formerly called the Province of Maine and the colony of Nova Scotia, agreeably to their respective rights, comprehending all islands within 20 leagues of the shores of the United States and lying between lines to be drawn due east from the points where the aforesaid boundaries between Nova Scotia on the one part and East Florida on the other part shall respectively touch the Bay of Fundy and the Atlantic Ocean."

The proposal in the first alternative was to appearance a perfectly fair one. From an estimate made by Dr. Tiarks, the astronomer of Great Britain under the fifth article of the treaty of Ghent, in conformity with directions from Colonel Barelay, the British commissioner, it was ascertained that the whole disputed territory contained 10,705 square miles; that the territory bounded by the St. John to its mouth contained 707 square miles less, or 9,998 square miles. The difference at the time was probably believed to be insensible. The first alternative was, however, rejected by Great Britain, and obviously on grounds connected with a difference in supposed advantage between the two propositions. The American commissioners were satisfied that they could urge no legal claim along the coast beyond the river St. Croix; they therefore treated on the other alternative in their instructions—the admitted limits between Massachusetts and Nova Scotia. Even in the former alternative, Nova Scotia would still have had a northwest angle, for the very use of the term shows that by the St. John its northwestern and not the southwestern branch was intended.

At that moment, when the interior of the country was unknown, the adoption of the St. John as the boundary, even admitting that the Walloostook, its southwestern branch, is the main stream, would have given to the United States a territory of more immediate value than that they now claim. For this very reason the proposition was instantly rejected by Great Britain, and the State of Massachusetts was forced to be contented with the distant region now in debate—a region then believed to be almost inaccessible and hardly fit for human habitation.

Even now, were there not vested private rights on both sides which might render such a plan difficult of application, the undersigned would not hesitate to recommend that this line should be accepted in lieu of the one which is claimed under the treaty of 178_3 .

It is finally obvious, from the most eursory inspection of any of the maps of the territory in question, that the line claimed for Great Britain in the argument before the King of the Netherlands fulfills no more than one of the two conditions, while that of Messrs. Featherstonhaugh and Mudge fulfills neither; and as the line claimed on the part of the United States is denied to be capable of meeting the terms of the treaty of 1783 by Great Britain, there is no line that, in conformity with the British argument, can be drawn within the disputed territory or its vicinity that will comply with either of the conditions. This is as well and as distinctly shown in the map of Mitchell as in the map of the British commission. It would therefore appear, if these views be correct, that the framers of the treaty of 1783 went through the solemn farce of binding their respective Governments to a boundary which they well knew did not and could not exist.

V .--- NORTHWEST HEAD OF CONNECTICUT RIVER.

The true mode of determining the most northwesterly of any two given points need no longer be a matter of discussion. It has already been a matter adjudicated and assented to by both Governments, in the case of the Lake of the Woods. The point to be considered as most to the northwest is that which a ruler laid on a map

Messages and Papers of the Presidents

drawn according to Mercator's projection in a direction northeast and southwest and moved parallel to itself toward the northwest would last touch. In this view of the subject the Eastern Branch of the Connecticut, which forms the lake of that name, is excluded, for its source, so far from lying to the northwest of those of the other two branches which have been explored, actually lies to the south of the source of the Indian Stream. The question must therefore lie between the two others, and it is as yet impossible to decide which of them is best entitled to the epithet, as their sources lie very nearly in the same northeast and southwest rhomb line. Another circumstance would, however, render the decision between them easy. The fortyfifth parallel of latitude, as laid out by the surveyors of the Provinces of Quebec and New York in conformity with the proclamation of 1763, crosses Halls Stream above its junction with the united current of the other two. In this case the latter is the Connecticut River of the treaty of 1783, and Halls Stream, which has not yet joined it, must be excluded. The parallel, as corrected by the united operations of the British and American astronomers under the fifth article of the treaty of Ghent, does not touch Halls Stream, and the Connecticut River, to which it is produced, is the united current of the three streams. If, then, the corrected parallel should become the boundary between the United States and the British Provinces, Halls Stream must become one of those the claim of whose source to the title of the northwesternmost head of Connecticut River is to be examined. And here it may be suggested, although with the hesitation that is natural in impeaching such high authority, that the commissioners under the fifth article of the treaty of Ghent in all probability misconstrued that instrument when they reopened the question of the forty-fifth parallel. It can not be said that the forty-fifth degree of latitude had "not been surveyed," when it is notorious that it had been traced and marked throughout the whole extent from St. Regis to the bank of the Connecticut River.

In studying, for the purpose of illustration, the history of this part of the boundary line it will be found that a change was made in it by the Quebec act of 1774. The proclamation of 1763 directs the forty-fifth parallel to be continued only until it neets highlands, while in that bill the Connecticut River is made the boundary of the Province of Quebec. Now the earlier of these instruments was evidently founded upon the French claim to extend their possession of Canada 10 leagues from the St. Lawrence River, and from the citadel of Quebec, looking to the south, are seen mountains whence rivers flow to the St. Lawrence. On their opposite slope there was a probability that streams might flow to the Atlantic. These mountains, however, are visibly separated from those over which the line claimed by the United States runs by a wide gap. This is the valley of the Chaudiere; and the St. Francis also rises on the southeastern side of these mountains and makes its way through them. It is not, therefore, in any sense a dividing ridge. Yet under the proclamation of 1763 the Provinces of New York and New Hampshire claimed and were entitled to the territory lying behind it, which is covered by their royal charters. The Quebec act, it would appear, was intended to divest them of it, and according to the construction of the treaty of 1783 now contended for the United States acquiesced in this diminution of the territory of those members of the Union. If, however, it be true, as maintained by Messrs. Featherstonhaugh and Mudge, that the highlands seen to the south of Quebec are a portion of the ridge seen from southeast to northeast, and if, as they maintain, so deep and wide a valley as that of the St. John is no disruption of the continuity of highlands, it would be possible to show that the highlands of the treaty of 1783 are made up of these two ridges of mountains and that the United States is entitled to the whole of the eastern townships. This range of highlands would coincide with the terms of the proclamation of 1763 by terminating on the north shore of the Bay of Chaleurs, while the abraded highlands of Messrs. Featherstonhaugh and Mudge terminate on its sonth shore. In fact, there is no step in their argument which might not be adduced to support this claim, nor

any apparent absurdity in preferring it which would not find its parallel in one or other of the positions they assume.

In this view of the history of this part of the line it becomes evident, however, that in divesting the Provinces of New York and New Hampshire by the Quebec act of territory admitted to belong to them in the proclamation of 1763 the British Parliament must have intended to make the encroachment as small as possible, and the first important branch of the Connecticut met with in tracing the forty-fifth parallel must have been intended. This intention is fully borne out by the words of the treaty of 1783, which chose from among the branches of the Connecticut that whose source is farthest to the northwest.

It has therefore been shown in the foregoing statement-

I. That the river to be considered as the St. Croix and its true source have been designated by a solemn act, to which the good faith of the majesty of Great Britain and of the people of the United States is pledged, and can not now be disturbed.

2. That the boundary line must, in compliance with the provisions of the treaty of 178_3 , be drawn due north from the source of that river, and in no other direction whatever.

3. That the northwest angle of Nova Scotia was a point sufficiently known at the date of the treaty of 1783 to be made the starting point of the boundary of the United States; that it was both described in the treaty and defined, without being named in previous official acts of the British Government, in so forcible a manner that no difficulty need have existed in finding it.

4. That the line of highlands claimed by the United States is, as the argument on the part of Great Britain has maintained it ought to be, in a mountainous region, while that proposed by Messrs. Featherstonhaugh and Mudge does not possess this character; that it is also, in the sense uniformly maintained by the United States, the height of land, which that of Messrs. Featherstonhaugh and Mudge is not; that it fulfills in every sense the conditions of the proclamation of 1763, the Quebec act of 1774, and the treaty of 1783, which no other line that can possibly be drawn in the territory in question can perform.

5. That as far as the Indian Stream and that flowing through Lake Connecticut are concerned, the source of the former must in the sense established by the assent of both parties be considered as the northwestern source of the Connecticut River, but that if the old demarcation of the forty-fifth parallel be disturbed the question must lie between the sources of Halls and of Indian streams.

All which is respectfully submitted.

JAS. RENWICK, JAMES D. GRAHAM, A. TALCOTT, *Commissioners.*

Note I.

[Treaty of 1794, Article V.]

Whereas doubts have arisen what river was truly intended under the name of the river St. Croix mentioned in the said treaty of peace, and forming a part of the boundary therein described, that question shall be referred to the final decision of commissioners to be appointed in the following manner, viz:

Soluting the property of the second state the second state in t

such surveyors or other persons as they shall judge necessary. The said commissioners shall, by a declaration under their hands and seals, decide what river is the river St. Croix intended by the treaty. The said declaration shall contain a description of the said river and shall particularize the latitude and longitude of its mouth and of its source. Duplicates of this declaration and of the statements of their accounts and of the journal of their proceedings shall be delivered by them to the agent of His Majesty and to the agent of the United States who may be respectively appointed and authorized to manage the business on behalf of the respective Governments. And both parties agree to consider such decision as final and conclusive, so as that the same shall never thereafter be called into question or made the subject of dispute or difference between them.

Note II.

Declaration of the commissioners under the fifth article of the treaty of 1794 between the United States and Great Britain, respecting the true river St. Croix, by Thomas Barclay, David Howell, and Egbert Benson, commissioners appointed in pursuance of the fifth article of the treaty of amity, commerce, and navigation between His Britannic Majesty and the United States of America finally to decide the question "What river was truly intended under the name of the river St. Croix mentioned in the treaty of peace between His Majesty and the United States, and forming a part of the boundary therein described?"

DECLARATION.

We, the said commissioners, having been sworn impartially to examine and decide the said question according to such evidence as should respectively be haid before us on the part of the British Government and of the United States, respectively, appointed and authorized to manage the business on behalf of the respective Governments, have decided, and hereby do decide, the river hereinafter particularly described and mentioned to be the river truly intended under the name of the river St. Croir in the said treaty of peace, and forming a part of the boundary therein described; that is to say, the mouth of the said river is in Passamaquody Bay at a point of land called Joes Point, about 1 mile northward from the northern part of St. Andrews Island, and in the latitude of 45° 5' and 5'' north, and in the longitude of 67° 12' and 30'' west from the Royal Observatory at Greenwich, in Great Britain, and 3° 54' and 15'' east from Harvard College, in the University of Cambridge, in the State of Massachusetts; and the course of the said river up from its said mouth is northerly to a point of land called the Devils Head; then, turning the said point, is westerly to where it divides into two streams, the one coming from the westward and the other from the northward, having the Indian name of Cheputnatecook, or Chebuitcook, as the same may be variously spelt; then up the said stream so coming from the northward to its source, which is at a stake near a yellow-birch tree hooped with iron and marked S. T. and J. H., 1797, by Samuel Titcomb and John Harris, the surveyors employed to survey the above-mentioned stream coming from the northward.

Note III.

[Article V of the treaty of Ghent, 1814.]

Whereas neither that point of the highlands lying due north from the source of the river St. Croix, and designated in the former treaty of peace between the two powers as the northwest angle of Nova Scotia, nor the northwesternmost head of Connecticut River has yet been ascertained; and whereas that part of the boundary line between the dominions of the two powers which extends from the source of the river St. Croix directly north to the above-mentioned northwest angle of Nova Scotia; thence along the said highlands which divide those rivers that empty themselves into the river St. Lawrence from those which fall into the Atlantic Ocean, to the northwesternmost head of Connecticut River; thence down along the middle of that river to the forty-fifth degree of north latitude; thence by a line due west on said latitude until it strikes the river Iroquois, or Cataraquy, has not yet been surveyed, it is agreed that for these several purposes two commissioners shall be appointed, sworn, and authorized to act exactly in the manner directed with respect to those mentioned in the next preceding article, unless otherwise specified in the present article. The said commissioners shall meet at St. Andrews, in the Province of New Brunswick, and shall have power to adjourn to such other place or places as they shall think fit. The said commissioners shall have power to ascertain and determine the points above mentioned in conformity with the provisions of the said treaty of peace of 1783, and

shall cause the boundary aforesaid, from the source of the river St. Croix to the river Iroquois, or Cataraquy, to be surveyed and marked according to the said provisions. The said commissioners shall make a map of the said boundary, and annex to it a declaration under their hands and seals certifying it to be the true map of the said boundary, and particularizing the latitude and longitude of the northwest angle of Nova Scotia, of the northwesternmost head of Connecticut River, and of such other points of the said boundary as they may deem proper; and both parties agree to consider such map and declaration as finally and conclusively fixing the said boundary. And in the event of the said two commissioners differing, or both or either of them refusing, declining, or willfully omitting to act, such reports, declarations, or statements shall be made by them or either of them, and such reference to a friendly sovereign or state shall be made in all respects as in the latter part of the fourth article is contained, and in as full a manner as if the same was herein repeated.

Note IV.

The point originally chosen by the commissioners in 1798 as the source of the St. Croix was to all appearance the act of an umpire who wished to reconcile two contending claims by giving to each party about half the matter in dispute. No one who compares Mitchell's map with that of Messrs. Featherstonhaugh and Mudge can fail to recognize in the St. Croix of the former the Magaguadavic of the latter. That this was the St. Croix intended by the framers of the treaty of 1783 was maintained, and, it may be safely asserted, proved on the American side. On the other hand, it was ascertained that the river called St. Croix by De Monts was the Schoodiac; and the agent of Great Britain insisted that the letter of the instrument was to be received as the only evidence, no matter what might have been the intentions of the framers. The American argument rested on the equity of the case, the Brit-ish on the strict legal interpretation of the document. The commissioners were divided in opinion, each espousing the cause of his country. In this position of things the umpire provided for in the treaty of 1794 was chosen, and in the United States it has always been believed unfortunately for her pretensions. A lawyer of eminence, who had reached the seat of a judge, first of a State court and then of a tribunal of the General Government, he prided himself on his freedom from the influence of feeling in his decisions. As commissioner for the settlement of the boundary between the States of New York and Vermont, he had offended the former, of which he was a native, by admitting the claim of the latter in its full extent, and it was believed that he would rather encounter the odium of his fellow-citizens than run the risk of being charged with partiality toward them. Colonel Barelay, the British commissioner, who concurred in choosing him as unpire, had been his schoolfellow and youthful associate, and it is believed in the United States that he concurred in, if he did not prompt, the nomination from a knowledge of this feature of character. Had he, as is insinuated by Messrs. Featherstonhaugh and Mudge, been inclined to act with partiality toward his own country, he had most plausible grounds for giving a verdict in her favor, and that he did not found his decisions upon them is evidence of a determination to be impartial, which his countrymen have said was manifested in a leaning to the opposite side. Those who suspect him of being biased by improper motives must either be ignorant of the circumstances of the case or else incapable of estimating the purity of the character of Egbert Benson. His award, however, has nothing to do with the question, as it was never acted upon. Both parties were dissatisfied with the conclusions at which he arrived, and in consequence a conventional line in which both concurred was agreed upon, and the award of the commissioners was no more than a formal act to make this convention binding.

If, then, both Governments should think it expedient to unsettle the vested rights which have arisen out of the award of 1798, there is a strong and plausible ground on which the United States may claim the Magaguadavic as their boundary, and the meridian line of its source will throw the valley of the St. John from Woodstock to the Grand Falls within the limits of the State of Maine. While, therefore, it is maintained that it would violate good faith to reopen the question, there is good reason to hope that an impartial umpire would decide it so as to give the United States the boundary formerly claimed.

Note V.

The angle made by the southern boundary of the Province of Quebec with the due north line from the source of the St. Croix first appeared in an English dress in the commission to Governor Wilmot. This was probably intended to be identical in its meaning with the terms in the Latin grant to Sir William Alexander, although there is no evidence to that effect. If, therefore, it were a false translation, the error has been committed on the side of Great Britain, and not on that of the United States. But it is not a false translation, as may be shown to the satisfaction of the merest tyro in classical literature.

The words of the grant to Sir William Alexander, as quoted by Messrs. Featherstonhaugh and Mudge, are as follows, viz:

"Omnes et singulas terras continentis ac insulas situatas et jacentes in America intra caput seu promontorium communiter Cap de Sable appellat, jacen. prope latitudinen, quadraginta trium graduum aut eo circa ab equinoctiali linea versus septentrionem, a quo promontorio versus littus maris tenden, ad occidentem ad stationem Sanctæ Mariæ navium vulgo Sanctmareis Bay. Et deinceps, versus septentrionem per directam lineam introitum sive ostium magnæ illius stationis navium trajicien. quæ excurrit in terræ orientalem plagan inter regiones Suriquorum et Etchenninorum vulgo Suriquois et Elchemines ad fluvium vulgo nomine Sanctæ Crucis appellat. Et ad scaturiginem remotissimam sive fontem ex occidentali parte ejusdem qui se primum predicto fluvio immiscet. Unde per imaginariam directam lineam quæ pergere per terram seu currere versus septentrionem concipietur ad proximam navium stationem, fluvium, vel scaturiginem in magno fluvio de Canada sese exonerantem. Et ab eo pergendo versus orientem per maris oris littorales ejusdem fluvii de Canada ad fluvium, stationem navium, portum, aut littus communiter nomine de Gathepe vel Gaspee notum et appellatum."

The authentic Latin copy of the grant to Sir William Alexander, as communicated officially by the British Government, contains no commas, and would read as follows:

"Onnes et singulas terras continentis ac insulas situatas et jacentes in America intra caput seu promontorium communiter Cap de Sable appellat. Jacen. prope latitudinem quadraginta trium graduum aut eo circa ab equinoctiali linea versus septentrionem a quo promontorio versus littus maris tenden, ad occidentem ad stationem Sanctæ Mariæ navium vulgo Sauctmareis Bay. Et deinceps versus septentrionem per directam lineam introitum sive ostium magnæ illius stationis navium trajicien. quæ excurrit in terræ orientalem plagaminter regiones Suriquorum et Etecheminorum vulgo Suriquois et Etechemines ad fluvium vulgo nomine Sanctæ Crucis appellat. Et ad scaturiginem remotissimam sive fontem ex occidentali parte ejusdem quæ pergere per terram seu currere versus septentrionem concipietur ad proximam navium stationem fluvium vel scaturiginem in magno fluvio de Canada sese exonerantem. Et ab eo pergendo versus orientem per maris oris littorales ejusdem fluvi de Canada ad fluvium stationem navium portum aut littus communiter nomine de Gathepe vel Gaspee notum et appellatum."

The translation of Messrs. Mudge and Featherstonhaugh is as follows:

"All and each of the lands of the continent and the islands situated and lying in America within the headland or promontory commonly called Cape Sable, lying near the forty-third degree of latitude from the equinoctial line or thereabout; from which promontory stretching westwardly toward the north by the scashore to the naval station of St. Mary, commonly called St. Marys Bay; from thence passing toward the north by a straight line, the entrance or mouth of that great navai station which penetrates the interior of the eastern shore betwixt the countries of the Suriquois and Etchemins, to the river commonly called the St. Croix, and to the most remote source or spring of the same on the western side which first mingles itself with the aforesaid river; from whence, by an imaginary straight line, which may be supposed (concipietur) to advance into the country or to run toward the north to the nearest naval station, river, or spring discharging itself into the great river of Canada and from thence advancing toward the east by the gulf shores of the said river of Canada to the river, naval station, port, or shore commonly known or called by the name of Gathepe or Gaspe."

The only American translations which have ever been presented in argument are as follows:

[Translation of Messrs. Gallatin and Preble, who were employed to prepare the statement laid before the King of the Netherlands.]

"Beginning at Cape Sable, in 43° north latitude or thereabout; extending thence westwardly along the seashore to the road commonly called St. Marys Bay; thence toward the north by a direct line, crossing the entrance or mouth of that great ship road which runs into the castern tract of land between the territories of the Souriquois and of the Etchemins (Bay of Fundy), to the river commonly called St. Croix, and to the most remote spring or source which from the western part thereof first mingles itself with the river aforesaid; and from thence, by an imaginary direct line, which may be conceived to stretch through the land or to run toward the north, to the nearest road, river, or spring emptying itself into the great river de Canada (river St. Lawrence); and from thence, proceeding eastwardly along the seashores of the said river de Canada, to the river, road, port, or shore commonly known and called by the name of Gathepe or Gaspe."

[Translation of Mr. Bradley, the American agent under the fifth article of the treaty of Ghent.]

"By the tenor of this our present charter we do give, grant, and convey to the said Sir William Alexander, his heirs or assigns, all and singular the lands of the continent and islands situated and lying in America within the headland or promontory commonly called Cape Sable, lying near the latitude of 43° or thereabout, from the equinoctial line toward the north; from which promontory stretching toward the shore of the sea to the west to the road of ships commonly called St. Marys Bay, and then toward the north by a direct line, crossing the entrance or mouth of that great road of ships which runs into the eastern tract of land between the territories of the Souriquois and the Etchemins, to the river called by the name of St. Croix, and to the most remote spring or fountain from the western part thereof which first mingles itself with the river aforesaid; whence, by an imaginary direct line, which may be conceived to go through or run toward the north, to the nearest road of ships, river, or spring emptying itself into the great river of Canada; and from thence proceeding toward the east by the shores of the sea of the said river of Canada to the river, road of ships, or shore commonly known and called by the name of Gachepe or Gaspe."

But the translations of the Americans were merely for form's sake, as the original Latin, in a copy furnished from a British public office, was laid before the King of the Netherlands; and no fear need have been felt that the umpire would not have been able to judge whether the translations were true or not. It was rather to be inferred that he, in examining a question submitted in a language foreign to him, would have found the Latin quite as intelligible as the English. This examination, however, is wholly superfluous.

From whatever source the negotiators of the treaty of 1783 derived their view of the boundary, that instrument directs that it shall be a due north line from the source of the river St. Croix. This expression is too definite to require explanation or illustration, and it is only for those purposes that any other instrument can be permitted to be quoted.

In the passages referred to the words "versus septentrionen" occur three times, and in two of the instances are qualified by the context in such manner as to leave no possible doubt as to the meaning. The first time they occur the words of the passage are, "prope latitudinem quadraginta trium graduum aut eo circa versus septentrionem." The free translation into modern idiom is beyond doubt, "near the forty-third degree of north latitude or thereabout;" and the direction toward the north must be along a meridian line on which latitude is measured, or due north. Messrs. Mudge and Featherstonhaugh, instead of connecting in their translation the words "versus septentrionem" with the words "prope latitudinem," etc., with which they stand in juxtaposition in the Latin text which they quote, connect them with the words "ad occidentem tendentem," which occur in the next clause of the sentence, even according to their own punctuation. We note this as a false translation, although it does not touch the point in dispute. They have, indeed, attempted to use it in their argument; but even if the use they make of it had been successful their inferences fall, because drawn from erroneous premises.

The second clause in which the words occur is as follows: "Ad stationem navium Sanctæ Mariæ vulgo St. Marys Bay, et deinceps versus septentrionem per directam lineam introitum sive ostium magnæ illius stationis navium trajicientem," etc., "ad fluvium vulgo nomine Sanctæ Crucis appellatum." Here the line, although directed to be drawn toward the north, is also directed to be drawn between two given points, and it is clear that under the double direction, if they should differ from each other, the position of the given points must govern, and the line be traced from one of them to the other, no matter what may be their bearings.

The last time the words occur is after the direction that the line shall pass up the St. Croix and to the most remote western spring or fountain of that stream, "unde per imaginariam lineam directam que pergere per terram seu currere versus septentrionem concipietur." Here alone can any doubt exist as to the meaning of the terms, and that is easily solved.

The boundary pointed out in the instrument is "such as may be conceived to go or run toward the north by (per) a direct (directam) line." Now a direct line toward the north can be no other than a meridian line. Had it been merely a straight line of vague northerly direction which was meant, *rectum*, the usual expression for a mathematical straight line, would have been used instead of *directam*. It is, moreover, to be considered that the Romans had names both for the northeast and northwest points of the compass, and that the expression "versus septentrionem" in its most vague application could not possibly have admitted of a deviation of more than two points on either hand. Had the direction intended deviated more than that amount from the true north, the Latin term corresponding to northeast or northwest must have been used. Nor is this a matter of mere surmise, for in a passage immediately following that which has been quoted the direction through the Gulf of St. Lawrence toward Cape Breton is denoted by the term "versus Euronotum," leaving no possibility of doubt that had the line directed to be drawn from the source of the St. Croix been intended to have a northwestern bearing the appropriate Latin words would have been employed.

It is, besides, to be recollected that the instrument was drawn by a person using habitually and thinking in a modern idion, and that in translating the English words due north into Latin no other possible expression could suggest itself than the one employed. Such, then, was the sense appropriately given to the Latin words, first in the commission of Governor Wilmot and his successors, governors of Nova Scotia, and subsequently in the commission of all the governors of New Brunswick from the time that it was erected into a province until the question was referred to the King of the Netherlands. In this reference, although a translation was given in the American argument, it was not as quoted by Messrs. Featherstonhaugh and Mudge, but was in the words which have already been cited.

Connected with this subject, although, like it, wholly irrelevant, is another conclusion which Messrs. Mudge and Featherstonlaugh attempt to draw from the same grant to Sir William Alexander. That charter directs the line "versus septentrionem" to be produced "ad proximam navium stationem, fluvium, vel scaturiginem in magno fluvio de Canada sese exonerantem." It can hardly be credited that, although a literal translation of this passage is given, including the whole of the three terms naval station, river, or spring, that it is attempted to limit the meaning to the first expression only, and to infer that as Quebec, in their opiniou, is the first naval station above Gaspe on the St. Lawrence, the line "versus septentrionem" was intended to be drawn toward that place, but that as "spring" is also mentioned the line must stop at the source of the Chaudiere. Now it has been uniformly maintained by British authorities, and most strongly in the discussion which preceded the War of 1756, that Nova Scotia extended to the St. Lawrence. The boundary of Sir William Alexander's grant was therefore to be changed from a geographical line to a water course as soon as it met with one, and the apparently useless verbiage was introduced to meet every possible contingency. Supposing, however, that it did not extend so far, the northwest angle of his Nova Scotia will be where the meridian line of the St. Croix crosses the Beaver Stream running into Lake Johnson, only a mile to the north of the point maintained by the American claim to be such.

The map of L'Escarbot, quoted by Messrs. Mudge and Featherstonhaugh, illustrates both this point and the second instance in which the term "versus septentrionem" is employed. On that map, due north of the Bay of St. Marys, a deep inlet of the Bay of Fundy is represented, and, continuing in the same direction, a deep inlet of the St. Lawrence is figured. The latter does not exist, but this map shows that it was believed to exist at the time of the grant, and must be the "statio navium" of that instrument.

This inlet of the Bay of Fundy occupies the position of the St. John, which is almost due north by the most recent determination from St. Marys Bay, and is so represented on their own map. That the St. John was by mistake arising from this cause taken for the St. Croix in the charter to Alexander is obvious from its being described as lying between the territories of the Etchemin and Souriquois. Now Etchemin, or canoe men, is the name given by the Micmac Indians to the race of the Abenakis, from their skill in the management of the canoe; and this race has always inhabited the river, whence one of their tribes is still called St. John's Indians. The language of this tribe, although they have lived apart for many years, is still perfeetly intelligible by the Indians of the Penobscot, and those in the service of the commission conversed with perfect ease with the Indians of Tobique. Massachusetts, then, was right in claiming to the St. John as the eastern limit of the grant to Sir William Alexander, being the stream understood and described in it under the name of St. Croix, and wholly different from the river known to the French under that name. If, therefore, Great Britain should insist that the question in relation to the St. Croix shall be reopened, the United States would be able to maintain in the very terms of the original grant to Alexander (on which the British argument in 1797 rested) that the St. John is the St. Croix, and the boundary will be that river to its most northwestern source, the Asherbish, which flows into the upper end of Lake Temisconata. Nova Scotia will then have recovered her lost northwest angle, which can not be

found in any of the many shapes under which the British argument has been presented, although it forms the place of beginning of what is called a grant to the United States.

Note VI.

The fact that a line drawn from the source of the Kennebec to the mouth of the Chaudiere or thereabout must be one of the boundary lines of the grant to the Duke of York has not escaped the notice of Messrs. Featherstonhaugh and Mudge; but they have not derived the true result from this discovery. The Kennebec being the western limit of the grant, the line in question bounds the territory ou the southwest. while they infer that it bounds it on the northeast. In making this inference they appear to have forgotten that the St. Croix is the eastern boundary of the grant. By their argument the grant to the Duke of York is blotted wholly from the map, or, rather, becomes a mathematical line which is absurd,

Note VII.

No name which has ever been applied to any part of North America is as vague as that of Acadie. The charter to De Monts in 1604 extended from the fortieth to the forty-sixth degree of north latitude; that is to say, from Sandy Hook, at the mouth of the Hudson, to the peninsula of Nova Scotia. It therefore included New York, parts of New Jersey and Pennsylvania, and all the New England States, but excluded the disputed territory. His settlement was at the mouth of the St. Croix, but was speedily removed to Port Royal. The latter place was soon after destroyed by an expedition from Virginia under Argall. Under the title derived from this conquest it would appear probable that the celebrated grant to Sir William Stirling was made; but when his agents attempted to make settlements in the country they found that the French had preoccupied it. Although the son of Alexander succeeded in conquering the country granted to his father, and even beyond it to the Penobscot, it was restored to France by the treaty of St. Germains in 1634, and the Alexanders were indemnified for the loss by the Crown of England.

In the subsequent cessions to France after its occupations by the arms of Massachusetts, and in its final cession to Great Britain by the treaty of Utrecht in 1713, the country ceded is described as Acadie or Nova Scotia, with its ancient bounds (cum finibus antiquis). The uncertainty arising from this vague description became in 1750 a subject of controversy between France and England, and was one of the causes which led to the war of 1756. In this discussion both parties admitted that the names Acadie and Nova Scotia were convertible terms. England maintained that the territory thus named extended to the St. Lawrence; the French, on the other hand, insisted that their Acadie had never extended more than 10 leagues from the Bay of Fundy; while by geographers, as quoted by the British commissioners, the name was limited to the peninsula which forms the present Province of Nova Scotia.* If Acadie had been limited to the north by the forty-sixth degree of north latitude, as expressed in the charter of De Monts, that parallel is to the south of Mars Hill. The British Government, therefore, derives no title to the disputed ter-ritory from this source, as the title of Massachusetts and of Maine as her successor is admitted to all country south of that parallel.†

It is very easy to tell what country was actually settled by the French as Acadie. Its chief town was Port Royal, now Annapolis, at the head of the Bay of Fundy. Nearly all the settlements of the Acadians were in that vicinity, and for the most part within the peninsula.

From these seats they were removed in 1756 by Great Britain, and to them a remnant was permitted to return. The most western settlement of Acadians was on the St. John River near the present site of Fredericton, and no permanent occupation was ever made by them of country west of the St. Croix. It is even doubtful whether the settlement near Fredericton was a part of French Acadie, for it seems to have been formed by persons who escaped from the general seizure and transportation of their countrymen.

This settlement was broken up in 1783, and its inhabitants sought refuge at Madawaska; but it can not be pretended that this forced removal of Acadians subsequent to the treaty of 1783 was an extension of the name of their country. The whole

* Report of Featherstonhaugh and Mudge, p. 8. † It can not be seriously pretended that when by the treaty of St. Germains, in 1622, Acadie was restored to France the intention was to cede to her the colonies atready settled in New England. Yet the language of the British commissioners would invely that this was the case were it not that they evidently consider the forty-sixth parallel as the southern boundary of the grant to De Monts whereas it is the worthern whereas it is the northern.

argument in favor of the British claim founded on the limits of ancient Acadie therefore fails:

First. Because of the inherent vagueness of the term, on which no settled understanding was ever had, although England held it to be synonymous with Nova Scotia and France denied that it extended more than 10 leagues from the Bay of Fundy.

Second. Because by its original definition in the grant to De Monts it excludes the whole disputed territory on the one side; and

Third. Because in its practical sense, as a real settlement, it is wholly to the east of the meridian of the St. Croix, and this excludes the whole of the disputed territory on the other.

The portion of the territory granted to the Duke of York, and which is now the subject of dispute, therefore can not be claimed as a part of Acadie, as it never fell within its limits either by charter or by occupation.

Note VIII.

[Extract from the award of the King of the Netherlands.]

Considering that in 1763, 1765, 1773, and 1782 it was established that Nova Scotia should be bounded at the north as far as the western extremity of the Bay des Chaleurs by the southern boundary of the Province of Quebec; that this delimitation is again found with respect to the Province of Quebec in the commission of the Gov ernor-General of Quebec of 1786, wherein the language of the proclamation of 1763 and of the Quebec act of 1774 has been used, as also in the commissions of 1786 and others of subsequent dates of the governors of New Brunswick, with respect to the last-mentioned Province, as well as in a great number of maps anterior and posterior to the treaty of 1783; and that the first article of the said treaty specifies by name the States whose independence is acknowledged; but that this mention does not imply (*implique*) the entire coincidence of the boundaries between the two powers, as set tled by the following article, with the ancient delimitation of the British Provinces, whose preservation is not mentioned in the treaty of 1783, and which, owing to its continual changes and the uncertainty which continued to exist respecting it, created from time to time differences between the provincial authorities.

Note IX.

[Article IV of the convention of 1827.]

The map called Mitchell's map, by which the framers of the treaty of 1783 are acknowledged to have regulated their joint and official proceedings, and the Map A, which has been agreed on by the contracting parties as a delineation of the water courses, and of the boundary lines in reference to the said water courses, as contended for by each party, respectively, and which has accordingly been signed by the above-named plenipotentiaries at the same time with this convention, shall be annexed to the statements of the contracting parties and be the only maps that shall be considered as evidence mutually acknowledged by the contracting parties of the topography of the country.

It shall, however, be lawful for either party to annex to its respective first statement, for the purposes of general illustration, any of the maps, surveys, or topographical delineations which were filed with the commissioners under the fifth article of the treaty of Ghent, any engraved map heretofore published, and also a transcript of the above-mentioned Map A or of a section thereof, in which transcript each party may lay down the highlands or other features of the country as it shall think fit, the water courses and the boundary lines as claimed by each party remaining as laid down in the said Map A. But this transcript, as well as all the other maps, surveys, or topographical delineations, other than the Map A and Mitchell's map, intended to be thus annexed by either party to the respective statements, shall be communicated to the other party, in the same manner as aforesaid, within nine months after the exchange of the ratifications of this convention, and shall be subject to such objections and observations as the other contracting party may deem it expedient to make thereto, and shall annex to his first statement, either in the margin of such transcript, map or maps, or otherwise.

Note X.

[Extract from the award of the King of the Netherlands.]

Considering that, according to the instances alleged, the term highlands applies not only to a hilly or elevated country, but also to land which, without being hilly, divides waters flowing in different directions, and that thus the character, more or less hilly and elevated, of the country through which are drawn the two lines respectively claimed at the north and at the south of the river St. John can not form the basis of a choice between them.

Note XI.

The reason of the double delineation of the Restigouche on the map of Mitchell and several others of ancient date is obvious. A mistake was common to them all by which the Bay of Chaleurs was laid down too far to the north. The main branch, or Grande Fourche, of Restigouche (Katawamkedgwick) has been reached by parties setting out from the banks of the St. Lawrence at Metis, and was known to fall into the Bay of Chaleurs, while the united stream had also been visited by persons crossing the wagansis of Grand River and descending the Southwestern Branch. The map makers could not, in consequence of the error in latitude, make their plat meet, and therefore considered the part of the united streams reached in the two different directions as different bodies of water, and without authority sought an outlet for that which they laid down as the southernmost of the two in another bay of the Gulf of St. Lawrence. On many of the maps, however, the small stream which modern geographers improperly call Restigouche is readily distinguishable under the name of Chacodi.

Note XII.

In the argument of the British commissioners under Jay's treaty the following points were maintained, and, being sanctioned by the decision of the umpire, became the grounds of an award acceded to by both Governments: First. That the limits of Nova Scotia

First. That the limits of Nova Scotia had been altered from the southern bank of the St. Lawrence to the highlands described in the treaty of peace.

Second. That if the river Schoodiac were the true St. Croix the northwest angle of Nova Scotia could be formed by the western and northern boundaries (the meridian line and the highlands). Third. That the territory of Acadie, or

Third. That the territory of Acadie, or Nova Scotia, was the same territory granted to Sir William Alexander.

Fourth. That the sea and Atlantic Ocean were used as convertible terms.

Fifth. That from the date of the treaty of Utrecht the boundary between Massachusetts and Nova Scotia was that of the patent to Sir William Alexander. Sixth. That the Provinces of Quebec

Sixth. That the Provinces of Quebec and Nova Scotia belonged to and were in possession of His Britannic Majesty in 1783, and that he had an undoubted right to cede to the United States such part of them as he might think fit.

Seventh. That the due north line from the source of the St. Croix must of necessity cross the St. John. It has since been maintained on the part of Great Britain:

First. That the limits of Nova Scotia never did extend to the St. Lawrence.

Second. That the northwest angle of Nova Scotia was unknown in 1783.

Third. That Acadie extended south to the forty-sixth degree of north latitude, and was not the same with Nova Scotia.

Fourth. That the sea and the Atlantic Ocean were different things.

Fifth. That the claims and rights of Massachusetts did not extend to the western bounds of the grant to Sir William Alexander.

Sixth. That this being the case the cession of territory not included within her limits is void,

Seventh. That it could never have been intended that the meridian line should cross the St. John.

Note XIII.

It has been pretended that the grant of the field of Madawaska in 1683 can be urged as a bar to the claim of Massachusetts. That field, indeed, was among the early grants of the French governors of Canada, but it is not included in the claim which the French themselves set up. It was therefore covered by the Massachusetts charter, because the grant had never been acted upon. Even up to the present day this field can hardly be said to be settled or occupied except by the retainers of the garrison of Fort Ingail, and from all the evidence which could be found on the spot it appeared that no settlement had ever been made upon it until the establishment of a posthouse some time between the date of the treaties of 1783 and 1794. It therefore was not at the time the charter of Massachusetts was granted (1691) "actually possessed or inhabited by any other Christian prince or state."

An argument has also been attempted to be drawn from the limits given on Greenleaf's map to a purchase made from the State of Massachusetts by Watkins and Flint. This purchase is, however, by the patent extended to the highlands, and the surveyors who laid it out crossed the Walloostook in search of them. Here they met, at a short distance from that stream, with waters running to the north, which they conceived to be waters of the St. Lawrence, and they terminated their survey. The lines traced on Greenleaf's map are therefore incorrect, either as compared with the grant or the actual survey, and although from a want of knowledge of the country the surveyors stopped at waters running into Lake Temiscouata instead of the St. Lawrence, the very error shows the understanding they had of the true design of the patent, and this transaction, so far from being an available argument against the American claim, is an act of possession at an early date within the limits of the disputed territory.

WASHINGTON, April 8, 1842.

To the Senate of the United States:

In compliance with your resolution of the 31st March, 1842, I have the honor to submit the accompanying document and report* from the Commissioner of the General Land Office. IOHN TYLER.

WASHINGTON, April 9, 1842.

WASHINGTON, April 11, 1842.

WASHINGTON, April 12, 1842.

To the House of Representatives of the United States:

I transmit herewith to the House of Representatives a report from the Secretary of State, with a copy of the correspondence † requested by their resolution of the 7th instant.

JOHN TYLER.

To the Senate of the United States:

I herewith transmit a memorial[‡] which I have received from the Choctaw tribe of Indians and citizens of the State of Mississippi, with a request that I should communicate the same to Congress. This I do not feel myself at liberty to decline, inasmuch as I think that some action by Congress is called for by justice to the memorialists and in compliance with the plighted national faith.

JOHN TYLER.

To the Senate of the United States:

In further compliance with the resolution of the Senate of the 2d of February last, requesting information touching the demarcation of the boundary line between the United States and the Republic of Texas, I transmit a report from the Secretary of State and the accompanying documents.

JOHN TYLER.

^{*} Relating to surveys and sales of the public lands during 1841 and 1842, etc.

[†]With Great Britain relative to an international copyright law.

Relating to an alleged violation by the United States of the treaty of Dancing Rabbit Creek.

WASHINGTON, April 13, 1842.

WASHINGTON, April 13, 1842.

To the Senate of the United States:

In compliance with a resolution of the Senate of the 24th of July last, I communicate to that body a report from the Secretary of State, conveying copies of the correspondence * which contains the information called for by that resolution. JOHN TYLER.

To the Senate of the United States:

In compliance with a resolution of the Senate of the 29th July last, I communicate to that body a report from the Secretary of State, conveying copies of the correspondence + which contains the information called for by said resolution.

In communicating these papers to the Senate I call their particular attention to that portion of the report of the Secretary of State in which he suggests the propriety of not making public certain parts of the correspondence which accompanied it.

JOHN TYLER.

To the Senate of the United States:

I have the honor to transmit herewith the report ‡ of the Secretary of State, in compliance with the resolution of the Senate of the 18th February, 1842.

To the Senate of the United States:

I transmit herewith, in part compliance with a resolution of the Senate of February 18, a report from the Secretary of War, inclosing a list of all officers, agents, and commissioners employed under the War Department who are not such by express provision of law, with other information required by the resolution.

JOHN TYLER.

WASHINGTON, April 19, 1842.

To the House of Representatives:

I transmit herewith a report from the Secretary of War, containing a list of appointments to office made in that Department since the 4th day of April, 1841, in part compliance with the resolution of the House of Representatives of the 21st ultimo.

JOHN TYLER.

WASHINGTON, April 19, 1842.

JOHN TYLER.

WASHINGTON, April 18, 1842.

^{*}Of the diplomatic agent and minister of the United States at the Court of Austria relative to the commercial interests of the United States.

⁺Between the Department of State and Belgium relative to the rejection by that Government of the treaty ratified by the Senate February 9, 1833, and the causes of the delay in exchanging the ratifications of the treaty ratified by the Senate December 31, 1840.

Transmitting names of agents employed by the State Department without express provision of law,

WASHINGTON, April 20, 1842. To the Senate and House of Representatives of the United States:

I submit to Congress a report from the Secretary of State, accompanied by documents relating to an application by the captain and owners of the Spanish ship *Sabina*,* which is recommended to their favorable consideration.

JOHN TYLER.

To the Senate of the United States:

I submit to the Senate, for the constitutional action of that body, a treaty concluded on the 11th day of August last with the Minda Wankanton bands of the Dakota or Sioux Nation of Indians, with the papers necessary to an understanding of the subject. JOHN TYLER.

WASHINGTON, April 28, 1842.

WASHINGTON, April 28, 1842.

To the Senate of the United States:

I submit to the Senate, for the constitutional action of that body, a treaty concluded with the half-breeds of the Dakota or Sioux Nation on the 31st day of July last, together with the papers referred to in the accompanying communication from the Secretary of War as necessary to a full view of the whole subject. IOHN TYLER.

WASHINGTON, April 30, 1842.

To the House of Representatives of the United States:

In compliance with your resolution of the 29th instant, I have the honor to transmit the reports of Messrs. Kelley and Steuart, two of the commissioners originally appointed, along with Mr. Poindexter, to investigate the affairs of the custom-house of New York, together with all the correspondence and testimony accompanying the same, and also the report of Mr. Poindexter, to which is annexed two letters, subscribed by Mr. Poindexter and Mr. Bradley. The last-named gentleman was substituted in the place of Mr. Kelley, whose inclinations and duties called him to his residence in Ohio after the return of the commissioners to this city, about the last of August. One of the letters just mentioned was addressed to the Secretary of the Treasury and bears date the 12th of April instant, and the other to myself, dated the 20th of this month. From the former you will learn that a most interesting portion of the inquiry instituted by this Department (viz, that relating to light-houses, buoys, beacons, revenue cutters, and revenue boats) is proposed to be made the subject of a further report by Messrs. Bradley and Poindexter. You will also learn, through the accompanying letter from Mr. Steuart,

* For compensation for rescuing and supporting the captain, supercargo, and 17 officers and men of the American ship *Courier*, of New York, which foundered at sea, and landing them safely at the Cape of Good Hope. the reasons which have delayed him in making a supplemental and additional report to that already made by himself and Mr. Kelley, embracing his views and opinions upon the developments made subsequent to the withdrawal of Mr. Kelley from the commission and the substitution of Mr. Bradley in his place. I also transmit two documents furnished by Mr. Steuart, and which were handed by him to the Secretary of the Treasury on the 7th instant, the one being "memoranda of proceedings," etc., marked No. 1, and the other "letters accompanying memoranda," etc., marked No. 2.

The commission was instituted for the purpose of ascertaining existing defects in the custom-house regulations, to trace to their true causes past errors, to detect abuses, and by wholesome reforms to guard in future not only against fraud and peculation, but error and mismanagement. For these purposes a selection was made of persons of acknowledged intelligence and industry, and upon this task they have been engaged for almost an entire year, and their labors remain yet to be completed. The character of those labors may be estimated by the extent of Messrs. Kelley and Steuart's report, embracing about 100 pages of closely written manuscript, the voluminous memoranda and correspondence of Mr. Steuart, the great mass of evidence accompanying Messrs. Kelley and Steuart's report, and the report of Mr. Poindexter, extending over 394 pages, comprised in the volume accompanying this, and additional reports still remaining to be made, as before stated.

I should be better pleased to have it in my power to communicate the entire mass of reports made and contemplated to be made at one and the same time, and still more should I have been gratified if time could have been allowed me, consistently with the apparent desire of the House of Representatives to be put into immediate possession of these papers, to have compared or even to have read with deliberation the views presented by the commissioners as to proposed reforms in the revenue laws, together with the mass of documentary evidence and information by which they have been explained and enforced and which do not admit of a satisfactory comparison until the whole circle of reports be completed. Charges of malfeasance against some of those now in office will devolve upon the Executive a rigid investigation into their extent and character, and will in due season claim my attention. The readiness, however, with which the House proposes to enter upon the grave and difficult subjects which these papers suggest having anticipated that consideration of them by the Executive which their importance demands, it only remains for me, in lieu of specific recommendations, which under other circumstances it would have been my duty to make, to urge upon Congress the importance and necessity of introducing the earliest reforms in existing laws and usages, so as to guard the country in future against frauds in the collection of the revenues and the Treasury against peculation, to relieve trade and commerce from oppressive regulations, and to guard law and morality against violation and abuse.

As from their great volume it has been necessary to transmit the original

papers to the House, I have to suggest the propriety of the House taking order for their restoration to the Treasury Department at such time as may comport with its pleasure. JOHN TYLER.

WASHINGTON, May 2, 1842.

To the House of Representatives of the United States:

I have this day received and now transmit to the House of Representatives the accompanying communication from Benjamin F. Butler, having relation to the reports of the commissioners appointed by me to examine into the affairs connected with the New York custom-house. As the whole subject is in possession of the House, I deem it also proper to communicate Mr. Butler's letter. JOHN TYLER.

Jonn. 11444

WASHINGTON, May 10, 1842.

To the Senate and House of Representatives:

The season for active hostilities in Florida having nearly terminated, my attention has necessarily been directed to the course of measures to be pursued hereafter in relation to the few Indians yet remaining in that Territory. Their number is believed not to exceed 240, of whom there are supposed to be about 80 warriors, or males capable of bearing arms. The further pursuit of these miserable beings by a large military force seems to be as injudicious as it is unavailing. The history of the last year's campaign in Florida has satisfactorily shown that notwithstanding the vigorous and incessant operations of our troops (which can not be exceeded), the Indian mode of warfare, their dispersed condition, and the very smallness of their number (which increases the difficulty of finding them in the abundant and almost inaccessible hiding places of the Territory) render any further attempt to secure them by force impracticable except by the employment of the most expensive means. The exhibition of force and the constant efforts to capture or destroy them of course places them beyond the reach of overtures to surrender. It is believed by the distinguished officer in command there that a different system should now be pursued to attain the entire removal of all the Indians in Florida, and he recommends that hostilities should cease unless the renewal of them be rendered necessary by new aggressions; that communications should be opened by means of the Indians with him to insure them a peaceful and voluntary surrender, and that the military operations should hereafter be directed to the protection of the inhabitants.

These views are strengthened and corroborated by the governor of the Territory, by many of its most intelligent citizens, and by numerous officers of the Army who have served and are still serving in that region. Mature reflection has satisfied me that these recommendations are sound and just; and I rejoice that consistently with duty to Florida I may indulge my desire to promote the great interests of humanity and extend

the reign of peace and good will by terminating the unhappy warfare that has so long been carried on there, and at the same time gratify my anxiety to reduce the demands upon the Treasury by curtailing the extraordinary expenses which have attended the contest. I have therefore authorized the colonel in command there as soon as he shall deem it expedient to declare that hostilities against the Indians have ceased. and that they will not be renewed unless provoked and rendered indispensable by new outrages on their part, but that neither citizens nor troops are to be restrained from any necessary and proper acts of selfdefense against any attempts to molest them. He is instructed to open communications with those yet remaining, and endeavor by all peaceable means to persuade them to consult their true interests by joining their brethren at the West; and directions have been given for establishing a cordon or line of protection for the inhabitants by the necessary number of troops.

But to render this system of protection effectual it is essential that settlements of our citizens should be made within the line so established, and that they should be armed, so as to be ready to repel any attack. In order to afford inducements to such settlements, I submit to the consideration of Congress the propriety of allowing a reasonable quantity of land to the head of each family that shall permanently occupy it, and of extending the existing provisions on that subject so as to permit the issue of rations for the subsistence of the settlers for one year; and as few of them will probably be provided with arms, it would be expedient to authorize the loan of muskets and the delivery of a proper quantity of cartridges or of powder and balls. By such means it is to be hoped that a hardy population will soon occupy the rich soil of the frontiers of Florida, who will be as capable as willing to defend themselves and their houses, and thus relieve the Government from further anxiety or expense for their protection.

JOHN TYLER.

WASHINGTON, May 13, 1842.

To the House of Representatives of the United States:

I transmit herewith a report* from the Postmaster-General, made in pursuance of the resolution of the House of Representatives of the 21st of March last, together with the accompanying documents.

JOHN TYLER.

To the Senate:

WASHINGTON, May 16, 1842.

Having directed hostilities in Florida to cease, the time seems to have arrived for distinguishing with appropriate honors the brave army that have so long encountered the perils of savage warfare in a country presenting every imaginable difficulty and in seasons and under a climate

* Transmitting lists of postmasters and others appointed by the President and Post-Office Department from April 4, 1841, to March 21, 1842.

fruitful of disease. The history of the hardships which our soldiers have endured, of the patience and perseverance which have enabled them to triumph over obstacles altogether unexampled, and of the gallantry which they have exhibited on every occasion which a subtle and skulking foe would allow them to improve is so familiar as not to require repetition at my hands. But justice to the officers and men now in Florida demands that their privations, sufferings, and dauntless exertions during a summer's campaign in such a climate, which for the first time was witnessed during the last year, should be specially commended. The foe has not been allowed opportunity either to plant or to cultivate or to reap. The season, which to him has usually been one of repose and preparation for renewed conflict, has been vigorously occupied by incessant and harassing pursuit, by penetrating his hiding places and laying waste his rude dwellings, and by driving him from swamp to swamp and from everglade to everglade. True, disease and death have been encountered at the same time and in the same pursuit, but they have been disregarded by a brave and gallant army, determined on fulfilling to the uttermost the duties assigned them, however inglorious they might esteem the particular service in which they were engaged.

To all who have been thus engaged the executive department, responding to the universal sentiment of the country, has already awarded the meed of approbation. There must, however, in all such cases be some who, availing themselves of the occasions which fortune afforded, have distinguished themselves for "gallant actions and meritorious conduct" beyond the usual high gallantry and great merit which an intelligent public opinion concedes to the whole Army. To express to these the sense which their Government cherishes of their public conduct and to hold up to their fellow-citizens the bright example of their courage, constancy, and patriotic devotion would seem to be but the performance of the very duty contemplated by that provision of our laws which authorizes the issuing of brevet commissions.

Fortunately for the country, a long peace, interrupted only by difficulties with Indians at particular points, has afforded few occasions for the exercise of this power, and it may be regarded as favorable to the encouragement of a proper military spirit throughout the Army that an opportunity is now given to evince the readiness of the Government to reward unusual merit with a peculiar and lasting distinction.

I therefore nominate to the Senate the persons whose names are contained in the accompanying list* for brevet commissions for services in Florida. That the number is large is evidence only of the value of the services rendered during a contest that has continued nearly as long as the War of the Revolution. The difficulty has been to reduce the number as much as possible without injustice to any, and to accomplish this great and mature consideration has been bestowed on the case of every officer who has served in Florida. IOHN TYLER.

* Omitted.

To the Senate of the United States:

I transmit herewith to the Senate a treaty recently concluded with the Wyandott tribe of Indians, and request the advice and consent of the Senate to the ratification of the same as proposed to be modified by the War Department. JOHN TYLER.

To the Senate of the United States:

I herewith transmit a report from the Acting Commissioner of the General Land Office and the documents accompanying the same (from No. 1 to No. 7), in relation to the conduct of N. P. Taylor, present register and former clerk in the land office at St. Louis, in compliance with your resolution of the 9th May. JOHN TYLER.

To the Senate of the United States:

I submit herewith a treaty concluded at Buffalo Creek on the 20th day of May last between the United States and the Seneca Nation of Indians, for your advice and consent to its ratification, together with a report on the subject from the War Department. JOHN TYLER.

To the Senate of the United States:

In compliance with a resolution of the Senate of the 2d of March last, requesting information touching proceedings under the convention of the 11th of April, 1839, between the United States and the Mexican Republic, I transmit a report from the Secretary of State, with the accompanying documents.

To the Senate of the United States:

To the House of Representatives:

In compliance with the resolution of the Senate of the 29th of March last, calling for information touching the relations between the United States and the Mexican Republic, I transmit a report from the Secretary of State, with the accompanying documents.*

JOHN TYLER.

WASHINGTON, June 17, 1842.

WASHINGTON, June 15, 1842.

I herewith transmit a report from the Secretary of the Treasury, which, accompanied by copies of certain letters of Mr. Ewing, late Secretary of

*Correspondence respecting certain citizens of the United States captured with the Texan expedition to Santa Fe, and held in confinement in Mexico.

WASHINGTON, May 24, 1842.

the Treasury, and a statement* from the Treasury Department, completes the answer, a part of which has heretofore been furnished, to your resolution of the 7th of February last, and complies also with your resolution of the 3d instant.

JOHN TYLER.

WASHINGTON, June 20, 1842.

To the House of Representatives:

A resolution of the House of Representatives of the r3th instant has been communicated to me, requesting, "so far as may be compatible with the public interest, a copy of the quintuple treaty between the five powers of Europe for the suppression of the African slave trade, and also copies of any remonstrance or protest addressed by Lewis Cass, envoy extraordinary and minister plenipotentiary of the United States at the Court of France, to that Government, against the ratification by France of the said treaty, and of all correspondence between the Governments of the United States and of France, and of all communications from the said Lewis Cass to his own Government and from this Government to him relating thereto."

In answer to this request I have to say that the treaty mentioned therein has not been officially communicated to the Government of the United States, and no authentic copy of it, therefore, can be furnished. In regard to the other papers requested, although it is my hope and expectation that it will be proper and convenient at an early day to lay them before Congress, together with others connected with the same subjects, yet in my opinion a communication of them to the House of Representatives at this time would not be compatible with the public interest.

JOHN TYLER.

To the Senate of the United States:

In compliance with a resolution of the Senate of the 15th of April last, I communicate to the Senate a report from the Secretary of State, accompanying copies of the correspondence † called for by said resolution.

JOHN TYLER.

WASHINGTON, June 24, 1842.

WASHINGTON, June 22, 1842.

To the Senate of the United States:

I transmit herewith to the Senate the translation of a letter⁺ addressed by the minister of France at Washington to the Secretary of State of the United States and a copy of the answer given thereto by my direction, and invite to the subject of the minister's letter all the consideration due

†Relating to the conduct and character of William B. Hodgson (nominated to be consul at Tunis) while dragoman at Constantinople.

‡ Relating to the establishment of a line of steamers between Havre and New York.

^{*} Of expenses of the commission to investigate the New York custom-house, etc.

to its importance and to a proposition originating in a desire to promote mutual convenience and emanating from a Government with which it is both our interest and our desire to maintain the most amicable relations. JOHN TYLER.

[The same message was sent to the House of Representatives.]

WASHINGTON, June 24, 1842.

To the Senate of the United States :

In compliance with the resolution of the Senate of the 16th of February last, I herewith transmit a letter * from the Secretary of State and the papers in that Department called for by the resolution aforesaid. JOHN TYLER.

WASHINGTON, June 25, 1842.

To the House of Representatives:

I have this day approved and signed an act, which originated in the House of Representatives, entitled "Au act for an apportionment of Representatives among the several States according to the Sixth Census," and have caused the same to be deposited in the office of the Secretary of State, accompanied by an exposition of my reasons for giving to it my sanction.

JOHN TYLER.

[Transmitted to the House of Representatives by the Secretary of State in compliance with a resolution of that body.]

WASHINGTON, June 25, 1842.

A BILL entitled "An act for an apportionment of Representatives among the several States according to the Sixth Census," approved June 25, 1842.

In approving this bill I feel it due to myself to say, as well that my motives for signing it may be rightly understood as that my opinions may not be liable to be misconstrued or quoted hereafter erroneously as a precedent, that I have not proceeded so much upon a *clear and decided opinion of my own* respecting the constitutionality or policy of the entire act as from respect to the declared will of the two Houses of Congress.

In yielding *my doubts* to the matured opinion of Congress I have followed the advice of the first Secretary of State to the first President of the United States and the example set by that illustrious citizen upon a memorable occasion.

When I was a member of either House of Cougress I acted under the conviction that *to doubt* as to the constitutionality of a law was sufficient to induce me to give my vote against it; but I have not been able to bring myself to believe that *a doubtful opinion* of the Chief Magistrate ought to outweigh the solemnly pronounced opinion of the representatives of the people and of the States.

One of the prominent features of the bill is that which purports to be mandatory on the States to form districts for the choice of Representatives to Congress, in single districts. That Congress itself has power by law to alter State regulations respecting the manner of holding elections for Representatives is clear, but its power to command the States to make new regulations or alter their existing regulations is the question upon which I have felt deep and strong doubts. I have yielded those

Transmitting names and compensation of employees and witnesses in connection with the commission of inquiry relative to the public buildings in Washington, D. C.

doubts, however, to the opinion of the Legislature, giving effect to their enactment as far as depends on my approbation, and leaving questions which may arise hereafter, if unhappily such should arise, to be settled by full consideration of the several provisions of the Constitution and the laws and the authority of each House to judge of the elections, returns, and qualifications of its own members.

Similar considerations have operated with me in regard to the representation of fractions above a moiety of the representative number, and where such moiety exceeds 30,000-a question on which a diversity of opinion has existed from the foundation of the Government. The provision recommends itself from its nearer approximation to equality than would be found in the application of a common and simple divisor to the entire population of each State, and corrects in a great degree those inequalities which are destined at the recurrence of each succeeding census so greatly to augment.

In approving the bill I flatter myself that a disposition will be perceived on my part to concede to the opinions of Congress in a matter which may conduce to the good of the country and the stability of its institutions, upon which my own opinion is not clear and decided. But it seemed to me due to the respectability of opinion against the constitutionality of the bill, as well as to the real difficulties of the subject, which no one feels more sensibly than I do, that the reasons which have determined me should be left on record.

JOHN TYLER.

To the Senate of the United States:

In pursuance of the suggestions contained in the accompanying letter from the Secretary of the Navy and of my own convictions of their propriety, I transmit to the Senate the report made by Lieutenant Wilkes, commander of the exploring expedition, relative to the Oregon Terri-Having due regard to the negotiations now pending between this tory. Government and the Government of Great Britain through its special envoy, I have thought it proper to communicate the report confidentially to the Senate.

JOHN TYLER.

WASHINGTON, July 2, 1842.

WASHINGTON, July 1, 1842.

To the Senate and House of Representatives of the United States:

I submit to Congress the printed copy of certain resolutions of the legislature of the State of Louisiana, accompanied by a letter from the Senators and Representatives from that State, and also a letter from the Solicitor of the Treasury and Commissioner of the General Land Office, requesting and recommending that a suit in ejectment may be authorized and directed in order to test the validity of a grant made on the 20th of June, 1797, by the Baron de Carondelet, Governor-General of Louisiana, to the Marquis de Maison Rouge.

The magnitude of this claim renders it highly desirable that a speedy termination should be put to all contest concerning it, and I therefore recommend that Congress shall authorize such proceedings as may be best calculated to bring it to a close JOHN TYLER.

WASHINGTON, July 9, 1842.

To the House of Representatives of the United States:

In compliance with the resolution of the House of Representatives of the 21st ultimo, requesting information relative to proceedings of this Government in the case of George Johnson, a citizen of the United States aggrieved by acts of authorities of the Republic of Uruguay, I transmit a report from the Secretary of State with the accompanying papers. JOHN TYLER.

WASHINGTON, July 14, 1842.

To the House of Representatives of the United States:

In answer to the resolution of the House of Representatives of the 12th instant, requesting copies of papers upon the subject of the relations between the United States and the Mexican Republic, I transmit a report from the Secretary of State and the documents by which it was accompanied. JOHN TYLER.

WASHINGTON, July 14, 1842.

To the Senate of the United States:

In compliance with the resolution of the Senate of the 11th instant, calling for the recent correspondence between the Republic of Mexico and this Government in relation to Texas, I transmit a report from the Secretary of State, with the accompanying documents.

JOHN TYLER.

WASHINGTON, July 20, 1842.

To the House of Representatives of the United States:

In further compliance with the resolution of the House of Representatives of the 29th of April last, I transmit herewith a supplemental and additional report of William M. Steuart, one of the commissioners appointed to investigate the affairs of the New York custom-house, which has recently been received, and which, like the reports of the commissioners heretofore communicated to the House, I have not had an opportunity to examine. For the reason stated in my message to the House of the 30th of April last, I shall abstain, as I have done hitherto, from recommending any specific measures which might be suggested by an examination of the various reports on the subject.

JOHN TYLER.

WASHINGTON, July 22, 1842.

To the House of Representatives of the United States:

In answer to the resolution of the House of Representatives of the 13th instant, upon the subject of the relations between the United States

Messages and Papers of the Presidents

and the Republic of Texas, I transmit a report from the Secretary of State. My last communication to Congress relating to that Republic was my message of the 30th of March last, suggesting the expediency of legislative provisions for improving the trade and facilitating the intercourse by post between the United States and Texas. The report of the Secretary of State is accompanied by a copy of all the correspondence between the two Governments since that period which it would be compatible with the public interest to communicate to the House of Representatives at this time,

JOHN TYLER.

To the Senate of the United States:

In the communication made to the Senate on the 13th of June, in answer to its resolution of the 2d of March last, there appears to have been, among other papers, sundry letters addressed to the Department of State by certain claimants or their agents containing reflections upon the character of the umpire appointed by His Prussian Majesty pursuant to the convention between the United States and the Mexican Republic of the 11th of April, 1839. As the call was for all communications which had been addressed to the Department of State by any of the claimants under that convention relative to the proceedings and progress of the mixed commission, the copies were prepared and submitted without attracting the attention either of the head of the Department or myself. If those letters had been noticed, their transmission to the Senate, if transmitted at all, would have been accompanied by a disclaimer on the part of the Executive of any intention to approve such charges. The Executive has no complaint to make against the conduct or decisions of the highly respectable person appointed by his sovereign umpire between the American and Mexican commissioners.

JOHN TYLER.

WASHINGTON, August 10, 1842.

WASHINGTON, August 11, 1842.

To the Senate of the United States:

In compliance with your resolution of the 18th July, I herewith transmit a letter from the Acting Secretary of the Treasury and a report from the Commissioner of Public Buildings, together with the accompanying documents.*

JOHN TYLER.

To the Senate of the United States:

I have the satisfaction to communicate to the Senate the results of the negotiations recently had in this city with the British minister, special and extraordinary.

* Relating to the macadamizing of Pennsylvania avenue, Washington, D. C.

WASHINGTON, August 8, 1842.

These results comprise-

First. A treaty to settle and define the boundaries between the territories of the United States and the possessions of Her Britannic Majesty in North America, for the suppression of the African slave trade, and the surrender of criminals fugitive from justice in certain cases.

Second. A correspondence on the subject of the interference of the colonial authorities of the British West Indies with American merchant vessels driven by stress of weather or carried by violence into the ports of those colonies.

Third. A correspondence upon the subject of the attack and destruction of the steamboat *Caroline*.

Fourth. A correspondence on the subject of impressment.

If this treaty shall receive the approbation of the Senate, it will terminate a difference respecting boundary which has long subsisted between the two Governments, has been the subject of several ineffectual attempts at settlement, and has sometimes led to great irritation, not without danger of disturbing the existing peace. Both the United States and the States more immediately concerned have entertained no doubt of the validity of the American title to all the territory which has been in dispute, but that title was controverted and the Government of the United States had agreed to make the dispute a subject of arbitration. One arbitration had been actually had, but had failed to settle the controversy, and it was found at the commencement of last year that a correspondence had been in progress between the two Governments for a joint commission, with an ultimate reference to an umpire or arbitrator with authority to make a final decision. That correspondence, however, had been retarded by various occurrences, and had come to no definite result when the special mission of Lord Ashburton was announced. This movement on the part of England afforded in the judgment of the Executive a favorable opportunity for making an attempt to settle this long-existing controversy by some agreement or treaty without further reference to arbitration.

It seemed entirely proper that if this purpose were entertained consultation should be had with the authorities of the States of Maine and Massachusetts. Letters, therefore, of which copies are herewith communicated, were addressed to the governors of those States, suggesting that commissioners should be appointed by each of them, respectively, to repair to this city and confer with the authorities of this Government on a line by agreement or compromise, with its equivalents and compensations. This suggestion was met by both States in a spirit of candor and patriotism and promptly complied with. Four commissioners on the part of Maine and three on the part of Massachusetts, all persons of distinetion and high character, were duly appointed and commissioned and lost no time in presenting themselves at the seat of the Government of the United States. These commissioners have been in correspondence with this Government during the period of the discussions; have enjoyed its confidence and freest communications; have aided the general object with their counsel and advice, and in the end have unanimously signified their assent to the line proposed in the treaty.

Ordinarily it would be no easy task to reconcile and bring together such a variety of interests in a matter in itself difficult and perplexed, but the efforts of the Government in attempting to accomplish this desirable object have been seconded and sustained by a spirit of accommodation and conciliation on the part of the States concerned, to which much of the success of these efforts is to be ascribed.

Connected with the settlement of the line of the northeastern boundary, so far as it respects the States of Maine and Massachusetts, is the continuation of that line along the highlands to the northwesternmost head of Connecticut River. Which of the sources of that stream is entitled to this character has been matter of controversy and of some interest to the State of New Hampshire. The King of the Netherlands decided the main branch to be the northwesternmost head of the Connecticut. This did not satisfy the claim of New Hampshire. The line agreed to in the present treaty follows the highlands to the head of Halls Stream and thence down that river, embracing the whole claim of New Hampshire and establishing her title to 100,000 acres of territory more than she would have had by the decision of the King of the Netherlands.

By the treaty of 1783 the line is to proceed down the Connecticut River to the forty-fifth degree of north latitude, and thence west by that parallel till it strikes the St. Lawrence. Recent examinations having ascertained that the line heretofore received as the true line of latitude between those points was erroneous, and that the correction of this error would not only leave on the British side a considerable tract of territory heretofore supposed to belong to the States of Vermont and New York, but also Rouses Point, the site of a military work of the United States, it has been regarded as an object of importance not only to establish the rights and jurisdiction of those States up to the line to which they have been considered to extend, but also to comprehend Rouses Point within the territory of the United States. The relinquishment by the British Government of all the territory south of the line heretofore considered to be the true line has been obtained, and the consideration for this relinquishment is to inure by the provisions of the treaty to the States of Maine and Massachusetts

The line of boundary, then, from the source of the St. Croix to the St. Lawrence, so far as Maine and Massachusetts are concerned, is fixed by their own consent and for considerations satisfactory to them, the chief of these considerations being the privilege of transporting the lumber and agricultural products grown and raised in Maine on the waters of the St. Johns and its tributaries down that river to the ocean free from

John Tyler

Imposition or disability. The importance of this privilege, perpetual in its terms, to a country covered at present by pine forests of great value, and much of it capable hereafter of agricultural improvement, is not a matter upon which the opinion of intelligent men is likely to be divided.

So far as New Hampshire is concerned, the treaty secures all that she requires, and New York and Vermont are quieted to the extent of their claim and occupation. The difference which would be made in the northern boundary of these two States by correcting the parallel of latitude may be seen on Tanner's maps (1836), new atlas, maps Nos. 6 and 9.

From the intersection of the forty-fifth degree of north latitude with the St. Lawrence and along that river and the lakes to the water communication between Lake Huron and Lake Superior the line was definitively agreed on by the commissioners of the two Governments under the sixth article of the treaty of Ghent; but between this last-mentioned point and the Lake of the Woods the commissioners acting under the seventh article of that treaty found several matters of disagreement, and therefore made no joint report to their respective Governments. The first of these was Sugar Island, or St. Georges Island, lying in St. Marys River, or the water communication between Lakes Huron and Superior. By the present treaty this island is embraced in the territories of the United States. Both from soil and position it is regarded as of much value.

Another matter of difference was the manner of extending the line from the point at which the commissioners arrived, north of Isle Royale, in Lake Superior, to the Lake of the Woods. The British commissioner insisted on proceeding to Fond du Lac, at the southwest angle of the lake, and thence by the river St. Louis to the Rainy Lake. The American commissioner supposed the true course to be to proceed by way of the Dog River. Attempts were made to compromise this difference, but without success. The details of these proceedings are found at length in the printed separate reports of the commissioners.

From the imperfect knowledge of this remote country at the date of the treaty of peace, some of the descriptions in that treaty do not harmonize with its natural features as now ascertained. "Long Lake" is nowhere to be found under that name. There is reason for supposing, however, that the sheet of water intended by that name is the estuary at the mouth of Pigeon River. The present treaty therefore adopts that estuary and river, and afterwards pursues the usual route across the height of land by the various portages and small lakes till the line reaches Rainy Lake, from which the commissioners agreed on the extension of it to its termination in the northwest angle of the Lake of the Woods. The region of country on and near the shore of the lake between Pigeon River on the north and Fond du Lac and the river St. Louis on the south and west, considered valuable as a mineral region, is thus included within the United States. It embraces a territory of 4,000,000 acres northward of the claim set up by the British commissioner under the treaty of Ghent. From the height of land at the head of Pigeon River westerly to the Rainy Lake the country is understood to be of little value, being described by surveyors and marked on the map as a region of rock and water.

From the northwest angle of the Lake of the Woods, which is found to be in latitude $45^{\circ} 23' 55''$ north, existing treaties require the line to be run due south to its intersection with the forty-fifth parallel, and thence along that parallel to the Rocky Mountains.

After sundry informal communications with the British minister upon the subject of the claims of the two countries to territory west of the Rocky Mountains, so little probability was found to exist of coming to any agreement on that subject at present that it was not thought expedient to make it one of the subjects of formal negotiation to be entered upon between this Government and the British minister as part of his duties under his special mission.

By the treaty of 1783 the line of division along the rivers and lakes from the place where the forty-fifth parallel of north latitude strikes the St. Lawrence to the outlet of Lake Superior is invariably to be drawn through the middle of such waters, and not through the middle of their main channels. Such a line, if extended according to the literal terms of the treaty, would, it is obvious, occasionally intersect islands. The manner in which the commissioners of the two Governments dealt with this difficult subject may be seen in their reports. But where the line thus following the middle of the river or water course did not meet with islands, yet it was liable sometimes to leave the only practicable navigable channel altogether on one side. The treaty made no provision for the common use of the waters by the citizens and subjects of both countries.

It has happened, therefore, in a few instances that the use of the river in particular places would be greatly diminished to one party or the other if in fact there was not a choice in the use of channels and passages. Thus at the Long Sault, in the St. Lawrence-a dangerous passage, practicable only for boats-the only safe run is between the Long Sault Islands and Barnharts Island (all which belong to the United States) on one side and the American shore on the other. On the other hand, by far the best passage for vessels of any depth of water from Lake Erie into the Detroit River is between Bois Blanc, a British island, and the Canadian shore. So again, there are several channels or passages, of different degrees of facility and usefulness, between the several islands in the river St. Clair at or near its entry into the lake of that name. In these three cases the treaty provides that all the several passages and channels shall be free and open to the use of the citizens and subjects of both parties.

The treaty obligations subsisting between the two countries for the

suppression of the African slave trade and the complaints made to this Government within the last three or four years, many of them but too well founded, of the visitation, seizure, and detention of American vessels on that coast by British cruisers could not but form a delicate and highly important part of the negotiations which have now been held.

The early and prominent part which the Government of the United States has taken for the abolition of this unlawful and inhuman traffic is By the tenth article of the treaty of Ghent it is declared well known. that the traffic in slaves is irreconcilable with the principles of humanity and justice, and that both His Majesty and the United States are desirous of continuing their efforts to promote its entire abolition; and it is thereby agreed that both the contracting parties shall use their best endeavors to accomplish so desirable an object. The Government of the United States has by law declared the African slave trade piracy, and at its suggestion other nations have made similar enactments. It has not been wanting in honest and zealous efforts, made in conformity with the wishes of the whole country, to accomplish the entire abolition of the traffic in slaves upon the African coast, but these efforts and those of other countries directed to the same end have proved to a considerable degree unsuccessful. Treaties are known to have been entered into some years ago between England and France by which the former power, which usually maintains a large naval force on the African station, was authorized to seize and bring in for adjudication vessels found engaged in the slave trade under the French flag.

It is known that in December last a treaty was signed in London by the representatives of England, France, Russia, Prussia, and Austria having for its professed object a strong and united effort of the five powers to put an end to the traffic. This treaty was not officially communicated to the Government of the United States, but its provisions and stipulations are supposed to be accurately known to the public. It is understood to be not yet ratified on the part of France.

No application or request has been made to this Government to become party to this treaty, but the course it might take in regard to it has excited no small degree of attention and discussion in Europe, as the principle upon which it is founded and the stipulations which it contains have caused warm animadversions and great political excitement.

In my message at the commencement of the present session of Congress I endeavored to state the principles which this Government supports respecting the right of search and the immunity of flags. Desirous of maintaining those principles fully, at the same time that existing obligations should be fulfilled, I have thought it most consistent with the honor and dignity of the country that it should execute its own laws and perform its own obligations by its own means and its own power.

The examination or visitation of the merchant vessels of one nation by the cruisers of another for any purpose except those known and acknowledged by the law of nations, under whatever restraints or regulations it may take place, may lead to dangerous results. It is far better by other means to supersede any supposed necessity or any motive for such examination or visit. Interference with a merchant vessel by an armed cruiser is always a delicate proceeding, apt to touch the point of national honor as well as to affect the interests of individuals. It has been thought, therefore, expedient, not only in accordance with the stipulations of the treaty of Ghent, but at the same time as removing all pretext on the part of others for violating the immunities of the American flag upon the seas, as they exist and are defined by the law of nations, to enter into the articles now submitted to the Senate.

The treaty which I now submit to you proposes no alteration, mitigation, or modification of the rules of the law of nations. It provides simply that each of the two Governments shall maintain on the coast of Africa a sufficient squadron to enforce separately and respectively the laws, rights, and obligations of the two countries for the suppression of the slave trade.

Another consideration of great importance has recommended this mode of fulfilling the duties and obligations of the country. Our commerce along the western coast of Africa is extensive, and supposed to be increasing. There is reason to think that in many cases those engaged in it have met with interruptions and annoyances caused by the jealousy and instigation of rivals engaged in the same trade. Many complaints on this subject have reached the Government. A respectable naval force on the coast is the natural resort and security against further occurrences of this kind.

The surrender to justice of persons who, having committed high crimes, seek an asylum in the territories of a neighboring nation would seem to be an act due to the cause of general justice and properly belonging to the present state of civilization and intercourse. The British Provinces of North America are separated from the States of the Union by a line of several thousand miles, and along portions of this line the amount of population on either side is quite considerable, while the passage of the boundary is always easy.

Offenders against the law on the one side transfer themselves to the other. Sometimes, with great difficulty, they are brought to justice, but very often they wholly escape. A consciousness of immunity from the power of avoiding justice in this way instigates the unprincipled and reckless to the commission of offenses, and the peace and good neighborhood of the border are consequently often disturbed.

In the case of offenders fleeing from Canada into the United States, the governors of States are often applied to for their surrender, and questions of a very embarrassing nature arise from these applications. It has been thought highly important, therefore, to provide for the whole case by a proper treaty stipulation. The article on the subject in the proposed treaty is carefully confined to such offenses as all mankind agree

to regard as heinous and destructive of the security of life and property. In this careful and specific enumeration of crimes the object has been to exclude all political offenses or criminal charges arising from wars or intestine commotions. Treason, misprision of treason, libels, desertion from military service, and other offenses of similar character are excluded.

And lest some unforeseen inconvenience or unexpected abuse should arise from the stipulation rendering its continuance in the opinion of one or both of the parties not longer desirable, it is left in the power of either to put an end to it at will.

The destruction of the steamboat Caroline at Schlosser four or five years ago occasioned no small degree of excitement at the time, and became the subject of correspondence between the two Governments. That correspondence, having been suspended for a considerable period, was renewed in the spring of the last year, but no satisfactory result having been arrived at, it was thought proper, though the occurrence had ceased to be fresh and recent, not to omit attention to it on the present occasion. It has only been so far discussed in the correspondence now submitted as it was accomplished by a violation of the territory of the United States. The letter of the British minister, while he attempts to justify that violation upon the ground of a pressing and overruling necessity, admitting, nevertheless, that even if justifiable an apology was due for it, and accompanying this acknowledgment with assurances of the sacred regard of his Government for the inviolability of national territory, has seemed to me sufficient to warrant forbearance from any further remonstrance against what took place as an aggression on the soil and territory of the country. On the subject of the interference of the British authorities in the West Indies, a confident hope is entertained that the correspondence which has taken place, showing the grounds taken by this Government and the engagements entered into by the British minister, will be found such as to satisfy the just expectation of the people of the United States.

The impressment of seamen from merchant vessels of this country by British cruisers, although not practiced in time of peace, and therefore not at present a productive cause of difference and irritation, has, nevertheless, hitherto been so prominent a topic of controversy and is so likely to bring on renewed contentions at the first breaking out of a European war that it has been thought the part of wisdom now to take it into serious and earnest consideration. The letter from the Secretary of State to the British minister explains the ground which the Government has assumed and the principles which it means to uphold. For the defense of these grounds and the maintenance of these principles the most perfect reliance is placed on the intelligence of the American people and on their firmness and patriotism in whatever touches the honor of the country or its great and essential interests. JOHN TYLER. [The following are inserted because they pertain to the treaty transmitted with the message of President Tyler immediately preceding.]

> DEPARTMENT OF STATE, Washington, August 3, 1848.

To the Senate of the United States:

The Secretary of State has the honor to transmit to the Senate, in compliance with a resolution adopted by it on the 29th ultimo, a copy of the *joint report* of the commissioners under the treaty of Washington of August 9, 1842, together with a copy of the report of the American commissioner transmitting the same to the State Department.

JAMES BUCHANAN.

Mr. Smith to Mr. Buchanan.

WASHINGTON, April 20, 1848.

SIR: In presenting to you the joint report of the commissioners appointed under the treaty of Washington of August 9, 1842, to survey and mark the line of boundary between the United States and the British Provinces, which I have the honor herewith most respectfully to submit, I have to perform the painful duty of informing you that the maps of that line and of the adjacent country, which had been elaborately constructed by the scientific corps on the part of the United States, and contained upon 100 sheets of drawing paper of the largest size, together with the tables of the survey, have been destroyed by the conflagration of the building in which they were contained. This house had been occupied by Major James D. Graham, the head of the scientific corps and principal astronomer of the American commission, as his office until his departure for Mexico. All the maps, drawings, and tables had been completed and duly authenticated by the joint commissioners, and were ready to be deposited with their joint report under their hands and seals in the archives of this Government. Of this I had the honor to inform you in my letter of the 21th ultimo.

I can hardly express the pain which this unfortunate event has occasioned me. But I can not perceive that any imputation of blame can properly be attached to any officer of the commission. The care and custody of all the work of the United States scientific corps were properly placed in charge of Major Graham, as the head of that corps, who had had the immediate direction and superintendence of it from the first organization of the commission. He required the maps and tables at his office for reference and revision in the progress of the astronomical work. Upon his departure for Mexico he placed Lieutenant A. W. Whipple in his rooms with an injunction to guard with the utmost care the valuable property of the commission. On the day after he left the city, and when for the first time informed of the fact, I called upon Lientenant Whipple and requested him to have all the maps, drawings, and tables ready to be turned over to the State Department on the following day. On the 24th ultimo I acquainted you with that fact.

No censure can possibly be attributed to Lieutenant Whipple, whose great care and attention to all his duties have been on all occasions highly distinguished. He escaped from the fire with scarcely an article of his dress, and his loss in money and clothing is at least \$1,000. Major Graham has lost his valuable library, together with personal effects to a large amount. The fire was communicated from the basement of the house, and by no effort could anything be saved.

There are tracings of the maps upon "tissue paper," without the topography, in the State of Maine, but they are not signed by the commissioners.

The field books of the engineers were, fortunately, not in Major Graham's office, and are preserved.

Duplicates of the maps, duly authenticated, have been placed in the British archives at London, which, although they have not the topography of the country so John Tyler

fully laid down upon them as it was upon our own, represent with equal exactness the survey of the boundary itself. Should it be deemed expedient by this Government to procure copies of them, access to those archives for that purpose would undoubtedly be permitted, and the object accomplished at small expense, and when completed these copies could be authenticated by the joint commissioners in accordance with the provisions of the treaty.

I have the honor to be, with great respect, your obedient and humble servant,

ALBERT SMITH.

Report of the joint commission of boundary appointed under the treaty of Washington of August 9, 1842.

The undersigned, commissioners appointed under the treaty of Washington to trace and mark the boundary, as directed by that treaty, between the British possessions in North America and the United States—that is to say, James Bneknall Bucknall Estcourt, lientenant-colonel in the British army, appointed commissioner by Her Britaunic Majesty, and Albert Smith, appointed commissioner by the President of the United States—having accomplished the duty assigned to them, do now, in accordance with the directions of the said treaty, submit the following report and the accompanying maps, jointly signed, to their respective Governments.

In obedience to the terms of the treaty, the undersigned met at Bangor, in the State of Maine, on the 1st day of May, 1843, where they produced and verified the authority under which they each were respectively to act. They then adjourned, because the weather was not sufficiently open for taking the field, to the 1st of the following month (June), and agreed to meet again at that time at Houlton.

Accordingly, they did meet at that place, and began their operations.

It may be desirable to state at the outset that for the sake of convenience the whole line of boundary marked by the undersigned has been divided in the mention made of the different portions into the following grand divisions, viz:

"North line," from the source of the St. Croix to the intersection of the St. John.

"River St. John," from the intersection of the north line to the mouth of the St. Francis,

"River St. Francis," from its month to the outlet of Lake Pohenagamook.

"Southwest line," from the outlet of Lake Pohenagamook to the Northwest Branch of the St. John.

"South line," from the Northwest Branch to the parallel of latitude 46° 25' on the Southwest Branch.

"Southwest Branch," from the parallel 46° 25' to its source.

"Highlands," from the source of the Southwest Branch of the St. John to the source of Halls Stream,

"Halls Stream," from its source to the intersection of the line of Valentine and Collins.

"West line," from Halls Stream to the St. Lawrence near St. Regis, along the line of Valentine and Collins.

To return to the narration of operations:

The exploring line of Colonel Bouchette and Mr. Johnson, as directed by the treaty, was traced from the monument at the source of the St. Croix to the intersection of the St. John.

The monument found at the source of the St. Croix, as described in the report of Colonel Bouchette and Mr. Johnson, and the course of their exploring line, was traced by blazes or marks upon the trees.

An old line, cut out by the assistant surveyors of Colonel Bouchette and Mr. Johnson, was also found, which terminated about half a mile north of the South Branch of the Meduxnikeag, where, by records to which the undersigned referred, they ascertained that it had been abandoned because of its deviation from the exploring line of Colonel Bouchette and Mr. Johnson.

After the exploration and re-marking of the north line it was cut out 30 feet wide. The same was afterwards done in all parts where the boundary passed through woodland. After thus opening the north line it was surveyed, and iron posts were erected at intervals to mark it.

The general bearing of the line was rather to the west of the meridian of the monument at the source of the St. Croix. The precise line laid down by the undersigned was determined by successive courses, of which each was made to be as long as was convenient, provided it did not pass out of the opening of 30 feet.

At each angle of deflection an iron monument was erected, and placed anglewise with the line. Other monuments were erected at the crossing of roads, rivers, and at every mile, commencing from the source of the St. Croix. Those which were not intended to mark angles of deflection were placed square with the line.

At the intersection of the St. John by the north line the river is deep and broad. The boundary runs up the middle of the channel of the river, as indicated by the maps, dividing the islands as follows:

No. 1. Ryan's Island	United States.
No. 2. King's Island	
No. 3. Les Trois Isles	
No. 4. La Septieme Isle	
No. 5. Quissibis	Great Britain.
No. 6. La Grand Isle	
No. 7. Thibideau's Islands	United States.
No. 8. Madawaska Islands	Great Britain.
'No. 9. Joseph Michaud's three islands	
No. 10. Pine Island	
No. 11. Baker's	
Turtle	
Dagle's { islands	Great Britain.
Fourth	
Fifth)	
No. 12. Kennedy's Island	Great Britain.
No. 13. Crock's	
Cranberry { islands	Great Britain.
Gooseberry	
No. 14. Savage's Island	United States.
No. 15. Wheelock's Island	United States.
No. 16. Caton's Island	United States.
No. 17. Honeywell's Island	
No. 18. Savage and Johnson's Island	United States.
No. 19. Grew's Island	United States.
No. 20. Kendall's Island	Great Britain.

The islands were distributed to Great Britain or to the United States, as they were found to be on the right or left of the deep channel. There was but one doubtful case, La Septieme Isle, and that was apportioned to the United States because the majority of the owners were ascertained to reside on the United States side of the river.

Monuments were erected upon the islands, marking them for Great Britain of the United States, as the case may have been.

After leaving the St. John the boundary enters the St. Francis, dividing the islands at the mouth of that river in the manner shown in the maps. It then runs up the

TYLER'S SIGNATURE TO THE WEBSTER-ASHBURTON TREATY.

St. Francis, through the middle of the lakes upon it, to the outlet of Lake Pohenagamook, the third large lake from the mouth of the river. At the outlet a large monument has been erected.

In order to determine the point on the Northwest Branch to which the treaty directed that a straight line should be run from the outlet of Lake Pohenagamook, a survey of that stream was made, and also of the main St. John in the neighborhood of the mouth of the Northwest Branch, and a line was cut between the St. John and the point on the Northwest Branch ascertained by the survey to be 10 miles in the nearest direction from it, and the distance was afterwards verified by chaining.

It was ascertained also, in accordance with the provisions of the treaty, by a triangulation of the country toward the highlands dividing the waters of the St. Lawrence and of the St. John, that more than 7 miles intervened between the point selected on the Northwest Branch and the crest of the dividing ridge. A large iron monument was afterwards erected on the point thus selected, and the space around was cleared and sown with grass seed. It is a short distance below the outlet of Lake Ishaganalshegeck.

The outlet of Lake Pohenagamook and the point on the Northwest Branch designated by the treaty having been thus ascertained and marked, in the spring of 1844 a straight line was run between them. Along that line, which passes entirely through forest, monuments were erected at every mile, at the crossings of the principal streams and rivers, and at the tops of those hills where a transit instrument had been set up to test the straightness of the line.

As soon as the parallel of latitude $46^{\circ} 25'$ had been determined on the Southwest Branch, in the early part of the summer of 1844, a straight line was drawn from the boundary point on the Northwest Branch to a large monument erected on the left bank of the Southwest Branch where it is intersected by the parallel of latitude $46^{\circ} 25'$. The line so drawn crosses the Southwest Branch once before it reaches the parallel of latitude $46^{\circ} 25'$, and at about half a mile distance from that parallel. There also a large monument has been set up on the left bank.

From the intersection of the parallel $46^{\circ} 25'$ the boundary ascends the Southwest Branch, passes through a lake near its head, and so up a small stream which falls into the lake from the west to the source of that stream, which has been selected as the source of the Southwest Branch.

On the Southwest Branch there are two principal forks, at each of which two monuments have been erected, one on each bank of the river immediately above the forks and upon the branch established as the boundary. The maps point out their positions. At the mouth of the small stream selected as the source of the Southwest Branch a monument has been erected upon a delta formed by two small outlets. Above those outlets three other monuments have been placed at intervals upon the same stream.

Upon the crest of the dividing ridge, very close to the source of the Southwest Branch, a large monument has been erected. It is the first point in the highlands, and from it the boundary runs along the crest in a southerly direction, passing near to the southeastern shore of the Portage Lake, and so on to a large monument erected on a small eminence on the east side of the Kennebec road. Thence it passes through a dwelling house called Tachereau's, which was standing there at the time the line was run; so, by a tortuous course, it runs to the top of Sandy Stream Mountain; thence, inclining to the southwest, it runs over Hog Back the First, as shown in the maps; thence toward Hog Back the Second, which it leaves on the north side. Further on, at the head of Leech Lake, there is a stream which divides its waters and flows both into Canada and into the United States. The boundary has been made to run up that stream a short distance from the fork where the waters divide to a second fork; thence between the streams which nuite to form that fork, and then to ascend again the dividing ridge. A monument has been erected at the fork first mentioned, where the waters divide.

As the boundary approaches the valley of Spider River it bends to the southeast, and, by a wide circuit over high and steep hills, it turns the head of Spider River; thence it bends to the northwest until it approaches within about 4 miles of Lake Megantic; thence it turns again south, having the valley of Arnolds River on the right and of Dead River on the left. It leaves Gasford Mountain in Canada, threads its way over very high ground between the head of Arnolds River and the tributaries of the Magalloway; inclines then to the north, so to the west, over very rocky, mountainous, and difficult country, leaving Gipps Peak in the United States, and turns by a sharp angle at Saddle Back to the south. After that it again inclines to the west, and then to the south, and again to the west, and passes the head of the Connecticut. About 3 miles and a half east of the head of the Connecticut there is a division of waters similar to that described near Leech Lake. The boundary runs down a stream from near its source to the fork where it divides, and then again follows the dividing ridge. The spot is noted on the map.

After the boundary has passed the head of the Connecticut it runs to the northwest, descending into very low, swampy ground between the heads of Indian Stream and the tributaries of the St. Francis. Thus it passes on, bending again to the south of west, over a high hill, to the source of Halls Stream.

Iron monuments have been erected at intervals along the highlands from the source of the Southwest Branch of the St. John to the source of Halls Stream, the position of each of which is shown upon the maps.

From the source of Halls Stream the boundary descends that river, dividing the islands, which are, however, merely unimportant alluvial deposits, in the manner indicated by the maps until it reaches the intersection of that stream by the line formerly run by Valentine and Collins as the forty-fifth degree of north latitude.

At that point a large monument has been erected on the right and a small one on the left bank of the stream. Monuments have also been erected along the bank of this stream, as indicated on the maps.

The line of Valentine and Collins was explored and found by the blazes still remaining in the original forest.

Upon cutting into those blazes it was seen that deep seated in the tree there was a sear, the surface of the original blaze, slightly decayed, and upon counting the rings (which indicate each year's growth of the tree) it was found that the blazes dated back to 1772, 1773, and 1774. The line of Valentine and Collins was run in 1771, 1772, 1773, and 1774. The coincidence of the dates of the blazes with those of the above line, confirmed by the testimony of the people of the country, satisfied the undersigned that the line they had found was that mentioned in the treaty. Along this portion of the boundary, which is known as the forty-fifth degree of Valentine and Collins, and which extends from Halls Stream to St. Regis, there are several interruptions to the blazes in those parts where clearings have been made, and there the authentic marks of the precise situation of the old line have been lost. In those cases the undersigned have drawn the boundary line straight from the original blazes on the one side of a clearing to the original blazes on the other side of the same clearing.

It can not be positively stated that the line as it has been traced through those clearings precisely coincides with the old line, but the undersigned believe that it does not differ materially from it; nor have they had the means of determining a nearcr or a surer approximation.

Along this line, at every point of deflection, an iron monument has been erected; also at the crossing of rivers, lakes, and roads. Those which mark deflections are placed, as on the "north line," anglewise with the line; all the others are placed square with it. The maps show the position of each.

On the eastern shore of Lake Memphremagog an astronomical station was estab-

lished, and on a large flat rock of granite, which happened to lie between the astronomical station and the boundary, was cut the following inscription:

A mark was cut upon the stone, as indicated by the dot upon the meridian line above, from which these measurements were made.

At Rouses Point a monument of wrought stone was set up at the intersection of the boundary by the meridian of the transit instrument used there by Major Graham, and an inscription was cut upon it stating the latitude and longitude, the names of the observer and his assistant, the names of the commissioners, and the territories divided.

To mark the position of the instruments used at the following astronomical stations along the west line, two monuments within a few feet of each other have been erected at each station, and they have been placed on the boundary line due north or south of the instrument, as the case may have been.

The stations are: Lake Memphremagog, Richford, John McCoy's, Trout River.

The boundary along the west line, though very far from being a straight line, is generally about half a mile north of the true parallel of latitude 45° from Halls Stream to Rouses Point. At about 28 miles west of Rouses Point it, however, crosses that parallel to the south until it reaches Chateaugay River, where it bends northward, and, crossing the parallel again about 4 miles cast of St. Regis, it strikes the St. Lawrence 151 feet north of 45°. At that point a large monument has been erected on the bank of the St. Lawrence. Two large monuments have also been erected, one on either side of the river Richelieu near Rouses Point.

No marks of the old line were to be found about St. Regis. It was therefore agreed to run a line due west from the last blaze which should be found in the woods on the east side of St. Regis. That blaze occurred about 1 mile east of the St. Regis River.

The maps, which exhibit the boundary on a scale of 4 inches to 1 statute nile, consist of 62 consecutive sheets of antiquarian paper as constructed by the British and of 61 as constructed by the American commission. A general map has also been constructed on a scale of 8 miles to 1 inch by the British and of 10 miles to 1 inch by the American commission, upon which the before-mentioned sheets are represented.

The following portions of the boundary have been laid down by the British commission, on detached maps, on a scale of 12 inches to 1 mile, which have been signed by both commissioners:

Grand Falls of the St. John, including the intersection of that river by the north line; islands of the St. John; the outlet of Lake Pohenagamook; the turning point of the boundary on the Northwest Branch of the St. John; the intersection of the Southwest Branch by the parallel of latitude 46° 25'; the source of the Southwest Branch; the source of Halls Stream; the intersection of Halls Stream by the west line; Rouses Point; St. Regis; Derby.

But similar maps have not been prepared by the American commission, because during the interval between the finishing of the maps of the British commission and those of the American it was thought that the maps already constructed upon a scale of 4 inches to 1 mile represented the boundary with sufficient clearness and accuracy.

The astronomical observations were begun at the Grand Falls early in June, 1843, and were carried up the St. John River to the Northwest Branch by a chain of stations, which, together with the results obtained, are tabulated in the appendix accompanying this report.

From the valley of the St. John an astronomical connection was made with Quebec, 66 and thence to Montreal, and so to Rouses Point. From Rouses Point a connection was obtained with Cambridge University, near Boston.

The astronomical stations on the west line were: Intersection of Halls Stream by the west line, Lake Memphremagog, Richford, Rouses Point, John McCoy's, Trout River, St. Regis.

Latitude was also obtained at an astronomical station established for the purpose at the head of the Connecticut.

Volumes containing the astronomical observations of both commissions are herewith submitted. From them it will be observed that the results for absolute longitude obtained by the British and American astronomers do not agree. It being a difference in no way affecting the survey of the boundary line, the undersigned do not feel called upon to attempt to reconcile it. The data upon which those results are based may be seen in the volumes of observations accompanying this report.

In the appendix will be found, in a tabular form, the following:

An abstract of the survey of the boundary along the north line; an abstract of the survey of the boundary along the southwest line; an abstract of the survey of the boundary along the south line; an abstract of the survey of the boundary along the highlands; an abstract of the survey of the boundary along the west line; the position of the monuments erected on the Southwest Branch of the St. John and on Halls Stream; the distribution of the islands of the St. John and the monuments on them; the guide lines and offsets run by each commission for the survey of the highlands; the azimuths of verification for the survey of the highlands; the latitudes and longitudes obtained from the astronomical observations; the comparative longitudes obtained, and the methods used for the purpose.

Upon comparing the maps of the two commissions it will be seen that the American commission numbers two monuments more than the British. Those are to be found, one on the "Fourth Island," in the river St. John, and the other on the highlands between the source of the Southwest Branch of the river St. John and the Kennebec road.

On the maps of the British commission representing the "west line" the name of the town of "*Derby*" has been improperly placed north of the line instead of south of it. Also, on the same maps the direction of Salmon River, near the western extremity of the "west line," has been incorrectly laid down from the boundary line northward. A direction has been given to it northeasterly instead of northwesterly.

The above two corrections the British commissioner is authorized to make on his maps after his return to England.

To avoid unnecessary delay in making their joint report, the undersigned have attached their signatures to the maps, although the lettering of some of the astronomical stations upon the maps of the American commission, as well as the alterations before mentioned in the maps of the British commission, are yet to be made; but in the maps of both the boundary has been laid down accurately and definitively, and the undersigned engage that it shall not be altered in any respect.

In conclusion the undersigned have the honor to report that the line of boundary described in the foregoing statement has been run, marked, and surveyed, and the accompanying maps faithfully constructed from that survey.

The undersigned take leave to add that the most perfect harmony has subsisted between the two commissions from first to last, and that no differences have arisen between the undersigned in the execution of the duties intrusted to them.

Signed and sealed in duplicate, at the city of Washington, this 28th day of June, A. D. 1847.

J. B. BUCKNALL ESTCOURT, [SEAL.] Lieutenant-Colonel, Her Britannic Majesty's Commissioner. ALBERT SMITH, [SEAL.] United States Commissioner.

NOTE.—The astronomical computations of the American commission not being completed, and it being unnecessary to defer the signing of the report on that

account, the American commissioner engages to transmit them, with any other papers or tables not yet finished, as soon as they shall be so, to the British commissioner, through the American minister resident in London, to whom, upon delivery of the documents, the British commissioner will give a receipt, to be transmitted to the American commissioner.

> J. B. BUCKNALL ESTCOURT, Lieutenant-Colonel, H. B. M. Commissioner of Boundary.

ALBERT SMITH, United States Commissioner.

WASHINGTON, August 18, 1842.

To the Senate of the United States:

I transmit to the Senate, for its consideration with a view to its ratification, a treaty of amity, commerce, and navigation with the Republic of Texas, negotiated at the seat of Government of the United States between the Secretary of State, duly empowered for that purpose, and the chargé d'affaires of that Republic.

In forming the first commercial treaty between the two Governments an anxious desire has been felt to introduce such provisions as should promote the interests of both countries. The immediate proximity of Texas to the United States and the consequent facility of intercourse, the nature of its principal agricultural production, and the relations which both countries bear to several large rivers which are boundaries between them, and which in some part of their course run within the territories of both, have caused peculiarities of condition and interests which it has been necessary to guard.

The treaty provides that Texas shall enjoy a right of deposit for such of her productions as may be introduced into the United States for exportation, but upon the condition that the Executive of the United States may prescribe such regulations as may be necessary for the proper enjoyment of the privilege within our territory. It was thought no more than reasonable to grant this facility to the trade of Texas, under such conditions as seem best calculated to guard against abuse or inconvenience.

The treaty further provides that raw cotton may be imported from either country into the other free of duties. In general it is not wise to enter into treaty stipulations respecting duties of import; they are usually much better left to the operation of general laws. But there are circumstances existing in this case which have been thought to justify a departure from the general rule, and the addition of it to the number of instances, not large, in which regulations of duties of imports have been made the subject of national compact.

The United States consume large quantities of raw cotton, but they are exporters of the article to a still greater extent. Texas, for the present at least, exports her whole crop. These exportations are, in

John Tyler

general, to the same foreign markets, and it is supposed to be of no considerable importance to the American producer whether he meets the Texan product at home or abroad.

On the other hand, it is thought that a useful commercial intercourse would be promoted in several ways by receiving the raw cotton of Texas at once into the United States free of duty. The tendency of such a measure is to bring to the United States, in the first instance, Texan cotton ultimately destined to European markets. The natural effect of this, it is supposed, will be to increase the business of the cities of the United States to the extent of this importation and exportation, and to secure a further degree of employment to the navigation of the country. But these are by no means all the benefits which may be reasonably expected from the arrangement. Texas, at least for a considerable time to come, must import all the manufactured articles and much of the supplies and provisions necessary for her use and consumption. These commodities she will be likely to obtain, if to be had, in the markets of the country in which she disposes of her main annual product. The manufactures of the North and East, therefore, and the grain and provisions of the Western States are likely to find in Texas a demand, increased by whatever augments intercourse between the two countries, and especially by whatever tends to give attraction to the cities of the United States as marts for the sale of her great and principal article of export.

As a security, however, against unforeseen results or occurrences, it has been thought advisable to give this article of the treaty a limitation of five years. JOHN TYLER.

WASHINGTON, August 23, 1842.

To the Senate of the United States:

A resolution of the Senate of the 21st of June last requested the President to communicate to the Senate, so far as he might deem it compatible with the public interests, what measures, if any, had been taken to obtain the recognition by the Mexican Government of such claims of American citizens as were laid before the late joint commission, but were not finally acted on by it, and the satisfaction of such claims as were admitted by said commission; also whether any facts had come to his knowledge calculated to induce a belief that any such claims had been rejected in consequence of the evidence thereof having been withheld by the Mexican Government, its officers or agents, and any other information which he might deem it expedient to communicate relative to said claims; and another resolution of the 6th instant requested the President, so far as he might deem it compatible with the public service, to communicate to the Senate the measures taken to obtain the performance of the stipulations contained in the convention with Mexico in relation to the awards made by the commissioners and umpire under said convention.

203I

In the present state of the correspondence and of the relations between the two Governments on these important subjects it is not deemed consistent with the public interest to communicate the information requested. The business engages earnest attention, and will be made the subject of a full communication to Congress at the earliest practicable period.

JOHN TYLER.

WASHINGTON, August 24, 1842.

To the Senate of the United States:

On the 15th day of April, 1842, in virtue of the sentence of a courtmartial regularly convened under orders from the Secretary of the Navy, which received my approval, John H. Clack, who was a captain in the Navy, was dismissed the service. Since the confirmation of that sentence a letter has been addressed by Mr. Paulding, late Secretary of the Navy, to Captain Clack, which leads to the belief that he had analyzed the charges made against Captain Clack, and for reasons which appeared to him satisfactory and which, according to his letter, he indorsed on the charges, disposed of the case by refusing to submit it to a court-martial.

Notwithstanding a diligent search has been made for this document, none such can be found; but the only paper in the office having reference to this subject is a letter addressed by Mr. Paulding to Lieutenant Buchanan, a copy of which, together with the original of that of Mr. P. to Captain C., is herewith communicated. I felt it, however, every way due to the high character of Mr. Paulding to consider the fact stated by him to be as well sustained by his declaration to that effect as if the record was found, and as the court-martial would not have been ordered by the present Secretary with the knowledge of the fact stated by Mr. Paulding, since it would have been improper to have reopened a case once finally disposed of, I have felt that it was alike due to the general service of the Navy as to Mr. Clack to nominate him for reappointment to the service.

I therefore nominate John H. Clack to be a captain in the Navy of the United States. JOHN TYLER.

WASHINGTON, August 25, 1842.

To the House of Representatives of the United States:

In answer to the resolution of the House of Representatives of the 11th of June last, upon the subject of claims of citizens of the United States against the Government of the Mexican Republic, I transmit a report from the Secretary of State and a copy of the report of the commissioners on the part of the United States under the late convention between the United States and that Republic.

JOHN TYLER.

VETO MESSAGES.

WASHINGTON, June 29, 1842.

To the House of Representatives of the United States:

I return the bill, which originated in the House of Representatives, entitled "An act to extend for a limited period the present laws for laying and collecting duties on imports," with the following objections:

It suspends—in other words, abrogates for the time—the provision of the act of 1833, commonly called the "compromise act." The only ground on which this departure from the solemn adjustment of a great and agitating question seems to have been regarded as expedient is the alleged necessity of establishing by legislative enactments rules and regulations for assessing the duties to be levied on imports after the 30th June according to the home valuation, and yet the bill expressly provides that "if before the 1st of August there be no further legislation upon the subject, the laws for laying and collecting duties shall be the same as though this act had not been passed." In other words, that the act of 1833, imperfect as it is considered, shall in that case continue to be and to be executed under such rules and regulations as previous statutes had prescribed or had enabled the executive department to prescribe for that purpose, leaving the supposed chasm in the revenue laws just as it was before.

I am certainly far from being disposed to deny that additional legislation upon the subject is very desirable; on the contrary, the necessity, as well as difficulty, of establishing uniformity in the appraisements to be made in conformity with the true intention of that act was brought to the notice of Congress in my message to Congress at the opening of its present session. But however sensible I may be of the embarrassments to which the Executive, in the absence of all aid from the superior wisdom of the Legislature, will be liable in the enforcement of the existing laws, I have not, with the sincerest wish to acquiesce in its expressed will, been able to persuade myself that the exigency of the occasion is so great as to justify me in signing the bill in question with my present views of its character and effects. The existing laws, as I am advised, are sufficient to authorize and enable the collecting officers, under the directions of the Secretary of the Treasury, to levy the duties imposed by the act of 1833.

That act was passed under peculiar circumstances, to which it is not necessary that I should do more than barely allude. Whatever may be, in theory, its character, I have always regarded it as importing the highest moral obligation. It has now existed for nine years unchanged in any essential particular, with as general acquiescence, it is believed, of the whole country as that country has ever manifested for any of her

wisely established institutions. It has insured to it the repose which always flows from truly wise and moderate counsels-a repose the more striking because of the long and angry agitations which preceded it. This salutary law proclaims in express terms the principle which, while it led to the abandonment of a scheme of indirect taxation founded on a false basis and pushed to dangerous excess, justifies any enlargement of duties that may be called for by the real exigencies of the public service. It provides "that duties shall be laid for the purpose of raising such revenue as may be necessary to an economical administration of the Government." It is therefore in the power of Congress to lay duties as high as its discretion may dictate for the necessary uses of the Government without infringing upon the objects of the act of 1833. I do not doubt that the exigencies of the Government do require an increase of the tariff of duties above 20 per cent, and I as little doubt that Congress may, above as well as below that rate, so discriminate as to give incidental protection to manufacturing industry, thus to make the burdens which it is compelled to impose upon the people for the purposes of Government productive of a double benefit. This most of the reasonable opponents of protective duties seem willing to concede, and, if we may judge from the manifestations of public opinion in all quarters, this is all that the manufacturing interests really require. I am happy in the persuasion that this double object can be most easily and effectually accomplished at the present juncture without any departure from the spirit and principle of the statute in question. The manufacturing classes have now an opportunity which may never occur again of permanently identifying their interests with those of the whole country, and making them, in the highest sense of the term, a national concern. The moment is propitious to the interests of the whole country in the introduction of harmony among all its parts and all its several interests. The same rate of imposts, and no more, as will most surely reestablish the public credit will secure to the manufacturer all the protection he ought to desire, with every prospect of permanence and stability which the hearty acquiescence of the whole country on a reasonable system can hold out to him.

But of this universal acquiescence, and the harmony and confidence and the many other benefits that will certainly result from it, I regard the suspension of the law for distributing the proceeds of the sales of the public lands as an indispensable condition. This measure is, in my judgment, called for by a large number, if not a great majority, of the people of the United States; by the state of the public credit and finances; by the critical posture of our various foreign relations; and, above all, by that most sacred of all duties—public faith. The act of September last, which provides for the distribution, couples it inseparably with the condition that it shall cease—first, in case of war; second, as soon and so long as the rate of duties shall for any reason whatever be raised above 20 per cent. Nothing can be more clear, express, or imperative than this language. It is in vain to allege that a deficit in the Treasury was known to exist and that means were taken to supply this deficit by loan when the act was passed. It is true that a loan was authorized at the same session during which the distribution law was passed, but the most sanguine of the friends of the two measures entertained no doubt but that the loan would be eagerly sought after and taken up by capitalists and speedily reimbursed by a country destined, as they hoped, soon to enjoy an overflowing prosperity. The very terms of the loan, making it redeemable in three years, demonstrate this beyond all cavil. Who at the time foresaw or imagined the possibility of the present real state of things, when a nation that has paid off her whole debt since the last peace, while all the other great powers have been increasing theirs, and whose resources, already so great, are yet but in the infancy of their development, should be compelled to haggle in the money market for a paltry sum not equal to one year's revenue upon her economical system? Tf the distribution law is to be indefinitely suspended, according not only to its own terms, but by universal consent, in the case of war, wherein are the actual exigencies of the country or the moral obligation to provide for them less under present circumstances than they could be were we actually involved in war? It appears to me to be the indispensable duty of all concerned in the administration of public affairs to see that a state of things so humiliating and so perilous should not last a moment longer than is absolutely unavoidable. Much less excusable should we be in parting with any portion of our available means, at least until the demands of the Treasury are fully supplied. But besides the urgency of such considerations, the fact is undeniable that the distribution act could not have become a law without the guaranty in the proviso of the act itself.

This connection, thus meant to be inseparable, is severed by the bill presented to me. The bill violates the principle of the acts of 1833 and September, 1841, by suspending the first and rendering for a time the last inoperative. Duties above 20 per cent are proposed to be levied, and yet the proviso in the distribution act is disregarded. The proceeds of the sales are to be distributed on the 1st of August, so that, while the duties proposed to be enacted exceed 20 per cent, no suspension of the distribution to the States is permitted to take place. To abandon the principle for a month is to open the way for its total abandonment. If such is not meant, why postpone at all? Why not let the distribution take place on the 1st of July if the law so directs (which, however, is regarded as questionable)? But why not have limited the provision to that effect? Is it for the accommodation of the Treasury? I see no reason to believe that the Treasury will be in better condition to meet the payment on the 1st of August than on the 1st of July.

The bill assumes that a distribution of the proceeds of the public lands is, by existing laws, to be made on the 1st day of July, 1842, notwithstanding there has been an imposition of duties on imports exceeding 20 per cent up to that day, and directs it to be made on the 1st of August next. It seems to me very clear that this conclusion is equally erroneous and dangerous, as it would divert from the Treasury a fund sacredly pledged for the general purposes of the Government in the event of a rate of duty above 20 per cent being found necessary for an economical administration of the Government.

The bill under consideration is designed only as a temporary measure; and thus a temporary measure, passed merely for the convenience of Congress, is made to affect the vital principle of an important act. If the proviso of the act of September, 1841, can be suspended for the whole period of a temporary law, why not for the whole period of a permanent law? In fact, a doubt may be well entertained, according to strict legal rules, whether the condition, having been thus expressly suspended by this bill and rendered inapplicable to a case where it would otherwise have clearly applied, will not be considered as ever after satisfied and gone. Without expressing any decided opinion on this point, I see enough in it to justify me in adhering to the law as it stands in preference to subjecting a condition so vitally affecting the peace of the country, and so solemnly enacted at a momentous crisis, and so steadfastly adhered to ever since, and so replete, if adhered to, with good to every interest of the country, to doubtful or captious interpretation.

In discharging the high duties thus imposed on me by the Constitution I repeat to the House my entire willingness to cooperate in all financial measures, constitutional and proper, which in its wisdom it may judge necessary and proper to reestablish the credit of the Government. I believe that the proceeds of the sales of the public lands being restored to the Treasury—or, more properly speaking, the proviso of the act of September, 1841, being permitted to remain in full force—a tariff of duties may easily be adjusted, which, while it will yield a revenue sufficient to maintain the Government in vigor by restoring its credit, will afford ample protection and infuse a new life into all our manufacturing establishments. The condition of the country calls for such legislatiou, and it will afford me the most sincere pleasure to cooperate in it.

JOHN TYLER.

WASHINGTON, August 9, 1842.

To the House of Representatives of the United States:

It is with unfeigned regret that I find myself under the necessity of returning to the House of Representatives with my objections a bill entitled "An act to provide revenue from imports, and to change and modify existing laws imposing duties on imports, and for other purposes." Nothing can be more painful to any individual called upon to perform the Chief Executive duties under our limited Constitution than to be constrained to withhold his assent from an important measure

adopted by the Legislature. Yet he would neither fulfill the high purposes of his station nor consult the true interests or the solemn will of the people-the common constituents of both branches of the Government-by yielding his well-considered, most deeply fixed, and repeatedly declared opinions on matters of great public concernment to those of a coordinate department without requesting that department seriously to reexamine the subject of their difference. The exercise of some independence of judgment in regard to all acts of legislation is plainly implied in the responsibility of approving them. At all times a duty, it becomes a peculiarly solemn and imperative one when the subjects passed upon by Congress happen to involve, as in the present instance, the most momentous issues, to affect variously the various parts of a great country, and to have given rise in all quarters to such a conflict of opinion as to render it impossible to conjecture with any certainty on which side the majority really is. Surely if the pause for reflection intended by the wise authors of the Constitution by referring the subject back to Congress for reconsideration be ever expedient and necessary it is precisely such a case as the present.

On the subject of distributing the proceeds of the sales of the public lands in the existing state of the finances it has been my duty to make known my settled convictions on various occasions during the present session of Congress. At the opening of the extra session, upward of twelve months ago, sharing fully in the general hope of returning prosperity and credit, I recommended such a distribution, but that recommendation was even then expressly coupled with the condition that the duties on imports should not exceed the rate of 20 per cent provided by the compromise act of 1833. These hopes were not a little encouraged and these views strengthened by the report of Mr. Ewing, then Secretary of the Treasury, which was shortly thereafter laid before Congress, in which he recommended the imposition of duties at the rate of 20 per cent ad valorem on all free articles, with specified exceptions, and stated "if this measure be adopted there will be received in the Treasury from customs in the last quarter of the present year (1841) \$5,300,000; in all of the year 1842, about \$22,500,000; and in the year 1843, after the final reduction under the act of March 2, 1833, about \$20,800,000;" and adds:

It is believed that after the heavy expenditures required by the public service in the present year shall have been provided for, the revenues which will accrue from that or a nearly approximate rate of duty will be sufficient to defray the expenses of the Government and leave a surplus to be annually applied to the gradual payment of the national debt, leaving the proceeds of *the public lands* to be disposed of as Congress shall see fit.

I was most happy that Congress at the time seemed entirely to concur in the recommendations of the Executive, and, anticipating the correctness of the Secretary's conclusions, and in view of an actual surplus,

John Tyler

passed the distribution act of the 4th September last, wisely limiting its operation by two conditions having reference, both of them, to a possible state of the Treasury different from that which had been anticipated by the Secretary of the Treasury and to the paramount necessities of the public service. It ordained that "if at any time during the existence of that act there should be an imposition of duties on imports inconsistent with the provision of the act of the 2d March, 1833, and beyond the rate of duties fixed by that act, to wit, 20 per cent on the value of such imports or any of them, then the distribution should be suspended, and should continue so suspended until that cause should be removed." $\mathbf{B}\mathbf{v}$ a previous clause it had, in a like spirit of wise and cautious patriotism. provided for another case, in which all are even now agreed, that the proceeds of the sales of the public lands should be used for the defense of the country. It was enacted that the act should continue and be in force until otherwise provided by law, unless the United States should become involved in war with any foreign power, in which event, from the commencement of hostilities, the act should be suspended until the cessation of hostilities.

Not long after the opening of the present session of Congress the unprecedented and extraordinary difficulties that have recently embarrassed the finances of the country began to assume a serious aspect. It soon became quite evident that the hopes under which the act of 4th September was passed, and which alone justified it in the eyes either of Congress who imposed or of the Executive who approved, the first of the two conditions just recited were not destined to be fulfilled. Under the pressure, therefore, of the embarrassments which had thus unexpectedly arisen it appeared to me that the course to be pursued had been clearly marked out for the Government by that act itself. The condition contemplated in it as requiring a suspension of its operation had occurred. It became necessary in the opinions of all to raise the rate of duties upon imports above 20 per cent; and with a view both to provide available means to meet present exigencies and to lay the foundation for a successful negotiation of a loan, I felt it incumbent on me to urge upon Congress to raise the duties accordingly, imposing them in a spirit of a wise discrimination for the twofold object of affording ample revenue for the Government and incidental protection to the various branches of domestic industry. I also pressed, in the most emphatic but respectful language I could employ, the necessity of making the land sales available to the Treasury, as the basis of public credit. I did not think that I could stand excused, much less justified, before the people of the United States, nor could I reconcile it to myself to recommend the imposition of additional taxes upon them without at the same time urging the employment of all the legitimate means of the Government toward satisfying its wants. These opinions were communicated in advance of any definitive action of Congress on the subject either of the tariff or

Messages and Papers of the Presidents

land sales, under a high sense of public duty and in compliance with an express injunction of the Constitution, so that if a collision, extremely to be deprecated, as such collisions always are, has seemingly arisen between the executive and legislative branches of the Government, it has assuredly not been owing to any capricious interference or to any want of a plain and frank declaration of opinion on the part of the former. Congress differed in its views with those of the Executive, as it had undoubtedly a right to do, and passed a bill virtually for a time repealing the proviso of the act of the 4th September, 1841. The bill was returned to the House in which it originated with my objections to its becoming a law. With a view to prevent, if possible, an open disagreement of opinion on a point so important, I took occasion to declare that I regarded it as an indispensable prerequisite to an increase of duties above 20 per cent that the act of the 4th September should remain unrepealed in its provisions. My reasons for that opinion were elaborately set forth in the message which accompanied the return of the bill. which no constitutional majority appears to have been found for passing into a law.

The bill which is now before me proposes in its twenty-seventh section the total repeal of one of the provisos in the act of September, and, while it increases the duties above 20 per cent, directs an unconditional distribution of the land proceeds. I am therefore subjected a second time in the period of a few days to the necessity of either giving my approval to a measure which, in my deliberate judgment, is in conflict with great public interests or of returning it to the House in which it originated with my objections. With all my anxiety for the passage of a law which would replenish an exhausted Treasury and furnish a sound and healthy encouragement to mechanical industry, I can not consent to do so at the sacrifice of the peace and harmony of the country and the clearest convictions of public duty.

For some of the reasons which have brought me to this conclusion I refer to my previous messages to Congress, and briefly subjoin the following:

1. The bill unites two subjects which, so far from having any affinity to one another, are wholly incongruous in their character. It is both a revenue and an appropriation bill. It thus imposes on the Executive, in the first place, the necessity of either approving that which he would reject or rejecting that which he might otherwise approve. This is a species of constraint to which the judgment of the Executive ought not, in my opinion, to be subjected. But that is not my only objection to the act in its present form. The union of subjects wholly dissimilar in their character in the same bill, if it grew into a practice, would not fail to lead to consequences destructive of all wise and conscientious legislation. Various measures, each agreeable only to a small minority, might by being thus united—and the more the greater chance of success—lead to

the passing of laws of which no single provision could if standing alone command a majority in its favor.

2. While the Treasury is in a state of extreme embarrassment, requiring every dollar which it can make available, and when the Government has not only to lay additional taxes, but to borrow money to meet pressing demands, the bill proposes to give away a fruitful source of revenue—...hich is the same thing as raising money by loan and taxation—not to meet the wants of the Government, but for distribution—a proceeding which I must regard as highly impolitic, if not unconstitutional.

A brief review of the present condition of the public finances will serve to illustrate the true condition of the Treasury and exhibit its actual necessities:

On the 5th of August (Friday last) there was in the Treasury, in round num-
bers
Necessary to be retained to meet trust funds
Interest on public debt due in October
To redeem Treasury notes and pay the interest 100,000
Land distribution under the act of the 4th of September, 1841
Leaving an available amount of

The Navy Department had drawn requisitions on the Treasury at that time to meet debts actually due, among which are bills under protest for \$1,414,000, thus leaving an actual deficit of \$444,000.

There was on hand about \$100,000 of unissued Treasury notes, assisted by the accruing revenue (amounting to about \$150,000 per week, exclusive of receipts on unpaid bonds), to meet requisitions for the Army and the demands of the civil list.

The withdrawal of the sum of \$640,000 to be distributed among the States, so soon as the statements and accounts can be made up and completed, by virtue of the provisions of the act of the 4th of September last (of which nearly a moiety goes to a few States, and only about \$383,000 is to be divided among all the States), while it adds materially to the embarrassments of the Treasury, affords to the States no decided relief.

No immediate relief from this state of things is anticipated unless (what would most deeply be deplored) the Government could be reconciled to the negotiation of loans already authorized by law at a rate of discount ruinous in itself and calculated most seriously to affect the public credit. So great is the depression of trade that even if the present bill were to become a law and prove to be productive some time would elapse before sufficient supplies would flow into the Treasury, while in the meantime its embarrassments would be continually augmented by the semiannual distribution of the land proceeds.

Indeed, there is but too much ground to apprehend that even if this bill were permitted to become a law—alienating, as it does, the proceeds of the land sales—an actual deficit in the Treasury would occur, which would more than probably involve the necessity of a resort to direct taxation.

Let it be also remarked that \$5,500,000 of the public debt becomes redeemable in about two years and a half, which at any sacrifice must be met, while the Treasury is always liable to demands for the payment of outstanding Treasury notes. Such is the gloomy picture which our financial department now presents, and which calls for the exercise of a rigid economy in the public expenditures and the rendering available of all the means within the control of the Government. I most respectfully submit whether this is a time to give away the proceeds of the land sales when the public lands constitute a fund which of all others may be made most useful in sustaining the public credit. Can the Government be generous and munificent to others when every dollar it can command is necessary to supply its own wants? And if Congress would not hesitate to suffer the provisions of the act of 4th September last to remain unrepealed in case the country was involved in war, is not the necessity for such a course now just as imperative as it would be then?

3. A third objection remains to be urged, which would be sufficient in itself to induce me to return the bill to the House with my objections. By uniting two subjects so incongruous as tariff and distribution it inevitably makes the fate of the one dependent upon that of the other in future contests of party. Can anything be more fatal to the merchant or manufacturer than such an alliance? What they most of all require is a system of moderate duties so arranged as to withdraw the tariff question, as far as possible, completely from the arena of political contention. Their chief want is permanency and stability. Such an increase of the tariff I believe to be necessary in order to meet the economical expenditures of Government. Such an increase, made in the spirit of moderation and judicious discrimination, would, I have no doubt, be entirely satisfactory to the great majority of the American people. In the way of accomplishing a measure so salutary and so imperatively demanded by every public interest, the legislative department will meet with a cordial cooperation on the part of the Executive. This is all that the manufacturer can desire, and it would be a burden readily borne by the people. But I can not too earnestly repeat that in order to be beneficial it must be permanent, and in order to be permanent it must command general acquiescence. But can such permanency be justly hoped for if the tariff question be coupled with that of distribution, as to which a serious conflict of opinion exists among the States and the people, and which enlists in its support a bare majority, if, indeed, there be a majority, of the two Houses of Congress? What permanency or stability can attach to a measure which, warring upon itself, gives away a fruitful source of revenue at the moment it proposes a large increase of taxes on the people? Is the manufacturer prepared to stake himself and his interests upon such an issue?

I know that it is urged (but most erroneously, in my opinion) that

instability is just as apt to be produced by retaining the public lands as a source of revenue as from any other cause, and this is ascribed to a constant fluctuation, as it is said, in the amount of sales. If there were anything in this objection, it equally applies to every imposition of duties on imports. The amount of revenue annually derived from duties is constantly liable to change. The regulations of foreign governments, the varying productiveness of other countries, periods of excitement in trade, and a great variety of other circumstances are constantly arising to affect the state of commerce, foreign and domestic, and, of consequence, the revenue levied upon it. The sales of the public domain in ordinary times are regulated by fixed laws which have their basis in a demand increasing only in the ratio of the increase of population. In recurring to the statistics connected with this subject it will be perceived that for a period of ten years preceding 1834 the average amount of land sales did not exceed \$2,000,000. For the increase which took place in 1834. 1835, and 1836 we are to look to that peculiar condition of the country which grew out of one of the most extraordinary excitements in business and speculation that has ever occurred in the history of commerce and It was the fruit of a wild spirit of adventure engendered by currency. a vicious system of credits, under the evils of which the country is still laboring, and which it is fondly hoped will not soon recur. Considering the vast amount of investments made by private individuals in the public lands during those three years, and which equaled \$43,000,000 (equal to more than twenty years' purchase), taking the average of sales of the ten preceding years, it may be safely asserted that the result of the public-land sales can hold out nothing to alarm the manufacturer with the idea of instability in the revenues and consequently in the course of the Government.

Under what appears to me, therefore, the soundest considerations of public policy, and in view of the interests of every branch of domestic industry, I return you the bill with these my objections to its becoming a law.

I take occasion emphatically to repeat my anxious desire to cooperate with Congress in the passing of a law which, while it shall assist in supplying the wants of the Treasury and reestablish public credit, shall afford to the manufacturing interests of the country all the incidental protection they require.

After all, the effect of what I do is substantially to call on Congress to reconsider the subject. If on such reconsideration a majority of twothirds of both Houses should be in favor of this measure, it will become a law notwithstanding my objections. In a case of clear and manifest error on the part of the President the presumption of the Constitution is that such majorities will be found. Should they be so found in this case, having conscientiously discharged my own duty I shall cheerfully acquiesce in the result. JOHN TYLER.

PROTEST.*

To the House of Representatives:

WASHINGTON, August 30, 1842.

By the Constitution of the United States it is provided that "every bill which shall have passed the House of Representatives and the Senate shall before it become a law be presented to the President of the United States; *if he approve*, he *shall* sign it; but if *not*, he *shall* return it with his objections to that House in which it shall have originated, who shall enter the objections at large upon the Journal and proceed to reconsider it."

In strict compliance with the positive obligation thus imposed upon me by the Constitution, not having been able to bring myself to approve a bill which originated in the House of Representatives entitled "An act to provide revenue from imports, and to change and modify existing laws imposing duties on imports, and for other purposes," I returned the same to the House with my objections to its becoming a law. These objections, which had entirely satisfied my own mind of the great impolicy, if not unconstitutionality, of the measure, were presented in the most respectful and even deferential terms. I would not have been so far forgetful of what was due from one department of the Government to another as to have intentionally employed in my official intercourse with the House any language that could be in the slightest degree offensive to those to whom it was addressed. If in assigning my objections to the bill I had so far forgotten what was due to the House of Representatives as to impugn its motives in passing the bill, I should owe, not only to that House, but to the country, the most profound apology. Such departure from propriety is, however, not complained of in any proceeding which the House has adopted. It has, on the contrary, been expressly made a subject of remark, and almost of complaint, that the language in which my dissent was couched was studiously guarded and cantions.

Such being the character of the official communication in question, I confess I was wholly unprepared for the course which has been pursued in regard to it. In the exercise of its power to regulate its own proceedings the House for the first time, it is believed, in the history of the Government thought proper to refer the message to a select committee of its own body for the purpose, as my respect for the House would have compelled me to infer, of deliberately weighing the objections urged against the bill by the Executive with a view to its own judgment upon the question of the final adoption or rejection of the measure.

Of the temper and feelings in relation to myself of some of the members selected for the performance of this duty I have nothing to say.

*The House of Representatives ordered that it be not entered on the Journal.

That was a matter entirely within the discretion of the House of Representatives. But that committee, taking a different view of its duty from that which I should have supposed had led to its creation, instead of confining itself to the objections urged against the bill availed itself of the occasion formally to arraign the motives of the President for others of his acts since his induction into office. In the absence of all proof and, as I am bound to declare, against all law or precedent in parliamentary proceedings, and at the same time in a manner which it would be difficult to reconcile with the comity hitherto sacredly observed in the intercourse between independent and coordinate departments of the Government, it has assailed my whole official conduct without the shadow of a pretext for such assault, and, stopping short of impeachment, has charged me, nevertheless, with offenses declared to deserve impeachment.

Had the extraordinary report which the committee thus made to the House been permitted to remain without the sanction of the latter, I should not have uttered a regret or complaint upon the subject. But unaccompanied as it is by any particle of testimony to support the charges it contains, without a deliberate examination, almost without any discussion, the House of Representatives has been pleased to adopt it as its own, and thereby to become my accuser before the country and before the world. The high character of such an accuser, the gravity of the charges which have been made, and the judgment pronounced against me by the adoption of the report upon a distinct and separate vote of the House leave me no alternative but to enter my solemn protest against this proceeding as unjust to myself as a man, as an invasion of my constitutional powers as Chief Magistrate of the American people, and as a violation in my person of rights secured to every citizen by the laws and the Constitution. That Constitution has intrusted to the House of Representatives the sole power of impeachment. Such impeachment is required to be tried before the most august tribunal known to our insti-The Senate of the United States, composed of the representatutions. tives of the sovereignty of the States, is converted into a hall of justice, and in order to insure the strictest observance of the rules of evidence and of legal procedure the Chief Justice of the United States, the highest judicial functionary of the land, is required to preside over its deliberations. In the presence of such a judicatory the voice of faction is presumed to be silent, and the sentence of guilt or innocence is pronounced under the most solemn sanctions of religion, of honor, and of law. To such a tribunal does the Constitution authorize the House of Representatives to carry up its accusations against any chief of the executive department whom it may believe to be guilty of high crimes and misdemeanors. Before that tribunal the accused is confronted with his accusers, and may demand the privilege, which the justice of the common law secures to the humblest citizen, of a full, patient, and impartial inquiry into the facts. upon the testimony of witnesses rigidly cross-examined and deposing in

Messages and Papers of the Presidents

the face of day. If such a proceeding had been adopted toward me, unjust as I should certainly have regarded it, I should, I trust, have met with a becoming constancy a trial as painful as it would have been undeserved. I would have manifested by a profound submission to the laws of my country my perfect faith in her justice, and, relying on the purity of my motives and the rectitude of my conduct, should have looked forward with confidence to a triumphant refutation in the presence of that country and by the solemn judgment of such a tribunal not only of whatever charges might have been formally preferred against me, but of all the calumnies of which I have hitherto been the unresisting victim. As it is, I have been accused without evidence and condemned without a hearing. As far as such proceedings can accomplish it, I am deprived of public confidence in the administration of the Government and denied even the boast of a good name—a name transmitted to me from a patriot father, prized as my proudest inheritance, and carefully preserved for those who are to come after me as the most precious of all earthly possessions. Ι am not only subjected to imputations affecting my character as an individual, but am charged with offenses against the country so grave and so heinous as to deserve public disgrace and disfranchisement. I am charged with violating pledges which I never gave, and, because I execute what I believe to be the law, with usurping powers not conferred by law, and, above all, with using the powers conferred upon the President by the Constitution from corrupt motives and for unwarrantable ends. And these charges are made without any particle of evidence to sustain them, and, as I solemnly affirm, without any foundation in truth.

Why is a proceeding of this sort adopted at this time? Is the occasion for it found in the fact that having been elected to the second office under the Constitution by the free and voluntary suffrages of the people, I have succeeded to the first according to the express provisions of the fundamental law of the same people? It is true that the succession of the Vice-President to the Chief Magistracy has never occurred before and that all prudent and patriotic minds have looked on this new trial of the wisdom and stability of our institutions with a somewhat anxious concern. I have been made to feel too sensibly the difficulties of my unprecedented position not to know all that is intended to be conveyed in the reproach cast upon a President without a party. But I found myself placed in this most responsible station by no usurpation or contrivance of my own. I was called to it, under Providence, by the supreme law of the land and the deliberately declared will of the people. It is by these that I have been clothed with the high powers which they have seen fit to confide to their Chief Executive and been charged with the solemn responsibility under which those powers are to be exercised. It is to them that I hold myself answerable as a moral agent for a free and conscientious discharge of the duties which they have imposed upon me. It is not as an individual merely that I am now called upon to resist

the encroachments of unconstitutional power. I represent the executive authority of the people of the United States, and it is in their name, whose mere agent and servant I am, and whose will declared in their fundamental law I dare not, even were I inclined, to disobey, that I protest against every attempt to break down the undoubted constitutional power of this department without a solemn amendment of that fundamental law.

I am determined to uphold the Constitution in this as in other respects to the utmost of my ability and in defiance of all personal consequences. What may happen to an individual is of little importance, but the Constitution of the country, or any one of its great and clear principles and provisions, is too sacred to be surrendered under any circumstances whatever by those who are charged with its protection and defense. Least of all should he be held guiltless who, placed at the head of one of the great departments of the Government, should shrink from the exercise of its unquestionable authority on the most important occasions and should consent without a struggle to efface all the barriers so carefully erected by the people to control and circumscribe the powers confided to their various agents. It may be desirable, as the majority of the House of Representatives has declared it is, that no such checks upon the will of the Legislature should be suffered to continue. This is a matter for the people and States to decide, but until they shall have decided it I shall feel myself bound to execute, without fear or favor, the law as it has been written by our predecessors.

I protest against this whole proceeding of the House of Representatives as ex parte and extrajudicial. I protest against it as subversive of the common right of all citizens to be condemned only upon a fair and impartial trial, according to law and evidence, before the country. I protest against it as destructive of all the comity of intercourse between the departments of this Government, and destined sooner or later to lead to conflicts fatal to the peace of the country and the integrity of the Con-I protest against it in the name of that Constitution which stitution. is not only my own shield of protection and defense, but that of every American citizen. I protest against it in the name of the people, by whose will I stand where I do, by whose authority I exercised the power which I am charged with having usurped, and to whom I am responsible for a firm and faithful discharge according to my own convictions of duty of the high stewardship confided to me by them. I protest against it in the name of all regulated liberty and all limited government as a proceeding tending to the utter destruction of the checks and balances of the Constitution and the accumulating in the hands of the House of Representatives, or a bare majority of Congress for the time being, an uncontrolled and despotic power. And I respectfully ask that this my protest may be entered upon the Journal of the House of Representatives as a solemn and formal declaration for all time to come against the injustice and unconstitutionality of such a proceeding.

JOHN TYLER.

SECOND ANNUAL MESSAGE.

WASHINGTON, December 6, 1842.

To the Senate and House of Representatives of the United States:

We have continued reason to express our profound gratitude to the Great Creator of All Things for numberless benefits conferred upon us as . a people. Blessed with genial seasons, the husbandman has his garners filled with abundance, and the necessaries of life, not to speak of its luxuries, abound in every direction. While in some other nations steady and industrious labor can hardly find the means of subsistence, the greatest evil which we have to encounter is a surplus of production beyond the home demand, which seeks, and with difficulty finds, a partial market in other regions. The health of the country, with partial exceptions, has for the past year been well preserved, and under their free and wise institutions the United States are rapidly advancing toward the consummation of the high destiny which an overruling Providence seems to have marked out for them. Exempt from domestic convulsion and at peace with all the world, we are left free to consult as to the best means of securing and advancing the happiness of the people. Such are the circumstances under which you now assemble in your respective chambers and which should lead us to unite in praise and thanksgiving to that great Being who made us and who preserves us as a nation.

I congratulate you, fellow-citizens, on the happy change in the aspect of our foreign affairs since my last annual message. Causes of complaint at that time existed between the United States and Great Britain which, attended by irritating circumstances, threatened most seriously the public peace. The difficulty of adjusting amicably the questions at issue between the two countries was in no small degree augmented by the lapse of time since they had their origin. The opinions entertained by the Executive on several of the leading topics in dispute were frankly set forth in the message at the opening of your late session. The appointment of a special minister by Great Britain to the United States with power to negotiate upon most of the points of difference indicated a desire on her part amicably to adjust them, and that minister was met by the Executive in the same spirit which had dictated his mission. The treaty consequent thereon having been duly ratified by the two Governments, a copy, together with the correspondence which accompanied it, is herewith communicated. I trust that whilst you may see in it nothing objectionable, it may be the means of preserving for an indefinite period the amicable relations happily existing between the two Governments. The question of peace or war between the United States and Great Britain is a question of the deepest interest, not only to themselves, but to the civilized world, since it is scarcely possible that a war could exist between them without endangering the peace of Christendom. The immediate effect of the treaty upon ourselves will be felt in the security afforded to mercantile enterprise, which, no longer apprehensive of interruption, adventures its speculations in the most distant seas, and, freighted with the diversified productions of every land, returns to bless our own. There is nothing in the treaty which in the slightest degree compromits the honor or dignity of either nation. Next to the settlement of the boundary line, which must always be a matter of difficulty between states as between individuals, the question which seemed to threaten the greatest embarrassment was that connected with the African slave trade.

By the tenth article of the treaty of Ghent it was expressly declared that—

Whereas the traffic in slaves is irreconcilable with the principles of humanity and justice, and whereas both His Majesty and the United States are desirous of continuing their efforts to promote its entire abolition, it is hereby agreed that both the contracting parties shall use their best endeavors to accomplish so desirable an object.

In the enforcement of the laws and treaty stipulations of Great Britain a practice had threatened to grow up on the part of its cruisers of subjecting to visitation ships sailing under the American flag, which, while it seriously involved our maritime rights, would subject to vexation a branch of our trade which was daily increasing, and which required the fostering care of Government. And although Lord Aberdeen in his correspondence with the American envoys at London expressly disclaimed all right to detain an American ship on the high seas, even if found with a cargo of slaves on board, and restricted the British pretension to a mere claim to visit and inquire, yet it could not well be discerned by the Executive of the United States how such visit and inquiry could be made without detention on the voyage and consequent interruption to the trade. It was regarded as the right of search presented only in a new form and expressed in different words, and I therefore felt it to be my duty distinctly to declare in my annual message to Congress that no such concession could be made, and that the United States had both the will and the ability to enforce their own laws and to protect their flag from being used for purposes wholly forbidden by those laws and obnoxious to the moral censure of the world. Taking the message as his letter of instructions, our then minister at Paris felt himself required to assume the same ground in a remonstrance which he felt it to be his duty to present to Mr. Guizôt, and through him to the King of the French, against what has been called the "quintuple treaty;" and his conduct in this respect met with the approval of this Government. In close conformity with these views the eighth article of the treaty was framed, which provides "that each nation shall keep afloat in the African seas a force not less than 80 guns, to act separately and apart, under

Messages and Papers of the Presidents

instructions from their respective Governments, and for the enforcement of their respective laws and obligations." From this it will be seen that the ground assumed in the message has been fully maintained at the same time that the stipulations of the treaty of Ghent are to be carried out in good faith by the two countries, and that all pretense is removed for interference with our commerce for any purpose whatever by a foreign government. While, therefore, the United States have been standing up for the freedom of the seas, they have not thought proper to make that a pretext for avoiding a fulfillment of their treaty stipulations or a ground for giving countenance to a trade reprobated by our laws. A similar arrangement by the other great powers could not fail to sweep from the ocean the slave trade without the interpolation of any new principle into the maritime code. We may be permitted to hope that the example thus set will be followed by some if not all of them. We thereby also afford suitable protection to the fair trader in those seas, thus fulfilling at the same time the dictates of a sound policy and complying with the claims of justice and humanity.

It would have furnished additional cause for congratulation if the treaty could have embraced all subjects calculated in future to lead to a misunderstanding between the two Governments. The Territory of the United States commonly called the Oregon Territory, lying on the Pacific Ocean north of the forty-second degree of latitude, to a portion of which Great Britain lays claim, begins to attract the attention of our fellow-citizens, and the tide of population which has reclaimed what was so lately an unbroken wilderness in more contiguous regions is preparing to flow over those vast districts which stretch from the Rocky Mountains to the Pacific Ocean. In advance of the acquirement of individual rights to these lands, sound policy dictates that every effort should be resorted to by the two Governments to settle their respective claims. It became manifest at an early hour of the late negotiations that any attempt for the time being satisfactorily to determine those rights would lead to a protracted discussion, which might embrace in its failure other more pressing matters, and the Executive did not regard it as proper to waive all the advantages of an honorable adjustment of other difficulties of great magnitude and importance because this, not so immediately pressing, stood in the way. Although the difficulty referred to may not for several years to come involve the peace of the two countries, yet I shall not delay to urge on Great Britain the importance of its early settlement. Nor will other matters of commercial importance to the two countries be overlooked, and I have good reason to believe that it will comport with the policy of England, as it does with that of the United States, to seize upon this moment, when most of the causes of irritation have passed away, to cement the peace and amity of the two countries by wisely removing all grounds of probable future collision.

With the other powers of Europe our relations continue on the most

amicable footing. Treaties now existing with them should be rigidly observed, and every opportunity compatible with the interests of the United States should be seized upon to enlarge the basis of commercial intercourse. Peace with all the world is the true foundation of our policy, which can only be rendered permanent by the practice of equal and impartial justice to all. Our great desire should be to enter only into that rivalry which looks to the general good in the cultivation of the sciences, the enlargement of the field for the exercise of the mechanical arts, and the spread of commerce—that great civilizer—to every land and sea. Carefully abstaining from interference in all questions exclusively referring themselves to the political interests of Europe, we may be permitted to hope an equal exemption from the interference of European Governments in what relates to the States of the American continent.

On the 23d of April last the commissioners on the part of the United States under the convention with the Mexican Republic of the 11th of April, 1839, made to the proper Department a final report in relation to the proceedings of the commission. From this it appears that the total amount awarded to the claimants by the commissioners and the umpire appointed under that convention was \$2,026,079.68. The arbiter having considered that his functions were required by the convention to terminate at the same time with those of the commissioners, returned to the board, undecided for want of time, claims which had been allowed by the American commissioners to the amount of \$928,620.88. Other claims, in which the amount sought to be recovered was \$3,336,837.05, were submitted to the board too late for its consideration. The minister of the United States at Mexico has been duly authorized to make demand for payment of the awards according to the terms of the convention and the provisions of the act of Congress of the 12th of June, 1840. He has also been instructed to communicate to that Government the expectations of the Government of the United States in relation to those claims which were not disposed of according to the provisions of the convention, and all others of citizens of the United States against the Mexican Government. He has also been furnished with other instructions, to be followed by him in case the Government of Mexico should not find itself in a condition to make present payment of the amount of the awards in specie or its equivalent.

I am happy to be able to say that information which is esteemed favorable both to a just satisfaction of the awards and a reasonable provision for other claims has been recently received from Mr. Thompson, the minister of the United States, who has promptly and efficiently executed the instructions of his Government in regard to this important subject.

The citizeus of the United States who accompanied the late Texan expedition to Santa Fe, and who were wrongfully taken and held as prisoners of war in Mexico, have all been liberated.

A correspondence has taken place between the Department of State

and the Mexican minister of foreign affairs upon the complaint of Mexico that citizens of the United States were permitted to give aid to the inhabitants of Texas in the war existing between her and that Republic. Copies of this correspondence are herewith communicated to Congress, together with copies of letters on the same subject addressed to the diplomatic corps at Mexico by the American minister and the Mexican secretary of state.

Mexico has thought proper to reciprocate the mission of the United States to that Government by accrediting to this a minister of the same rank as that of the representative of the United States in Mexico. From the circumstances connected with his mission favorable results are anticipated from it. It is so obviously for the interest of both countries as neighbors and friends that all just causes of mutual dissatisfaction should be removed that it is to be hoped neither will omit or delay the employment of any practicable and honorable means to accomplish that end.

The affairs pending between this Government and several others of the States of this hemisphere formerly under the dominion of Spain have again within the past year been materially obstructed by the military revolutions and conflicts in those countries.

The ratifications of the treaty between the United States and the Republic of Ecuador of the 13th of June, 1839, have been exchanged, and that instrument has been duly promulgated on the part of this Government. Copies are now communicated to Congress with a view to enable that body to make such changes in the laws applicable to our intercourse with that Republic as may be deemed requisite.

Provision has been made by the Government of Chile for the payment of the claim on account of the illegal detention of the brig *Warrior* at Coquimbo in 1820. This Government has reason to expect that other claims of our citizens against Chile will be hastened to a final and satisfactory close.

The Empire of Brazil has not been altogether exempt from those convulsions which so constantly afflict the neighboring republics. Disturbances which recently broke out are, however, now understood to be quieted. But these occurrences, by threatening the stability of the governments, or by causing incessant and violent changes in them or in the persons who administer them, tend greatly to retard provisions for a just indennity for losses and injuries suffered by individual subjects or citizens of other states. The Government of the United States will feel it to be its duty, however, to consent to no delay not unavoidable in making satisfaction for wrongs and injuries sustained by its own citizens. Many years having in some cases elapsed, a decisive and effectual course of proceeding will be demanded of the respective governments against whom claims have been preferred.

The vexatious, harassing, and expensive war which so long prevailed with the Indian tribes inhabiting the peninsula of Florida has happily

John Tyler

been terminated, whereby our Army has been relieved from a service of the most disagreeable character and the Treasury from a large expenditure. Some casual outbreaks may occur, such as are incident to the close proximity of border settlers and the Indians, but these, as in all other cases, may be left to the care of the local authorities, aided when occasion may require by the forces of the United States. A sufficient number of troops will be maintained in Florida so long as the remotest apprehensions of danger shall exist, yet their duties will be limited rather to the garrisoning of the necessary posts than to the maintenance of active hostilities. It is to be hoped that a territory so long retarded in its growth will now speedily recover from the evils incident to a protracted war, exhibiting in the increased amount of its rich productions true evidences of returning wealth and prosperity. By the practice of rigid justice toward the numerous Indian tribes residing within our territorial limits and the exercise of a parental vigilance over their interests, protecting them against fraud and intrusion, and at the same time using every proper expedient to introduce among them the arts of civilized life, we may fondly hope not only to wean them from their love of war, but to inspire them with a love for peace and all its avocations. With several of the tribes great progress in civilizing them has already been made. The schoolmaster and the missionary are found side by side, and the remnants of what were once numerous and powerful nations may yet be preserved as the builders up of a new name for themselves and their posterity.

The balance in the Treasury on the 1st of January, 1842, exclusive of the amount deposited with the States, trust funds, and indemnities, was \$230,483.68. The receipts into the Treasury during the three first quarters of the present year from all sources amount to \$26,616,593.78, of which more than fourteen millions were received from customs and about one million from the public lands. The receipts for the fourth quarter are estimated at nearly eight millions, of which four millions are expected from customs and three millions and a half from loans and Treasury notes. The expenditures of the first three quarters of the present year exceed twenty-six millions, and those estimated for the fourth quarter amount to about eight millions; and it is anticipated there will be a deficiency of half a million on the 1st of January next, but that the amount of outstanding warrants (estimated at \$800,000) will leave an actual balance of about \$224,000 in the Treasury. Among the expenditures of this year are more than eight millions for the public debt and about \$600,000 on account of the distribution to the States of the proceeds of sales of the public lands.

The present tariff of duties was somewhat hastily and hurriedly passed near the close of the late session of Congress. That it should have defects can therefore be surprising to no one. To remedy such defects as may be found to exist in any of its numerous provisions will not

fail to claim your serious attention. It may well merit inquiry whether the exaction of all duties in cash does not call for the introduction of a system which has proved highly beneficial in countries where it has been adopted. I refer to the warehousing system. The first and most prominent effect which it would produce would be to protect the market alike against redundant or deficient supplies of foreign fabrics, both of which in the long run are injurious as well to the manufacturer as the importer. The quantity of goods in store being at all times readily known, it would enable the importer with an approach to accuracy to ascertain the actual wants of the market and to regulate himself accordingly. If, however, he should fall into error by importing an excess above the public wants, he could readily correct its evils by availing himself of the benefits and advantages of the system thus established. In the storehouse the goods imported would await the demand of the market and their issues would be governed by the fixed principles of demand and supply. Thus an approximation would be made to a steadiness and uniformity of price, which if attainable would conduce to the decided advantage of mercantile and mechanical operations.

The apprehension may be well entertained that without something to ameliorate the rigor of cash payments the entire import trade may fall into the hands of a few wealthy capitalists in this country and in Europe. The small importer, who requires all the money he can raise for investments abroad, and who can but ill afford to pay the lowest duty, would have to subduct in advance a portion of his funds in order to pay the duties, and would lose the interest upon the amount thus paid for all the time the goods might remain unsold, which might absorb his profits. The rich capitalist, abroad as well as at home, would thus possess after a short time an almost exclusive monopoly of the import trade, and laws designed for the benefit of all would thus operate for the benefit of a few-a result wholly uncongenial with the spirit of our institutions and antirepublican in all its tendencies. The warehousing system would enable the importer to watch the market and to select his own time for offering his goods for sale. A profitable portion of the carrying trade in articles entered for the benefit of drawback must also be most seriously affected without the adoption of some expedient to relieve the cash system. The warehousing system would afford that relief, since the carrier would have a safe recourse to the public storehouses and might without advancing the duty reship within some reasonable period to foreign ports. A further effect of the measure would be to supersede the system of drawbacks, thereby effectually protecting the Government against fraud, as the right of debenture would not attach to goods after their withdrawal from the public stores.

In revising the existing tariff of duties, should you deem it proper to do so at your present session, I can only repeat the suggestions and reconmendations which upon several occasions I have heretofore felt it to

be my duty to offer to Congress. The great primary and controlling interest of the American people is union-union not only in the mere forms of government, forms which may be broken, but union founded in an attachment of States and individuals for each other. This union in sentiment and feeling can only be preserved by the adoption of that course of policy which, neither giving exclusive benefits to some nor imposing unnecessary burthens upon others, shall consult the interests of all by pursuing a course of moderation and thereby seeking to harmonize public opinion, and causing the people everywhere to feel and to know that the Government is careful of the interests of all alike. Nor is there any subject in regard to which moderation, connected with a wise discrimination, is more necessary than in the imposition of duties on imports. Whether reference be had to revenue, the primary object in the imposition of taxes, or to the incidents which necessarily flow from their imposition, this is entirely true. Extravagant duties defeat their end and object, not only by exciting in the public mind an hostility to the manufacturing interests, but by inducing a system of smuggling on an extensive scale and the practice of every manner of fraud upon the revenue, which the utmost vigilance of Government can not effectually suppress. An opposite course of policy would be attended by results essentially different, of which every interest of society, and none more than those of the manufacturer, would reap important advantages. Among the most striking of its benefits would be that derived from the general acquiescence of the country in its support and the consequent permanency and stability which would be given to all the operations of industry. It can not be too often repeated that no system of legislation can be wise which is fluctuating and uncertain. No interest can thrive under it. The prudent capitalist will never adventure his capital in manufacturing establishments, or in any other leading pursuit of life, if there exists a state of uncertainty as to whether the Government will repeal to-morrow what it has enacted to-day. Fitful profits, however high, if threatened with a ruinous reduction by a vacillating policy on the part of Government, will scarcely tempt him to trust the money which he has acquired by a life of labor upon the uncertain adventure. I therefore, in the spirit of conciliation, and influenced by no other desire than to rescue the great interests of the country from the vortex of political contention, and in the discharge of the high and solemn duties of the place which I now occupy, recommend moderate duties, imposed with a wise discrimination as to their several objects, as being not only most likely to be durable, but most advantageous to every interest of society.

The report of the Secretary of the War Department exhibits a very full and satisfactory account of the various and important interests committed to the charge of that officer. It is particularly gratifying to find that the expenditures for the military service are greatly reduced in amount—that a strict system of economy has been introduced into the

service and the abuses of past years greatly reformed. The fortifications on our maritime frontier have been prosecuted with much vigor, and at many points our defenses are in a very considerable state of for-The suggestions in reference to the establishment of means wardness. of communication with our territories on the Pacific and to the surveys so essential to a knowledge of the resources of the intermediate country are entitled to the most favorable consideration. While I would propose nothing inconsistent with friendly negotiations to settle the extent of our claims in that region, yet a prudent forecast points out the necessity of such measures as may enable us to maintain our rights. The arrangements made for preserving our neutral relations on the boundary between us and Texas and keeping in check the Indians in that quarter will be maintained so long as circumstances may require. For several years angry contentions have grown out of the disposition directed by law to be made of the mineral lands held by the Government in several of the States. The Government is constituted the landlord, and the citizens of the States wherein lie the lands are its tenants. The relation is an unwise one, and it would be much more conducive of the public interest that a sale of the lands should be made than that they should remain in their present condition. The supply of the ore would be more abundantly and certainly furnished when to be drawn from the enterprise and the industry of the proprietor than under the present system.

The recommendations of the Secretary in regard to the improvements of the Western waters and certain prominent harbors on the Lakes merit, and I doubt not will receive, your serious attention. The great importance of these subjects to the prosperity of the extensive region referred to and the security of the whole country in time of war can not escape observation. The losses of life and property which annually occur in the navigation of the Mississippi alone because of the dangerous obstructions in the river make a loud demand upon Congress for the adoption of efficient measures for their removal.

The report of the Secretary of the Navy will bring you acquainted with that important branch of the public defenses. Considering the already vast and daily increasing commerce of the country, apart from the exposure to hostile inroad of an extended seaboard, all that relates to the Navy is calculated to excite particular attention. Whatever tends to add to its efficiency without entailing unnecessary charges upon the Treasury is well worthy of your serious consideration. It will be seen that while an appropriation exceeding by more than a million the appropriations of the current year is asked by the Secretary, yet that in this sum is proposed to be included \$400,000 for the purchase of clothing, which when once expended will be annually reimbursed by the sale of the clothes, and will thus constitute a perpetual fund without any new appropriation to the same object. To this may also be added \$50,000 asked to cover the arrearages of past years and \$250,000 in order to maintain a competent squadron on the coast of Africa; all of which when deducted will reduce the expenditures nearly within the limits of those of the current year. While, however, the expenditures will thus remain very nearly the same as of the antecedent year, it is proposed to add greatly to the operations of the marine, and in lieu of only 25 ships in commission and but little in the way of building, to keep with the same expenditure 41 vessels afloat and to build 12 ships of a small class.

A strict system of accountability is established and great pains are taken to insure industry, fidelity, and economy in every department of duty. Experiments have been instituted to test the quality of various materials, particularly copper, iron, and coal, so as to prevent fraud and imposition.

It will appear by the report of the Postmaster-General that the great point which for several years has been so much desired has during the current year been fully accomplished. The expenditures of the Department for current service have been brought within its income without lessening its general usefulness. There has been an increase of revenue equal to \$166,000 for the year 1842 over that of 1841, without, as it is believed, any addition having been made to the number of letters and newspapers transmitted through the mails. The post-office laws have been honestly administered, and fidelity has been observed in accounting for and paying over by the subordinates of the Department the moneys which have been received. For the details of the service I refer you to the report.

I flatter myself that the exhibition thus made of the condition of the public administration will serve to convince you that every proper attention has been paid to the interests of the country by those who have been called to the heads of the different Departments. The reduction in the annual expenditures of the Government already accomplished furnishes a sure evidence that economy in the application of the public moneys is regarded as a paramount duty.

At peace with all the world, the personal liberty of the citizen sacredly maintained and his rights secured under political institutious deriving all their authority from the direct sanction of the people, with a soil fertile almost beyond example and a country blessed with every diversity of climate and production, what remains to be done in order to advance the happiness and prosperity of such a people? Under ordinary circumstances this inquiry could readily be answered. The best that probably could be done for a people inhabiting such a country would be to fortify their peace and security in the prosecution of their various pursuits by guarding them against invasion from without and violence from within. The rest for the greater part might be left to their own energy and enterprise. The chief embarrassments which at the moment exhibit themselves have arisen from overaction, and the most difficult task which remains to be accomplished is that of correcting and overcoming its effects. Between the years 1833 and 1838 additions were made to bank capital and bank issues, in the form of notes designed for circulation, to an extent enormously great. The question seemed to be not how the best currency could be provided, but in what manner the greatest amount of bank paper could be put in circulation. Thus a vast amount of what was called money-since for the time being it answered the purposes of money-was thrown upon the country, an overissue which was attended, as a necessary consequence, by an extravagant increase of the prices of all articles of property, the spread of a speculative mania all over the country, and has finally ended in a general indebtedness on the part of States and individuals, the prostration of public and private credit, a depreciation in the market value of real and personal estate. and has left large districts of country almost entirely without any circulating medium. In view of the fact that in 1830 the whole banknote circulation within the United States amounted to but \$61,323,898, according to the Treasury statements, and that an addition had been made thereto of the enormous sum of \$88,000,000 in seven years (the circulation on the 1st of January, 1837, being stated at \$149,185,890). aided by the great facilities afforded in obtaining loans from European capitalists, who were seized with the same speculative mania which prevailed in the United States, and the large importations of funds from abroad-the result of stock sales and loans-no one can be surprised at the apparent but unsubstantial state of prosperity which everywhere prevailed over the land; and as little cause of surprise should be felt at the present prostration of everything and the ruin which has befallen so many of our fellow-citizens in the sudden withdrawal from circulation of so large an amount of bank issues since 1837-exceeding, as is believed, the amount added to the paper currency for a similar period antecedent to 1837-it ceases to be a matter of astonishment that such extensive shipwreck should have been made of private fortunes or that difficulties should exist in meeting their engagements on the part of the debtor States; apart from which, if there be taken into account the immense losses sustained in the dishonor of numerous banks, it is less a matter of surprise that insolvency should have visited many of our fellowcitizens than that so many should have escaped the blighting influences of the times.

In the solemn conviction of these truths and with an ardent desire to meet the pressing necessities of the country, I felt it to be my duty to cause to be submitted to you at the commencement of your last session the plan of an exchequer, the whole power and duty of maintaining which in purity and vigor was to be exercised by the representatives of the people and the States, and therefore virtually by the people themselves. It was proposed to place it under the control and direction of a Treasury board to consist of three commissioners, whose duty it should be to see that the law of its creation was faithfully executed and that

FREMONT PLACING FLAG ON THE ROCKIES

FREMONT, THE PATHFINDER

Under the authority of the United States Government, John Charles Fremont, in 1842, began the exploration of an overland route to the Pacific Ocean. When the discovery of gold in 1849 precipitated the great emigration his pathfinding was of incalculable value.

The picture represents him scaling Fremont's Peak in the Rocky Mountains, the highest point in the Wind River Range. In his Journal he says:

"I sprang upon the summit and another step would have precipitated me into an immense snowfall 500 feet below. To the edge of this field was a sheer icy precipice. I stood on a narrow crest about 3 feet in width. We unfurled the national flag to wave in the breeze where never flag waved before. We had climbed the loftiest peak of the Rocky Mountains and looked down upon the snow 1,000 feet below, and, standing where never human foot had stood before, felt the exultation of first explorers."

Fremont's biography occurs in the Biographic Index, under the heading "Fremont, John Charles," and there are several references to presidential remarks concerning him. He laid down the road to California and Oregon. References to the headings "California" and "Oregon" will provide interesting reading, both in the Encyclopedic articles and in presidential discussions concerning those sections. the great end of supplying a paper medium of exchange at all times convertible into gold and silver should be attained. The board thus constituted was given as much permanency as could be imparted to it without endangering the proper share of responsibility which should attach to all public agents. In order to insure all the advantages of a well-matured experience, the commissioners were to hold their offices for the respective periods of two, four, and six years, thereby securing at all times in the management of the exchequer the services of two men of experience; and to place them in a condition to exercise perfect independence of mind and action it was provided that their removal should only take place for actual incapacity or infidelity to the trust, and to be followed by the President with an exposition of the causes of such removal, should it occur. It was proposed to establish subordinate boards in each of the States, under the same restrictions and limitations of the power of removal, which, with the central board, should receive, safely keep, and disburse the public moneys. And in order to furnish a sound paper medium of exchange the exchequer should retain of the revenues of the Government a sum not to exceed \$5,000,000 in specie, to be set apart as required by its operations, and to pay the public creditor at his own option either in specie or Treasury notes of denominations not less than \$5 nor exceeding \$100, which notes should be redeemed at the several places of issue, and to be receivable at all times and everywhere in payment of Government dues, with a restraint upon such issue of bills that the same should not exceed the maximum of \$15,000,000. In order to guard against all the hazards incident to fluctuations in trade, the Secretary of the Treasury was invested with authority to issue \$5,000,000 of Government stock, should the same at any time be regarded as necessary in order to place beyond hazard the prompt redemption of the bills which might be thrown into circulation; thus in fact making the issue of \$15,000,000 of exchequer bills rest substantially on \$10,000,000, and keeping in circulation never more than one and one-half dollars for every dollar in specie. When to this it is added that the bills are not only everywhere receivable in Government dues, but that the Government itself would be bound for their ultimate redemption, no rational doubt can exist that the paper which the exchequer would furnish would readily enter into general circulation and be maintained at all times at or above par with gold and silver, thereby realizing the great want of the age and fulfilling the wishes of the people. In order to reimburse the Government the expenses of the plan, it was proposed to invest the exchequer with the limited authority to deal in bills of exchange (unless prohibited by the State in which an agency might be situated) having only thirty days to run and resting on a fair and bona fide basis. The legislative will on this point might be so plainly announced as to avoid all pretext for partiality or favoritism. It was furthermore proposed to invest this Treasury agent with authority to receive on deposit to a limited amount the specie funds of individuals and to grant certificates therefor to be redeemed on presentation, under the idea, which is believed to be well founded, that such certificates would come in aid of the exchequer bills in supplying a safe and ample paper circulation. Or if in place of the contemplated dealings in exchange the exchequer should be authorized not only to exchange its bills for actual deposits of specie, but, for specie or its equivalent, to sell drafts, charging therefor a small but reasonable premium, I can not doubt but that the benefits of the law would be speedily manifested in the revival of the credit, trade, and business of the whole country. Entertaining this opinion, it becomes my duty to urge its adoption upon Congress by reference to the strongest considerations of the public interests, with such alterations in its details as Congress may in its wisdom see fit to make.

I am well aware that this proposed alteration and amendment of the laws establishing the Treasury Department has encountered various objections, and that among others it has been proclaimed a Government bank of fearful and dangerous import. It is proposed to confer upon it no extraordinary power. It purports to do no more than pay the debts of the Government with the redeemable paper of the Government, in which respect it accomplishes precisely what the Treasury does daily at this time in issuing to the public creditors the Treasury notes which under law it is authorized to issue. It has no resemblance to an ordinary bank, as it furnishes no profits to private stockholders and lends no capital to individuals. If it be objected to as a Government bank and the objection be available, then should all the laws in relation to the Treasury be repealed and the capacity of the Government to collect what is due to it or pay what it owes be abrogated.

This is the chief purpose of the proposed exchequer, and surely if in the accomplishment of a purpose so essential it affords a sound circulating medium to the country and facilities to trade it should be regarded as no slight recommendation of it to public consideration. Properly guarded by the provisions of law, it can run into no dangerous evil, nor can any abuse arise under it but such as the Legislature itself will be answerable for if it be tolerated, since it is but the creature of the law and is susceptible at all times of modification, amendment, or repeal at the pleasure of Congress. I know that it has been objected that the system would be liable to be abused by the Legislature, by whom alone it could be abused, in the party conflicts of the day; that such abuse would manifest itself in a change of the law which would authorize an excessive issue of paper for the purpose of inflating prices and winning popular favor. To that it may be answered that the ascription of such a motive to Congress is altogether gratuitous and inadmissible. The theory of our institutions would lead us to a different conclusion. But a perfect security against a proceeding so reckless would be found to exist in the very nature of things. The political party which should be so blind to the true interests of the country as to resort to such an expedient

2060 e fact that the moment

would inevitably meet with final overthrow in the fact that the moment the paper ceased to be convertible into specie or otherwise promptly redeemed it would become worthless, and would in the end dishonor the Government, involve the people in ruin and such political party in hopeless disgrace. At the same time, such a view involves the utter impossibility of furnishing any currency other than that of the precious metals; for if the Government itself can not forego the temptation of excessive paper issues what reliance can be placed in corporations upon whom the temptations of individual aggrandizement would most strongly operate? The people would have to blame none but themselves for any injury that might arise from a course so reckless, since their agents would be the wrongdoers and they the passive spectators.

There can be but three kinds of public currency-first, gold and silver; second, the paper of State institutions; or, third, a representative of the precious metals provided by the General Government or under its authority. The subtreasury system rejected the last in any form, and as it was believed that no reliance could be placed on the issues of local institutions for the purposes of general circulation it necessarily and unavoidably adopted specie as the exclusive currency for its own use; and this must ever be the case unless one of the other kinds be used. The choice in the present state of public sentiment lies between an exclusive specie currency on the one hand and Government issues of some kind on That these issues can not be made by a chartered instituthe other. tion is supposed to be conclusively settled. They must be made, then, directly by Government agents. For several years past they have been thus made in the form of Treasury notes, and have answered a valuable purpose. Their usefulness has been limited by their being transient and temporary; their ceasing to bear interest at given periods necessarily causes their speedy return and thus restricts their range of circulation, and being used only in the disbursements of Government they can not reach those points where they are most required. By rendering their use permanent, to the moderate extent already mentioned, by offering no inducement for their return and by exchanging them for coin and other values, they will constitute to a certain extent the general currency so much needed to maintain the internal trade of the country. And this is the exchequer plan so far as it may operate in furnishing a currency.

I can not forego the occasion to urge its importance to the credit of the Government in a financial point of view. The great necessity of resorting to every proper and becoming expedient in order to place the Treasury on a footing of the highest respectability is entirely obvious. The credit of the Government may be regarded as the very soul of the Government itself—a principle of vitality without which all its movements are languid and all its operations embarrassed. In this spirit the Executive felt itself bound by the most imperative sense of duty to submit

to Congress at its last session the propriety of making a specific pledge of the land fund as the basis for the negotiation of the loans authorized to be contracted. I then thought that such an application of the public domain would without doubt have placed at the command of the Government ample funds to relieve the Treasury from the temporary embarrassments under which it labored. American credit has suffered a considerable shock in Europe from the large indebtedness of the States and the temporary inability of some of them to meet the interest on their debts. The utter and disastrous prostration of the United States Bank of Pennsylvania had contributed largely to increase the sentiment of distrust by reason of the loss and ruin sustained by the holders of its stock, a large portion of whom were foreigners and many of whom were alike ignorant of our political organization and of our actual responsibilities.

It was the anxious desire of the Executive that in the effort to negotiate the loan abroad the American negotiator might be able to point the money lender to the fund mortgaged for the redemption of the principal and interest of any loan he might contract, and thereby vindicate the Government from all suspicion of bad faith or inability to meet its engagements. Congress differed from the Executive in this view of the subject. It became, nevertheless, the duty of the Executive to resort to every expedient in its power to do so.

After a failure in the American market a citizen of high character and talent was sent to Europe, with no better success; and thus the mortifying spectacle has been presented of the inability of this Government to obtain a loan so small as not in the whole to amount to more than onefourth of its ordinary annual income, at a time when the Governments of Europe, although involved in debt and with their subjects heavily burthened with taxation, readily obtained loans of any amount at a greatly reduced rate of interest. It would be unprofitable to look further into this anomalous state of things, but I can not conclude without adding that for a Government which has paid off its debts of two wars with the largest maritime power of Europe, and now owing a debt which is almost next to nothing when compared with its boundless resources-a Government the strongest in the world, because emanating from the popular will and firmly rooted in the affections of a great and free people, and whose fidelity to its engagements has never been questioned-for such a Government to have tendered to the capitalists of other countries an opportunity for a small investment in its stock, and yet to have failed, implies either the most unfounded distrust in its good faith or a purpose to obtain which the course pursued is the most fatal which could have been adopted. It has now become obvious to all men that the Government must look to its own means for supplying its wants, and it is consoling to know that these means are altogether adequate for the object. The exchequer, if adopted, will greatly aid in bringing about this result. Upon what I regard as a well-founded supposition that its bills would be readily sought for by the public creditors and that the issue would in a short time reach the maximum of \$15,000,000, it is obvious that \$10,000,000

would thereby be added to the available means of the Treasury without cost or charge. Nor can I fail to urge the great and beneficial effects which would be produced in aid of all the active pursuits of life. Its effects upon the solvent State banks, while it would force into liquidation those of an opposite character through its weekly settlements, would be highly beneficial; and with the advantages of a sound currency the restoration of confidence and credit would follow with a numerous train of blessings. My convictions are most strong that these benefits would flow from the adoption of this measure: but if the result should be adverse there is this security in connection with it-that the law creating it may be repealed at the pleasure of the Legislature without the slightest implication of its good faith.

I recommend to Congress to take into consideration the propriety of reimbursing a fine imposed on General Jackson at New Orleans at the time of the attack and defense of that city, and paid by him. Without designing any reflection on the judicial tribunal which imposed the fine, the remission at this day may be regarded as not unjust or inexpedient. The voice of the civil authority was heard amidst the glitter of arms and obeyed by those who held the sword, thereby giving additional luster to a memorable military achievement. If the laws were offended, their majesty was fully vindicated; and although the penalty incurred and paid is worthy of little regard in a pecuniary point of view, it can hardly be doubted that it would be gratifying to the war-worn veteran, now in retire. ment and in the winter of his days, to be relieved from the circumstances in which that judgment placed him. There are cases in which public functionaries may be called on to weigh the public interest against their own personal hazards, and if the civil law be violated from praiseworthy motives or an overruling sense of public danger and public necessity punishment may well be restrained within that limit which asserts and maintains the authority of the law and the subjection of the military to the civil power. The defense of New Orleans, while it saved a city from the hands of the enemy, placed the name of General Jackson among those of the greatest captains of the age and illustrated one of the brightest pages of our history. Now that the causes of excitement existing at the time have ceased to operate, it is believed that the remission of this fine and whatever of gratification that remission might cause the eminent man who incurred and paid it would be in accordance with the general feeling and wishes of the American people.

I have thus, fellow-eitizens, acquitted myself of my duty under the Constitution by laying before you as succinctly as I have been able the state of the Union and by inviting your attention to measures of much importance to the country. The executive will most zealously unite its efforts with those of the legislative department in the accomplishment of all that is required to relieve the wants of a common constituency or elevate the destinies of a beloved country.

JOHN TYLER.

SPECIAL MESSAGES.

WASHINGTON CITY, December 13, 1842.

To the Senate of the United States:

I hereby communicate to the Senate a letter from the Secretary of the Navy, with accompanying documents.* JOHN TYLER.

[The same message was sent to the House of Representatives.]

WASHINGTON, December 14, 1842.

To the Senate of the United States:

I transmit to the Senate a treaty recently concluded with the Chippewa Indians of the Mississippi and Lake Superior, with communications from the War Department in relation thereto, and ask the advice and consent of the Senate to the ratification of the said treaty.

JOHN TYLER.

WASHINGTON, December 14, 1842.

To the Senate of the United States:

I transmit to the Senate a treaty recently concluded with the Sac and Fox Indians, with communications from the War Department in relation thereto, and ask the advice and consent of the Senate to the ratification of the said treaty. JOHN TYLER.

WASHINGTON, December 23, 1842. To the Senate of the United States:

I have received the resolution of the 22d instant, requesting me "to inform the Senate of the nature and extent of 'the informal communications' which took place between the American Secretary of State and the British special minister during the late negotiations in Washington City upon the subject of the claims of the United States and Great Britain to the territory west of the Rocky Mountains," and also to inform the Senate what were the reasons which prevented "any agreement upon the subject at present" and which made it "inexpedient to include that subject among the subjects of formal negotiation."

In my message to Congress at the commencement of the present session, in adverting to the territory of the United States on the Pacific Ocean north of the forty-second degree of north latitude, a part of which

^{*}Communication from Commodore Charles W. Morgan, commanding the United States naval forces in the Mediterraneau, relative to the adjustment of differences with Morocco; translation of a letter from the Emperor of Morocco, etc.

is claimed by Great Britain, I remarked that "in advance of the acquirement of individual rights to these lands sound policy dictates that every effort should be resorted to by the two Governments to settle their respective claims," and also stated that I should not delay to urge on Great Britain the importance of an early settlement. Measures have been already taken in pursuance of the purpose thus expressed, and under these circumstances I do not deem it consistent with the public interest to make any communication on the subject.

JOHN TYLER.

WASHINGTON, December 23, 1842.

To the Senate of the United States:

I herewith communicate to the Senate a report* from the Secretary of State, in answer to a resolution of the Senate adopted on the 22d instant. JOHN TYLER.

WASHINGTON, December 29, 1842.

To the Senate of the United States:

I herewith transmit to the Senate a report † from the Secretary of State, with accompanying papers, in answer to their resolution of the 27th instant.

JOHN TYLER.

WASHINGTON, December 30, 1842.

To the Senate of the United States:

In reply to the resolution of the Senate of the 14th December, I transmit herewith the accompanying letter t from the Secretary of the Navy and the statement thereto appended from the Bureau of Equipment and Construction. JOHN TYLER.

WASHINGTON, December 30, 1842.

To the Senate and House of Representatives of the United States:

I communicate herewith to Congress copies of a correspondence which has recently taken place between certain agents of the Government of the Hawaiian or Sandwich Islands and the Secretary of State.

The condition of those islands has excited a good deal of interest, which

Relating to the strength and expense of maintaining the African Squadron under the late British treaty, the number of guns it is expected to have afloat in the United States Navy during 1843, and the estimated expense of the naval establishment for 1843.

^{*} Stating that the special minister from Great Britain to the United States made no proposition, informal or otherwise, to the negotiator on the part of the United States for the assumption or gnaranty of the State debts by the Government of the United States to the holders of said debts.

⁺Transmitting correspondence between the United States minister at London and the British Government in relation to certain slaves taken from the wreck of the schooner Hermosa and liberated by the authorities at Nassau, New Providence.

is increasing by every successive proof that their inhabitants are making progress in civilization and becoming more and more competent to maintain regular and orderly civil government. They lie in the Pacific Ocean, much nearer to this continent than the other, and have become an important place for the refitment and provisioning of American and European vessels.

Owing to their locality and to the course of the winds which prevail in this quarter of the world, the Sandwich Islands are the stopping place for almost all vessels passing from continent to continent across the Pacific Ocean. They are especially resorted to by the great number of vessels of the United States which are engaged in the whale fishery in those seas. The number of vessels of all sorts and the amount of property owned by citizens of the United States which are found in those islands in the course of the year are stated probably with sufficient accuracy in the letter of the agents.

Just emerging from a state of barbarism, the Government of the islands is as yet feeble, but its dispositions appear to be just and pacific, and it seems anxious to improve the condition of its people by the introduction of knowledge, of religious and moral institutions, means of education, and the arts of civilized life.

It can not but be in conformity with the interest and wishes of the Government and the people of the United States that this community, thus existing in the midst of a vast expanse of ocean, should be respected and all its rights strictly and conscientiously regarded; and this must also be the true interest of all other commercial states. Far remote from the dominions of European powers, its growth and prosperity as an independent state may yet be in a high degree useful to all whose trade is extended to those regions; while its near approach to this continent and the intercourse which American vessels have with it, such vessels constituting five-sixths of all which annually visit it, could not but create dissatisfaction on the part of the United States at any attempt by another power, should such attempt be threatened or feared, to take possession of the islands, colonize them, and subvert the native Government. Considering, therefore, that the United States possesses so large a share of the intercourse with those islands, it is deemed not unfit to make the declaration that their Government seeks, nevertheless, no peculiar advantages, no exclusive control over the Hawaiian Government, but is content with its independent existence and anxiously wishes for its security and pros-Its forbearance in this respect under the circumstances of the perity. very large intercourse of their citizens with the islands would justify this Government, should events hereafter arise to require it, in making a decided remonstrance against the adoption of an opposite policy by any other power. Under the circumstances I recommend to Congress to provide for a moderate allowance to be made out of the Treasury to the consul residing there, that in a Government so new and a country so remote

American citizens may have respectable authority to which to apply for redress in case of injury to their persons and property, and to whom the Government of the country may also make known any acts committed by American citizens of which it may think it has a right to complain.

Events of considerable importance have recently transpired in China. The military operations carried on against that Empire by the English Government have been terminated by a treaty, according to the terms of which four important ports hitherto shut against foreign commerce are to be open to British merchants, viz, Amoy, Foo-Choo-Foo, Ningpo, and Chinghai. It can not but be interesting to the mercantile interest of the United States, whose intercourse with China at the single port of Canton has already become so considerable, to ascertain whether these other ports now open to British commerce are to remain shut, nevertheless, against the commerce of the United States. The treaty between the Chinese Government and the British commissioner provides neither for the admission nor the exclusion of the ships of other nations. It would seem, therefore, that it remains with every other nation having commercial intercourse with China to seek to make proper arrangements for itself with the Government of that Empire in this respect.

The importations into the United States from China are known to be large, having amounted in some years, as will be seen by the annexed tables, to \$9,000,000. The exports, too, from the United States to China constitute an interesting and growing part of the commerce of the country. It appears that in the year 1841, in the direct trade between the two countries, the value of the exports from the United States amounted to \$715,000 in domestic produce and \$485,000 in foreign merchandise. But the whole amount of American produce which finally reaches China and is there consumed is not comprised in these tables, which show only the direct trade. Many vessels with American products on board sail with a primary destination to other countries, but ultimately dispose of more or less of their cargoes in the port of Canton.

The peculiarities of the Chinese Government and the Chinese character are well known. An Empire supposed to contain 300,000,000 subjects, fertile in various rich products of the earth, not without the knowledge of letters and of many arts, and with large and expensive accommodations for internal intercourse and traffic, has for ages sought to exclude the visits of strangers and foreigners from its dominions, and has assumed for itself a superiority over all other nations. Events appear likely to break down and soften this spirit of nonintercourse and to bring China ere long into the relations which usually subsist between civilized states. She has agreed in the treaty with England that correspondence between the agents of the two Governments shall be on equal terms—a concession which it is hardly probable will hereafter be withheld from other nations.

It is true that the cheapness of labor among the Chinese, their ingenuity in its application, and the fixed character of their habits and pursuits may discourage the hope of the opening of any great and sudden demand for the fabrics of other countries. But experience proves that the productions of western nations find a market to some extent among the Chinese; that that market, so far as respects the productions of the United States, although it has considerably varied in successive seasons, has on the whole more than doubled within the last ten years; and it can hardly be doubted that the opening of several new and important ports connected with parts of the Empire heretofore seldom visited by Europeans or Americans would exercise a favorable influence upon the demand for such productions.

It is not understood that the immediate establishment of correspondent embassies and missions or the permanent residence of diplomatic functionaries with full powers of each country at the Court of the other is contemplated between England and China, although, as has been already observed, it has been stipulated that intercourse between the two countries shall hereafter be on equal terms. An ambassador or envoy extraordinary and minister plenipotentiary can only be accredited, according to the usages of western nations, to the head or sovereign of the state, and it may be doubtful whether the Court of Pekin is yet prepared to conform to these usages so far as to receive a minister plenipotentiary to reside near it.

Being of opinion, however, that the commercial interests of the United States connected with China require at the present moment a degree of attention and vigilance such as there is no agent of this Government on the spot to bestow, I recommend to Congress to make appropriation for the compensation of a commissioner to reside in China to exercise a watchful care over the concerns of American citizens and for the protection of their persons and property, empowered to hold intercourse with the local authorities, and ready, under instructions from his Government, should such instructions become necessary and proper hereafter, to address himself to the high functionaries of the Empire, or through them to the Emperor himself.

It will not escape the observation of Congress that in order to secure the important object of any such measure a citizen of much intelligence and weight of character should be employed on such agency, and that to secure the services of such an individual a compensation should be made corresponding with the magnitude and importance of the mission.

JOHN TYLER.

WASHINGTON, December 31, 1842.

To the House of Representatives:

In compliance with your resolution of the 12th of February, 1841, requesting me to communicate to the House of Representatives the documents and other information in the possession of the Executive regarding

claims of citizens of the United States on the Government of Hayti, I now transmit a letter from the Secretary of State and the accompanying documents.

JOHN TYLER.

WASHINGTON, January 9, 1843.

To the Senate of the United States:

I have received a resolution of the Senate of the 27th of December, in the following terms:

Resolved, That the President be requested to inform the Senate, if compatible with the public interest, whether the quintuple treaty for the suppression of the slave trade has been communicated to the Government of the United States in any form whatever, and, if so, by whom, for what purpose, and what answer may have been returned to such communication. Also to communicate to the Senate all the information which may have been received by the Government of the United States going to show that the "course which this Government might take in relation to said treaty has excited no small degree of attention and discussion in Europe." Also to inform the Senate how far the "warm animadversions" and the "great political excitement" which this treaty has caused in Europe have any application or reference to the United States. Also to inform the Senate what danger there was that "the laws and the obligations" of the United States in relation to the suppression of the slave trade would be "executed by others," if we did not "remove the pretext and motive for violating our flag and executing our laws" by entering into the stipulations for the African squadron and the remonstrating embassies which are contained in the eighth and ninth articles of the late British treaty. Also that the President be requested to communicate to the Senate all the correspondence with our ministers abroad relating to the foregoing points of inquiry. Also that the President be requested to communicate to the Senate all such information upon the negotiation of the African squadron articles as will show the origin of such articles and the history and progress of their formation.

I informed the Senate, in the message transmitting the treaty with England of the 9th of August last, that no application or request had been made to this Government to become a party to the quintuple treaty. Agents of the Government abroad, regarding the signature of that treaty as a political occurrence of some importance, obtained, unofficially, copies of it, and transmitted those copies to the Department of State, as other intelligence is communicated for the information of the Government. The treaty has not been communicated to the Government of the United States from any other quarter, in any other manner, or for any other purpose.

The next request expressed in the resolution is in these words:

Also to communicate to the Senate all the information which may have been received by the Government of the United States going to show that the "course which this Government might take in relation to said treaty has excited no small degree of attention and discussion in Enrope." Also to inform the Senate how far the "warm animadversions" and the "great political excitement" which this treaty has caused in Europe have any application or reference to the United States.

The words quoted in this part of the resolution appear to be taken from my message above mentioned. In that communication I said:

No application or request has been made to this Government to become a party to this treaty, but the course it might take in regard to it has excited no small degree of attention and discussion in Europe, as the principle upon which it is founded and the stipulations which it contains have caused warm animadversions and great political excitement.

In my message at the commencement of the present session of Congress I endeavored to state the principles which this Government supports respecting the right of search and the immunity of flags. Desirous of maintaining those principles fully, at the same time that existing obligations should be fulfilled, I have thought it most consistent with the honor and dignity of the country that it should execute its own laws and perform its own obligations by its own means and its own power. The examination or visitation of the merchant vessels of one nation by the cruisers of another for any purposes except those known and acknowledged by the law of nations, under whatever restraints or regulations it may take place, may lead to dangerous results. It is far better by other means to supersede any supposed necessity or any motive for such examination or visit. Interference with a merchant vessel by an armed cruiser is always a delicate proceeding, apt to touch the point of national honor as well as to affect the interests of individuals. It has been thought, therefore, expedient, not only in accordance with the stipulations of the treaty of Ghent, but at the same time as removing all pretext on the part of others for violating the immunities of the American flag upon the seas as they exist and are defined by the law of nations, to enter into the articles now submitted to the Senate.

The treaty which I now submit to you proposes no alteration, mitigation, or modification of the rules of the law of nations. It provides simply that each of the two Governments shall maintain on the coast of Africa a sufficient squadron to enforce, separately and respectively, the laws, rights, and obligations of the two countries for the suppression of the slave trade.

These opinious were expressed by me officially upon the occasion of making to the Senate a communication of very great importance. It is not perceived how the accuracy of this general statement can be doubted by those who are acquainted with the debates of public bodies in Europe, the productions of the press, and the other modes by which public opinion is manifested in an enlightened age. It is not to be supposed that excited attention to public and national transactions or general political discussions in Europe on subjects open to all the world are known only in consequence of private information communicated to the Government, and feeling a strong persuasion that it would be improper in the Executive to go into any discussion or argument upon such a subject with the Senate, I have no further remarks to make upon this part of the inquiry.

The third inquiry is:

What danger there was that "the laws and the obligations" of the United States in relation to the suppression of the slave trade would be "executed by others" if we do not "remove the pretext and motive for violating our flag and executing our laws."

I have already quoted from the message the entire paragraph to a part of which this portion of the inquiry is supposed to refer.

As to the danger there was that the laws and the obligations of the

United States in relation to the suppression of the slave trade would be executed by others if we did not remove the pretext and motive for violating our flag and provide for executing our laws, I might say that this depends upon notorious facts and occurrences, of which the evidence has been in various forms before the country and all the branches of the Government.

When I came to occupy the Executive chair I could not be ignorant of the numerous complaints which had been made on account of alleged interruptions of American vessels engaged in lawful commerce on the coast of Africa by British cruisers on the ground of their being engaged in the slave trade. I could not be ignorant, at the same time, of the well-grounded suspicions which pervaded the country that some American vessels were engaged in that odious and unlawful traffic. There were two dangers, then, to be guarded against-the one, that this traffic would continue to be carried on in American ships, and perhaps much increased, unless some new and vigorous effort should be made for its suppression; the other, that acquiescence in the capture of American vessels, notorious slave dealers, by British cruisers might give countenance to seizures and detentions of vessels lawfully employed on light or groundless suspi-And cases had arisen under the administration of those who precions. ceded me well calculated to show the extent and magnitude of this latter danger; and believing that very serious consequences might in time grow out of the obvious tendency and progress of things, I felt it to be my duty to arrest that progress, to rescue the immunity of the American flag from the danger which hung over it, and to do this by recommending such a provision for the execution of our own laws as should remove all pretense for the interference of others.

Among the occurrences to which I have alluded, it may be useful to particularize one case.

The schooner *Catharine*, an American vessel owned by citizens of the United States, was seized on the coast of Africa by the British cruiser called the *Dolphin* and brought into the port of New York in the summer of 1839. Upon being brought into port, Benjamin F. Butler, esq., district attorney of the United States for the southern district of New York, appeared in the district court of the United States for that district and in the name and behalf of the United States libeled the schooner, her apparel and furniture, for a violation of the several acts of Congress passed for the suppression of the slave trade. The schooner being arrested by the usual process in such cases and possession taken of her from the hands of the British captors by officers of the United States, the cause proceeded, and by a decree of the circuit court in December, 1840, a forfeiture was pronounced. From this decree an appeal was taken, which is now pending in the Supreme Court of the United States.

It is true that in another case, that of the *Tigris*, of like general character, soon after arising, the then Secretary of State, on the 1st of March, 1841, informed Mr. Fox, the British minister, that "however strong and unchangeable may be the determination of this Government to punish any citizens of the United States who violate the laws against the African slave trade, it will not permit the exercise of any authority by foreign armed vessels in the execution of those laws."

But it is evident that this general declaration did not relieve the subject from its difficulties. Vessels of the United States found engaged in the African slave trade are guilty of piracy under the acts of Congress. It is difficult to say that such vessels can claim any interference of the Government in their behalf, into whosesoever hands they may happen to fall, any more than vessels which should turn general pirates. Notorious African slave traders can not claim the protection of the American character, inasmuch as they are acting in direct violation of the laws of their country and stand denounced by those laws as pirates. In case of the seizure of such a vessel by a foreign cruiser, and of her being brought into a port of the United States, what is to be done with her? Shall she be libeled, prosecuted, and condemned as if arrested by a cruiser of the United States? If this is to be done, it is clear that the agency of a foreign power has been instrumental in executing the laws of the United States. Or, on the other hand, is the vessel, with all her offenses flagrant upon her, to be released on account of the agency by which she was seized, discharged of all penalties, and left at liberty to renew her illegal and nefarious traffic?

It appeared to me that the best, if not the only, mode of avoiding these and other difficulties was by adopting such a provision as is contained in the late treaty with England.

The Senate asks me for the reasons for entering into the stipulations for the "remonstrating embassies" contained in the late treaty. Surely there is no stipulation in the treaty for any "remonstrating embassies," or any other embassies, nor any reference or allusion to any such thing. In this respect all that the treaty provides is in the ninth article and is in these words:

The parties to this treaty agree that they will unite in all becoming representations and remonstrances with any and all powers within whose dominions such markets [for African slaves] are allowed to exist, and that they will urge upon all such powers the propriety and duty of closing such markets effectually, at once and forever.

It always gives me sincere pleasure to communicate to both Houses of Congress anything in my power which may aid them in the discharge of their high duties and which the public interest does not require to be withheld. In transmitting the late treaty to the Senate everything was caused to accompany it which it was supposed could enlighten the judgment of the Senate upon its various provisions. The views of the Executive, in agreeing to the eighth and ninth articles, were fully expressed, and pending the discussion in the Senate every call for further information was promptly complied with, and nothing kept back which the

Senate desired. Upon this information and upon its own knowledge of the subject the Senate made up and pronounced its judgment upon its own high responsibility, and as the result of that judgment the treaty was ratified, as the Journal shows, by a vote of 39 to 9. The treaty has thus become the law of the land by the express advice of the Senate, given in the most solemn manner known to its proceedings.

The fourth request is-

That the President be requested to communicate to the Senate all the correspondence with our ministers abroad relating to the foregoing points of inquiry.

If this branch of the resolution were more definite, some parts of it might perhaps be met without prejudice to the public interest by extracts from the correspondence referred to. At a future day a communication may be expected to be made as broad and general as a proper regard to these interests will admit, but at present I deem any such communication not to be consistent with the public interest.

The fifth and last is-

That the President be requested to communicate to the Senate all such information upon the negotiation of the African squadron articles as will show the origin of such articles and the history and progress of their formation.

These articles were proposed to the British minister by the Secretary of State under my express sanction and were acceded to by him and have since been ratified by both Governments. I might without disrespect speak of the novelty of inquiring by the Senate into the history and progress of articles of a treaty through a negotiation which has terminated, and as the result of which these articles have become the law of the land by the constitutional advice of the Senate itself. But I repeat that those articles had their origin in a desire on the part of the Government of the United States to fulfill its obligations, entered into by the treaty of Ghent, to do its utmost for the suppression of the African slave trade, and to accomplish this object by such means as should not lead to the interruption of the lawful commerce of the United States or any derogation from the dignity and immunity of their flag. And I have the satisfaction to believe that both the Executive, in negotiating the treaty of which these articles form part, and the Senate, in advising to its ratification, have effected an object important to the Government and satisfactory to the people.

In conclusion I hope I may be permitted to observe that I have, out of a profound respect for the Senate, been induced to make this communication in answer to inquiries some of which at least are believed to be without precedent in the history of the relations between that body and the executive department. These inquiries were particularly unexpected to me at the present moment. As I had been so fortunate as to find my own views of the expediency of ratifying the late treaty with England confirmed by a vote of somewhat more than four-fifths of the Senators present, I have hitherto flattered myself that the motives which influenced my conduct had been fully appreciated by those who advised and approved it, and that if a necessity should ever arise for any special explanation or defense in regard to those motives it could scarcely be in that assembly itself.

JOHN TYLER.

WASHINGTON, January 18, 1843.

To the House of Representatives:

In compliance with the resolution of the House of Representatives of the 27th ultimo, I now transmit the letter and pamphlet* which accompanies this.

JOHN TYLER.

WASHINGTON, January 23, 1843.

To the Senate of the United States:

I herewith transmit to the Senate, in answer to their resolution of the 19th instant, reports from the State and War Departments.

JOHN TYLER.

WASHINGTON, January 23, 1843.

To the Senate of the United States:

I transmit to the Senate herewith, in answer to their resolution of the 5th instant, a report ‡ from the Secretary of State, with accompanying documents. JOHN TYLER.

WASHINGTON, January 31, 1843.

WASHINGTON, January 31, 1843.

To the House of Representatives:

In compliance with a resolution of the House of Representatives of the 24th instant, requesting me to communicate answers to certain queries therein contained respecting instructions given to the commissioners appointed to adjudicate claims arising under the Cherokee treaty of 1835, I transmit herewith a report from the War Department, accompanied by a copy of the instructions referred to.

JOHN TYLER.

To the House of Representatives:

At the last session of Congress a resolution was passed by the House of Representatives requesting me to cause to be communicated to the

^{*}Entitled "Acts and Resolutions of the Legislative Council of the Territory of Florida," passed at its twentieth session, January 3 to March 5, 1842.

⁺Relating to a grant of land in Oregon Territory to the Hudsons Bay Company by the British Government.

Transmitting correspondence with Great Britain relative to the destruction of the steamboat Caroline at Schlosser, N. Y., December 29, 1837.

House "the several reports made to the Department of War by Lieutenant-Colonel Hitchcock relative to the affairs of the Cherokee Indians, together with all information communicated by him concerning the frauds he was charged to investigate; also all facts in the possession of the Executive relating to the subject."

A resolution of the same import had been passed by the House of Representatives on the 18th of May last, requiring the Secretary of War to communicate to the House the same reports and matters. After consultation with me and under my directions, the Secretary of War informed the House that the reports referred to relative to the affairs of the Cherokees contained information and suggestions in reference to the matters which it was supposed would become the subject of a negotiation between that Department and the delegates of the Cherokee Nation. It was stated by him that the nature and subject of the report, in the opinion of the President and the Department, rendered its publication at that time inconsistent with the public interest. The negotiation referred to subsequently took place, and embraced the matters upon which Lieutenant-Colonel Hitchcock had communicated his views. That negotiation terminated without the conclusion of any arrangement. It may, and in all probability will, be renewed. All the information communicated by Lieutenant-Colonel Hitchcock respecting the Cherokees-their condition as a nation and their relations to other tribes—is herewith transmitted. But his suggestions and projects respecting the anticipated propositions of the delegates and his views of their personal characters can not in any event aid the legislation of Congress, and in my opinion the promulgation of them would be unfair and unjust to him and inconsistent with the public interest, and they are therefore not transmitted.

The Secretary of War further stated in his answer to the resolution that the other report referred to in it, relating to the alleged frauds which Lieutenant-Colonel Hitchcock was charged to investigate, contained such information as he (Colonel Hitchcock) was enabled to obtain by *cx parte* inquiries of various persons whose statements were necessarily without the sanction of an oath, and which the persons implicated had had no opportunity to contradict or explain. He expressed the opinion that to promulgate those statements at that time would be grossly unjust to those persons and would be calculated to defeat rather than promote the objects of the inquiry, and he remarked that sufficient opportunity had not been given to the Department to pursue the investigation or to call upon the parties affected for explanations or to determine on the measures proper to be adopted. And he hoped these reasons would be satisfactory for not transmitting to the House at that time the reports referred to in its resolution.

It would appear from the report of the Committee on Indian Affairs, to whom the communication of the Secretary of War was referred, and which report has been transmitted to me, together with the resolutions 2075

of the House adopted on the recommendation of the committee, and from those resolutions, that the reasons given by the Secretary were not deemed satisfactory and that the House of Representatives claims the right to demand from the Executive and heads of Departments such information as may be in their possession relating to "subjects of the deliberations of the House and within the sphere of its legitimate powers," and that in the opinion of the House the reports and facts called for by its resolution of the 18th of May related to subjects of its deliberations and were within the sphere of its legitimate powers, and should have been communicated.

If by the assertion of this claim of right to call upon the Executive for all the information in its possession relating to any subject of the deliberation of the House, and within the sphere of its legitimate powers, it is intended to assert also that the Executive is bound to comply with such call without the authority to exercise any discretion on its part in reference to the nature of the information required or to the interests of the country or of individuals to be affected by such compliance, then do I feel bound, in the discharge of the high duty imposed upon me "to preserve, protect, and defend the Constitution of the United States," to declare in the most respectful manner my entire dissent from such a proposition. The instrument from which the several departments of the Government derive their authority makes each independent of the other in the discharge of their respective functions. The injunction of the Constitution that the President "shall take care that the laws be faithfully executed" necessarily confers an authority commensurate with the obligation imposed to inquire into the manner in which all public agents perform the duties assigned to them by law. To be effective these inquiries must often be confidential. They may result in the collection of truth or of falsehood, or they may be incomplete and may require further prosecution. To maintain that the President can exercise no discretion as to the time in which the matters thus collected shall be promulgated or in respect to the character of the information obtained would deprive him at once of the means of performing one of the most salutary duties of his office. An inquiry might be arrested at its first stage and the officers whose conduct demanded investigation may be enabled to elude or defeat it. To require from the Executive the transfer of this discretion to a coordinate branch of the Government is equivalent to the denial of its possession by him and would render him dependent upon that branch in the performance of a duty purely executive.

Nor can it be a sound position that all papers, documents, and information of every description which may happen by any means to come into the possession of the President or of the heads of Departments must necessarily be subject to the call of the House of Representatives *mercly* because they relate to a subject of the deliberations of the House, although that subject may be within the sphere of its legitimate powers. It can not be that the only test is whether the information relates to a legitimate subject of deliberation. The Executive Departments and the citizens of this country have their rights and duties as well as the House of Representatives, and the maxim that the rights of one person or body are to be so exercised as not to impair those of others is applicable in its fullest extent to this question. Impertinence or malignity may seek to make the Executive Departments the means of incalculable and irremediable injury to innocent parties by throwing into them libels most foul and atrocious. Shall there be no discretionary authority permitted to refuse to become the instruments of such malevolence?

And although information comes through a proper channel to an executive officer it may often be of a character to **fo**rbid its being made public. The officer charged with a confidential inquiry, and who reports its result under the pledge of confidence which his appointment implies, ought not to be exposed individually to the resentment of those whose conduct may be impugned by the information he collects. The knowledge that such is to be the consequence will inevitably prevent the performance of duties of that character, and thus the Government will be deprived of an important means of investigating the conduct of its agents.

It is certainly no new doctrine in the halls of judicature or of legislation that certain communications and papers are privileged, and that the general authority to compel testimony must give way in certain cases to the paramount rights of individuals or of the Government. Thus no man can be compelled to accuse himself, to answer any question that tends to render him infamous, or to produce his own private papers on any occasion. The communications of a client to his counsel and the admissions made at the confessional in the course of religious discipline are privileged communications. In the courts of that country from which we derive our great principles of individual liberty and the rules of evidence it is well settled-and the doctrine has been fully recognized in this country-that a minister of the Crown or the head of a department can not be compelled to produce any papers or disclose any transactions relating to the executive functions of the Government which he declares are confidential or such as the public interest requires should not be divulged; and the persons who have been the channels of communication to officers of the State are in like manner protected from the disclosure of their names. Other instances of privileged communications might be enumerated if it were deemed necessary. These principles are as appli-cable to evidence sought by a legislature as to that required by a court.

The practice of the Government since its foundation has sanctioned the principle that there must necessarily be a discretionary authority in reference to the nature of the information called for by either House of Congress.

The authority was claimed and exercised by General Washington in 1796. In 1825 President Monroe declined compliance with a resolution

of the House of Representatives calling for the correspondence between the Executive Departments of this Government and the officers of the United States Navy and others at or near the ports of South America on the Pacific Ocean. In a communication made by the Secretary of War in 1832 to the Committee of the House on the Public Lands, by direction of President Jackson, he denies the obligation of the Executive to furnish the information called for and maintains the authority of the President to exercise a sound discretion in complying with calls of that description by the House of Representatives or its committees. Without multiplying other instances, it is not deemed improper to refer to the refusal of the President at the last session of the present Congress to comply with a resolution of the House of Representatives calling for the names of the members of Congress who had applied for offices. As no further notice was taken in any form of this refusal, it would seem to be a fair inference that the House itself admitted that there were cases in which the President had a discretionary authority in respect to the transmission of information in the possession of any of the Executive Departments.

Apprehensive that silence under the claim supposed to be set up in the resolutions of the House of Representatives under consideration might be construed as an acquiescence in its soundness, I have deemed it due to the great importance of the subject to state my views, that a compliance in part with the resolution may not be deemed a surrender of a necessary authority of the Executive.

Many of the reasons which existed at the date of the report of the Secretary of War of June 1, 1842, for then declining to transmit the report of Lieutenant-Colonel Hitchcock concerning the frauds which he was charged to investigate have ceased to operate. It has been found wholly impracticable to pursue the investigation in consequence of the death and removal out of the country of those who would be called upon to testify, and in consequence of the want of adequate authority or means to render it effectual. It could not be conducted without expense. Congress at its last session prohibited the payment of any account or charge whatever growing out of or in any way connected with any commission or inquiry, except military and naval courts-martial and courts of inquiry, unless special appropriations should be made for the payment of such accounts and charges. Of the policy of that provision of law it does not become me to speak, except to say that the institution of inquiries into the conduct of public agents, however urgent the necessity for such inquiry may be, is thereby virtually denied to the Executive, and that if evils of magnitude shall arise in consequence of the law I take to myself no portion of the responsibility.

In relation to the propriety of directing prosecutions against the contractors to furnish Indians rations who are charged with improper conduct, a correspondence has been had between the War Department and the Solicitor of the Treasury, which is herewith transmitted in a conviction that such prosecution would be entirely ineffectual.

Under these circumstances I have thought proper to direct that the

report of Lieutenant-Colonel Hitchcock concerning the frauds which he was charged to investigate be transmitted to the House of Representatives, and it accordingly accompanies this message. At the same time, I have to request the House to consider it so far confidential as not to direct its publication until the appropriate committee shall have examined it and expressed their opinion whether a just regard to the character and rights of persons apparently implicated, but who have not had an opportunity to meet the imputations on them, does not require that portions at least of the report should not at present be printed.

This course is adopted by me from a desire to render justice to all and at the same time avoid even the appearance of a desire to screen any, and also to prevent the exaggerated estimate of the importance of the information which is likely to be made from the mere fact of its being withheld.

The resolution of the House also calls for "all facts in the possession of the Executive, from any source, relating to the subject." There are two subjects specified in the resolution-one "relative to the affairs of the Cherokee Indians," and another "concerning the frauds he [Lieutenant-Colonel Hitchcock] was charged to investigate."

All the papers in the War Department or its bureaus relating to the affairs of the Cherokee Indians, it is believed, have been from time to time communicated to Congress and are contained in the printed documents, or are now transmitted, with the exception of those portions of Lieutenant-Colonel Hitchcock's report hereinbefore mentioned, and excepting the correspondence with the Cherokee delegates in the negotiations which took place during the last summer, which are not supposed to be within the intent of the resolution of the House. For the same reason a memorial from the Old Settlers, or Western Cherokees, as they term themselves, recently presented, is not transmitted. If these or any other public documents should be desired by the House, a specification of them will enable me to cause them to be furnished if it should be found proper.

All the papers in the War Office or its bureaus known or supposed to have any relation to the alleged frauds which Lieutenant-Colonel Hitchcock was charged to investigate are herewith transmitted.

JOHN TYLER.

WASHINGTON, February 8, 1843.

To the House of Representatives of the United States:

I herewith transmit to the House of Representatives, in answer to their resolution of the 28th ultimo, a report* from the Secretary of State.

IOHN TYLER.

^{*}Stating that no information is in possession of the Government of any negotiation of a treaty. or of any overtures to treat, for a cession of California by Mexico to England.

WASHINGTON, February 9, 1843.

To the House of Representatives:

In order to enable Congress to approve or disapprove the selection of a site for a Western armory made by the board of commissioners appointed by me for that purpose pursuant to the act of September 9, 1841, I transmit herewith their report and proceedings, as required by that act.

JOHN TYLER.

WASHINGTON, February 13, 1843.

To the House of Representatives:

I herewith transmit to the House of Representatives a report made to me on the 9th instant by the Secretary of the Treasury, on the subject of the present and prospective condition of the finances.

You will perceive from it that even if the receipts from the various sources of revenue for the current year shall prove not to have been overrated and the expenditures be restrained within the estimates, the Treasury will be exhausted before the close of the year, and that this will be the case although authority should be given to the proper Department to reissue Treasury notes. But the state of facts existing at the present moment can not fail to awaken a doubt whether the amount of the revenue for the respective quarters of the year will come up to the estimates, nor is it entirely certain that the expenditures which will be authorized by Congress may not exceed the aggregate sum which has hitherto been assumed as the basis of the Treasury calculations.

Of all the duties of the Government, none is more sacred and imperative than that of making adequate and ample provision for fulfilling with punctuality its pecuniary engagements and maintaining the public credit inviolate. Any failure in this respect not produced by unforeseen causes could only be regarded by our common constituents as a serious neglect of the public interests. I feel it, therefore, to be an indispensable obligation, while so much of the session yet remains unexpired as to enable Congress to give to the subject the consideration which its great importance demands, most earnestly to call its attention to the propriety of making further provision for the public service of the year.

The proper objects of taxation are peculiarly within the discretion of the Legislature, while it is the duty of the Executive to keep Congress duly advised of the state of the Treasury and to admonish it of any danger which there may be ground to apprehend of a failure in the means of meeting the expenditures authorized by law.

I ought not, therefore, to dissemble my fears that there will be a serious falling off in the estimated proceeds both of the customs and the public lands. I regard the evil of disappointment in these respects as altogether too great to be risked if by any possibility it may be entirely obviated.

While I am far from objecting, under present circumstances, to the recommendation of the Secretary that authority be granted him to reissue Treasury notes as they shall be redeemed, and to other suggestions which he has made on this subject, yet it appears to me to be worthy of grave consideration whether more permanent and certain supplies ought not to be provided. The issue of one note in redemption of another is not the payment of a debt, which must be made in the end by some form of public taxation.

I can not forbear to add that in a country so full of resources, of such abundant means if they be but judiciously called out, the revenues of the Government, its credit, and its ability to fulfill all its obligations ought not to be made dependent on temporary expedients or on calculations of an uncertain character. The public faith in this or in all things else ought to be placed beyond question and beyond contingency.

The necessity of further and full provision for supplying the wants of the Treasury will be the more urgent if Congress at this present session should adopt no plan for facilitating the financial operations of the Government and improving the currency of the country. By the aid of a wise and efficient measure of that kind not only would the internal business and prosperity of the country be revived and invigorated, but important additions to the amount of revenue arising from importations might also be confidently expected. Not only does the present condition of things in relation to the currency and commercial exchanges produce severe and distressing embarrassments in the business and pursuits of individuals, but its obvious tendency is to create also a necessity for the imposition of new burdens of taxation in order to secure the Government and the country against discredit from the failure of means to fulfill the public engagements.

JOHN TYLER.

WASHINGTON, February 18, 1843.

To the House of Representatives of the United States:

A resolution has been communicated to me, which was adopted by the House of Representatives on the 2d instant, in the following terms:

Resolved, That the President of the United States be requested to inform this House by what authority and under whose instructions Captain Thomas ap Catesby Jones, commander of the squadron of the United States in the Pacific Ocean, did, on or about the 19th of October last, invade in warlike array the territories of the Mexican Republic, take possession of the town of Monterey, and declare himself the commander of the naval and military expedition for the occupation of the Californias.

Resolved, That the President of the United States be requested to communicate to this House copies of all the instructions given by him or under his authority to the said Captain Jones from the time of his appointment to the command of the said squadron; also copies of all communications received from him relating to his expedition for the occupation of the Californias; and also to inform this House whether orders have been dispatched to the said Captain Jones recalling him from his command.

The proceeding of Captain Jones in taking possession of the town of Monterey, in the possessions of Mexico, was entirely of his own authority, and not in consequence of any orders or instructions of any kind given to him by the Government of the United States. For that proceeding he has been recalled, and the letter recalling him will be found among the papers herewith communicated.

The resolution of the House of Representatives asks for "copies of all the instructions given to Captain Jones from the time of his appointment to the command of the said squadron, also copies of all communications received from him relating to his expedition for the occupation of the Californias," without confining the request to such instructions and correspondence as relate to the transactions at Monterey, and without the usual reservation of such portions of the instructions or correspondence as in the President's judgment could not be made public without prejudice or danger to the public interests.

It may well be supposed that cases may arise even in time of peace in which it would be highly injurious to the country to make public at a particular moment the instructions under which a commander may be acting on a distant and foreign service. In such a case, should it arise, and in all similar cases the discretion of the Executive can not be controlled by the request of either House of Congress for the communication of papers. The duties which the Constitution and the laws devolve on the President must be performed by him under his official responsibility, and he is not at liberty to disregard high interests or thwart important public objects by untimely publications made against his own judgment, by whomsoever such publications may be requested. In the present case, not seeing that any injury is likely to arise from so doing, I have directed copies of all the papers asked for to be communicated; and I avail of the opportunity of transmitting also copies of sundry letters, as noted below.

JOHN TYLER.

WASHINGTON, February 20, 1843.

To the House of Representatives:

I transmit to the House of Representatives a report from the Secretary of State, accompanied by a copy of the correspondence* requested by their resolution of the 29th of December last.

JOHN TYLER.

WASHINGTON, February 20, 1843.

To the Senate of the United States:

I transmit to the Senate a report † from the Secretary of State, in answer to their resolution of the 14th instant.

JOHN TYLER.

^{*}Between the consul-general of the United States'at Tangier and the Government of Morocco. †Communicating a copy of the commission and instructions issued to Daniel Webster, Secretary

of State, to treat with Lord Ashburton, special minister from Great Britain to the United States.

WASHINGTON, February 24, 1843.

To the Senate of the United States:

I transmit to the Senate, in answer to their resolutions of the 20th of December and of the 9th instant, the inclosed copies of papers* from the Department of State, with an accompanying list.

JOHN TYLER.

WASHINGTON, February 27, 1843.

To the House of Representatives:

In compliance with the resolution of the House of Representatives of the 22d instant, requesting me to communicate to the House "whatever correspondence or communication may have been received from the British Government respecting the President's construction of the late British treaty concluded at Washington as it concerns an alleged right to visit American vessels," I herewith transmit a report made to me by the Secretary of State.

I have also thought proper to communicate copies of Lord Aberdeen's letter of the 20th December, 1841, to Mr. Everett, Mr. Everett's letter of the 23d December in reply thereto, and extracts from several letters of Mr. Everett to the Secretary of State.

I can not forego the expression of my regret at the apparent purport of a part of Lord Aberdeen's dispatch to Mr. Fox. I had cherished the hope that all possibility of misunderstanding as to the true construction of the eighth article of the treaty lately concluded between Great Britain and the United States was precluded by the plain and well-weighed language in which it is expressed. The desire of both Governments is to put an end as speedily as possible to the slave trade, and that desire, I need scarcely add, is as strongly and as sincerely felt by the United States as it can be by Great Britain. Yet it must not be forgotten that the trade, though now universally reprobated, was up to a late period prosecuted by all who chose to engage in it, and there were unfortunately but very few Christian powers whose subjects were not permitted, and even encouraged, to share in the profits of what was regarded as a perfectly legitimate commerce. It originated at a period long before the United States had become independent and was carried on within our borders in opposition to the most earnest remonstrances and expostulations of some of the colonies in which it was most actively prosecuted. Those engaged in it were as little liable to inquiry or interruption as any others. Its character, thus fixed by common consent and general practice, could only be changed by the positive assent of each and every nation, expressed either in the form of municipal law or conventional arrangement. The United States led the way in efforts to suppress it. They claimed no right to dictate to others, but they resolved, without waiting for the

^{*}Correspondence with the United States minister to France relative to the quintuple treaty of December 20, 1841, and the Ashburton treaty of August 9, 1842.

cooperation of other powers, to prohibit it to their own citizens and to visit its perpetration by them with condign punishment. I may safely affirm that it never occurred to this Government that any new maritime right accrued to it from the position it had thus assumed in regard to the slave trade. If before our laws for its suppression the flag of every nation might traverse the ocean unquestioned by our cruisers, this freedom was not, in our opinion, in the least abridged by our municipal legislation.

Any other doctrine, it is plain, would subject to an arbitrary and evervarying system of maritime police, adopted at will by the great naval power for the time being, the trade of the world in any places or in any articles which such power might see fit to prohibit to its own subjects or citizens. A principle of this kind could scarcely be acknowledged without subjecting commerce to the risk of constant and harassing vexations.

The attempt to justify such a pretension from the right to visit and detain ships upon reasonable suspicion of piracy would deservedly be exposed to universal condemnation, since it would be an attempt to convert an established rule of maritime law, incorporated as a principle into the international code by the consent of all nations, into a rule and principle adopted by a single nation and enforced only by its assumed authority. To seize and detain a ship upon suspicion of piracy, with probable cause and in good faith, affords no just ground either for complaint on the part of the nation whose flag she bears or claim of indemnity on the part of the owner. The universal law sanctions and the common good requires the existence of such a rule. The right under such circumstances not only to visit and detain but to search a ship is a perfect right and involves neither responsibility nor indemnity. But, with this single exception, no nation has in time of peace any authority to detain the ships of another upon the high seas on any pretext whatever beyond the limits of her territorial jurisdiction. And such, I am happy to find, is substantially the doctrine of Great Britain herself in her most recent official declarations, and even in those now communicated to the House. These declarations may well lead us to doubt whether the apparent difference between the two Governments is not rather one of definition than of principle. Not only is the right of search, properly so called, disclaimed by Great Britain, but even that of mere visit and inquiry is asserted with qualifications inconsistent with the idea of a perfect right.

In the dispatch of Lord Aberdeen to Mr. Everett of the 20th of December, 1841, as also in that just received by the British minister in this country made to Mr. Fox, his lordship declares that if in spite of all the precaution which shall be used to prevent such occurrences an American ship, by reason of any visit or detention by a British cruiser, "should suffer loss and injury, it would be followed by prompt and ample remuneration;" and in order to make more manifest her intentions in this respect, Lord Aberdeen in the dispatch of the 20th December makes

known to Mr. Everett the nature of the instructions given to the British cruisers. These are such as, if faithfully observed, would enable the British Government to approximate the standard of a fair indemnity. That Government has in several cases fulfilled her promises in this particular by making adequate reparation for damage done to our commerce. It seems obvious to remark that a right which is only to be exercised under such restrictions and precautions and risk, in case of any assignable damage to be followed by the consequences of a trespass, can scarcely be considered anything more than a privilege asked for and either conceded or withheld on the usual principles of international comity.

The principles laid down in Lord Aberdeen's dispatches and the assurances of indemnity therein held out, although the utmost reliance was placed on the good faith of the British Government, were not regarded by the Executive as a sufficient security against the abuses which Lord Aberdeen admitted might arise in even the most cautious and moderate exercise of their new maritime police, and therefore in my message at the opening of the last session I set forth the views entertained by the Executive on this subject, and substantially affirmed both our inclination and ability to enforce our own laws, protect our flag from abuse, and acquit ourselves of all our duties and obligations on the high seas. In view of these assertions the treaty of Washington was negotiated, and upon consultation with the British negotiator as to the quantum of force necessary to be employed in order to attain these objects, the result to which the most deliberate estimate led was embodied in the eighth article of the treaty.

Such were my views at the time of negotiating that treaty, and such, in my opinion, is its plain and fair interpretation. I regarded the eighth article as removing all possible pretext on the ground of mere necessity to visit and detain our ships upon the African coast because of any alleged abuse of our flag by slave traders of other nations. We had taken upon ourselves the burden of preventing any such abuse by stipulating to furnish an armed force regarded by both the high contracting parties as sufficient to accomplish that object.

Denying as we did and do all color of right to exercise any such general police over the flags of independent nations, we did not demand of Great Britain any formal renunciation of her pretension; still less had we the idea of yielding anything ourselves in that respect. We chose to make a practical settlement of the question. This we owed to what we had already done upon this subject. The honor of the country called for it; the honor of its flag demanded that it should not be used by others to cover an iniquitous traffic. This Government, I am very sure, has both the inclination and the ability to do this; and if need be it will not content itself with a fleet of eighty guns, but sooner than any foreign government shall exercise the province of executing its laws and fulfilling its obligations, the highest of which is to protect its flag alike from abuse or insult, it would, I doubt not, put in requisition for that purpose its whole naval power. The purpose of this Government is faithfully to fulfill the treaty on its part, and it will not permit itself to doubt that Great Britain will comply with it on hers. In this way peace will best be preserved and the most amicable relations maintained between the two countries.

JOHN TYLER.

WASHINGTON, February 27, 1843.

To the House of Representatives:

I transmit to Congress sundry letters which have passed between the Department of State and the Chevalier d'Argaïz, envoy extraordinary and minister plenipotentiary of Spain near the Government of the United States, on the subject of the schooner *Amistad* since the last communication of papers connected with that case. This correspondence will show the general grounds on which the Spanish minister expresses dissatisfaction with the decision of the Supreme Court in that case and the answers which have been made to his complaints by the Department of State.

In laying these papers before Congress I think it proper to observe that the allowance of salvage on the cargo does not appear to have been a subject of discussion in the Supreme Court. Salvage had been denied in the court below and from that part of the decree no appeal had been claimed.

The ninth article of the treaty between the United States and Spain provides that "all ships and merchandise of what nature soever which shall be rescued out of the hands of any pirates or robbers on the high seas shall be brought into some port of either State and shall be delivered to the custody of the officers of that port in order to be taken care of and restored entire to the true proprietor as soon as due and sufficient proof shall be made concerning the property thereof." The case of the *Amistad*, as was decided by the court, was not a case of piracy, and therefore not within the terms of the treaty; yet it was a case in which the authority of the master, officers, and crew of the vessel had been divested by force, and in that condition the vessel, having been found on the coast, was brought into a port of the United States; and it may deserve consideration that the salvors in this case were the officers and seamen of a public ship.

It is left to Congress to consider, under these circumstances, whether, although in strictness salvage may have been lawfully due, it might not yet be wise to make provision to refund it, as a proof of the entire good faith of the Government and of its disposition to fulfill all its treaty stipulations to their full extent under a fair and liberal construction.

JOHN TYLER.

John Tyler

WASHINGTON, February 28, 1843.

To the Senate of the United States:

I transmit to the Senate, for its consideration with a view to ratification, a convention further to provide for the payment of awards in favor of claimants under the convention between the United States and the Mexican Republic of the 11th of April, 1839, signed in the City of Mexico on the 30th day of last month. A copy of the instructions from the Department of State to the minister of the United States at Mexico relative to the convention and of the dispatches of that minister to the Department is also communicated. By adverting to the signatures appended to the original draft of the convention as transmitted from the Department of State to General Thompson it will be seen that the convention as concluded was substantially approved by the representatives of a large majority in value of the parties immediately interested.

JOHN TYLER.

WASHINGTON, February 28, 1843.

To the House of Representatives:

I communicate to the House of Representatives a report from the Secretary of State, which, with the documents* accompanying it, furnishes the information requested by their resolution of the 18th instant.

JOHN TYLER.

WASHINGTON, March 3, 1843.

To the Senate of the United States:

In submitting the name of Henry A. Wise to the Senate for the mission to France, I was led to do so by considerations of his high talent, his exalted character, and great moral worth. The country, I feel assured, would be represented at Paris in the person of Mr. Wise by one wholly unsurpassed in exalted patriotism and well fitted to be the representative of his country abroad. His rejection by the Senate has caused me to reconsider his qualifications, and I see no cause to doubt that he is eminently qualified for the station. I feel it, therefore, to be my duty to renominate him.

I nominate Henry A. Wise, of Virginia, to be envoy extraordinary and minister plenipotentiary to the Court of His Majesty the King of the French, in place of Lewis Cass, resigned.

JOHN TYLER.

To the Senate of the United States:

In submitting to you the name of Caleb Cushing as Secretary of the Treasury, I did so in full view of his consummate abilities, his unquestioned patriotism and full capacity to discharge with honor to himself

*Correspondence between the representatives of foreign governments and the United States relative to the operation of the tariff laws on treaties existing with foreign governments

MARCH 3, 1843.

and advantage to the country the high and important duties appertaining to that Department of the Government. The respect which I have for the wisdom of the Senate has caused me again, since his rejection, to reconsider his merits and his qualifications. That review has satisfied me that I could not have a more able adviser in the administration of public affairs or the country a more faithful officer. I feel it, therefore, to be my duty to renominate him.

I nominate Caleb Cushing to be Secretary of the Treasury, in the place of Walter Forward, resigned. JOHN TYLER.

WASHINGTON, March 3, 1843.

To the House of Representatives of the United States:

I herewith transmit to the House of Representatives copies of the final report and appendices of the joint commission appointed to explore and survey the boundary line between the States of Maine and New Hampshire and the adjoining British Provinces, together with a general map showing the results of their labors. JOHN TYLER.

Report of the commissioners appointed by the President of the United States for the purpose of exploring and surveying the boundary line between the States of Maine and New Hampshire and the British Provinces.*

WASHINGTON, January 27, 1843.

Hon. DANIEL WEBSTER,

Secretary of State.

SIR: The operations of the divisions under the direction of the several commissioners during the past season have been as follows, viz:

I.

The work remaining to be performed by the division under the direction of the chairman of the board was as follows:

I. The completion of the survey of the line of highlands around the sources of the Rimouski, filling up the gap left in former surveys in the line of boundary claimed by the United States.

2. The survey of the line of highlands rising from the northern side of the Bay of Chaleurs at its western extremity from the point visited and measured in 1840 to its connection with the line surveyed in 1841 in the vicinity of Lake Metis.

3. The astronomical determination of the longitude of one or more points in the surveyed lines, in order to the compilation of a geographical map of undeniable accuracy.

The party, which was dispatched at the earliest possible period, having been recalled by a special messenger as soon as the signature of the treaty of Washington was made known to the commissioner, no more than the first of these objects was attempted, and some of the observations that would have been considered necessary to make

^{*} This report proper and Appendix No. t are the only portions of the original final report whichcan be found filed with the archives of the commission. The copy of the report which was transmitted to the House of Representatives is missing from the files of the House. A careful search in the Government libraries of Washington warrants me in asserting that the report has never been printed.—COMPLER.

this survey useful as evidence in case of a further discussion of the subject of boundary were not completed. The expedition has, however, obtained for its results an accurate survey of the Green River of St. John from its mouth to the portage between it and the South Branch of the Katawamkedgwick, a survey of that portage, and a careful chain and compass survey of the highlands surrounding the sources of Rimouski. The first of these is connected with the survey of the river St. John made by Major Graham; the last was united at its two extremities with stations of the survey of 1841. Throughout the whole of the surveys the latitudes were carefully determined, by the methods employed during the former years, at a sufficient number of points. The longitudes have been estimated by the use of chronometers, but the sudden recall of the party left the latter part of the task incomplete. Any defect arising from the latter cause may be considered as in a great degree compensated by the connections referred to with the work of Major Graham and the surveys of the previous years.

The party left Portland to take the field on the 18th June, and reached the Grand Falls of the St. John on its return on the 25th August.

The surplus stores, with the boats and camp equipage, were stored there, and were afterwards transferred to the parties of the two other commissioners.

A map of the operations of this division was placed on file in the State Department on the 27th December.

The distance surveyed along Green River from its mouth to the portage is 57 miles, the length of the portage $5\frac{1}{2}$ miles, the distance measured in exploration of the remaining portion of the 'boundary claimed by the United States $61\frac{1}{2}$ miles, making in all 124 miles.

II.

The parties under the direction of A. Talcott entered upon their field duties about the middle of September, and completed that branch of the service by the 5th of November.

During that period the following rivers and streams were surveyed:

I. The "main St. John River" from the mouth of the "Alleguash" to the Forks.

2. The "Southwest Branch" to its source at the Metjarmette portage.

3. The "South Branch," or "Wool-as-ta-qua-guam," to 5 miles above Bakers Lake and near to the exploring line of 1841 along the highlands claimed by Great Britain.

4. The "West Branch," or "Mat-ta-wa-quam," to its source in the highlands.

5. The "Northwest Branch" to its source in the highlands.

6. The "Big Black River," or "Chim-pas-a-ooc-ten," to its source.

7. The "Little Black River," or "Pas-a-ooc-ten."

8. The "Chim-mem-ti-cook River" as far as navigable.

The character of all these streams is the same—slack water of moderate depth alternating with rapids. They can never be navigated by anything larger than a bateau.

The method of survey was to trace the course of each stream by compass, estimating distances by the eye, or by pacing when the nature of the margin of the river would permit.

The average distance coursed per day was about 9 miles, and at the camps formed at night astronomical observations north and south of the zenith were made to determine their position in latitude, and observations for the local time to ascertain their differences of longitude.

Meridian observations of the sun were also made at a point intermediate to the camps whenever they could be obtained.

Thirty-three of these points have been used in the correction of the paced and estimated distances.

Tables exhibiting these observations, their calculation and results, will accompany the detailed maps.

With a view to facilitate the operations of the joint commission it was conceived to be important that the intersection of the parallel of $46^{\circ} 25'$ with the Southwest Branch should be ascertained, as also the point on the Northwest Branch (10 miles from the main St. John) where the boundary line from the outlet of Lake Pohenagamook intersects the said branch.

It is believed that these points are projected on the map which accompanies this report so near to their true position that the line indicating the boundary as drawn on the map may be considered to substantially exhibit the division of territory as effected by the late treaty.

The more thorough knowledge acquired through these explorations of the character of the territory which has been relinquished by the United States fully confirms the opinion previously entertained of its little value, either for its timber growth or for purposes of agriculture.

Bordering on the "Big Black" and "Little Black" rivers the growth of pine is large and apparently of good quality, and it is believed that most of the smaller streams falling into the St. John below the "Seven Islands" will be found fringed with pine, but it is quite certain that very little will be found included between the lines of boundary and the highlands as claimed by the United States to the westward of St. Francis River.

The office work of this party is nearly completed, all the calculations arising from the astronomical observations have been made, and the detailed maps (five in number) drawn to the scale of 1:50,000 (or nearly 1¼ inches to 1 mile), exhibiting the result of the surveys in 1840, 1841, and 1842, are in such a state of forwardness as to insure their completion by the middle of February.

These explorations and surveys embrace-

I. The highlands as claimed by the United States, extending from the northwesternmost head of the Connecticut River to the portage road which leads from the St. Lawrence River to Lake Temisconata.

2. The highlands as claimed by Great Britain from the Metjarmette portage to the source of the Aroostook River.

3. All the principal heads or branches of the Connecticut River north of the fortyfifth degree of latitude.

4. The St. John and all its principal branches or tributaries west of the Alleguash River.

III.

The division under the direction of Major Graham has been employed during the past season in making the following surveys, viz:

1. In prolonging the meridian of the monument at the source of the river St. Croix.

2. In making a survey of the Little Madawaska River, a tributary to the Aroostook, from its mouth to its source in the Madawaska Lakes.

3. In surveying the group of lakes lying northwest of the Madawaska Lakes, known by the appellation of the Eagle Lakes, or sometimes by the aboriginal one of the Cheaplawgan Lake., and especially to ascertain if those lakes, or any of them, emptied their waters into the river St. John by any other outlet than Fish River.

4. A survey of the portion of Fish River included between the outlet of Lake Winthrop and the river St. John.

5. A survey of the river St. John between the Grand Falls and the mouth of the Alleguash.

6. A survey of the Alleguash from its mouth to its source.

7. A survey of the river St. Francis from its mouth to the outlet of Lake St. Francis.

8. In making astronomical observations for the latitude and longitude of the Grand

Falls and the mouths of the Grand, the Green, Madawaska, Fish, and St. Francis rivers.

Early in July a party under the direction of an officer of Topographical Engineers was sent into the field and directed to occupy the most northern astronomical station fixed the preceding year upon the true meridian of the monument at the source of the river St. Croix, with the view of being prepared to complete its trace to the northwest angle of Nova Scotia before the termination of the season in case the pending negotiations for a conventional boundary should fail.

The true meridian was in this way prolonged to a point 19 miles north of the station alluded to of last year, or $13\frac{1}{2}$ miles north of its intersection with the river St. John, reaching to the summit of the height immediately south of Grand River, where a permanent station was fixed. The point thus fixed is $90\frac{3}{4}$ miles north of the monument at the source of the St. Croix.

This portion of the work was performed by the 15th of August, at which period it was considered inexpedient to incur the expense of continuing it any farther.

A party under the direction of another officer of Topographical Engineers, which took the field also in July was charged with the surveys of the Little Madawaska River, the Eagle or Cheaplawgan Lakes, the portion of Fish River from the outlet of Lake Winthrop—one of the Eagle group—to its débouché into the St. John, of the river St. John, thence to the meridian of the source of the St. Croix, and finally of the Alleguash from its mouth to its source.

The Little Madawaska was ascended in bateaux from its mouth to its source, which is found in the Madawaska Lakes, and a trace of the river was made by coursing with a compass and estimating the distances, which were checked by astronomical observations for latitude and longitude.

The position of its mouth had been fixed by the surveys of the preceding year, and observations for latitude and longitude were made at a point intermediate between its mouth and its source and also at the junction of the two lakes which form its source. The trace of the river was corrected so as to agree with the results of these observations before being laid down upon the map.

A portage of 5¼ miles was cut from the Madawaska to the Eagle Lakes, which are only 4¾ miles apart in a direct line. The party transported their baggage and boats by this portage and launched them on Lake Sedgwick, the most southern and largest of the Eagle group.

This group, which is composed of the Winthrop, Sedgwick, Preble, Bear, and Cleveland lakes, being all connected one with another by water communications between them, was carefully surveyed by triangulating them and coursing their shores with the chain and compass, except those parts which were so straight as to render the work sufficiently accurate by sketching those portions between consecutive points of triangulation of no great distance apart. They were also sounded so far as to obtain their general depths.

The survey was continued from the outlet of I,ake Winthrop down Fish River to its mouth, which was found to be the only outlet from this group to the river St. John.

Lake Cleveland, the most northern and deepest of the group, was connected in position with the river St. John at a point 2 miles below the upper chapel of the Madawaska settlement, by a chained and coursed line following the portage represented on the map 5½ miles long.

The Alleguash was ascended in the month of October in bateaux and canoes from its month to its source in Lake Telos, a distance of about 94 miles. The river and its lakes were coursed by a compass, the distances estimated, and the projection resulting therefrom corrected before being placed upon the map by means of astronomical observations at eight intermediate points between its month and its source. The lakes were triangulated by means of magnetic bearings as far as was practicable, in order to obtain their widths and general contour. In the vicinity of Chamberlain Lake use has also been made of a recent survey of Mr. Parrott, a surveyor in the employ of the State of Maine, to whom we acknowledge ourselves indebted for the aid which this portion of his valuable labors furnished us.

Between the head of Lake Telos and Webster Pond, one of the sources of the East Branch of the Penobscot, there is a portage of only I mile and a half. This, together with a small cut or canal, made in 1841 to connect the waters of Lake Telos with those of Webster Pond, enabled the party which made this survey to proceed with their boats and baggage down the Penobscot to Bangor, where they and their surplus stores were disposed of.

A survey of the river St. John was made in the month of September with the chain and compass from the mouth of Fish River to the intersection of the meridian of the monument at the source of the St. Croix with the St. John. This survey was afterwards extended eastward to the Grand Falls, in order to connect with the astronomical station established there, and westward to the mouth of the Alleguash, embracing a distance of 87 miles. The islands were all surveyed, and the channels on either side of them sounded.

The commissioner, having had other duties assigned him in reference to the question of boundary, did not take the field in person until September. Between the middle of that month and the middle of December he was occupied in performing the field duties assigned him by the Department of State.

The party conducted by him in person made the astronomical observations for the determination of the latitude and longitude of the Grand Falls of the St. John, and of the mouths of the Grand, Green, Madawaska, Fish, and St. Francis rivers, all tributary to the St. John.

The same party also made a survey of the river St. Francis from its mouth to the outlet of Lake St. Francis, a distance of S1 miles.

This river was coursed by means of a compass, and when ver the nature of the shores would permit the distances from bend to bend were either measured with a chain or paced. Through the greater part of the stream, however, the impediments offered by the thick and small growth near the shores rendered this degree of minuteness impracticable and a resort to estimating the distances by the eye, well practiced by previous actual measurements, became necessary.

Before putting the trace of the river thus derived upon the map it was adjusted to correspond with the results of astronomical observations for latitude and longitude at twelve intermediate points between its mouth and the outlet of Lake St. Francis. Its three principal lakes, viz, Pettiquaggamas, Petteiquaggamak, and Pohenagamook, were triangulated and sounded as exhibited by the maps of detail yet to be handed in of the operations of this division.

A profile of the river, exhibiting the slope of the country through which it flows, was obtained by barometric observations made at fifteen points between its mouth and the bridge where it is intersected by the Grand portage road.

A connection was made with Long Lake, a tributary to Lake Temiscouata, by a chained line from a point on the St. Francis 2 miles below the mouth of Blue River to the western shore of Long Lake, by which it was ascertained that the shore of this lake approached within $2\frac{34}{2}$ miles of the river St. Francis.

The outlet of Lake Pohenagamook was reached in a distance of 4934 miles from the mouth of the St. Francis following the sinuosities of the river on the 18th of October.

A camp was established on the southwest shore of the lake at its outlet for the purpose of making the necessary astronomical observations to determine the latitude and longitude of this position. Ten days were spent here for this object, out of which we had only three nights that were tavorable for observation. These were improved as far as possible, and the results obtained, combined with those obtained by Captain

Talcott's parties on the Northwest and Southwest branches of the St. John, have furnished the elements for laying down upon the general map the straight lines which show the boundary as it is required to run between the highlands and the river St. John under the treaty of 1842. These furnish data for an accurate exhibition of the extent of territory included by this portion of the boundary as fixed by that treaty.

The south shore of Lake Pohenagamook forms an angle of about 100° with the direction of the stream which flows from it, and marks with great certainty the point at which, according to the late treaty, the straight line is to be commenced in running the boundary southwestward to the Northwest Branch of the river St. John.

The work of this division was connected with that of Captain Talcott's division of the preceding year by noting the position of a common point on the western shore of Lake Pohenagamook near its head.

The commissioner and his party reached the Grand portage, or British military road, where it crosses the river St. Francis on 'he 2d of November, and connected their work with that of Professor Renwick's division of the preceding year at the bridge near Fournier's house.

Observations were also made at this bridge for the latitude and longitude, when the weather was favorable, between the nights of the 2d and 5th of November, and a connection was made in longitude with the meridian of Quebec by comparisons of the local time with three chronometers transported from the first to the last mentioned place between the 6th and 10th of November.

This comparison was repeated on the return of the commissioner by observing again at the St. Francis bridge before mentioned on the night of the 10th of December, with the thermometer ranging during these observations from 11 to 15° below zero of Fahrenheit's scale, there being then near 4 feet of snow upon the ground. The commissioner then proceeded by the Grand portage road, and the road which pursues the margin of Temiscouata Lake and the valleys of the Madawaska and St. John rivers, to the mouth of Green River, where on the night of the 12th of December he again observed at the same point where his observations of the 29th of September were made while ascending the St. John. These completed, he proceeded to the Grand Falls, and on the 14th of December discharged his party, which terminated his field duties for the season.

The distance surveyed along the new line of boundary by this division the past season is—

		Miles.
	1. Along the river St. John from the meridian of the monument of the source of	
	the St. Croix to the mouth of the river St. Francis	711/2
:	2. Along the river St. Francis from its mouth to the outlet of Lake Pohenaga-	
	mook	4934
	Total	1211/4

IV.

A map marked L^2 , on a scale of 1:400,000, exhibiting the lines respectively claimed by the two nations under the treaty of 1783, as well as that adopted by the treaty of 1842, is herewith presented. By reference thereto the operations of the several divisions during the present and previous years will be better understood.

For a more particular view of the surveys and explorations made under the direction of each of the commissioners, including descriptions of the face of the country, navigation of streams, etc., the undersigned respectfully refer to their respective narratives hereto appended, and to the maps of detail deposited by each in the Department of State.

All which is respectfully submitted.

JAS. RENWICK, A. TALCOTT, JAMES D. GRAHAM, *Commissioners*.

APPENDIX NO. I.

DPERATIONS OF THE DIVISION UNDER THE DIRECTION OF JAMES RENWICK, LL. D., CHAIRMAN OF THE BOARD.

I. - Operations during the year 1841.

I. At as early a period as there was any probability of the country being accessible two engineers were dispatched from the city of New York for the purpose of exploring the Rimouski River. This had been crossed by the commissioner late in the previous season. It had been ascertained that it took its source much farther to the south than was represented on any map, and that at its head would be the greatest difficulty in the intended researches. It was, besides, considered necessary that skillful boatmen and practiced woodsmen should be engaged in Canada. These it was believed could be found in Quebec, and the chief of this detachment, with an appointment as acting commissioner, was directed to perform this duty on his route.

This detachment accordingly left New York on the 22d May. On reaching Quebec it was found that the proper persons could only be engaged at Trois Rivieres. A delay was thus occasioned before this part of the duty could be performed. The detachment, however, reached Rimouski 4th June, where the snow was still found upon the ground and the river barely fit for the access of boats. No time had therefore been lost, and the reconnoissance of the river was successfully performed. The detachment, after passing all the establishments of lumberers, extended its explorations beyond the remotest Indian paths, and leaving its boats penetrated on foot several miles to the south of the highest point of the stream in which boats could float. In this progress through unexplored ground a lake wholly unknown was discovered. The results of this expedition were embodied in a map, which on examination by parties furnished with better means was found accurate.

It was found by this party that the Rimouski presented difficulties which would forbid its ascent by a party provided with stores and instruments for the prosecution of a survey along the height of land, and that it would be impracticable even to make it the route of an expedition to reach its own source. The little knowledge which was possessed of its upper course and the fact that it had probably never been explored even by Indian hunters were accounted for by its difficulty of access, which would forbid the carriage of a sufficient supply of provisions for consumption during its ascent and descent. On other streams difficulties of this sort had been and were afterwards overcome by the use of the bateaux of the Penobscot, of greater burthen and strength than the birch canoes, but the continual repetition of portages on the Rimouski forbade the use of any vessel heavier than the latter.

2. The main body of engineers, etc., was ordered to assemble in New York on the 15th May, for which time a vessel was chartered for the purpose of conveying them, with stores sufficient for an expedition of five months and the necessary instruments and camp equipage, to Metis, on the St. Lawrence. The experience of the former season had shown that the country was so poor as to furnish little for the support of a numerous party, and it was believed that even game and fish would be found scarce at the points where supplies would be most needed. It was therefore to be chosen between laying in the supplies in New York or in Quebec, and while the great advantage of conveying all the important instruments by sea turned the scale in favor of the former place, it has been ascertained that the decision was in other respects correct, for the dangers and difficulties of navigating the St. Lawrence might have frustrated altogether, and would certainly have materially delayed, the commencement of the man survey.

The sailing of the vessel was delayed, in expectation of the arrival of instruments

from Europe, until the 30th of May, when a sufficient supply for beginning the operations arrived.

In the meantime Mr. Lally, one of the first assistants, was directed to proceed to Bangor, in Maine, for the purpose of procuring boats and men to manage them. These were obtained and brought down the Penobscot to Castine, where they were on the 8th June embarked in the vessel which carried the rest of the party, and which had orders to call at that port for the purpose. The experience of the previous year had manifested the great superiority of the batcaux of the Penobscot over all other vessels in the navigation of shallow and rapid rivers. The physical energy and enterprise of the boatmen of that river had also been known. It was believed that it was not only essential that a considerable proportion of the laboring force should be American citizens, but that much good would result from emulation between the boatmen of the Penobscot and the Canadian voyageurs. This expectation was in a great degree confirmed by the result, for although it must be stated with regret that it became necessary at an early period to discharge some of the Americans, the remainder were models of intelligence, sobriety, industry, and perseverance, and entered into the work, not with the feelings of hired laborers, but with those of men who felt that the interest of their country was at stake.

3. The commissioner did not leave New York until 30th of June, being delayed in expectation of more instruments. A part of these only had arrived, but further delay might have been injurious. Proper instructions had been given for setting the party in motion in case it could be organized before he joined it, but these were rendered nugatory by the length of the vessel's passage. This did not reach Metis till 7th July, so that the commissioner, arriving on the 9th, was in time to direct the first operations in person. The stores, boats, and instruments had been landed and partially carried to a camp on the river above the falls. A heavy rain on the 10th July rendered the roads almost impassable, and it was not till the morning of the 12th that the first detachment could be embarked. This was comprised of Dr. O. Goodrich, the assistant commissary, two surveyors, and an assistant engineer. The first was in charge of stores sufficient for six weeks' consumption. The surveyors had orders to survey the river for the purpose of connecting it with the line of exploration, and the latter was directed to make barometric observations. The commissioner and the remaining engineers were detained at Metis by the necessary astronomic observations. These being completed, the instruments, camp equipage, and a portion of the stores were embarked, and the main body proceeded up the river about noon on the 15th July.

4. The river was found to be still swollen by the melting of the snows on the highlands near its source, and, being at all times rapid, the progress of the party was attended both with difficulty and danger. One of the birch canoes, although managed by a skillful voyageur, was twice upset, and one of the heavily loaded bateaux filled with water in a rapid. The result of the first accident was unimportant, except as respected the personal comfort of one of the party, who lost his clothing when it could not be replaced; the second accident caused the loss of some valuable stores. A guide had been procured in the person of a Canadian who was said to have acted in the same capacity to Captain Broughton, who had descended the river by order of the commissioners of Great Britain in 1840. So long as the services of the guide were unimportant he was found intelligent and acquainted with the country, but on passing beyond the region usually visited by lumbering parties he manifested a very scanty knowledge. It had been the intention of the commissioner to ascend to Lake Metis and thence proceed to the height of land by an old portage said to have existed from that lake to the one at the head of the Grande Fourche of the Restigouche, which had been explored by the commissioner in 1840. Lake Metis was chosen because all former accounts, and particularly those of the surveyors of the joint commission under the fifth article of the treaty of Ghent, represented this

Messages and Papers of the Presidents

as the body of water seen to the northwest of the termination of the exploring meridian line. The guide appeared to confirm this impression, and held out inducements that led to the belief that he was acquainted with the portage in question. The nearer, however, it was approached the less seemed to be his confidence. When there appeared to be some reason to doubt his competency or his will, a place in the river was reached where it divided into two branches of nearly equal magnitude. On inquiry from the guide it was ascertained that the easternmost of these was the main Wetis, the other the Mistigougeche (Riviere au Foin). Although the latter appeared to be the most direct course to the boundary, it was still believed, and nothing could be learned from him to the contrary, that the former led to the termination of the exploring meridian line. The party of Dr. Goodrich had gone up the Metis, and it was necessary to communicate with it before any change in plan could be made. The commissioner therefore entered the main Metis, and in the evening overtook the surveyors, who had been unable to keep the survey up with the progress of the boats. An express was therefore sent forward to stop the boats, and, the party encamping, astronomic observations were made for the solution of the difficulty in which it appeared to be enveloped. A detachment was also sent out to explore to the eastward of the Metis. This reached the Lake of the Little Red River, and from its banks took bearings to what appeared to be the greatest mountain of the country. This is known by the name of Paganet, and lies to the southwest of Lake Matapediac, forming a part of the highlands which are so obviously described as the boundary of the Province of Quebec in the proclamation of 1763. Its height was reported to be probably 3,000 feet, but as it has appeared in the course of the survey that heights in that region may easily be overestimated, it can not be safely taken at more than 2,500 feet. The result of the astronomic observations seemed to show that the main stream would lead too far to the eastward, and after mature deliberation it was resolved that the course should be retraced and the Mistigougeche ascended. The first part of the operation was attended with little delay. Half an hour sufficed for reaching the forks, whence the party had been six hours in mounting. The guide also stated that the Mistigougeche was a much less difficult stream than Metis. Of the comparative facility, except for a few miles of the latter, no opportunity for judging was obtained; but these were so difficult as to confirm his statement. On the other hand, the former was found to be much worse than it had been represented by him. His knowledge, in fact, was limited to its state in winter, for it appeared from a subsequent interview with Captain Broughton to be doubtful whether he had served in the employ of that officer; and it can be well imagined that the river when locked up in ice should present an aspect of far less rapidity than when rushing with its springtide violence. The Mistigougeche was found to be intercepted by a fall of a few feet, which could not be passed by the boats when loaded, although the Penobscot men boldly and successfully carried theirs up when empty, in which feat they were imitated by the voyageurs, who had at first deemed it impossible. The loads of the boats were carried over a portage, and in this operation the chronometers were found to deviate from each other, showing a manifest change of rate in some or all of them. This may be ascribed to a change in the mode of transportation, but was more than could be reasonably anticipated, considering the shortness of the portage (2,000 yards) and the great care that was taken in conveying them. At some distance above the falls a lake of moderate size was reached, embosomed in hills and embarrassed at its upper end with grass. From the last feature it was ascertained that both sets, and river take their epithet of Grassy (Riviere au Foin, and, in Indian, of Mistigougeche, or Grassy Lake). At this lake the party of the commissioner was in advance of the loaded boats. A halt was therefore made and a party sent out to explore to the westward. This party reached an eminence whence a lake was seen, which the guide stated to be the head of a branch of the Rimonski, far distant, as he averred, from any waters of the Restigonche. Subsequent examination has shown

that this party had actually reached the height of land and that the survey of the boundary might have been advantageously commenced from this point.

On leaving the lake the river was found to have a gentle current for a few miles. It was then interrupted by a bed of timber, after passing which it became as rapid as ever. In a short time, however, a noble sheet of water was reached, surrounded by lofty hills, and of great depth. At the upper end of this a place was chosen for a stationary camp, and preparations were made for proceeding to the land survey. While these were going forward with as much dispatch as possible, Mr. Lally, one of the first assistants, was detached to reconnoiter the inlet of the lake. During his absence observations were taken and the rates of the chronometers worked up. Of the four instruments with which the expedition was furnished, two had varied from the other two on the portage. All were of good reputation, and no means existed of determining on which pair reliance could be placed. From the rates of two of them it appeared that the camp was situated 12 miles to the northwest of the tree chosen by the American surveyors in 1818 as marking the northwest angle of Nova Scotia. Actual survey has shown that the distance is about 10 miles. The result given by the chronometers was speedily confirmed by the return of Mr. Laily, who reported that he had actually reached the marked tree, well known to him by his visit to it the year before, and that he had pursued for a couple of miles the line cut out subsequently by Captain Broughton.

6. The preparations being completed, Messrs. H. B. Renwick and Lally were sent out, each at the head of a sufficient party, with instructions to proceed together to the west until they reached waters running to the Restigouche and then to divide, Mr. Lally proceeding to the northwest angle and Mr. Renwick toward Rimouski. Each was directed to pursue as far as possible the height of land and 'o remain in the field as long as the supplies which the men could carry would permit. They were also ordered to mark their path in order to insure a safe return, as well as all the stations of their barometric observations. Each of the laborers was loaded with 56 pounds besides his own baggage and ax, and the engineers and surveyors carried their own baggage and instruments. The commissioner, with one assistant, remained in the stationary camp for the purpose of determining the longitude accurately and of making corresponding barometric observations.

7. In this place it will be proper to state that the lake which was thus reached was ascertained with certainty to be that seen by the surveyors of the joint commission in 1818, and which was by them supposed to be Lake Metis. As it has no name yet assigned to it, it has been called upon our maps Lake Johnson, in honor of the American surveyor by whom it was first visited. It is 1,007 feet above the level of the sea, being more than twice as much as the total fall assigned to the waters of the Metis in the report of Messrs. Mudge and Featherstonhaugh. So great an elevation in so short a course is sufficient to account for the great rapidity of the stream. To illustrate this rapidity in an obvious manner, the birch canoes, which on the waters of the St. John are easily managed by one man, are never intrusted on those of the Metis to less than two. Our departure from Metis in boats so deeply loaded, as was afterwards learned, was considered there as a desperate attempt, and although but one of them sustained injury, this is to be ascribed to the great skill of the boatmen; and to show the velocity of the stream in a still stronger light, it is to be recollected that, after deducting the loss of time on the Metis, nine days of incessant labor were spent in taking up the loaded boats, while the assistant commissary whom it became necessary to send to Metis left the stationary camp at 2 o'clock in the morning of the 28th July and reached the mouth of the river before sunset of the same day, after making two portages, one of 2,000 yards and the other of 2 miles.

8. The first day of the operations of Merses H & Renwick and Laliy was attended with an accident which had an injurious effect. The surveyor of Mr. Lally's party, Mr. W. G. Waller, fell from a tree laid as a bridge across a stream and lamed himself to such a degree as to be incapable either of proceeding with the party or of returning to the stationary camp. It became necessary, therefore, to leave him, with a man to attend him, in the woods, and it was a week before he was sufficiently recovered to be able to walk. Intelligence was immediately sent to the commissioner, by whom the assistant he had retained in camp to aid in astronomic observations was sent to take the place of the surveyor. Two days were thus lost, and the intended astronomic observations were far less numerous than they might have been with the aid of a competent assistant.

The two parties, proceeding together, reached Katawamkedgwick Lake. That under the direction of Mr. II. B. Renwick immediately crossed it, while that of Mr. Lally proceeded along the eastern bank for the purpose of reaching the source of the stream. This being attained, the party of Mr. L. pursued the height of land as nearly as possible and reached the exploring meridian line. Crossing this, some progress was made to the eastward, when a failure of provisions compelled a return to camp. The party of Mr. H. B. Renwick, proceeding until the Rimouski was seen, turned to the south and finally reached the southeasterly source of that river, a point probably never before pressed by human foot, for it was found to consist in a series of beaver ponds, in which that animal was residing in communities and without any appearance of having been ever disturbed. The low state of provisions in this instance also called the party back, but not before every anticipated result had been obtained.

9. The party of Mr. H. B. Renwick having returned first, immediate preparations were made for descending the stream. Before they were completed Mr. Lally also came in, and both were assembled at Metis on the 14th, whence the commissioner set out instantly for the river Du Loup, which had been chosen as the base of further operations.

The circumstances of the operations up the Metis and Metis and Mistigougeche had been upon the whole favorable. With the exception of a single thundershower, no rain had been experienced; the country was still sufficiently moist to insure a supply of water even upon the ridges. The sun was observed daily for time and latitude, and the nights admitted of observations of the pole star for latitude at almost every camp. At the stationary camp, however, the mists rising from the lake obscured the horizon and rendered the eclipses of Jupiter's satellites invisible; nor was it possible to observe the only occultation of a star which calculation rendered probable during the period in question. Much, however, had been accomplished. A river little known had been carefully surveyed some miles beyond its junction with a branch unheard of by geographers. This branch had been explored, its course and length determined; a path nearly coinciding with the boundary line for an extent of 86 miles had been measured and leveled, and regions before unseen visited. One accident of a serious character had occurred, and one of the laboring men, although an homme du nord, seasoned in the service of the Hudsons Bay Company, had been rendered unfit by fatigue for further duty in the service; but with these exceptions the health and strength of the party were unimpaired. All augured well for a speedy and successful completion of the task in a manner as perfect as had been anticipated.

IO. Instructions had been transmitted to the commissary, as soon as it was found that a portage to Katawamkedgwick and thence to Rimonski was impracticable, to have a vessel ready at Metis to transport the stores to the river Du Loup. One was in consequence chartered, but, being neaped in the harbor of Rimonski, did not reach Metis till the 19th August. When loaded, her sailing was delayed by an unfavorable wind, and its continuance prevented her from reaching the river Du Loup before the 29th August. An entire week of very favorable weather was thus lost for field operations, and it was not even possible to employ it to advantage in observations, as all the chronometers but one and the larger instruments, in order to expose them as little as possible to change of rate or injury, had been forwarded from Metis in the vessel. With the one chronometer and the reflecting repeating circle numerous observations were, however, made for the latitude of the river Du Loup.

11. During the time the main body was engaged in ascending the Metis and in the other operations which have been mentioned an engineer was directed to proceed

from Metis along the Kempt road for the purpose of exploring along the dividing ridge between the waters of the Bay of Chaleurs in the vicinity of Lake Matapediac and the St. Lawrence. This line forms the continuation of that claimed by the United States, and is important in its connection with the proclamation of 1763, but as it falls without the ground which is the subject of dispute, it was not considered necessary to survey it. The heights which could be reached were therefore measured with the barometer, and the position of the points at which the observations were taken referred to existing maps without any attempt to correct their errors.

In the course of this reconnoissance an eminence 1,743 feet in height, lying to the southeast of Lake Matapediac, was ascended. Thence was had the view of a wide, cpen valley extending toward the southeast to the Bay of Chaleurs and bounded on the northeast and southwest by highlands. The former were pointed out by the guide as the Chic Choc Mountains, in the district of Gaspe; the latter, it appeared beyond question, extended to the Bay of Chaleurs, and strike it below the Matapediac. At the latter place a party detached down the Restigouche in 1840 had measured the height of Ben Lomond, a highland rising abruptly from the western termination of the Bay of Chaleurs and found it to be 1,024 feet. Thus it appears beyond the possibility of doubt that a chain of eminences well entitled to the name of highlands, both as dividing waters and rising to the character of mountains, depart from "the northern shore of the Bay of Chaleurs at its western extremity," bound the valley of the Matapediac to the northeast, and, bending around the lake of that name, separate its waters from those of the Metis. These are deeply cut by valleys, whose direction appears from the map of the reconnoissance and from the course of the tributary streams which occupy their lines of maximum slope to run from southwest to northeast, or at right angles to the general course of the highlands themselves. These highlands are obviously those defined in the proclamation of 1763 and the commission of Governor Wilmot.

12. As soon as the necessary instruments arrived from Metis at the river Du Loup a party was detached to survey the Temiscouata portage, a line known to be of great importance to the subsequent operations, but whose interest has been increased from the unexpected frequency with which the line dividing the waters touches or crosses it. Stores for a month's service were transported with all possible dispatch to Lake Temiscouata, along with the boats and camp equipage.

Two separate parties were now formed, the one to proceed up Temiscouata Lake, the other to ascend the Tuladi. The embarkation of both was completed at noon on the 4th September.

13. Mr. H. B. Renwick, with the party under his command, was directed if possible to ascend the middle or main branch of Tuladi and form a stationary camp at the highest point of that stream which could be reached by boats.

Mr. Lally had orders to enter and follow the river Asherbish, which enters Lake Temiscouata at its head, until the progress of his boats should be interrupted. The first party was directed to operate in the first place toward the west, the second toward the east, upon the height of land until they should meet each other's marks. The party of Mr. H. B. Renwick was directed, therefore, to proceed from the head of Tuladi and reach if possible the head of Rimouski, thus forming a connection with the line explored from the head of Mistigougeche; that of Mr. Lally to proceed from the head of Asherbish along the height of land to the Temiscouata portage. The commissary was then moved up with a large amount of stores and halted on the summit of Mount Biort, to be within reach of both the parties in case of a demand for new supplies, and to receive them on their return.

14. The party of Mr. II. B. Renwick, having passed through Tuladi Lake, entered the main stream of that name on the 5th September. The head of it had been seen by that gentleman in September, 1840, and held out the promise of abundance of water for navigation. This promise did not fail, but it was found that the stream had probably never before been ascended, and was therefore embarrassed with driftwood. After cutting through several rafts with great labor, a place was reached where the stream spread out to a great width over beds of gravel, and all further progress in boats became impossible. It was therefore determined to fall down the stream and ascend the western branch, well known under the name of Abagusquash, and which had been fully explored in 1840. The resolution to return was taken on the 6th, and on the evening of the 9th the beaver pond at the head of Abagusquash was reached; here a stationary camp was established. One of the men had wounded himself with an ax and three more were so ill as to be unfit for service. The numbers were yet sufficient for short expeditions, and one was immediately fitted out for the head of Tuladi with provisions to form a cache for future operations. This expedition explored so much of the height of land as would otherwise have been thrown out of the regular order in consequence of the failure to ascend the main branch of Tuladi

15. In the meantime Mr. Lally proceeded up Lake Temiscouata and entered the Asherbish. This stream was also found very difficult, and on the evening of the 7th no more than 7 miles had been accomplished on it. At this point a stationary camp was fixed and a detachment sent out to explore the neighborhood. On the 10th Mr. Lally set out to the castward, and struck the lower end of Abagusquash Lake on the afternoon of the 11th September. Being obviously too far to the south, he ascended that stream and reached H. B. Renwick's camp on the evening of the 12th. The next morning he proceeded to the height of land, and after twice crossing it reached his stationary camp on Asherbish at noon on the 21st September.

On this expedition two out of three barometers were broken, and an assistant was therefore sent to seek a fresh supply from the stores.

16. The expedition sent out by H. B. Renwick to the head of the Tuladi returned on the 13th Ser ember. One of the men came in severely wounded, and those left sick and wounded in camp were still unfit for service; others also were taken sick. Of the laborers of the party, one-half were thus lost for the present to the service. The engineer in command, who had finished the observations for which he had remained in the stationary camp, determined, therefore, to proceed to Mount Biort in order to obtain men. Previous to his departure on the 15th September he fitted out a second expedition with all the disposable strength for the purpose of operating between the head of Tuladi and the point in the height of land where Mr. Lally's line diverged to the southwest. The newly engaged hands and the detachment on its return both reached the camp on the Abagusquash on the 19th of September. On the 21st, all arrangements having been completed, Mr. H. B. Renwick, leaving the assistant commissary with only one man in the stationary camp, set off toward the head of Rimouski. This course was pursued for six days, when it became necessary to return for want of provisions, and the stationary camp was reached on the 2d October. On this expedition the line of exploration made in June up the Rimouski was intersected and the ground traversed in July and August seen and connected with the survey, but it was found impossible to penetrate along the height of land on the western side of Rimonski to its head. On reaching the camp snow began to fall, and the thermometer marked 18° in the morning. All further operations for the season in this direction were therefore at an end. A portion of the line which divides the waters falling into the St. John from those falling into the St. Lawrence remained in consequence unsurveyed. It can not, however, be said to be absolutely unexplored, for it was seen from the eastern side of Rinn uski, presenting the appearance of a range of hills at least as elevated as any on the boundary.

18. Mr. Lally having received a fresh supply of barometers on the evening of the 23d, resumed his survey of the height of land on the 25th September, and reached the camp of the commissary on Mount Biort on the 2d October, having surveyed and leveled the intermediate dividing ridge. The party of H. B. Renwick descended the Abagusquash and Tuladi, and, crossing Lake Temisconata, reached the same

rendezvous on the 5th October. The interval was spent by Mr. Lally's party in clearing a space for a panoramic view on the summit of Mount Biort.

19. The commissioner, having superintended in person the equipment and embarketion of the parties of Messrs. H. B. Renwick and Lally on Lake Temiscouata, returned to the river Du Loup for the purpose of making astronomic observations. These being completed, he visited and conferred with the parties of his colleague, A. Talcott, esq., on their way to the height of land southeast of Kamouraska. Here he made arrangements for the junction of the two lines on the Temiscouata portage. He then proceeded to the camp of the commissary on Mount Biort, and there made provision for the completion of the residue of the line in the vicinity of the portage. He also selected points of view for the use of the daguerreotype and camera lucida, and, being unable to do any more on the ground for the furtherance of the objects of his appointment, returned to New York, taking with him the earlier records of the field operations for the purpose of organizing the office work.

20. Under the direction of Mr. H. B. Renwick, a party led by Mr. Lally set off from Mount Biort on the 7th October, and, proceeding westward along the portage road to the ridge of Mount Paradis, turned to the south along the dividing ridge. This being pursued led them back to the portage at a point about 21½ miles from the river Du Loup on the 10th. The dividing ridge was now found for some distance to coincide nearly with the portage road and to pass over the summit of the Grande Fourche Mountain, a fact which had not before been suspected. The source of the Grande Fourche of Trois Pistoles having been headed, the party reached a station which the commissary had now established at the river St. Francis on the 13th October. Departing from this, the basin of the St. Francis to the north of the portage road was explored, and the survey finished on the 17th October.

Operating from the St. Lawrence as a base, and within reach of a cultivated country, whence numerous roads are cut to the height of land, it would have been possible to have kept the field for perhaps a fortnight longer. The plans and estimates of the division had been made with this view, and it was anticipated that the height of land might have been surveyed 30 miles to the south of the Temiscouata portage. Although this would have been practicable, it would have been a service of hardship. The necessity for this was obviated by the progress of the parties of A. Talcott, esq., which completed their surveys up to the portage on the same day that the surveys of this division were finished.

22. The circumstances under which the latter part of the survey was performed from the time of leaving the river Du Loup, on the 3d September, were far less favorable than had been experienced on the Metis and its branches. The continual drought had at the beginning of this part of the duty affected the streams and springs in such a way as to render navigation difficult and water for drinking scarce on the heights of land to which the survey was necessarily directed. On the eastern side of Lake Temiscouata a large fire had extended itself into the woods. On the Temiscouata portage the persons in charge of that road had set fire to the brush and wood cut in opening it out to an increased breadth, and a belt of flame 30 miles in length was at each change of wind carried in some new direction into the dry forest. The camp and collection of stores on Mount Biort were thus threatened for several days, and only saved by great exertions. Serious apprehensions were entertained lest the return of the parties in the field might be obstructed by the spreading of their own fires. The smoke of this vast extent of combustion obscured the heavens and rendered astronomic observations difficult or prevented it altogether. Finally, a season of unprecedented drought was closed on the 24th of September by the setting in of the equinoctial storm, and from this day until that on which the survey terminated few hours elapsed without rain, sleet, or snow. In spite of these obstacles, it is believed that the State Department will have no reason to be dissatisfied with the results of the campaign.

23. The results of the operations of this division are embodied in a map and profiles, which are herewith presented. The degree of reliance to be placed on this map will be best understood from a detail of the methods employed in preparing it.

The river Metis and its branch, the Mistigougeche, were surveyed by an azimuth compass of Smallcaldus construction, and the distances measured by a micrometric telescope by Ertil, of Munich. The courses of the rest of the lines were determined by compasses of similar construction, and the distances measured by chains of 100 feet constructed by Dollond, of London, and Brown, of New York. An exception to this general rule exists in the survey of the eastern side of Rimouski. The courses and distances thus measured, and corrected for the variation of the compass, were compared with astronomic observations for latitude and with longitudes deduced from chronometers. For this reason, as the line on the east side of Rimouski is almost in the direction of the meridian, it was not considered necessary to lose time in measuring it when the latitude of the several camps, determined by observations of the pole star, were taken nightly.

The latitudes of the courses under the direction of Mr. H. B. Renwick were deternined by a reflecting repeating circle of Dollond; those on Mr. Lally's by a good sextant. The latitudes and times at Grand Metis, the river Du Loup, and the stationary camp on Mistigougeche and Abagusquash were principally determined from observations made with the Dollond circle. Lunar transits were taken at the river Du Loup, and distances of the moon for longitude at several places on the line. The reliance for the longitudes was, however, principally upon timekeepers, and of these the party was furnished with one box and two pocket chronometers by Parkinson & Trodsham, one pocket chronometer by Molyneux, one by French, one by Barraud, and one by Morrice. Thus, while several could be retained at the station, each party in the field was furnished with two, and the measured distance furnished a check. which, in case of discrepancy, that on which greatest reliance could be placed might be ascertained. It is sufficient to say that the deductions have been in general satisfactory, although the rough motion to which these instruments were subjected in passing through pathless woods, embarrassed by fallen trees and morasses in which the bearers often sunk to the middle, caused changes of rate and even sudden variations. Uncertainty arising from these causes was rendered less to be dreaded from its being possible to refer, as a base of operations, to the excellent survey of the St. Lawrence River by Captain Byfield, of the British navy. With the geographical positions given in his charts our own observations agreed so closely as materially to confirm the respective accuracy of both.

24. The point which in this part of the survey has been kept in view as most important is the determination of the heights. For this purpose the party of Professor Renwick was furnished with the following barometers:

Two loaned by the Superintendent of the Coast Survey, of his own construction; two portable and one standard, by Neurnan; three of the siphon form, by Bunnin, of Paris; one by Traughton & Simms; one by Forlin, of Paris; three of siphon form, by Roach & Warner, of New York; two by Tagliabue, of New York, originally on the plan of Durand, but which had been advantageously altered by Roach & Warner in such manner as to admit of the adjustment of the level of the mercury in the eistern.

The stations at which the lower barometers were placed were Grand Metis until the return of the expedition up the river of that name, and the river Du Loup from that time until the close of the survey. At these places all the barometers not actually in the field were suspended and registered at the hours most likely to correspond with the observations of a traveling party, say at 6, 7, 8, and 9 in the morning, noon, 1, 5, and 6 in the afternoon, until as the season advanced and the days became short the earliest and latest of these hours were omitted. Although several barometers were thus constantly observed, no other use of these was made but to determine their comparisons with each other, except one of the barometers of Mr. Hassler,

Superintendent of the Coast Survey. This, from its superior simplicity, being, in fact, no more than the original Tonicillean experiment, with a well-divided scale and adjustment of its 0° to the surface of the mercury in the cistern, was found to be most certain in its results. All the barometers used by the parties in the field were therefore reduced to this by their mean differences.

The stations at the two above-mentioned places were near the St. Lawrence. At Metis the height of the cistern of the standard barometer was determined by a spirit level. At the river Du Loup the height of the station was determined by two sets of observations of barometers, taken with different instruments by different observers, and at an interval of a week from each other. The results of the two several sets, which were calculated separately, differ no more than 0.5 of a foot from each other.

On reaching the highest accessible points of the streams on which the parties proceeded toward the height of land, stationary camps were established, as has been already stated. At these series of observations were made at the same hours as at the river stations. The height of the former was then calculated from a series of observations taken at noon and at I p. m. for the whole of the time the camp was occupied. The heights of the points at which observations were made by the traveling party were then deduced from a comparison with the nearest contemporaneous observations at the stationary camp. An exception to this rule was made in the observations to the westward of Temiscouata Lake, which were referred directly to those made at the river Du Loup, which was sufficiently near for the purpose.

The height of the stationary camp at Mount Biort having been determined by observations continued for several days, the level of Lake Temiscouata was thence determined by using a set of levels taken with a theodolite by Breithaupt, of Cassel, in 1840. The height of the lake thus deduced is greater than it would appear to be from the barometric observations taken in December, 1840. It had been imagined that a difference in level might exist between the St. Lawrence at Metis and at the river Du Loup. Four days of contemporaneous observations were therefore made at each with a view to the solution of this question. The idea of a difference of level was not sustained by the operation.

The heights of the river stations were measured in each case to the highest mark left by spring tides, and half the fall of that tide as given by Captain Byfield has been added in all cases as a reduction to the mean level of the sea. Opportunities were offered in a few instances for testing the accuracy of the method by different barometers used by different observers at different days on the same point. No discrepancy greater than 7 feet has been thus discovered. In other cases the same observer returned and observed at the same places, and here a similar congruity of result has been found to exist.

The whole of the calculations have been made by the formulæ and tables of Bailey. Before adopting these their results were compared in one or two instances with those of a more exact formula. The differences, however, were found so small as to be of no importance, amounting in the height of Lake Johnson to no more than 5 feet in 1,007. The original record of the barometric observations, each verified by the initials of the observer, have been deposited in the State Department.

25. The paths pursued by the traveling parties were marked by blazing trees. The position of the barometer at each place of observation was also marked. The operation was a search for the boundary line in an unknown country, hence it rarely happened that the path of the parties has pursued the exact dividing line of the waters of the St. Lawrence and the Atlantic, but has been continually crossing it. The maps herewith submitted and the marks by which the line of the survey has been perpetuated would have enabled a party sent out for that especial purpose to trace the boundary on the ground without difficulty other than that arising from the inacessible character of the country.

26. The commissioner can not speak in too high terms of the industry and perseverance manifested by the engineers and surveyors employed on this division, and in particular of the skill and intelligence of the two first assistants. Circumstances had prevented the receipt of portable astronomic instruments which had been ordered from Paris and Munich, and an instrument formed by the adaptation of a vertical circle to the lower part of an excellent German theodolite by Draper, of Philadelphia, was found on its being opened at Metis to have received an injury which rendered its accuracy doubtful. The whole reliance for the greatest accuracy was thus thrown on the repeating circle of Dollond. Such, however, was the address and skill of the engineer to whom it was intrusted that he not only fulfilled the object for which it was intended, of determining the position of the points visited by the traveling parties, but accomplished the same object at the stationary camps and at the river stations, without delaying for an hour the operations of the survey.

The duty which these gentlemen performed was arduous in the extreme. It has been seen that on the expedition up the Metis a seasoned voyageur had been worn out by the severity of his labors; on the Tuladi half the men were sick at a time; and of Mr. Lally's party two Penobscot Indians of herculean frame were compelled to return by extreme fatigue. The engineers, while in the field, were even more exposed to fatigue than the laborers, for they carried their own baggage and instruments, and were engaged nightly in observation and calculation, while the workmen could repose.

27. The commissioner to whom the survey of the northern division of the boundary line was intrusted has to express his acknowledgments for the politeness and good offices of the authorities of Her Britannic Majesty. In compliance with his request, permission was granted by the late lamented Covernor-General for the admission of a vessel and the entry of the stores, camp equipage, and instruments of the party at one or more ports on the St. Lawrence. Letters were addressed by the principal secretary of the colony of Canada to all the officers and magistrates, directing them to give every facility to the operations, and these directions were obeyed, not as mere matters of form, but with a truly hospitable spirit. To the officers of the Sixty-eighth Regiment, forming the garrison of Fort Ingall and occupying the post of the river Du Loup, as well as to the officers of the commissariat on duty at those places, acknowledgments are due for numerous attentions.

II.—Operations of the year 1842.

 \mathbf{r} . Of the task originally assigned in the instructions for this division there remained to be completed—

(1) A portion of the boundary elaimed by the United States around the head waters of the river Rimouski.

(2) The line of highlands forming the south bounds of the Province of Quebec, extending from the north shore of the Bay of Chaleurs at its western extremity.

2. Experience had shown that the portion of the boundary which remained unsurveyed could not be reached with any hope of completing the survey by any of the streams running into the St. Lawrence nor from the waters of Lake Temiscouata. The Green River (of St. John) was therefore chosen as the line of operation. It was known that a portage existed between its boatable waters and those of the Grande Fourche of Restigouche. The plan for the work of the season was therefore laid as follows:

To proceed up Green River with a party, thence to cross to the Bell Kedgwick by the portage, and having, by expeditions from the banks of that stream, surveyed the remainder of the claimed boundary, to fall down the stream to the Bay of Chaleurs, and, ascending the highland measured in 1840, to proceed along the heights in order to reach if possible the northwest angle of Nova Scotia.

The work being the most remote and difficult of access of any on the whole boundary, it was necessary to take measures early, and, it being apparent that if they were not vigorously pressed the whole summer's work would be **frustrated**, permission was granted by the Secretary of State to prepare stores and provisions, and the party was sent forward toward its line of operations. Care was, however, taken, in conformity with his instructions, to secure means of communication.

3. The transportation of stores, equipage, and instruments was rendered unexpectedly easy by a steamboat running from Portland to St. John, and by the politeness of the British consul at Portland and the collector of Her Britannic Majesty's customs at St. John free entrance was permitted at the latter port. These articles were shipped from Portland the 19th of June and under the charge of the Hon. Albert Smith reached the Grand Falls of St. John July —.

4. Mr. Lally, first assistant engineer, with the surveyor, was dispatched by the way of Bangor and Houlton to the same point of rendezvous on 18th June for the purpose of procuring boats and engaging laborers. Mr. H. B. Renwick, first assistant, with Mr. F. Smith, second assistant, were placed in charge of the chronometers and the necessary astronomic instruments, with instructions to observe on the meridian of the St. Croix at Houlton, and again at its intersection with the river St. John, for the purpose of ascertaining the rate taken by the chronometers when carried. These preliminary operations being successfully performed, the party was completely organized at the Grand Falls of the St. John on the 2d July. The energy and activity of the persons intrusted with these several duties was such that this date of complete preparation for the field duties was at least a week earlier than any calculation founded on the experience of former years rendered probable. The commissioner, advised of the negotiation in progress, had made his arrangements to reach the Grand Falls of the St. John on the 10th July. Being directed by the State Department to remain in New York, he sent orders by mail to the party to halt until further instructions.

5. These orders were not received, for the party, being fully organized, left the Grand Falls in three different detachments on the 4th, 6th, and 8th of July. The first detachment was composed of the surveyor, Mr. Bell, and an engineer having instructions to make a survey of Green River. The second was in charge of the assistant commissary, and was composed of three bateaux and fourteen pirogues, carrying stores and equipage for three months' service. The third was formed by the two first assistants, who, after performing the necessary astronomic observations at the Grand Falls and at two points on Green River, passed the surveying party and reached the portage between Green and Kedgwick rivers on the evening of the 13th July.

6. Green River has a fall and rapids near its junction with the St. John, which are passed by a portage of 1½ miles. At 15 miles from its mouth is a second fall, which is passed by a portage of 82 yards. The stream for this distance and for 5 miles above the second fall is very rapid, its bed being in some reaches almost filled with rocks. For the next 10 miles it has deep still reaches, alternating with gravel beds, or else the river flows over ledges of rock. It is then interrupted by a third fall, requiring a portage of 176 yards. Thence to the second fork of the lakes it has the same character as for the last 10 miles, except that in some places it flows with a gentle current between low banks covered with alder. From the second fork of the lakes to the southern end of the Green River and Kedgwick portage the stream is very narrow and may be styled one continuous rapid. It is upon the whole the most difficult of navigation of all the streams running into the St. John from its northern side, and approaches in its character of a torrent to the waters on the St. Lawrence side of the highlands.

7. The portage from Green River to the South Branch of Kedgwick is $5\frac{1}{2}$ miles in tength, and passes over the summits of two of the highest mountains in the ceded

district, as well as several ridges. No vessel heavier than a birch canoe had ever before been carried over it. It therefore became necessary to clear it out before the bateaux and other heavy articles could be transported. Fifteen extra laborers, who had been engaged, with their pirogues, to carry some of the stores from the St. John, were retained to aid in making this portage, which swelled the number to twenty-seven. This large force was industriously engaged for eight days in carrying the stores and equipage over the portage, with the boats and canoes required for the future operations of the party. In the meantime the portage was surveyed, and a great number of observations were made, by which the latitude of the southern end of the portage and its difference in longitude from that of the meridian line were determined with great accuracy. In addition to the other labors of the party, a storehouse and observatory were erected.

8. The commissioner, learning that the party had left the Grand Falls before his letter could have reached that place, addressed fresh orders to the engineer in command. These were sent under cover to the British postmaster at Lake Temiscouata, who was requested to send them up Green River by an express. By these he was directed to stop the progress of the party and to proceed himself to the river Du Loup, there to await fresh instructions.

These orders did not arrive in time to prevent the party intended for the survey of the boundary from setting out. The engineer who had hitherto been in command returned to the St. John in pursuance of his original instructions and met the express on his way down Green River. The commissioner, being advised on the 13th July that the treaty had been signed, immediately dispatched a special messenger, who joined the chief of the division at the mouth of Green River on the 24th July. Measures were now taken for the recall and return of the party in the woods, and the whole division was assembled at the stationary camp at the north end of the portage on the 11th of August.

9. The party engaged in the survey of the remaining part of the boundary line had before the orders of recall reached them successfully accomplished that duty, having connected their survey with points in the survey of the previous year and thoroughly explored the culminating points of the valley of Rimouski. As had been anticipated from the level of the streams seen in 1841, this portion of the boundary claimed by the United States is more elevated than any other portion of that line between the Temiscouata portage and the northwest angle of Nova Scotia. This survey would therefore have added an important link to the argument of the United States had not the question been settled by treaty.

The party having received its orders of recall, all the articles of equipment which could not be carried in the boats which had been launched on the waters of the Restigouche were transported to the other end of the portage and embarked in pirogues sent up Green River for that purpose under the direction of the assistant commissary. The engineers then set out on their return by the Bell Kedgwick, the Grande Fourche, and the Southwest Branch of Restigouche. Ascending the latter stream, this party reached the Wagansis portage on the 21st August, and arrived at the Grand Falls on the 25th August.

The descent of the Bell Kedgwick was attended with great difficulties in consequence of the low state of the waters. Until its junction with Katawamkedgwick, to form the Grande Fourche of Restigouche, it was necessary to drag the boats by hand.

10. The detailed map of the surveys of this division, exhibiting the more important points whose altitudes were determined by the barometer, has already been lodged in the Department of State under date of 27th December.

Although the interest of this survey to the United States has now passed away, yet, as it is probable that many years may elapse before this country shall be again explored, and as it may still possess some interest to the nation into whose undisputed possession it has now fallen, it may not be improper to state the methods

GENERAL SCOTT-GENERAL SCOTT ENTERING MENICO CHIY

GENERAL SCOTT ENTERING MEXICO CITY.

General Winfield Scott's military services to the United States were unique, in that he saw action in three wars—the War of 1812, the Mexican War, and the Civil War. In the Mexican War, he was given charge of the forces which started at Vera Cruz to fight their way to Mexico City. The way to the capital of Mexico was opened by the victories of Molino del Rey, on September 8, 1847, and Chapultepee on September 13; and on September 14, 1847, General Scott entered Mexico City unopposed. With the capital of Mexico in the hands of the United States forces, all Mexican resistance ceased. (See Mexican War in Encyclopedie Index.) employed in the survey, for the purpose of showing to what degree of faith it is entitled.

The latitude and longitude of the mouth of Green River were furnished by Major Graham. The three portages on that river were surveyed by chain and compass. The courses on the navigable parts of the river were taken with a compass and the distances measured by a micrometrical telescope by Ertil, of Munich. This instrument, which had given satisfactory results on Metis and Mistigougeche in 1841, was still more accurate in the present survey. The latitude of the south end of the Kedgwick portage as given by the plot of Green River on the original projection differed no more than 5" from that given by numerous astronomic observations, an agreement so close that it might be almost considered as arising from happy accident. This survey therefore required but little correction, which was applied from the observations already cited and from those at two intermediate points.

The survey of Kedgwick portage was performed with chain and compass. In the woods between the Bell Kedgwick and the boundary and along the whole line of survey the same method was used, observations for time and latitude being also taken whenever the weather permitted. As the lines intersected those of the last year, it can now be stated that every part of the boundary claimed by the United States, from the height of land on the Temiscouata portage which divides the waters of the Green River of the St. Lawrence from those of the St. Francis to the northwest angle of Nova Scotia, as well as its connections with the St. Lawrence and Lake Temiscouata by the Temiscouata portage, and with the St. Lawrence a second time by the Metis and Mistigougeche, and with the St. John by Green River, has been actually surveyed. This result is one that neither the Department in its original instructions nor the commissioner on his first view of the country had contemplated. In stating this the commissioner feels it his duty to acknowledge his obligations to the untiring zeal and energy of the gentlemen who have acted under his orders, and especially to his two first assistants, who, entering upon duties of an entirely novel character, not only to themselves, but to the country, have in the course of the operations of two years accumulated under the most disadvantageous circumstances a stock of observations which for number and accuracy may compare with those taken with every convenience at hand by the most practiced astronomers.

In addition to the latitude of numerous points determined astronomically by the party engaged in surveying the line through the woods, the latitude of a point near the southern end of Green River and Kedgwick has been determined by eighty-six altitudes of sun and stars taken with a repeating and reflecting circle.

The whole number of altitudes of sun and stars taken during the expedition for time and latitude was 806.

III.

I. The operations of this division during the three seasons which it has been engaged in field duties have given a view of nearly every part of the country which has now been ceded to Great Britain to the north of the St. John River and the Temiscouata portage. During the year 1840 the commissioner proceeded in person by the wagansis of Grand River to the waters of the Bay of Chalenrs, ascended the Grande Fourche of the Restigonche to Lake Kedgwick, and then traversed the country from that lake to the Tuladi by a route never before explored. In 1841 the Rimouski and Metis were both ascended—the first to the limits of its navigation by cances, the latter to the lake in which the waters of its western branch are first collected. From this lake lines of survey repeatedly crossing the boundary claimed by the United States were extended to a great distance in both directions. The operations of the year were closed by a survey of so much of the boundary as incloses the basin of Lake Temisconata and intersects so frequently the great portage. These latter surveys covered in some degree the explorations of one of the parties in 1840, which, therefore, are not quoted as a part of the work of that year. In 1842 the valley of Green River was explored, that stream was carefully surveyed, and the remainder of the boundary line dividing the sources of Rimouski from those of Green River and the eastern branches of Tuladi run out with chain and compass.

In these surveys and explorations the character of the country, its soil, climate, and natural productions, have been thoroughly examined, and may be stated with full confidence in the accuracy of the facts.

2. Beginning on the southern side of the ceded territory, the left bank of the St. John is for a few miles above the Grand Falls uncultivated and apparently barren. Thence to the confluence of the Madawaska it presents a continued settlement upon land of good quality, producing large crops of potatoes and grass. It also yields wheat, oats, and barley, but the crops are neither abundant nor certain. The Madawaska River presents but few attempts at settlement on either of its banks. Its left bank is represented to be generally barren, but some good land is said to exist on its southwestern side. The shores of Lake Temiscouata are either rocky or composed of a light, gravelly soil, which is so poor that it will not repay the labor of cultivation, even when newly cleared, without the aid of manure. Some tolerable meadows are found, which are at the moment highly valued in consequence of a demand for forage by the British troops. The valley of Green River has in some places upon its banks intervals of level alluvium which might be improved as meadows, and it has been represented as being in general fertile. A close examination has not confirmed this impression.

Mr. Lally reports that-

"In the valley of Green River there are some tracts of land capable of cultivation, but the greater portion of it is a hard, rocky soil, covered with a growth of poplar and trees of that description. Some of the most desirable spots for farms had been formerly taken up by settlers from the Madawaska settlement, but although the land is as good as that on the river St. John, they were obliged to abandon their clearings on account of the early frosts and the black flies. It can hardly be conceived that the latter would be a sufficient cause for leaving valuable land to waste, but such is the fact, as I have been informed by some of those who made the attempt to settle, and I can well believe it from my own experience there."

3. The explorations of 1840, in which the ground lying between the western sources of Green River and Squattuck, a branch of Tuladi, was traversed, showed a considerable extent of better land than any other in the ceded territory. The commissioner traveled for a part of two days along a table-land of no great elevation, covered with rock, maple, and a thick undergrowth of moosewood, both said to be signs of good soil; of this there may be from seven to ten thousand acres, and it is a far larger body of tillable land than is to be found in any other part of the country north of the settlements on the St. John.

4. By far the greater portion of the territory in question is composed of the highlands in which the streams that flow to the St. Lawrence and the Atlantic take their rise. With but three exceptions no part of this is less than $1,\infty\infty$ feet above the level of the sea. It is a perfect labyrinth of small lakes, cedar and alder swamps, and ridges covered with a thick but small growth of fir and spruce, or, more rarely, of birch. No portion of it appears to be fit for tillage.

5. In respect to timber, it was found that the pine, the only tree considered of any value, ceased to grow in rising from the St. Lawrence at less than 1,000 feet above the level of the sea. Only one extensive tract of pine was seen by any of the parties; this lies around the sources of the St. Francis, and may cover three or four thousand acres. This river, however, discharges itself from Lake St. Francis through a bed of bowlders, and is sometimes wholly lost to the view. This tract, therefore, although repeatedly examined by the proprietors of sawmills on the St. Lawrence and the St. John, has been hitherto found inaccessible. The pine timber on the seigniory of

Temiscouata has been in a great degree cut off or burnt by fires in the woods. There is still some timber on the waters of Squattuck, but it has been diminished by two or three years of active lumbering, while that around Tuladi, if it were ever abundant, has disappeared. It would, however, appear from report that on the waters of the North Branch of Restigouche to the eastward of the exploring meridian there is some valuable timber. This is the only portion of the district which has not been explored.

6. As to the valley of Green River, the engineer who has already been quoted reports as follows:

"This river has had the reputation of having on it large quantities of pine timber, but as far as I have been able to judge it is small and rather sparsely scattered along the slopes of the ridges. Above the third falls of the river, which are rather more than 30 miles from its mouth, there is scarcely any to be seen. Some of the Madawaska settlers, who have explored nearly every tributary of the river, report that there is good timber on some of them. Judging from the language that they used in relation to some that I saw myself, I infer that what they call good would not be so considered by the lumbermen of the Penobscot. The people who lumber in this vicinity do it on a small scale when compared with the operators in Maine. They rarely use more than two horses to draw their lumber to the stream, so that a tract which would not afford more than a month's work to an extensive operator would keep one of these people employed for years."

7. As respects climate, the country would be considered unfit for habitation by those accustomed to the climates even of the southern parts of Maine and of New Hampshire. Frosts continue on the St. John until late in May, and set in early in September. In 1840 ice was found on the Grand River on the 12th of that month, and snow fell in the first week of October on Lake Temiscouata. In the highland region during the last week of July, although the thermometer rose above 80° , and was once above 90° , white frost was formed every clear night. Upon the whole, therefore, it may be concluded that there is little in this country calculated to attract either settlers or speculators in lumber. The former were driven to it under circumstances of peculiar hardship and of almost paramount necessity. Their industry and perseverance under adverse circumstances is remarkable, but they would have been hardly able to overcome them had not the very question of the disputed boundary led to an expenditure of considerable money among them.

VETO MESSAGE.*

WASHINGTON, December 14, 1842.

To the House of Representatives:

Two bills were presented to me at the last session of Congress, which originated in the House of Representatives, neither of which was signed by me; and both having been presented within ten days of the close of the session, neither has become a law.

The first of these was a bill entitled "An act to repeal the proviso of the sixth section of the act entitled 'An act to appropriate the proceeds of the sales of the public lands and to grant preemption rights,' approved September 4, 1841." This bill was presented to me on Tuesday, the 30th August, at twentyfour minutes after 4 o'clock in the afternoon. For my opinions relative to the provisions contained in this bill it is only necessary that I should refer to previous communications made by me to the House of Representatives.

The other bill was entitled "An act regulating the taking of testimony in cases of contested elections, and for other purposes." This bill was presented to me at a quarter past 1 o'clock on Wednesday, the 31st day of August. The two Houses, by concurrent vote, had already agreed to terminate the session by adjournment at 2 o'clock on that day—that is to say, within three-quarters of an hour from the time the bill was placed in my hands. It was a bill containing twenty-seven sections, and, I need not say, of an important nature.

On its presentment to me its reading was immediately commenced, but was interrupted by so many communications from the Senate and so many other causes operating at the last hour of the session that it was impossible to read the bill understandingly and with proper deliberation before the hour fixed for the adjournment of the two Houses; and this, I presume, is a sufficient reason for neither signing the bill nor returning it with my objections.

The seventeenth joint rule of the two Houses of Congress declares that "no bill or resolution that shall have passed the House of Representatives and the Senate shall be presented to the President of the United States for his approbation on the last day of the session."

This rule was evidently designed to give to the President a reasonable opportunity of perusing important acts of Congress and giving them some degree of consideration before signing or returning the same.

It is true that the two Houses have been in the habit of suspending this rule toward the close of the session in relation to particular bills, and it appears by the printed Journal that by concurrent votes of the two Houses passed on the last day of the session the rule was agreed to be suspended so far as the same should relate to all such bills as should have been passed by the two Houses at 1 o'clock on that day. It is exceedingly to be regretted that a necessity should ever exist for such suspension in the case of bills of great importance, and therefore demanding careful consideration.

As the bill has failed under the provisions of the Constitution to become a law, I abstain from expressing any opinions upon its several provisions, keeping myself wholly uncommitted as to my ultimate action on any similar measure should the House think proper to originate it *de novo*, except so far as my opinion of the unqualified power of each House to decide for itself upon the elections, returns, and qualifications of its own members has been expressed by me in a paper lodged in the Department of State at the time of signing an act entitled "An act for the apportionment of Representatives among the several States according to the Sixth Census," approved June 22, 1842, a copy of which is in possession of the House.

THIRD ANNUAL MESSAGE.

WASHINGTON, December, 1843.

To the Senate and House of Representatives of the United States:

If any people ever had cause to render up thanks to the Supreme Being for parental care and protection extended to them in all the trials and difficulties to which they have been from time to time exposed, we certainly are that people. From the first settlement of our forefathers on this continent, through the dangers attendant upon the occupation of a savage wilderness, through a long period of colonial dependence, through the War of the Revolution, in the wisdom which led to the adoption of the existing forms of republican government, in the hazards incident to a war subsequently waged with one of the most powerful nations of the earth, in the increase of our population, in the spread of the arts and sciences, and in the strength and durability conferred on political institutions emanating from the people and sustained by their will, the superintendence of an overruling Providence has been plainly visible. As preparatory, therefore, to entering once more upon the high duties of legislation, it becomes us humbly to acknowledge our dependence upon Him as our guide and protector and to implore a continuance of His parental watchfulness over our beloved country. We have new cause for the expression of our gratitude in the preservation of the health of our fellow-citizens, with some partial and local exceptions, during the past season, for the abundance with which the earth has yielded up its fruits to the labors of the husbandman, for the renewed activity which has been imparted to commerce, for the revival of trade in all its departments, for the increased rewards attendant on the exercise of the mechanic arts, for the continued growth of our population and the rapidly reviving prosperity of the whole country. I shall be permitted to exchange congratulations with you, gentlemen of the two Houses of Congress, on these auspicious circumstances, and to assure you in advance of my ready disposition to concur with you in the adoption of all such measures as shall be calculated to increase the happiness of our constituents and to advance the glory of our common country.

Since the last adjournment of Congress the Executive has relaxed no effort to render indestructible the relations of amity which so happily exist between the United States and other countries. The treaty lately concluded with Great Britain has tended greatly to increase the good understanding which a reciprocity of interests is calculated to encourage, and it is most ardently to be hoped that nothing may transpire to interrupt the relations of amity which it is so obviously the policy of both nations to cultivate. A question of much importance still remains to be adjusted between them. The territorial limits of the two countries in relation to what is commonly known as the Oregon Territory still remain in dispute. The United States would be at all times indisposed to aggrandize itself at the expense of any other nation; but while they would be restrained by principles of honor, which should govern the conduct of nations as well as that of individuals, from setting up a demand for territory which does not belong to them, they would as unwillingly consent to a surrender of their rights. After the most rigid and, as far as practicable, unbiased examination of the subject, the United States have always contended that their rights appertain to the entire region of country lying on the Pacific and embraced within 42° and 54° 40' of north latitude. This claim being controverted by Great Britain, those who have preceded the present Executive - actuated, no doubt, by an earnest desire to adjust the matter upon terms mutually satisfactory to both countries - have caused to be submitted to the British Government propositions for settlement and final adjustment, which, however, have not proved heretofore acceptable to it. Our minister at London has, under instructions, again brought the subject to the consideration of that Government, and while nothing will be done to compromit the rights or honor of the United States, every proper expedient will be resorted to in order to bring the negotiation now in the progress of resumption to a speedy and happy termination. In the meantime it is proper to remark that many of our citizens are either already established in the Territory or are on their way thither for the purpose of forming permanent settlements, while others are preparing to follow; and in view of these facts I must repeat the recommendation contained in previous messages for the establishment of military posts at such places on the line of travel as will furnish security and protection to our hardy adventurers against hostile tribes of Indians inhabiting those extensive regions. Our laws should also follow them, so modified as the circumstances of the case may seem to require. Under the influence of our free system of government new republics are destined to spring up at no distant day on the shores of the Pacific similar in policy and in feeling to those existing on this side of the Rocky Mountains, and giving a wider and more extensive spread to the principles of civil and religious liberty.

I am happy to inform you that the cases which have from time to time arisen of the detention of American vessels by British cruisers on the coast of Africa under pretense of being engaged in the slave trade have been placed in a fair train of adjustment. In the case of the *William* and Francis full satisfaction will be allowed. In the cases of the *Tygris* and Seamew the British Government admits that satisfaction is due. In the case of the *Jones* the sum accruing from the sale of that vessel and cargo will be paid to the owners, while I can not but flatter myself that full indemnification will be allowed for all damages sustained by the detention of the vessel: and in the case of the *Douglas* Her Majesty's Gevernment has expressed its determination to make indemnification. Strong hopes are therefore entertained that most, if not all, of these cases will be speedily adjusted. No new cases have arisen since the ratification of the treaty of Washington, and it is confidently anticipated that the slave trade, under the operation of the eighth article of that treaty, will be altogether suppressed.

The occasional interruption experienced by our fellow-citizens engaged in the fisheries on the neighboring coast of Nova Scotia has not failed to claim the attention of the Executive. Representations upon this subject have been made, but as yet no definitive answer to those representations has been received from the British Government.

Two other subjects of comparatively minor importance, but nevertheless of too much consequence to be neglected, remain still to be adjusted between the two countries. By the treaty between the United States and Great Britain of July, 1815, it is provided that ne higher duties shall be levied in either country on articles imported from the other than on the same articles imported from any other place. In 1836 rough rice by act of Parliament was admitted from the coast of Africa into Great Britain on the payment of a duty of I penuy a quarter, while the same article from all other countries, including the United States, was subjected to the payment of a duty of 20 shillings a quarter. Our minister at London has from time to time brought this subject to the attention of the British Government, but so far without success. He is instructed to renew his representations upon it.

Some years since a claim was preferred against the British Government on the part of certain American merchants for the return of export duties paid by them on shipments of woolen goods to the United States after the duty on similar articles exported to other countries had been repealed, and consequently in contravention of the commercial convention between the two nations securing to us equality in such cases. The principle on which the claim rests has long since been virtually admitted by Great Britain, but obstacles to a settlement have from time to time been interposed, so that a large portion of the amount claimed has not yet been refunded. Our minister is now engaged in the prosecution of the claim, and I can not but persuade myself that the British Government will no longer delay its adjustment.

I am happy to be able to say that nothing has occurred to disturb in any degree the relations of amity which exist between the United States and France, Austria, and Russia, as well as with the other powers of Europe, since the adjournment of Congress. Spain has been agitated with internal convulsions for many years, from the effects of which, it is hoped, she is destined speedily to recover, when, under a more liberal system of commercial policy on her part, our trade with her may again fill its old and, so far as her continental possessions are concerned, its almost forsaken channels, thereby adding to the mutual prosperity of the two countries.

The Germanic Association of Customs and Commerce, which since its establishment in 1833 has been steadily growing in power and importance, and consists at this time of more than twenty German States, and embraces a population of 27,000,000 people united for all the purposes of commercial intercourse with each other and with foreign states, offers to the latter the most valuable exchanges on principles more liberal than are offered in the fiscal system of any other European power. From its origin the importance of the German union has never been lost sight of by the United States. 'The industry, morality, and other valuable qualities of the German nation have always been well known and appreciated. On this subject I invite the attention of Congress to the report of the Secretary of State, from which it will be seen that while our cotton is admitted free of duty and the duty on rice has been much reduced (which has already led to a greatly increased consumption), a strong disposition has been recently evinced by that great body to reduce, upon certain conditions, their present duty upon tobacco. This being the first intimation of a concession on this interesting subject ever made by any European power, I can not but regard it as well calculated to remove the only impediment which has so far existed to the most liberal commercial intercourse between us and them. In this view our minister at Berlin. who has heretofore industriously pursued the subject, has been instructed to enter upon the negotiation of a commercial treaty, which, while it will open new advantages to the agricultural interests of the United States and a more free and expanded field for commercial operations, will affect injuriously no existing interest of the Union. Should the negotiation be crowned with success, its results will be communicated to both Houses of Congress.

I communicate herewith certain dispatches received from our minister at Mexico, and also a correspondence which has recently occurred between the envoy from that Republic and the Secretary of State. It must but be regarded as not a little extraordinary that the Government of Mexico, in anticipation of a public discussion (which it has been pleased to infer from newspaper publications as likely to take place in Congress, relating to the annexation of Texas to the United States), should have so far anticipated the result of such discussion as to have announced its determination to visit any such anticipated decision by a formal declaration of war against the United States. If designed to prevent Congress from introducing that question as a fit subject for its calm deliberation and final judgment, the Executive has no reason to doubt that it will entirely fail of its object. The representatives of a brave and patriotic people will suffer no apprehension of future consequences to embarrass them in the course of their proposed deliberations, nor will the executive department of the Government fail for any such cause to discharge its whole duty to the country.

The war which has existed for so long a time between Mexico and

Texas has since the battle of San Jacinto consisted for the most part of predatory incursions, which, while they have been attended with much of suffering to individuals and have kept the borders of the two countries in a state of constant alarm, have failed to approach to any definitive result. Mexico has fitted out no formidable armament by land or by sea for the subjugation of Texas. Eight years have now elapsed since Texas declared her independence of Mexico, and during that time she has been recognized as a sovereign power by several of the principal civilized states. Mexico, nevertheless, perseveres in her plans of reconquest, and refuses to recognize her independence. The predatory incursions to which I have alluded have been attended in one instance with the breaking up of the courts of justice, by the seizing upon the persons of the judges, jury, and officers of the court and dragging them along with unarmed, and therefore noncombatant, citizens into a cruel and oppressive bondage, thus leaving crime to go unpunished and immorality to pass unreproved. A border warfare is evermore to be deprecated, and over such a war as has existed for so many years between these two States humanity has had great cause to lament. Nor is such a condition of things to be deplored only because of the individual suffering attendant upon it. The effects are far more extensive. The Creator of the Universe has given man the earth for his resting place and its fruits for his subsistence. Whatever, therefore, shall make the first or any part of it a scene of desolation affects injuriously his heritage and may be regarded as a general calamity. Wars may sometimes be necessary, but all nations have a common interest in bringing them speedily to a close. The United States have an immediate interest in seeing an end put to the state of hostilities existing between Mexico and Texas. They are our neighbors, of the same continent, with whom we are not only desirous of cultivating the relations of anity, but of the most extended commercial intercourse, and to practice all the rites of a neighborhood hospitality. Our own interests are involved in the matter, since, however neutral may be our course of policy, we can not hope to escape the effects of a spirit of jealousy on the part of both of the powers. Nor can this Government be indifferent to the fact that a warfare such as is waged between those two nations is calculated to weaken both powers and finally to render them-and especially the weaker of the twothe subjects of interference on the part of stronger and more powerful nations, who, intent only on advancing their own peculiar views, may sooner or later attempt to bring about a compliance with terms as the condition of their interposition alike derogatory to the nation granting them and detrimental to the interests of the United States. We could not be expected quietly to permit any such interference to our disadvantage. Considering that Texas is separated from the United States by a mere geographical line; that her territory, in the opinion of many, down to a late period formed a portion of the territory of the United

States; that it is homogeneous in its population and pursuits with the adjoining States, makes contributions to the commerce of the world in the same articles with them, and that most of her inhabitants have been citizens of the United States, speak the same language, and live under similar political institutions with ourselves, this Government is bound by every consideration of interest as well as of sympathy to see that she shall be left free to act, especially in regard to her domestic affairs, unawed by force and unrestrained by the policy or views of other countries. In full view of all these considerations, the Executive has not hesitated to express to the Government of Mexico how deeply it deprecated a continuance of the war and how anxiously it desired to witness its termination. I can not but think that it becomes the United States, as the oldest of the American Republics, to hold a language to Mexico upon this subject of an unambiguous character. It is time that this war had ceased. There must be a limit to all wars, and if the parent state after an eight years' struggle has failed to reduce to submission a portion of its subjects standing out in revolt against it, and who have not only proclaimed themselves to be independent, but have been recognized as such by other powers, she ought not to expect that other nations will quietly look on, to their obvious injury, upon a protraction of hostilities. These United States threw off their colonial dependence and established independent governments, and Great Britain, after having wasted her energies in the attempt to subdue them for a less period than Mexico has attempted to subjugate Texas, had the wisdom and justice to acknowledge their independence, thereby recognizing the obligation which rested on her as one of the family of nations. An example thus set by one of the proudest as well as most powerful nations of the earth it could in no way disparage Mexico to imitate. While, therefore, the Executive would deplore any collision with Mexico or any disturbance of the friendly relations which exist between the two countries, it can not permit that Government to control its policy, whatever it may be, toward Texas, but will treat her-as by the recognition of her independence the United States have long since declared they would do-as entirely independent of Mexico. The high obligations of public duty may enforce from the constituted authorities of the United States a policy which the course persevered in by Mexico will have mainly contributed to produce, and the Executive in such a contingency will with confidence throw itself upon the patriotism of the people to sustain the Government in its course of action.

Measures of an unusual character have recently been adopted by the Mexican Government, calculated in no small degree to affect the trade of other nations with Mexico and to operate injuriously to the United States. All foreigners, by a decree of the 23d day of September, and after six months from the day of its promulgation, are forbidden to carry on the business of selling by retail any goods within the confines of Mexico. Against this decree our minister has not failed to remonstrate.

The trade heretofore carried on by our citizens with Santa Fe, in which

much capital was already invested and which was becoming of daily increasing importance, has suddenly been arrested by a decree of virtual prohibition on the part of the Mexican Government. Whatever may be the right of Mexico to prohibit any particular course of trade to the citizens or subjects of foreign powers, this late procedure, to say the least of it, wears a harsh and unfriendly aspect.

The installments on the claims recently settled by the convention with Mexico have been punctually paid as they have fallen due, and our minister is engaged in urging the establishment of a new commission in pursuance of the convention for the settlement of unadjusted claims.

With the other American States our relations of amity and good will have remained uninterrupted. Our minister near the Republic of New Granada has succeeded in effecting an adjustment of the claim upon that Govenrment for the schooner *By Chance*, which had been pending for many years. The claim for the brig *Morris*, which had its origin during the existence of the Republic of Colombia, and indemnification for which since the dissolution of that Republic has devolved upon its several members, will be urged with renewed zeal.

I have much pleasure in saying that the Government of Brazil has adjusted the claim upon that Government in the case of the schooner *John S. Bryan*, and that sanguine hopes are entertained that the same spirit of justice will influence its councils in arriving at an early decision upon the remaining claims, thereby removing all cause of dissension between two powers whose interests are to some extent interwoven with each other.

Our minister at Chili has succeeded in inducing a recognition by that Government of the adjustment effected by his predecessor of the first claim in the case of the *Macedonian*. The first installment has been received by the claimants in the United States.

Notice of the exchange of ratifications of the treaty with Peru, which will take place at Lima, has not yet reached this country, but is shortly expected to be received, when the claims upon that Republic will doubtless be liquidated and paid.

In consequence of a misunderstanding between this Government and that of Buenos Ayres, occurring several years ago, this Government has remained unrepresented at that Court, while a minister from it has been constantly resident here. The causes of irritation have in a great measure passed away, and it is in contemplation, in view of important interests which have grown up in that country, at some early period during the present session of Congress, with the concurrence of the Senate, to restore diplomatic relations between the two countries.

Under the provisions of an act of Congress of the last session a minister was dispatched from the United States to China in August of the present year, who, from the latest accounts we have from him, was at Suez, in Egypt, on the 25th of September last, on his route to China.

Messages and Papers of the Presidents

In regard to the Indian tribes residing within our jurisdictional limits, the greatest vigilance of the Government has been exerted to preserve them at peace among themselves and to inspire them with feelings of confidence in the justice of this Government and to cultivate friendship with the border inhabitants. This has happily succeeded to a great extent, but it is a subject of regret that they suffer themselves in some instances to be imposed upon by artful and designing men, and this notwithstanding all efforts of the Government to prevent it.

The receipts into the Treasury for the calendar year 1843, exclusive of loans, were little more than \$18,000,000, and the expenditures, exclusive of the payments on the public debt, will have been about \$23,000,000. By the act of 1842 a new arrangement of the fiscal year was made, so that it should commence on the 1st day of July in each year. The accounts and estimates for the current fiscal year will show that the loans and Treasury notes made and issued before the close of the last Congress to meet the anticipated deficiency have not been entirely adequate. Although on the 1st of October last there was a balance in the Treasury, in consequence of the provisions thus made, of \$3,914,082.77, yet the appropriations already made by Congress will absorb that balance and leave a probable deficiency of \$2,000,000 at the close of the present fiscal year. There are outstanding Treasury notes to about the amount of \$4,600,000, and should they be returned upon the Treasury during the fiscal year they will require provision for their redemption. I do not, however, regard this as probable, since they have obviously entered into the currency of the country and will continue to form a portion of it if the system now adopted be continued. The loan of 1841, amounting to \$5,672,976.88, falls due on the 1st day of January, 1845, and must be provided for or postponed by a new loan; and unless the resources of revenue should be materially increased by you there will be a probable deficiency for the service of the fiscal year ending June 30, 1845, of upward of \$4,000,000.

The delusion incident to an enormously excessive paper circulation, which gave a fictitious value to everything and stimulated adventure and speculation to an extravagant extent, has been happily succeeded by the substitution of the precious metals and paper promptly redeemable in specie; and thus false values have disappeared and a sounder condition of things has been introduced. This transition, although intimately connected with the prosperity of the country, has nevertheless been attended with much embarrassment to the Government in its financial concerns. Sc long as the foreign importers could receive payment for their cargoes in a currency of greatly less value than that in Europe, but fully available here in the purchase of our agricultural productions (their profits being immeasurably augmented by the operation), the shipments were large and the revenues of the Government became superabundant. But the change in the character of the circulation from a nominal and apparently real value in the first stage of its existence to an obviously

John Tyler

depreciated value in its second, so that it no longer answered the purposes of exchange or barter, and its ultimate substitution by a sound metallic and paper circulation combined, has been attended by diminished importations and a consequent falling off in the revenue. This has induced Congress, from 1837, to resort to the expedient of issuing Treasury notes, and finally of funding them, in order to supply deficiencies. I can not, however, withhold the remark that it is in no way compatible with the dignity of the Government that a public debt should be created in time of peace to meet the current expenses of the Government, or that temporary expedients should be resorted to an hour longer than it is possible The Executive can do no more than apply the means to avoid them. which Congress places in its hands for the support of Government, and, happily for the good of the country and for the preservation of its liberties, it possesses no power to levy exactions on the people or to force from them contributions to the public revenue in any form. It can only recommend such measures as may in its opinion be called for by the wants of the public service to Congress, with whom alone rests the power to "lay and collect taxes, duties, imposts, and excises." This duty has upon several occasions heretofore been performed. The present condition of things gives flattering promise that trade and commerce are rapidly reviving, and, fortunately for the country, the sources of revenue have only to be opened in order to prove abundant.

While we can anticipate no considerable increase in the proceeds of the sales of the public lands, for reasons perfectly obvious to all, for several years to come, yet the public lands can not otherwise than be regarded as the foundation of the public credit. With so large a body of the most fertile lands in the world under the control and at the disposal of this Government, no one can reasonably doubt the entire ability to meet its engagements under every emergency. In seasons of trial and difficulty similar to those through which we are passing the capitalist makes his investments in the Government stocks with the most assured confidence of ultimate reimbursement; and whatever may be said of a period of great financial prosperity, such as existed for some years after 1833, I should regard it as suicidal in a season of financial embarrassment either to alienate the lands themselves or the proceeds arising from their sales. The first and paramount duty of those to whom may be intrusted the administration of public affairs is to guard the public credit. In reestablishing the credit of this central Government the readiest and most obvious mode is taken to restore the credit of the States. The extremities can only be made sound by producing a healthy action in the central Government, and the history of the present day fully establishes the fact that an increase in the value of the stocks of this Government will in a great majority of instances be attended by an increase in the value of the stocks of the States. It should therefore be a matter of general congratulation that amidst all the embarrassments arising from surrounding

Messages and Papers of the Presidents

circumstances the credit of the Government should have been so fully restored that it has been enabled to effect a loan of \$7,000,000 to redeem that amount of Treasury notes on terms more favorable than any that have been offered for many years. And the 6 per cent stock which was created in 1842 has advanced in the hands of the holders nearly 20 per cent above its par value. The confidence of the people in the integrity of their Government has thus been signally manifested. These opinions relative to the public lands do not in any manner conflict with the observance of the most liberal policy toward those of our fellow-citizens who press forward into the wilderness and are the pioneers in the work of its reclamation. In securing to all such their rights of preemption the Government performs but an act of retributive justice for sufferings encountered and hardships endured, and finds ample remuneration in the comforts which its policy insures and the happiness which it imparts.

Should a revision of the tariff with a view to revenue become necessary in the estimation of Congress, I doubt not you will approach the subject with a just and enlightened regard to the interests of the whole Union. The principles and views which I have heretofore had occasion to submit remain unchanged. It can, however, never be too often repeated that the prominent interest of every important pursuit of life requires for success permanency and stability in legislation. These can only be attained by adopting as the basis of action moderation in all things, which is as indispensably necessary to secure the harmonious action of the political as of the animal system. In our political organization no one section of the country should desire to have its supposed interests advanced at the sacrifice of all others, but union, being the great interest, equally precious to all, should be fostered and sustained by mutual concessions and the cultivation of that spirit of compromise from which the Constitution itself proceeded.

You will be informed by the report from the Treasury Department of the measures taken under the act of the last session authorizing the reissue of Treasury notes in lieu of those then outstanding. The system adopted in pursuance of existing laws seems well calculated to save the country a large amount of interest, while it affords conveniences and obviates dangers and expense in the transmission of funds to disbursing agents. I refer you also to that report for the means proposed by the Secretary to increase the revenue, and particularly to that portion of it which relates to the subject of the warehousing system, which I earnestly urged upon Congress at its last session and as to the importance of which my opinion has undergone no change.

In view of the disordered condition of the currency at the time and the high rates of exchange between different parts of the country, I felt it to be incumbent on me to present to the consideration of your predecessors a proposition conflicting in no degree with the Constitution or with the rights of the States and having the sanction (not in detail, but in principle) of some of the eminent men who have preceded me in the Executive office. That proposition contemplated the issuing of Treasury notes of denominations of not less than \$5 nor more than \$100, to be employed in the payment of the obligations of the Government in lieu of gold and silver at the option of the public creditor, and to an amount not exceeding \$15,000,000. It was proposed to make them receivable everywhere and to establish at various points depositories of gold and silver to be held in trust for the redemption of such notes, so as to insure their convertibility into specie. No doubt was entertained that such notes would have maintained a par value with gold and silver, thus furnishing a paper currency of equal value over the Union, thereby meeting the just expectations of the people and fulfilling the duties of a parental government. Whether the depositories should be permitted to sell or purchase bills under very limited restrictions, together with all its other details, was submitted to the wisdom of Congress and was regarded as of secondary importance. I thought then and think now that such an arrangement would have been attended with the happiest results. The whole matter of the currency would have been placed where by the Constitution it was designed to be placed-under the immediate supervision and control of Congress. The action of the Government would have been independent of all corporations, and the same eve which rests unceasingly on the specie currency and guards it against adulteration would also have rested on the paper currency, to control and regulate its issues and protect it against depreciation. The same reasons which would forbid Congress from parting with the power over the coinage would seem to operate with nearly equal force in regard to any substitution for the precious metals in the form of a circulating medium. Paper when substituted for specie constitutes a standard of value by which the operations of society are regulated, and whatsoever causes its depreciation affects society to an extent nearly, if not quite, equal to the adulteration of the coin. Nor can I withhold the remark that its advantages contrasted with a bank of the United States, apart from the fact that a bank was esteemed as obnoxious to the public sentiment as well on the score of expediency as of constitutionalty, appeared to me to be striking and obvious. The relief which a bank would afford by an issue of \$15,000,000 of its notes, judging from the experience of the late United States Bank, would not have occurred in less than fifteen years, whereas under the proposed arrangement the relief arising from the issue of \$15,000,000 of Treasury notes would have been consummated in one year, thus furnishing in one-fifteenth part of the time in which a bank could have accomplished it a paper medium of exchange equal in amount to the real wants of the country at par value with gold and silver. The saving to the Government would have been equal to all the interest which it has had to pay on Treasury notes of previous as well as subsequent issues, thereby relieving the Government and at the same time affording

relief to the people. Under all the responsibilities attached to the station which I occupy, and in redemption of a pledge given to the last Congress at the close of its first session, I submitted the suggestion to its consideration at two consecutive sessions. The recommendation, however, met with no favor at its hands. While I am free to admit that the necessities of the times have since become greatly ameliorated and that there is good reason to hope that the country is safely and rapidly emerging from the difficulties and embarrassments which everywhere surrounded it in 1841, yet I can not but think that its restoration to a sound and healthy condition would be greatly expedited by a resort to the expedient in a modified form.

The operations of the Treasury now rest upon the act of 1789 and the resolution of 1816, and those laws have been so administered as to produce as great a quantum of good to the country as their provisions are capable of yielding. If there had been any distinct expression of opinion going to show that public sentiment is averse to the plan, either as heretofore recommended to Congress or in a modified form, while my own opinion in regard to it would remain unchanged I should be very far from again presenting it to your consideration. The Government has originated with the States and the people, for their own benefit and advantage, and it would be subversive of the foundation principles of the political edifice which they have reared to persevere in a measure which in their mature judgments they had either repudiated or condemned. The will of our constituents clearly expressed should be regarded as the light to guide our footsteps, the true difference between a monarchical or aristocratical government and a republic being that in the first the will of the few prevails over the will of the many, while in the last the will of the many should be alone consulted.

The report of the Secretary of War will bring you acquainted with the condition of that important branch of the public service. The Army may be regarded, in consequence of the small number of the rank and file in each company and regiment, as little more than a nucleus around which to rally the military force of the country in case of war, and yet its services in preserving the peace of the frontiers are of a most important nature. In all cases of emergency the reliance of the country is properly placed in the militia of the several States, and it may well deserve the consideration of Congress whether a new and more perfect organization might not be introduced, looking mainly to the volunteer companies of the Union for the present and of easy application to the great body of the militia in time of war.

The expenditures of the War Department have been considerably teduced in the last two years. Contingencies, however, may arise which would call for the filling up of the regiments with a full complement of men and make it very desirable to remount the corps of dragoons, which by an act of the last Congress was directed to be dissolved.

1.51.7 THE BATTLE OF BUENA

BATTLE OF BUENA VISTA.

In the fall of 1846, President Polk and his Cabinet decided to launch an attack upon Mexico City from Vera Cruz. To this end, they withdrew a number of men from the forces of General Taylor, who had entered Mexico from the north. Santa Anna, learning of the weakness of the troops under Taylor, hurriedly marched northwards with a large force to attack Taylor. Despite junction with another division of American troops, Taylor was able to oppose only 5,000 men to Santa Anna's 20,000. On February 23, 1847, the Mexicans surrounded the United States forces at Buena Vista, a short distance south of Saltillo. The battle lasted all day, and until the fall of night gave little indication of the manner in which it would result. A vicious attack against Taylor's centre was repulsed with great loss, and at Tayler's order, "Give them a little more grape." the Mexicans were dispersed by heavy artillery fire. The Mexicans lost 2,000 men as against the Americans' loss of 746, and withdrew during the night. (See Buena Vista, Battle of, in Encyclopedic Index.) I refer you to the accompanying report of the Secretary for information in relation to the Navy of the United States. While every effort has been and will continue to be made to retrench all superfluities and lop off all excrescences which from time to time may have grown up, yet it has not been regarded as wise or prudent to recommend any material change in the annual appropriations. The interests which are involved are of too important a character to lead to the recommendation of any other than a liberal policy. Adequate appropriations ought to be made to enable the Executive to fit out all the ships that are now in a course of building or that require repairs for active service in the shortest possible time should any emergency arise which may require it. An efficient navy, while it is the cheapest means of public defense, enlists in its support the feelings of pride and confidence which brilliant deeds and heroic valor have heretofore served to strengthen and confirm.

I refer you particularly to that part of the Secretary's report which has reference to recent experiments in the application of steam and in the construction of our war steamers, made under the superintendence of distinguished officers of the Navy. In addition to other manifest improvements in the construction of the steam engine and application of the motive power which has rendered them more appropriate to the uses of ships of war, one of those officers has brought into use a power which makes the steamship most formidable either for attack or defense. I cau not too strongly recommend this subject to your consideration and do not hesitate to express my entire conviction of its great importance.

I call your particular attention also to that portion of the Secretary's report which has reference to the act of the late session of Congress which prohibited the transfer of any balance of appropriation from other heads of appropriation to that for building, equipment, and repair. The repeal of that prohibition will enable the Department to give renewed employment to a large class of workmen who have been necessarily discharged in consequence of the want of means to pay them—a circumstance attended, especially at this season of the year, with much privation and suffering.

It gives me great pain to announce to you the loss of the steamship the *Missouri* by fire in the Bay of Gibraltar, where she had stopped to renew her supplies of coal on her voyage to Alexandria, with Mr. Cushing, the American minister to China, on board. There is ground for high commendation of the officers and men for the coolness and intrepidity and perfect submission to discipline evinced under the most trying circumstances. Surrounded by a raging fire, which the utmost exertions could not subdue, and which threatened momentarily the explosion of her well-supplied magazines, the officers exhibited no signs of fear and the men obeyed every order with alacrity. Nor was she abandoned until the last gleam of hope of saving her had expired. It is well worthy of your consideration whether the losses sustained by the officers and crew in this unfortunate affair should not be reimbursed to them. I can not take leave of this painful subject without adverting to the aid rendered upon the occasion by the British authorities at Gibraltar and the commander, officers, and crew of the British ship of the line the *Malabar*, which was lying at the time in the bay. Everything that generosity or humanity could dictate was promptly performed. It is by such acts of good will by one to another of the family of nations that fraternal feelings are nourished and the blessings of permanent peace secured.

The report of the Postmaster-General will bring you acquainted with the operations of that Department during the past year, and will suggest to you such modifications of the existing laws as in your opinion the exigencies of the public service may require. The change which the country has undergone of late years in the mode of travel and transportation has afforded so many facilities for the transmission of mail matter out of the regular mail as to require the greatest vigilance and circumspection in order to enable the officer at the head of the Department to restrain the expenditures within the income. There is also too much reason to fear that the franking privilege has run into great abuse. The Department, nevertheless, has been conducted with the greatest vigor, and has attained at the least possible expense all the useful objects for which it was established.

In regard to all the Departments, I am quite happy in the belief that nothing has been left undone which was called for by a true spirit of economy or by a system of accountability rigidly enforced. This is in some degree apparent from the fact that the Government has sustained no loss by the default of any of its agents. In the complex, but at the same time beautiful, machinery of our system of government, it is not a matter of surprise that some remote agency may have failed for an instant to fulfill its desired office; but I feel confident in the assertion that nothing has occurred to interrupt the harmonious action of the Government itself, and that, while the laws have been executed with efficiency and vigor, the rights neither of States nor individuals have been trampled on or disregarded.

In the meantime the country has been steadily advancing in all that contributes to national greatness. The tide of population continues unbrokenly to flow into the new States and Territories, where a refuge is found not only for our native-born fellow-citizens, but for emigrants from all parts of the civilized world, who come among us to partake of the blessings of our free institutions and to aid by their labor to swell the current of our wealth and power.

It is due to every consideration of public policy that the lakes and rivers of the West should receive all such attention at the hands of Congress as the Constitution will enable it to bestow. Works in favorable and proper situations on the Lakes would be found to be as indispensably necessary, in case of war, to carry on safe and successful naval operations as fortifications on the Atlantic seaboard. The appropriation made by the last Congress for the improvement of the navigation of the Mississippi River has been diligently and efficiently applied.

I can not close this communication, gentlemen, without recommending to your most favorable consideration the interests of this District. Appointed by the Constitution its exclusive legislators, and forming in this particular the only anomaly in our system of government—of the legislative body being elected by others than those for whose advantage they are to legislate—you will feel a superadded obligation to look well into their condition and to leave no cause for complaint or regret. The scat of Government of our associated republics can not but be regarded as worthy of your parental care.

In connection with its other interests, as well as those of the whole country, I recommend that at your present session you adopt such measures in order to carry into effect the Smithsonian bequest as in your judgment will be best calculated to consummate the liberal intent of the testator.

When, under a dispensation of Divine Providence, I succeeded to the Presidential office, the state of public affairs was embarrassing and critical. To add to the irritation consequent upon a long-standing controversy with one of the most powerful nations of modern times, involving not only questions of boundary (which under the most favorable circumstances are always embarrassing), but at the same time important and high principles of maritime law, border controversies between the citizens and subjects of the two countries had engendered a state of feeling and of conduct which threatened the most calamitous consequences. The hazards incident to this state of things were greatly heightened by the arrest and imprisonment of a subject of Great Britain, who, acting (as it was alleged) as a part of a military force, had aided in the commission of an act violative of the territorial jurisdiction of the United States and involving the murder of a citizen of the State of New York. A large amount of claims against the Government of Mexico remained unadjusted and a war of several years' continuance with the savage tribes of Florida still prevailed, attended with the desolation of a large portion of that beautiful Territory and with the sacrifice of many valuable lives. To increase the embarrassments of the Government, individual and State credit had been nearly stricken down and confidence in the General Govermneut was so much impaired that loans of a small amount could only be negotiated at a considerable sacrifice. As a necessary consequence of the blight which had fallen on commerce and mechanical industry, the ships of the one were thrown out of employment and the operations of the other had been greatly diminished. Owing to the condition of the currency, exchanges between different parts of the country had become ruinously high and trade had to depend on a depreciated paper currency in conducting its transactions. I shall be permitted to congratulate the country that under an overruling Providence peace was preserved 69

without a sacrifice of the national honor; the war in Florida was brought to a speedy termination; a large portion of the claims on Mexico have been fully adjudicated and are in a course of payment, while justice has been rendered to us in other matters by other nations; confidence between man and man is in a great measure restored and the credit of this Government fully and perfectly reestablished; commerce is becoming more and more extended in its operations and manufacturing and mechanical industry once more reap the rewards of skill and labor honestly applied; the operations of trade rest on a sound currency and the rates of exchange are reduced to their lowest amount.

In this condition of things I have felt it to be my duty to bring to your favorable consideration matters of great interest in their present and ultimate results; and the only desire which I feel in connection with the future is and will continue to be to leave the country prosperous and its institutions unimpaired.

JOHN TYLER.

SPECIAL MESSAGES.

CITY OF WASHINGTON, December 8, 1843.

To the House of Representatives of the United States:

I transmit herewith a report from the Secretary of the Treasury, exhibiting certain transfers of appropriations which have been made in that Department in pursuance of the power vested in the President of the United States by the act of Congress of the 3d March, 1809, entitled "An act further to amend the several acts for the establishment and regulation of the Treasury, War, and Navy Departments."

JOHN TYLER.

WASHINGTON, December 12, 1843.

To the Senate of the United States:

I transmit herewith to the Senate, for their consideration in reference to its ratification, a convention for the surrender of criminals between the United States of America and His Majesty the King of the French, signed at this place on the 9th day of November last by the Secretary of State and the minister plenipotentiary *ad interim* from the French Government to the United States. JOHN TYLER.

JOHN TYLER.

WASHINGTON, December 16, 1843.

To the House of Representatives:

The two Houses of Congress at their last session passed a joint resolution, which originated in the House of Representatives, "presenting the

John Tyler

thanks of Congress to Samuel T. Washington for the service sword of George Washington and the staff of Benjamin Franklin, presented by him to Congress." This resolution (in consequence, doubtless, of a merely accidental omission) did not reach me until after the adjournment of Congress, and therefore did not receive my approval and signature, which it would otherwise promptly have received. I nevertheless felt myself at liberty and deemed it entirely proper to communicate a copy of the resolution to Mr. Washington, as is manifested by the accompanying copy of the letter which I addressed to him. The joint resolution, together with a copy of the letter, is deposited in the Department of State, and can be withdrawn and communicated to the House if it see cause to require them.

JOHN TYLER.

WASHINGTON, April 27.

[From Miscellaneous Letters, Department of State.]

SAMUEL T. WASHINGTON, Esq.

DEAR SIR: I send you a copy of a joint resolution of the two Houses of Congress expressive of the estimate which they place upon the presents which you recently made to the United States of the sword used by your illustrious relative, George Washington, in the military carcer of his early youth in the Seven Years' War, and throughout the War of our National Independence, and of the staff bequeathed by the patriot, statesman, and sage Benjamin Franklin to the same leader of the armies of freedom in the Revolutionary War, George Washington.

These precious relics have been accepted in the name of the nation, and have been deposited among its archives.

I avail myself of the opportunity afforded in the performance of this pleasing task to tender you assurances of my high respect and esteem.

JOHN TYLER.

[From Pocketed Laws, Department of State.]

JOINT RESOLUTION presenting the thanks of Congress to Samuel T. Washington for the service sword of George Washington and the staff of Benjamin Franklin, presented by him to Congress.

Resolved unanimously by the Senate and House of Representatives of the United States of America in Congress assembled, That the thanks of this Congress be presented to Samuel T. Washington, of Kanawha County, Va., for the present of the sword used by his illustrious relative, George Washington, in the military career of his early youth in the Seven Years' War, and throughout the War of our National Independence, and of the staff bequeathed by the patriot, statesman, and sage Benjamin Franklin to the same leader of the armies of freedom in the Revolutionary War, George Washington.

That these precious relics are hereby accepted in the name of the nation; that they be deposited for safe-keeping in the Department of State of the United States; and that a copy of this resolution, signed by the President of the Senate and the Speaker of the House of Representatives, be transmitted to the said Samuel T. Washington.

JOHN WHITE, Speaker of the House of Representatives. WHLLE P. MANGUM, President of the Senate pro tempore.

WASHINGTON, December 26, 1843.

To the Senate of the United States:

I transmit herewith a communication from the War Department, containing all the information and correspondence in that Department "on the subject of the 'mountain howitzer' taken by Lieutenant Fremont on the expedition to the Oregon" [Territory], as requested by the resolution of the Senate of the 18th instant. IOHN TYLER.

WASHINGTON, D. C., December 27, 1843.

To the Senate of the United States:

I lay before the Senate a convention for the settlement of the claims of the citizens and Government of the Mexican Republic against the Government of the United States and of the citizens and Government of the United States against the Government of the Mexican Republic, signed in the City of Mexico on the 20th of last month.

I am happy to believe that this convention provides as fully as is practicable for the adjustment of all claims of our citizens on the Government of Mexico. That Government has thus afforded a gratifying proof of its promptness and good faith in observing the stipulation of the sixth article of the convention of the 30th of January last.

JOHN TYLER.

WASHINGTON, January 8, 1844.

To the Senate of the United States:

• I herewith transmit a report* made by the Secretary of the Navy in pursuance of the provisions of the act of the 3d March, 1843.

JOHN TYLER.

WASHINGTON, January 10, 18.14.

To the House of Representatives:

I transmit the accompanying letter † from the Secretary of State, and copy of a correspondence between that officer and the minister from Portugal near this Government, to which I invite the attention of Congress. JOHN TYLER.

WASHINGTON, January 16, 1844.

To the House of Representatives of the United States:

In answer to the resolution of the House of Representatives of the roth instant, requesting the President to communicate to that body "copies of all correspondence with any foreign government relative to the title, boundary, discovery, and settlement of the Territory of Oregon," I have

^{*}Transmitting abstracts of proposals made to the Navy Department and its several bureans. †Relating to the duties levied on the wines of Portugal and its possessions by tariff acts of the United States in violation of the treaty of August 20, 1840.

to state that the information called for by the House has been already from time to time transmitted to Congress, with the exception of such correspondence as has been held within the last few months between the Department of State and our minister at London; that there is a prospect of opening a negotiation on the subject of the northwestern boundary of the United States immediately after the arrival at Washington of the newly appointed British minister, now daily expected; and that under existing circumstances it is deemed inexpedient, with a view to the public interest, to furnish a copy of the correspondence above mentioned. IOHN TYLER.

WASHINGTON CITY, January 17, 1844.

To the Senate of the United States:

In compliance with the resolution of the Senate of the 26th ultimo, I transmit herewith a report of the Secretary of War, with a copy of the proceedings of the court-martial in the case of Second Lieutenant D. C. Buell, Third Infantry, and of all orders and papers in relation thereto.

It will be perceived that at the date of the resolution the final action of the Executive was not had upon the case. That action having since taken place, it is communicated with the papers.

JOHN TYLER.

WASHINGTON, D. C., January 19, 1844.

To the House of Representatives:

In compliance with your resolution of the 15th December, 1843, requesting "such information as may be on file in a.19 of the Departments relative to the formation of a junction between the Atlantic and Pacific oceans," I transmit herewith a letter from the Secretary of State, with accompanying documents, in relation thereto. IOHN TYLER.

WASHINGTON, January 24, 1844.

To the House of Representatives:

I communicate to the House of Representatives a report from the Secretary of State, under date of the 7th ultimo, accompanied by a copy of a note from the Chevalier de Argaïz, on the subject of the schooner *Amistad.*

JOHN TYLER.

WASHINGTON, January 26, 1844.

To the House of Representatives:

I transmit herewith a report of the Secretary of War and accompanying papers, containing the information respecting the Indians remaining at present in Florida, requested by a resolution of the House of Representatives of the 10th instant. IOHN TYLER.

To the Senate of the United States:

I transmit a report* of the War Department, prepared under a resolution of the Senate of the 4th instant. JOHN TYLER.

WASHINGTON, February 6, 1844.

WASHINGTON, January 30, 1844.

To the House of Representatives:

In compliance with the resolution of the House of Representatives of the 22d January, I herewith transmit a letter † from the Secretary of the Navy, containing all the information in the possession of that Department on the subject to which the resolution refers.

JOHN TYLER.

WASHINGTON, February 7, 1844.

To the Senate of the United States:

I transmit to the Senate of the United States, in answer to their resolution of the 9th of January last, a report[‡] from the Secretary of State [·] and a report[§] from the Secretary of War. IOHN TYLER.

WASHINGTON, February 9, 1844.

To the Scnate of the United States:

In compliance with the resolution of the Senate of the 31st January, I herewith transmit the accompanying letter || from the Secretary of the Navy.

JOHN TYLER.

WASHINGTON, February 12, 1844.

To the Senate of the United States:

I herewith transmit to the Senate articles of agreement between the Delawares and Wyandots, by which the Delawares propose to convey to the Wyandots certain lands therein mentioned, for the ratification and approval of the Senate, together with the accompanying documents, marked A and B.

My mind is not clear of doubt as to the power of the Executive to act in the matter, but being opposed to the assumption of any doubtful power, I have considered it best to submit the agreement to your consideration.

JOHN TYLER.

WASHINGTON, February 23, 1844.

To the House of Representatives:

2131

I transmit herewith a communication from the Secretary of the Navy, to which I invite the particular attention of Congress. The act entitled "An act to authorize the President of the United States to direct transfers of appropriation in the naval service under certain circumstances" has this day met with my approval, under no expectation that it can be rendered available to the present wants of the service, but as containing an exposition of the views of Congress as to the entire policy of transfers from one head of appropriation to any other in the naval service and as a guide to the Executive in the administration of the duties of that Department. The restrictions laid upon the power to transfer by the latter clauses of the act have rendered its passage of no avail at the present moment.

It will, however, be perceived by the document accompanying the report of the Secretary that there has been realized by recent sales of old iron, copper, and other materials the sum of \$116,922.79. These sales were ordered for the express purpose of enabling the Executive to complete certain ships now on the stocks, the completion of which is called for by the economical wants of the service; and the doubt existing as to the power of the Government to apply this sum to the objects contemplated proceeds from the fact that the late Secretary of the Navy directed them to be placed in the Treasury, although in doing so he had no intention of diverting them from their intended head of expenditure. The Secretary of the Treasury, however, has brought himself to the opinion that they could only be entered under the head of miscellaneous receipts, and therefore can only be withdrawn by authority of an express act of Congress. I would suggest the propriety of the passage of such an act without delay.

As intimately associated with the means of public defense, I can not

^{*}Relating to slaves committing crimes and escaping from the United States to the British dominious since the ratification of the treaty of 1542, and the refusal of the British authorities to give them up, and to the construction which the British Government puts upon the article of said treaty relative to slaves committing crimes in the United States and taking refuge in the British dominions. † Relating to a demand upon the British Government for the surrender of certain fugitive criminals from Florida under the provisions of the tenth article of the treaty of Washington.

forbear urging upon you the importance of constructing, upon the principles which have been brought into use in the construction of the Princeton, several ships of war of a larger class, better fitted than that ship to the heavy armament which should be placed on board of them. The success which has so eminently crowned this first experiment should encourage Congress to lose no time in availing the country of all the important benefits so obviously destined to flow from it. Other nations will speedily give their attention to the subject, and it would be criminal in the United States, the first to apply to practical purposes the great power which has been brought into use, to permit others to avail themselves of our improvements while we stood listlessly and supinely by. In the number of steam vessels of war we are greatly surpassed by other nations, and yet to Americans is the world indebted for that great discovery of the means of successfully applying steam power which has in the last quarter century so materially changed the condition of the world. We have now taken another and even bolder step, the results of which upon the affairs of nations remain still to be determined, and I can not but flatter myself that it will be followed up without loss of time to the full extent of the public demands. The Secretary of the Navy will be instructed to lay before you suitable estimates of the cost of constructing so many ships of such size and dimensions as you may think proper to order to be built.

The application of steam power to ships of war no longer confines us to the seaboard in their construction. The urgent demands of the service for the Gulf of Mexico and the substitution of iron for wood in the construction of ships plainly point to the establishment of a navy-yard at some suitable place on the Mississippi. The coal fields and iron mines of the extensive region watered by that noble river recommend such an establishment, while high considerations of public policy would lead to the same conclusion.

One of the complaints of the Western States against the actual operation of our system of government is that while large and increasing expenditures of public money are made on the Atlantic frontier the expenditures in the interior are comparatively small. The time has now arrived when this cause of complaint may be in a great measure removed by adopting the legitimate and necessary policy which I have indicated, thereby throwing around the States another bond of union.

I could not forego the favorable opportunity which has presented itself, growing out of the communication from the Secretary of the Navy, to urge upon you the foregoing recommendations.

JOHN TYLER.

WASHINGTON, February 29, 1844.

To the Senate and House of Representatives of the United States:

I have to perform the melancholy duty of aunouncing to the two Houses of Congress the death of the Hon. Abel P. Upshur, late Secretary of State, and the Hon. Thomas W. Gilmer, late Secretary of the Navy.

This most lamentable occurrence transpired on board the United States ship of war the Princeton on yesterday at about half past 4 o'clock in the evening, and proceeded from the explosion of one of the large guns of that ship.

The loss which the Government and the country have sustained by this deplorable event is heightened by the death at the same time and by the same cause of several distinguished persons and valuable citizens.

I shall be permitted to express my great grief at an occurrence which has thus suddenly stricken from my side two gentlemen upon whose advice I so confidently relied in the discharge of my arduous task of administering the office of the executive department, and whose services at this interesting period were of such vast importance.

In some relief of the public sorrow which must necessarily accompany this most painful event, it affords me much satisfaction to say that it was produced by no carelessness or inattention on the part of the officers and crew of the Princeton, but must be set down as one of those casualties which to a greater or less degree attend upon every service, and which are invariably incident to the temporal affairs of mankind. I will also add that it in no measure detracts from the value of the improvement contemplated in the construction of the Princeton or from the merits of her brave and distinguished commander and projector.

^{*}Relating to the survey of the harbor of St. Louis.

WASHINGTON, D. C., April 9, 1844.

To the House of Representatives:

In compliance with a resolution of the House of Representatives of the 23d of March last, requesting the President to lay before the House "the authority and the true copies of all requests and applications upon which he deemed it his duty to interfere with the naval and military forces of the United States on the occasion of the recent attempt of the people of Rhode Island to establish a free constitution in the place of the old charter government of that State; also copies of the instructions to and statements of the charter commissioners sent to him by the then existing authorities of the State of Rhode Island; also copies of the correspondence between the Executive of the United States and the charter government of the State of Rhode Island, and all the papers and documents connected with the same; also copies of the correspondence, if any, between the heads of Departments and said charter government or any person or persons connected with the said government, and of any accompanying papers and documents; also copies of all orders issued by the Executive of the United States, or any of the Departments, to military officers for the movement or employment of troops to or in Rhode Island; also copies of all orders to naval officers to prepare steam or other vessels of the United States for service in the waters of Rhode Island; also copies of all orders to the officers of revenue cutters for the same service: also copies of any instructions borne by the Secretary of War to Rhode Island on his visit in 1842 to review the troops of the charter government; also copies of any order or orders to any officer or officers of the Army or Navy to report themselves to the charter government; and that he be requested to lay before this House copies of any other papers or documents in the possession of the Executive connected with this subject not above specifically enumerated," I have to inform the House that the Executive did not deem it his "duty to interfere with the naval and military forces of the United States" in the late disturbances in Rhode Island; that no orders were issued by the Executive or any of the Departments to military officers for the movement or employment of troops to or in Rhode Island other than those which accompany this message and which contemplated the strengthening of the garrison at Fort Adams, which, considering the extent of the agitation in Rhode Island, was esteemed necessary and judicious; that no orders were issued to naval officers to prepare steam or other vessels of the United States for service in the waters of Rhode Island; that no orders were issued "to the officers of the revenue cutters for said service;" that no instructions were borne by "the Secretary of War to Rhode Island on his visit in 1842 to review the troops of the charter government;" that no orders were given to any officer or officers of the Army or Navy to report themselves to the charter government; that "requests and applications" were made to the Executive to fulfill the guaranties of the Constitution which

impose on the Federal Government the obligation to protect and defend each State of the Union against "domestic violence and foreign invasion," but the Executive was at no time convinced that the casus faderis had arisen which required the interposition of the military or naval power in the controversy which unhappily existed between the people of Rhode Island. I was in no manner prevented from so interfering by the inquiry whether Rhode Island existed as an independent State of the Union under a charter granted at an early period by the Crown of Great Britain It was enough for the Executive to know that she was recogor not. nized as a sovereign State by Great Britain by the treaty of 1783; that at a later day she had in common with her sister States poured out her blood and freely expended her treasure in the War of the Revolution: that she was a party to the Articles of Confederation; that at an after period she adopted the Constitution of the United States as a free, independent, and republican State; and that in this character she has always possessed her full quota of representation in the Senate and House of Representatives; and that up to a recent day she has conducted all her domestic affairs and fulfilled all her obligations as a member of the Union, in peace and war, under her charter government, as it is denominated by the resolution of the House of the 23d March. I must be permitted to disclaim entirely and unqualifiedly the right on the part of the Executive to make any real or supposed defects existing in any State constitution or form of government the pretext for a failure to enforce the laws or the guaranties of the Constitution of the United States in reference to any such State. I utterly repudiate the idea, in terms as emphatic as I can employ, that those laws are not to be enforced or those guaranties complied with because the President may believe that the right of suffrage or any other great popular right is either too restricted or too broadly enlarged. I also with equal strength resist the idea that it falls within the Executive competency to decide in controversies of the nature of that which existed in Rhode Island on which side is the majority of the people or as to the extent of the rights of a mere numerical majority. For the Executive to assume such a power would be to assume a power of the most dangerous character. Under such assumptions the States of this Union would have no security for peace or tranquillity, but might be converted into the mere instruments of Executive will. Actuated by selfish purposes, he might become the great agitator, fomenting assaults upon the State constitutions and declaring the majority of to-day to be the minority of to-morrow, and the minority, in its turn, the majority, before whose decrees the established order of things in the State should be subverted. Revolution, civil commotion, and bloodshed would be the inevitable consequences. The provision in the Constitution intended for the security of the States would thus be turned into the instrument of their destruction. The President would become, in fact, the great constitution maker for the States, and all power would be vested in his hands.

When, therefore, the governor of Rhode Island, by his letter of the 4th of April, 1842, made a requisition upon the Executive for aid to put down the late disturbances, I had no hesitation in recognizing the obligations of the Executive to furnish such aid upon the occurrence of the contingency provided for by the Constitution and laws. My letter of the 11th of April, in reply to the governor's letter of the 4th, is herewith communicated, together with all correspondence which passed at a subsequent day and the letters and documents mentioned in the schedule hereunto annexed. From the correspondence between the Executive of the United States and that of Rhode Island, it will not escape observation that while I regarded it as my duty to announce the principles by which I should govern myself in the contingency of an armed interposition on the part of this Government being necessary to uphold the rights of the State of Rhode Island and to preserve its domestic peace, yet that the strong hope was indulged and expressed that all the difficulties would disappear before an enlightened policy of conciliation and compromise. In that spirit I addressed to Governor King the letter of the 9th of May, 1842, marked "private and confidential," and received his reply of the 12th of May of the same year. The desire of the Executive was from the beginning to bring the dispute to a termination without the interposition of the military power of the United States, and it will continue to be a subject of self-congratulation that this leading object of policy was finally accomplished. The Executive resisted all entreaties, however urgent, to depart from this line of conduct. Information from private sources had led the Executive to conclude that little else was designed by Mr. Dorr and his adherents than mere menace with a view to intimidation; nor was this opinion in any degree shaken until the 22d of June, 1842, when it was strongly represented from reliable sources, as will be seen by reference to the documents herewith communicated, that preparations were making by Mr. Dorr, with a large force in arms, to invade the State, which force had been recruited in the neighboring States and had been already preceded by the collection of military stores in considerable quantities at one or two points. This was a state of things to which the Executive could not be indifferent. Mr. Dorr speedily afterwards took up his headquarters at Chepachet and assumed the command of what was reported to be a large force, drawn chiefly from voluntary enlistments made in neighboring States. The Executive could with difficulty bring itself to realize the fact that the citizens of other States should have forgotten their duty to themselves and the Constitution of the United States and have entered into the highly reprehensible and indefensible course of interfering so far in the concerns of a sister State as to have entered into plans of invasion, conquest, and revolution; but the Executive felt it to be its duty to look minutely into the matter, and therefore the Secretary of War was dispatched to Rhode Island with instructions (a copy of which is herewith transmitted), and was authorized, should

a requisition be made upon the Executive by the government of Rhode Island in pursuance of law, and the invaders should not abandon their purposes, to call upon the governors of Massachusetts and Connecticut for a sufficient number of militia at once to arrest the invasion and to interpose such of the regular troops as could be spared from Fort Adams for the defense of the city of Providence in the event of its being attacked, as was strongly represented to be in contemplation. Happily there was no necessity for either issuing the proclamation or the requisition or for removing the troops from Fort Adams, where they had been properly stationed. Chepachet was evacuated and Mr. Dorr's troops dispersed without the necessity of the interposition of any military force by this Government, thus confirming me in my early impressions that nothing more had been designed from the first by those associated with Mr. Dorr than to excite fear and apprehension and thereby to obtain concessions from the constituted authorities which might be claimed as a triumph over the existing government.

With the dispersion of Mr. Dorr's troops ended all difficulties. A convention was shortly afterwards called, by due course of law, to amend the fundamental law, and a new constitution, based on more liberal principles than that abrogated, was proposed, and adopted by the people. Thus the great American experiment of a change in government under the influence of opinion and not of force has been again crowned with success, and the State and people of Rhode Island repose in safety under institutions of their own adoption, unterrified by any future prospect of necessary change and secure against domestic violence and invasion from abroad. I congratulate the country upon so happy a termination of a condition of things which seemed at one time seriously to threaten the public peace. It may justly be regarded as worthy of the age and of the country in which we live.

JOHN TYLER.

The PRESIDENT OF THE UNITED STATES.

SIR: The State of Rhode Island is threatened with domestic violence. Apprehending that the legislature can not be convened in sufficient season to apply to the Government of the United States for effectual protection in this case, I hereby apply to yon, as the executive of the State of Rhode Island, for the protection which is required by the Constitution of the United States. To communicate more fully with you on this subject, I have appointed John Whipple, John Brown Francis, and Elisha R. Potter, esqs., three of our most distinguished citizens, to proceed to Washington and to make known to you in behalf of this State the circumstances which call for the interposition of the Government of the United States for our protection.

I am, sir, very respectfully, your obedient servant,

SAM. W. KING, Governor of Rhode Island.

The PRESIDENT OF THE UNITED STATES.

SIR: For nearly a year last past the State of Rhode Island has been agitated by revolutionary movements, and is now threatened with domestic violence.

2139

PROVIDENCE, April 4, 1842.

PROVIDENCE, April 4, 1842.

The report* of a joint committee of both branches of the legislature of this State, with an act* and resolutions* accompanying the same, herewith communicated, were passed unanimously by the senate, and by a vote of 60 to 6 in the house of representatives. The legislature adjourned to the first Tuesday of May next.

It has become my duty by one of these resolutions to adopt such measures as in my opinion may be necessary in the recess of the legislature to execute the laws and preserve the State from domestic violence.

The provisions of the said act "in relation to offenses against the sovereign power of this State" have created much excitement among that portion of the people who have unequivocally declared their intention to set up another government in this State and to put down the existing government, and they threaten, individually and collectively, to resist the execution of this act. The numbers of this party are sufficiently formidable to threaten seriously our peace, and in some portions of the State, and in this city particularly, may constitute a majority of the physical force, though they are a minority of the people of the State.

Under the dangers which now threaten us, I have appointed John Whipple, John Brown Francis, and Elisha R. Potter, esqs., three of our most distinguished citizens, to proceed to Washington and consult with you in behalf of this State, with a view that such precautionary measures may be taken by the Government of the United States as may afford us that protection which the Constitution of the United States requires. There is but little doubt that a proclamation from the President of the United States and the presence here of a military officer to act under the authority of the United States would destroy the delusion which is now so prevalent, and convince the deluded that in a contest with the government of this State they would be involved in a contest with the Government of the United States, which could only eventuate in their destruction.

As no State can keep troops in time of peace without the consent of Congress, there is the more necessity that we should be protected by those who have the means of protection. We shall do all we can for ourselves. The Government of the United States has the power to *prevent* as well as to defend us from violence. The protection provided by the Constitution of the United States will not be effectual unless such precautionary measures may be taken as are necessary to prevent lawless men from breaking out into violence, as well as to protect the State from further violence after it has broken out. Preventive measures are the most prudent and safe, and also the most merciful.

The protective power would be lamentably deficient if "the beginning of strife," which "is like the letting out of waters," can not be prevented, and no protection can be afforded the State until to many it would be too late.

The above-named gentlemen are fully authorized to act in behalf of the State of Rhode Island in this emergency, and carry with them such documents and proof as will, no doubt, satisfy you that the interposition of the authority of the Government of the United States will be salutary and effectual.

I am, sir, very respectfully, your obedient servant,

SAM. W. KING, Governor of Rhode Island.

APRIL 9, 1842.

My DEAR SIR: † Will you do me the favor to see the committee from Rhode Island as soon after the meeting of the Cabinet as may suit your convenience?

I regret to learn from Mr. Francis that the leaning of your mind was decidedly against any expression of opinion upon the subject, upon the ground that *free suffrage* must *prevail*. Undoubtedly it will. That is not the question. The freeholders of Rhode Island have yielded that point, and the *only* question is between their constitution, providing for an extension of suffrage, and ours, containing *substantially*

*Omitted.

†Addressed to the President of the United Stat's.

the same provision—whether their constitution shall be carried out by force of arms without a majority, or the present government be supported until a constitution can be agreed upon that will command a majority. Neither their constitution nor ours has as yet received a majority of the free white males over 21 years of age. There is no doubt upon that subject, and I very much regret that your mind should have been influenced (if it has) by the paper called the Express. Nearly all the leaders who are professional men have abandoned them, on the ground that a majority is not in favor of their constitution. I know this to be true. I do hope that you will reconsider this vital question and give us a full hearing before you decide.

With great respect, very truly and sincerely, yours,

JOHN WHIPPLE.

His Excellency JOHN TYLER, President of the United States:

The undersigned, having been deputed by Samuel W. King, the governor of the State of Rhode Island, to lay before you the present alarming condition in which the people of that State are placed, and to request from you the adoption of such prudential measures as in your opinion may tend to prevent domestic violence, beg leave most respectfully to state the following among the leading facts, to which your attention is more particularly invited:

That the people of Rhode Island have no fundamental law except the charter of King Charles II, granted in 1663, and the usage of the legislature under it. Legislative usage under their charters has been decided by the Supreme Court of the United States to be the fundamental law both in Connecticut and Rhode Island.

That from the date of the Rhode Island charter down to the year 1841, a period of nearly two hundred years, no person has been allowed to vote for town or State offices unless possessed of competent estates and admitted free in the several towns in which they resided.

That since the statute of 1728 no person could be admitted a freeman of any town unless he owned a freehold estate of the value fixed by law (now \$134) or was the eldest son of such a freeholder.

That until the past year no attempt has been made, to our knowledge, to establish any other fundamental law, by force, than the one under which the people have lived for so long a period.

That at the January session of the legislature in 1841 a petition signed by five or six hundred male inhabitants, praying for such an extension of suffrage as the legislature might in their wisdom deem expedient to propose, was presented.

That, influenced by that petition, as well as by other considerations, the legislature at that session requested the qualified voters, or freemen, as they are called with us, to choose delegates at their regular town meetings to be holden in August, 1841, for a convention to be holden in November, 1841, to frame a written constitution.

That the result of the last meeting of this legal convention in February, 1842, was the constitution * accompanying this statement, marked —, which, in ease of its adoption by the people, would have been the supreme law of the State.

Most of the above facts are contained in the printed report of a numerous committee of the legislature at their session in March, 1842, which report was adopted by the legislature.

That in May, 1841, after said legal convention had been provided for by the legislature, and before the time appointed for the choice of delegates by the qualified voters (August, 1841), a mass meeting was held by the friends of an extension of suffrage at Newport, at which meeting a committee was appointed, called the State committee, who were authorized by said mass meeting to take measures for calling a convention to frame a constitution.

That this committee, thus authorized, issued a request for a meeting of the male citizens in the several towns to appoint delegates to the proposed convention.

That meetings (of unqualified voters principally, as we believe) were accordingly holden in the several towns, unauthorized by law, and contrary to the invariable custom and usage of the State from 1663 down to that period; that the aggregate votes appointing the delegates to that convention were, according to their own estimate, about 7,200, whereas the whole number of male citizens over 21 years of age, after making a deduction for foreigners, paupers, etc., was, according to their own estimate, over 22,000.

That this convention, thus constituted, convened in Providence in October, 1841, and the constitution called the "people's constitution" was the result of their deliberations.

That at subsequent meetings of portions of the people in December, 1841, by the authority of this convention alone (elected, as its delegates had been, by about one-third of the voters, according to their own standard of qualification), all males over 21 years of age were admitted to vote for the adoption of the people's constitution; that these meetings were not under any presiding officer whose legal right or duty it was to interpose any check or restraint as to age, residence, property, or color.

By the fourteenth article of this constitution it was provided that "this constitution shall be submitted to the people for their adoption or rejection on Monday, the 27th of December next, and on the two succeeding days;" "and every person entitled to vote as aforesaid who from sickness or *other causes* may be unable to attend and vote in the town or ward meetings assembled for voting upon said constitution on the days aforesaid is requested to write his name on a ticket, and to obtain the signature upon the back of the same of a person who has given in his vote, as a witness thereto, and the moderator or clerk of any town or ward meeting convened for the purpose aforesaid shall receive such vote on either of the three days next succeeding the three days before named for voting for said constitution."

During the first three days about 9,000 votes were received from the hands of the voters in the open meetings. By the privilege granted to any and all friends of the constitution of *bringing into* their meetings the *names* of voters during the three following days 5,000 votes more were obtained, making an aggregate of about 14,000 votes.

This constitution, thus originating and thus formed, was subsequently declared by this convention to be the supreme law of the land. By its provisions a government is to be organized under it, by the choice of a governor, lieutenant-governor, senators and representatives, on the Monday preceding the third Wednesday in April, 1842.

By the provisions of the "landholder's constitution," as the legal constitution is called, every white native citizen possessing the freehold qualification, and over 21 years of age, may vote upon a residence of *one* year, and without any freehold may vote upon a residence of *lwo* years, except in the case of votes for town taxes, in which case the voter must possess the freehold qualification *or* be taxed for other property of the value of \$150.

By the "people's constitution" "every white male citizen of the United States of the age of 21 years who has resided in this State for *one* year and in the town where he votes for six months" shall be permitted to vote, with the same exception as to voting for town taxes as is contained in the other constitution.

The provision, therefore, in relation to the great subject in dispute—the elective franchise—is substantially the same in the two constitutions.

On the 21st, 22d, and 23d March last the legal constitution, by an act of the legislature, was submitted to all the persons who by its provisions would be entitled to vote under it after its adoption, for their ratification. It was rejected by a majority of 676 votes, the number of votes polled being over 16,000. It is believed that many freeholders voted against it because they were attached to the old form of government and were against any new constitution whatever. Both parties used uncommon exertions to bring all their voters to the polls, and the result of the vote was, under the scrutiny of opposing interests in legal town meetings, that the friends of the people's constitution brought to the polls probably not over 7,000 to 7,500 votes. The whole vote against the legal constitution was about 8,600. If we allow 1,000 as the number of freeholders who voted against the legal constitution because they are opposed to any constitution, it would leave the number of the friends of the people's constitution 7,600, or about one-third of the voters of the State under the new qualification proposed by either constitution.

It seems incredible that there can be 14,000 friends of the people's constitution in the State, animated as they are by a most extraordinary and enthusiastic feeling; and yet upon this trial, in the usual open and fair way of voting, they should have obtained not over 7,600 votes.

The unanimity of the subsequent action of the legislature, comprehending as it did both the great political parties—the house of representatives giving a vote of 60 in favor of maintaining the existing government of the State and only 6 on the other side, with a unanimous vote in the senate—the unanimous and decided opinion of the supreme court declaring this extraordinary movement to be illegal in all its stages (see ——*), a majority of that court being of the Democratic party, with other facts of a similar character, have freed this question of a mere party character and enabled us to present it as a great constitutional question.

Without presuming to discuss the elementary and fundamental principles of government, we deem it our duty to remind you of the fact that the existing government of Rhode Island is *the* government that adopted the Constitution of the United States, became a member of this Confederacy, and has ever since been represented in the Senate and House of Representatives. It is at this moment the existing government of Rhode Island, both *de facto* and *de jure*, and is the only government in that State entitled to the protection of the Constitution of the United States.

It is that government which now calls upon the General Government for its interference; and even if the legal effect of there being an ascertained majority of unqualified voters against the existing government was as is contended for by the **opp**osing party, yet, upon their own principle, ought not that majority in point of fact to be clearly ascertained, not by assertion, but by proof, in order to justify the General Government in withdrawing its legal and moral influence to prevent domestic violence?

That a domestic war of the most furious character will speedily ensue unless prevented by a prompt expression of opinion here can not be doubted. In relation to this, we refer to the numerous resolutions passed at meetings of the friends of the people's constitution, and more especially to the Cumberland resolutions * herewith presented, and the affidavits,* marked -----, and to repeated expressions of similar reliance upon the judgment of the Chief Magistrate of the nation.

All which is respectfully submitted by-

JOHN WHIPPLE. JOHN BROWN FRANCIS. ELISHA R. POTTER.

WASHINGTON, April 11, 1842.

His Excellency the GOVERNOR OF RHODE ISLAND.

SIR: Your letter dated the 4th instant was handed me on Friday by Mr. Whipple, who, in company with Mr. Francis and Mr. Potter, called upon me on Saturday and placed me, both verbally and in writing, in possession of the prominent facts which have led to the present unhappy condition of things in Rhode Island—a state of things which every lover of peace and good order must deplore. I shall not adventure the expression of an opinion upon those questions of domestic policy which seem to have given rise to the unfortunate controversies between a portion of the citizens and the existing government of the State They are questions of municipal regulation, the adjustment of which belongs exclusively to the people of Rhode Island, and with which this Government can have nothing to do. For the regulation of my conduct in any interposition which I may be called upon to make between the government of a State and any portion of its citizens who may assail it with domestic violence, or may be in actual insurrection against it, I can only look to the Constitution and laws of the United States, which plainly declare the obligations of the executive department and leave it no alternative as to the course it shall pursue.

By the fourth section of the fourth article of the Constitution of the United States it is provided that "the United States shall guarantee to every State in this Union a republican form of government, and shall protect each of them against invasion, and, on application of the legislature or executive (when the legislature can not be convened), against domestic violence." And by the act of Congress approved on the 28th February, 1795, it is declared "that in case of an insurrection in any State against the government thereof it shall be lawful for the President of the United States, upon application of the legislature of such State or by the executive (when the legislature can not be convened), to call forth such numbers of the militia of any other State or States as may be applied for, as he may judge sufficient to suppress such insurrection." By the third section of the same act it is provided "that whenever it may be necessary, in the judgment of the President, to use the military force hereby directed to be called forth, the President shall forthwith, by proclamation, command such insurgents to disperse and retire peaceably to their respective abodes within a reasonable time." By the act of March 3, 1807, it is provided "that in all cases of insurrection or obstruction to the laws, either of the United States or of any individual State or Territory where it is lawful for the President of the United States to call forth the militia for the purpose of suppressing such insurrection or of causing the laws to be duly executed, it shall be lawful for him to employ for the same purposes such part of the land or naval force of the United States as shall be judged necessary, having first observed all the prerequisites of the law in that respect."

This is the first occasion, so far as the government of a State and its people are concerned, on which it has become necessary to consider of the propriety of exercising those high and most important of constitutional and legal functions.

By a careful consideration of the above-recited acts of Congress your excellency will not fail to see that no power is vested in the Executive of the United States to anticipate insurrectionary movements against the government of Rhode Island so as to sanction the interposition of the military authority, but that there must be an actual insurrection, manifested by lawless assemblages of the people or otherwise, to whom a proclamation may be addressed and who may be required to betake themselves to their respective abodes. I have, however, to assure your excellency that should the time arrive—and my fervent prayer is that it may never come—when an insurrection shall exist against the government of Rhode Island, and a requisition shall be made upon the Executive of the United States to furnish that protection which is guaranteed to each State by the Constitution and laws, I shall not be found to shrink from the performance of a duty which, while it would be the most painful, is at the same time the most imperative. I have also to say that in such a contingency the Executive could not look into real or supposed defects of the existing government in order to ascertain whether some other plan of government proposed for adoption was better suited to the wants and more in accordance with the wishes of any portion of her citizens. To throw the Executive power of this Government into any such controversy would be to make the President the armed arbitrator between the people of the different States and their constituted authorities, and might lead to a usurped power dangerous alike to the stability of the State governments and the liberties of the people. It will be my duty, on the contrary, to respect the requisitions of that

Messages and Papers of the Presidents

government which has been recognized as the existing government of the State through all time past until I shall be advised in regular manner that it has been altered and abolished and another substituted in its place by legal and peaceable proceedings adopted and pursued by the authorities and people of the State. Nor can I readily bring myself to believe that any such contingency will arise as shall render the interference of this Government at all necessary. The people of the State of Rhode Island have been too long distinguished for their love of order and of regular government to rush into revolution in order to obtain a redress of grievances, real or supposed, which a government under which their fathers lived in peace would not in due season redress. No portion of her people will be willing to drench her fair fields with the blood of their own brethren in order to obtain a redress of grievances which their constituted authorities can not for any length of time resist if properly appealed to by the popular voice. None of them will be willing to set an example, in the bosom of this Union, of such frightful disorder, such needless convulsions of society, such danger to life, liberty, and property, and likely to bring so much discredit on the character of popular governments. My reliance on the virtue, intelligence, and patriotism of her citizens is great and abiding, and I will not doubt but that a spirit of conciliation will prevail over rash councils, that all actual grievances will be promptly redressed by the existing government, and that another bright example will be added to the many already prevailing among the North American Republics of change without revolution and a redress of grievances without force or violence.

I tender to your excellency assurances of my high respect and consideration.

JOHN TYLER.

NEWPORT, R. I., May 4, 1842.

His Excellency JOHN TYLER,

President of the United States.

SIR: I transmit herewith certain resolutions passed by the general assembly of this State at their session holden at Newport on the first Wednesday of May instant.

You are already acquainted with some of the circumstances which have rendered necessary the passage of these resolutions. Any further information that may be desired will be communicated by the bearers, the Hon. Richard K. Randolph, speaker of the house of representatives, and Elisha R. Potter, esq., a member of the senate of this State.

I can not allow myself to doubt but that the assistance to which this State is entitled under the Constitution of the United States, to protect itself against domestic violence, will be promptly rendered by the General Government of the Union.

With great respect, I am, Your Excellency's humble servant,

SAM. W. KING, Governor of Rhode Island.

STATE OF RHODE ISLAND AND PROVIDENCE PLANTATIONS, In General Assembly, May Session, 1842.

Whereas a portion of the people of this State, for the purpose of subverting the taws and existing government thereof, have framed a pretended constitution, and for the same unlawful purposes have met in lawless assemblages and elected officers for the future government of this State; and

Whereas the persons so elected in violation of law, but in conformity to the said pretended constitution, have, on the 3d day of May instant, organized themselves into executive and legislative departments of government, and under oath assumed the duties and exercise of said powers: and

Whereas in order to prevent the due execution of the laws a strong military force

was called out and did array themselves to protect the said unlawful organization of government and to set at defiance the due enforcement of law: Therefore,

Resolved by the general assembly, That there now exists in this State an insurrection against the laws and constituted authorities thereof, and that, in pursuance of the Constitution and laws of the United States, a requisition be, and hereby is, made by this legislature upon the President of the United States forthwith to interpose the authority and power of the United States to suppress such insurrectionary and lawless assemblages, to support the existing government and laws, and protect the State from domestic violence.

Resolved, That his excellency the governor be requested immediately to transmit a copy of these resolutions to the President of the United States.

True copy. Witness:

HENRY BOWEN, Secretary of State.

WASHINGTON, May 7, 1842.

The GOVERNOR OF THE STATE OF RHODE ISLAND.

SIR: Your letter of the 4th instant, transmitting resolutions of the legislature of Rhode Island, informing me that there existed in that State "certain lawless assemblages of a portion of the people" "for the purpose of subverting the laws and overthrowing the existing government," and calling upon the Executive "forthwith to interpose the authority and power of the United States to suppress such insurrectionary and lawless assemblages and to support the existing government and laws and protect the State from domestic violence," was handed me on yesterday by Messrs. Randolph and Potter.

I have to inform your excellency in reply that my opinions as to the duties of this Government to protect the State of Rhode Island against domestic violence remain unchanged. Yet, from information received by the Executive since your dispatches came to hand I am led to believe that the lawless assemblages to which reference is made have already dispersed and that the danger of domestic violence is hourly diminishing, if it has not wholly disappeared. I have with difficulty brought myself at any time to believe that violence would be resorted to or an exigency arise which the unaided power of the State could not meet, especially as I have from the first felt persuaded that your excellency and others associated with yourself in the administration of the government would exhibit a temper of conciliation as well as of energy and decision. To the insurgents themselves it ought to be obvious, when the excitement of the moment shall have passed away, that changes achieved by regular and, if necessary, repeated appeals to the constituted authorities, in a country so much under the influence of public opinion, and by recourse to argument and remonstrance, are more likely to insure lasting blessings than those accomplished by violence and bloodshed on one day, and liable to overthrow by similar agents on another.

I freely confess that I should experience great reluctance in employing the military power of this Government against any portion of the people; but however painful the duty, I have to assure your excellency that if resistance be made to the execution of the laws of Rhode Island by such force as the *civil power* shall be unable to overcome, it will be the duty of this Government to enforce the constitutional guaranty a guaranty given and adopted mutually by all the original States, of which number Rhode Island was one, and which in the same way has been given and adopted by each of the States since admitted into the Union; and if an exigency of lawless violence shall actually arise the executive government of the United States, on the application of your excellency under the authority of the resolutions of the legislature already transmitted, will stand ready to succor the authorities of the State in their efforts to maintain a due respect for the laws. I sincerely hope, however, that no such exigency may occur, and that every citizen of Rhode Island will manifest his love of peace and good order by submitting to the laws and seeking a redress of grievances by other means than intestine commotions.

I tender to your excellency assurances of my distinguished consideration.

JOHN TYLER.

JOHN TYLER,

President of the United States.

SIR: As requested by the general assembly, I have the honor of transmitting to you, under the seal of the State, the accompanying resolutions.

And I am, very respectfully, your obedient servant,

THOMAS W. DORR, Governor of the State of Rhode Island and Providence Plantations.

STATE OF RHODE ISLAND AND PROVIDENCE PLANTATIONS,

General Assembly, May Session, in the City of Providence, A. D. 1842.

Resolved, That the governor be requested to inform the President of the United States that the government of this State has been duly elected and organized under the constitution of the same, and that the general assembly are now in session and proceeding to discharge their duties according to the provisions of said constitution.

Resolved, That the governor be requested to make the same communication to the President of the Senate and to the Speaker of the House of Representatives, to be laid before the two Houses of the Congress of the United States.

Resolved, That the governor be requested to make the same communication to the governors of the several States, to be laid before the respective legislatures.

A true copy. Witness: [L. S.]

WM. H. SMITH, Secretary of State.

Governor KING, of Rhode Island.

SIR: Messrs. Randolph and Potter will hand you an official letter, but I think it important that you should be informed of my views and opinions as to the best mode of settling all difficulties. I deprecate the use of force except in the last resort, and I am persuaded that measures of conciliation will at once operate to produce quiet. Iam well advised, if the general assembly would authorize you to announce a general amnesty and pardon for the past, without making any exception, upon the condition of a return to allegiance, and follow it up by a call for a new convention upon somewhat liberal principles, that all difficulty would at once cease. And why should not this be done? A government never loses anything by mildness and forbearance to its own citizens, more especially when the consequences of an opposite course may be the shedding of blood. In your case the one-half of your people are involved in the consequences of recent proceedings. Why urge matters to an extremity? If you succeed by the bayonet, you succeed against your own fellow-citizens and by the shedding of kindred blood, whereas by taking the opposite course you will have shown a paternal care for the lives of your people. My own opinion is that the adoption of the above measures will give you peace and insure you harmony. A resort to force, on the contrary, will engender for years to come feelings of animosity.

I have said that I *speak advisedly*. Try the experiment, and if it fail then your justification in using force becomes complete.

Excuse the freedom I take, and be assured of my respect.

JOHN TYLER.

MAY 9, 1842.

PROVIDENCE, R. I., May 12, 1842.

His Excellency the PRESIDENT OF UNITED STATES.

My DEAR SIR: I have had the honor to receive your communication of 9th instant by Mr. Raudolph, and assure you it has given me much satisfaction to know that your views and opinions as to the course proper to be pursued by the government of this State in the present unhappy condition of our political affairs is so much in conformity with my own.

Our legislature will undoubtedly at their session in June next adopt such measures as will be necessary to organize a convention for the formation of a new constitution of government, by which all the evils now complained of may be removed.

It has already been announced as the opinion of the executive that such of our citizens as are or have been engaged in treasonable and revolutionary designs against the State will be pardoned for the past on the condition only that they withdraw themselves from such enterprise and signify their return to their allegiance to the governmer'.

With high consideration and respect, your obedient and very humble servant,

SAM. W. KING.

His Excellency JOHN TYLER,

KINGSTON, R. I., May 15, 1842.

President of the United States.

DEAR SIR: We arrived at Newport on Wednesday morning in time to attend the meeting of our legislature.

The subject of calling a convention immediately, and upon a liberal basis as to the right of voting for the delegates, was serionsly agitated amongst us. The only objection made was that they did not wish to concede while the *pcople's party* continued *their threats.* All allowed that the concession must be made, and the only difference of opinion was as to time.

For my own part, I fear we shall never see the time when concession could have been made with better grace or with better effect than now. If two or three *noisy* folks among the suffrage party could only have their mouths stopped for a week or two, a reconciliation could be brought about at any time, or if Mr. Dorr would allow himself to be arrested peaceably and give bail no one could then object. But the supporters of the government say it is wrong to give up so long as Mr. Dorr threatens actual resistance to the laws in case he is arrested. If this could be done, they would then consider that they had sufficiently shown their determination to support the laws, and the two measures which you proposed to us in conversation at Washington—a convention and then a *general* amnesty—would succeed beyond a doubt.

Allow me to suggest that if Mr. Wickliffe, or someone who you might think would have most influence, would address a letter to Governor Fenner on the subject of conciliation it might be of great service. Governor F. is the father-in-law of General Mallett and a member of our senate.

Our assembly adjourned to the third Monday of June, but it is in the power of the governor to call it sooner, which can be done in a day at any time. Unless, however, there is a little more *prudence* in the *leaders* on both sides, we shall then be farther from reconciliation than now. The great mass of both parties I believe to be sincerely anxious for a settlement.

I do not know whether a letter addressed to the President upon a subject of this name, e would of course be considered as public and liable to inspection. Few would write freely if that were the case. If private, I will cheerfully communicate from time to time any information that may be in my power and which might be of any service.

I am, sir, very respectfully, your obedient servant,

ELISHA R. POTTER.

Mr. Dorr returned to Providence this (Monday) morning with an armed escort.

ELISHA R. POTTER, Esq.

WASHINGTON, May 20, 1842.

DEAR SIR: You have my thanks for your favor of the 16th [15th] instant, and I have to request that you will write to me without reserve whenever anything of importance shall arise. My chief motives for desiring the adoption of the measures suggested to you, viz, a general amnesty and a call of a convention, were, first, because I felt convinced that peace and harmony would follow in their train, and, secondly, if in this I was disappointed the insurgents would have had no longer a pretense for an appeal to the public sympathies in their behalf. I saw nothing to degrade or to give rise to injurious reflections against the government of the State for resorting to every proper expedient in order to quiet the disaffection of any portion of her own people. Family quarrels are always the most difficult to appease, but everybody will admit that those of the family who do most to reconcile them are entitled to the greatest favor. Mr. Dorr's recent proceedings have been of so extravagant a character as almost to extinguish the last hope of a peaceable result, and yet I can not but believe that much is meant for effect and for purposes of intimidation merely. I certainly hope that such may be the case, though the recent proceedings in New York may have excited new feelings and new desires. This mustering of the clans may place Governor King in a different situation from that which he occupied when I had the pleasure of seeing you. Then he might have yielded with grace; whether he can do so now is certainly a question of much difficulty and one on which I can not venture to express an opinion at this distance from the scene of action.

I shall be always most happy to hear from you, and your letters will never be used to your prejudice.

Accept assurances of my high respect.

JOHN TYLER.

The PRESIDENT OF THE UNITED STATES.

SIR: At the request of Governor King, I inclose to you an extra of the Providence Daily Express of this morning, containing the proclamation of Thomas W. Dorr to the people of this State.

It states definitely the position assumed by him and his faction against the government of this State and of the United States.

His excellency tenders to you the highest respect and consideration.

Respectfully, yours,

THOS. A. JENCKES, Private Secretary.

PROVIDENCE, May 16, 1842.

STATE OF RHODE ISLAND AND PROVIDENCE PLANTATIONS.

A PROCLAMATION.

BY THOMAS W. DORR, GOVERNOR AND COMMANDER IN CHIEF OF THE SAME.

FELLOW-CITIZENS: Shortly after the adjournment of the general assembly and the completion of indispensable executive business I was induced by the request of the most active friends of our cause to undertake the duty (which had been previously suggested) of representing in person the interests of the people of Rhode Island in other States and at the seat of the General Government. By virtue of a resolution of the general assembly, I appointed Messrs. Pearce and Anthon, commissioners for the same purpose.

Of the proposed action of the Executive in the affairs of our State you have been already apprised. In case of the failure of the civil posse (which expression was intended by the President, as I have been informed, to embrace the military power) to execute any of the laws of the charter assembly, including their law of pains

and penalties and of treason, as it has been for the first time defined, the President intimates an intention of resorting to the forces of the United States to check the movements of the people of this State in support of their republican constitution recently adopted.

From a decision which conflicts with the right of sovereignty inherent in the people of this State and with the principles which lie at the foundation of a democratic republic an appeal has been taken to the people of our country. They understand our cause; they sympathize in the injuries which have been inflicted upon us; they disapprove the course which the National Executive has adopted toward this State, and they assure us of their disposition and intention to interpose a barrier between the supporters of the people's constitution and the hired soldiery of the United States. The democracy of the country are slow to move in any matter which involves an issue so momentous as that which is presented by the controversy in Rhode Island, but when they have once put themselves in motion they are not to be easily diverted from their purposes. They believe that the people of Rhode Island are in the right; that they are contending for equal justice in their political system; that they have properly adopted a constitution of government for themselves, as they were entitled to do, and they can not and will not remain indifferent to any act, from whatever motive it may proceed, which they deem to be an invasion of the sacred right of selfgovernment, of which the people of the respective States can not be divested.

As your representative I have been everywhere received with the utmost kindness and cordiality. To the people of the city of New York, who have extended to us the hand of a generous fraternity, it is impossible to overrate our obligation at this most important crisis.

It has become my duty to say that so soon as a soldier of the United States shall be set in motion, by whatever direction, to act against the people of this State in aid of the charter government I shall call for that aid to oppose all such force, which, I am fully authorized to say, will be immediately and most cheerfully tendered to the service of the people of Rhode Island from the city of New York and from other places. The contest will then become national, and our State the battle ground of American freedom.

As a Rhode Island man I regret that the constitutional question in this State can not be adjusted among our own citizens, but as the minority have asked that the sword of the National Executive may be thrown into the scale against the people, it is imperative upon them to make the same appeal to their brethren of the States an appeal which they are well assured will not be made in vain. They who have been the first to ask assistance from abroad can have no reason to complain of any consequences which may ensue.

No further arrests under the law of pains and penalties, which was repealed by the general assembly of the people at their May session, will be permitted. I hereby direct the military, under their respective officers, promptly to prevent the same and to release all who may be arrested under said law.

As requested by the general assembly, I enjoin upon the militia forthwith to elect their company officers; and I call upon volunteers to organize themselves without delay. The military are directed to hold themselves in readiness for immediate service.

Given under my hand and the seal of the State, at the city of Providence, this 6th day of May, A. D. 1842.

[L. S.]

THOMAS W. DORR, Governor and Commander in Chief of the State of Rhode Island and Providence Plantations.

By the governor's command :

WILLIAM H. SMITH, Secretary of State.

PROVIDENCE, R. I., May 25, 1842.

The PRESIDENT OF THE UNITED STATES.

SIR: Since my last communication the surface of things in this city and State has been more quiet. The complete dispersing of the insurgents and flight of their leader on Wednesday last, 18th instant, seem to have broken their strength and prevented them from making head openly in any quarter.

But another crisis now appears to be approaching. By the private advices received by myself and the council from our messengers in the neighboring States we learn that Dorr and his agents are enlisting men and collecting arms for the purpose of again attempting to subvert, by open war, the government of this State. Those who have assisted him at home in his extreme measures are again holding secret councils and making preparations to rally on his return. Companies of men pledged to support him have met and drilled in the north part of this State during the present week.

From the forces which he can collect among our own citizens we have nothing to fear. Our own military strength has once scattered them, and could as easily do so a second time. But if the bands which are now organizing in Massachusetts, Connecticut, and New York should make the incursion which they threaten, with Dorr at their head, we have reason to apprehend a civil war of the most destructive and vindictive character. Our own forces might be sufficient to repel them, but having little discipline and no officer of military experience to lead them, they could not do it without the loss of many valuable lives.

For the evidence that such forces are organizing in other States, I refer Your Excellency to a letter from Governor Seward, of New York, and to a statement made by one of our messengers to the council, which will be handed you. Other messengers confirm to the fullest extent the same intelligence.

In this posture of affairs I deem it my duty to call upon Your Excellency for the support guaranteed by the Constitution and laws of the United States to this government. I would submit to Your Excellency whether a movement of a sufficient body of troops to this quarter, to be stationed at Fort Adams, and to be subject to the requisitions of the executive of this State whenever in his opinion the exigency should arise to require their assistance, would not be the best measure to insure peace and respect for the laws and to deter invasions.

You will see by the statement* of the secret agent of the government that the time set for this incursion is very near. The mustering of the insurgents and their movement upon the city will probably be with the greatest expedition when once commenced—in a time too short for a messenger to reach Washington and return with aid. I therefore make this application before any movement of magnitude on their part, in order that we may be prepared at the briefest notice to quelt domestic insurrection and repel invasion.

SAM. W. KING, Governor of Rhude Island.

EXECUTIVE DEPARTMENT, Albany, May 22, 1842.

His Excellency SAMUEL WARD KING, Governor of Rhode Island.

SIR: In compliance with your excellency's requisition, I have this day issued a warrant for the arrest of Thomas Wilson Dorr, esq., charged in Rhode Island with the crime of treason. The warrant will be delivered to a police officer of this city, who will attend Colonel Pitman and be advised by him in regard to the arrest of the fugitive should he be found in this State.

May I be allowed to suggest to your excellency that a detention of the accused in

John Tyler

this State would be liable to misapprehension, and if it should be in a particular region of this State might, perhaps, result in an effort to rescue him. Therefore it seems to be quite important that your excellency should without delay designate, by a communication to me, an agent to receive the fugitive and convey him to Rhode Island.

I have the honor to be, with very high respect and consideration, your excellency's obedient servant, WILLIAM H. SEWARD.

His Excellency Governor KING.

WASHINGTON CITY, May 28, 1842.

SIR: I have received your excellency's communication of the 25th instant, informing me of efforts making by Mr. Dorr and others to embody a force in the contiguous States for the invasion of the State of Rhode Island, and calling upon the Executive of the United States for military aid.

In answer I have to inform your excellency that means have been taken to ascertain the extent of the dangers of any armed invasion by the citizens of other States of the State of Rhode Island, either to put down her government or to disturb her peace. The apparent improbability of a violation so flagrant and unprecedented of all our laws and institutions makes me, I confess, slow to believe that any serious attempts will be made to execute the designs which some evil-minded persons may have formed.

But should the necessity of the case require the interposition of the authority of the United States it will be rendered in the manner prescribed by the laws.

In the meantime I indulge a confident expectation, founded upon the recent manifestations of public opinion in your State in favor of law and order, that your own resources and means will be abundantly adequate to preserve the public peace, and that the difficulties which have arisen will be soon amicably and permanently adjusted by the exercise of a spirit of liberality and forbearance.

JOHN TYLER.

The Secretary of War will issue a private order to Colonel Bankhead, commanding at Newport, to employ, if necessary, a private and confidential person or persons to go into all such places and among all such persons as he may have reason to believe to be likely to give any information touching Rhode Island affairs, and to report with the greatest dispatch, if necessary, to the President. He will also address a letter to General Wool conveying to him the fears entertained of a hostile invasion contemplated to place Dorr in the chair of state of Rhode Island by persons in the States of Connecticut and New York, and also to General Eustis, at Boston, of a similar character, with instructions to adopt such inquiries (to be secretly made) as they may deem necessary, and to report with the greatest dispatch all information which from time to time they may acquire.

(Indorsed: "President's instructions, May 28, 1842.")

Colonel BANKHEAD,

WAR DEPARTMENT, May 28, 1842.

Newport, R. I.

SIR: The governor of Rhode Island has represented to the President that preparations are making by Mr. Dorr and some of his adherents to recruit men in the neighboring States for the purpose of supporting his usurpation of the powers of government, and that he has provided arms and camp equipage for a large number of men. It is very important that we should have accurate information on this subject, and particularly in relation to the movements made in other States. I have therefore to desire you to employ proper persons to go to the places where it may be supposed such preparations are making to possess themselves fully of all

that is doing and in contemplation, and report frequently to you. It is said that Mr. Dorr's principal headquarters are at the town of Thompson, in the State of Connecticut. It may be well for you to communicate personally with Governor King and ascertain from him the points and places at which any preparations for embodying men are supposed to be making, and to direct your inquiries accordingly.

It is important that you should select persons on whose integrity and accuracy the fullest reliance can be placed. They should not be partisans on either side, although to effect the object it will of course be necessary that some of them should obtain (if they do not already possess) the confidence of the friends of Mr. Dorr. You will please communicate directly to me all the information you obtain, and your own views of it.

It is scarcely necessary to say that this communication is of the most private and confidential character, and is not to be made known to anyone.

Respectfully, your obedient servant,

J. C. SPENCER.

WAR DEPARTMENT, May 29, 1842.

Brigadier-General EUSTIS,

Boston.

SIR: The governor of Rhode Island has represented to the President that preparations are making in other States (particularly in Massachusetts) for an armed invasion of that State to support the usurpations of Mr. Dorr and his friends and foment domestic insurrection. It is very important that we should have accurate information on this subject, and I have to desire you to take all necessary means to acquire it, and communicate directly to me as speedily and frequently as possible. It is said that $1,\infty$ o stand of arms have been procured in Boston, some pieces of artillery, and a large quantity of camp equipage for the use of the insurgents. Your attention to this is particularly desired to ascertain its truth or falsehood. It is also said that there are 200 men enrolled and embodied in a town upon the borders of Rhode Island, the name of which has escaped me. Please inquire into this. If it becomes necessary to employ confidential persons to discover what is doing, you will do so, being careful to select those only that are entirely trustworthy; and it will be desirable to avoid heated partisans on either side. Their inquiries should be conducted quietly and privately.

I desire you to communicate fully and freely what you may learn and your views concerning it for the information of the President and the Department.

It is scarcely necessary to say that this communication is strictly private and confidential.

Respectfully, your obedient servant,

[J. C. SPENCER.]

NEW YORK, June 3, 1842.

My DEAR SIR: I came to this city yesterday, having taken a severe cold on the Sound, and am now just out of my bed. I transmit herewith a letter from —, a friend appointed by me, as you requested, to look into the Rhode Island business. Mr. —— has had access to authentic sources in Governor Dorr's party, and I have no doubt his account of the whole matter is perfectly just. I supposed I should receive the foreign mail here, but I shall not wait for it if I should feel well enough to travel to-morrow.

Yours, truly,

The PRESIDENT.

DANL. WEBSTER.

NEW YORK, June 3, 1842.

Hon. DANIEL WEBSTER,

Secretary of State.

DEAR SIR: In pursuance of the arrangement made when you were in Boston, I have visited the State of Rhode Island, and, so far as could be done, possessed myself

THE BATTLE OF CONTRERAS, 1847

BATTLE OF CONTRERAS.

This battle was fought on August 20, 1847, between the Mexican forces and the American troops under General Scott fighting their way to Mexico City; and resulted in a victory for the Americans. The battle immediately preceded the battle of Churnbusco, which definitely opened up the road to the capital of Mexico for Scott's forces. (See Contreras, Battle of, in Encyclopedic Index.) of a knowledge of the existing state of things there. I had a full and free interview with Governor King and his council, as well as with several other gentlemen upon each side of the matter in controversy. All agree that, so far as the people of Rhode Island are concerned, there is no danger of any further armed resistance to the legitimate authorities of the State. It was never intended, probably, by the majority of those called the suffrage party to proceed in any event to violence, and when they found themselves pushed to such an extremity by their leaders they deserted their leaders and are now every day enrolling themselves in the volunteer companies which are being organized in every part of the State for the suppression of any further insurrectionary movements that may be made. A large majority of those elected or appointed to office under the people's constitution (so called) have resigned their places and renounced all allegiance to that constitution and the party which supports it, so that the insurgents are now without any such organization as would enable them to carry out their original purposes if they otherwise had the power.

Governor King and his council alone, of all the intelligent persons with whom I consulted, fear an irruption upon them of an armed force to be collected in other States, and this is the only difficulty of which they now have any apprehension. This fear is excited by the boasts frequently made by the few who still avow their determination to adhere to the constitution that they have at their control large bodies of armed men, as well as camp equipage, provisions, money, and munitions of war, which have been provided for them in Massachusetts, Connecticut, and New York. The supposition that Rhode Island is to be invaded by a foreign force, when that force would neither be led nor followed by any considerable number of the people of the State, does not seem, to say the least, to be a very reasonable one. If those who think they are suffering injustice are not disposed to make an effort to redress their supposed wrongs, they would hardly expect the work to be done by others.

The ostensible object of the insurgents now is not the real one. They meditate no further forcible proceedings. They bluster and threaten for several reasons:

First. Because they suppose they shall thus break their fall a little and render their retreat a little less inglorious than it would be if they should beat it at once.

Second. They believe that if they keep up a shew of opposition to the existing government they shall be more likely to revolutionize it by peaceable measures; and

Third. They think they can make their influence so far felt as to operate favorably upon those who are now under arrest for treason or who may be hereafter arrested for the same offense.

That these are the views and purposes of the insurgents I am confidentially assured by the potorious individual from whom I told you I could learn their plans and designs; and no one has better means of knowing than he, having been himself one of Mr. Dorr's confidential advisers from the beginning.

The meeting at Woonsocket on the 1st did not amount to much, being but thinly attended. The projected fortifications at that place have been abandoned. It is said they will be thrown up in some other spot to be designated hereafter, but this is not believed.

Mr. Dorr is now understood to be lurking in this city. Warrants have been issued for his arrest both by the governor of this State and the governor of Massachusetts, but he moves so privately and shifts his whereabouts so often that he eludes his pursuers.

Under all the circumstances I think you will come to the opinion entertained by seven-eighths of all the people of Providence (the scene of his operations thus far) that, deserted by his followers at home and disgraced in the estimation of those who sympathized with him abroad, Mr. Dorr has it not in his power to do any further serious mischief.

Yours, very truly,

PROVIDENCE, R. I., June 22, 1842.

Hon. J. C. SPENCER,

Secretary of War.

SIR: When I last had the honor to write to you I felt confident that there would be no further disturbance of the peace in this State. Governor King was of the same opinion. But I now fear, from strong indications, that Mr. Dorr and his party are determined to enter the State in force, and that in a few days serious difficulties will arise.

On my arrival here this morning from Newport, on my way to New York, I learnt from undoubted authority that several large boxes of muskets, supposed to contain about eighty, were received the evening before last at Woonsocket from New York; that several mounted cannon had been also received there and forwarded on to Chepachet; that a number of men, not citizens of the State, with arms, were in and about Woonsocket and Chepachet; that forty-eight kegs of powder were stolen on Sunday night last from a powder house in this neighborhood, and that Dorr, with about twenty men, landed last evening at Norwich.

An unsuccessful attempt was made two nights ago to steal the guns of the artillery company at Warren, and at several other places where guns had been deposited by the State, by some of Dorr's men, one of whom has been identified and arrested.

It has been observed for several days past that many of the suffrage party and residents of this city have been sending off their families and effects. The inhabitants of the city are seriously alarmed and in a state of much excitement. An express to convey the above intelligence to Governor King at Newport will be immediately sent down by the mayor of the city.

I shall be in New York early to-morrow morning ready to receive any instructions you may think proper to honor me with.

I have been compelled to write this in haste.

I am, sir, with great respect, your obedient servant,

JAS. BANKHEAD, Colonel Second Regiment Artillery.

CITY OF PROVIDENCE, MAYOR'S OFFICE,

June 23, 18.12.

SIR:* Governor King, having gone to Newport this afternoon, has requested me to forward his letter to Your Excellency, with such depositions as I could procure concerning the state of affairs in the north part of the State. These documents will be taken on by the Hon. William Sprague, our Senator, who intends leaving to-night for Washington. Should any accident prevent Mr. Sprague from going, I shall forward them to be put in the mail. I inclose the depositions † of Messrs. Samuel W. Peckham and Charles I. Harris. Messrs. Keep and Shelley, whom I sent out, have just returned. If I can get their depositions in time, I shall also forward them.

About 11 a. m. this day a body marched from Woonsoeket to Chepachet amounting to 90 men, and other small bodies are marching in that direction, so that I suppose that about 400 will be concentrated at Chepachet this evening.

In this city there is much excitement, but no symptoms as yet of men gathering with arms. There are many who I fear will be ready to join in any mischief should Dorr's forces approach us. Up to 8 o'clock this morning Mr. Dorr was in Connecticut, but a gentleman from Chepachet informs me his friends expect him this day.

I remain, with great respect, your obedient servant,

THOS. M. BURGESS,

Mayor.

*Addressed to the President of the United States. †Omitted.

EXECUTIVE DEPARTMENT, Providence, June 23, 1842.

His Excellency JOHN TYLER, President of the United States.

SIR: After my last communication the excitement and military operations of the insurgents against the government of this State appeared to subside, and I indulged hopes that no open violence would be attempted, but that they were disposed to await the action of the general assembly, now in session at Newport. I regret that I am obliged to inform Your Excellency that within a few days past appearances have become more alarming. Several iron cannon have been stolen from citizens of Providence, and during the night of the 19th a powder house, owned by a merchant of Providence, was broken open and about 1,200 pounds of powder stolen therefrom. Yesterday the military operations of the insurgents became more decided in their character. At Woonsocket and Chepachet there were gatherings of men in military array, pretending to act under the authority of Thomas W. Dorr. They established a kind of martial law in those villages, stopped peaceable citizens in the highways, and at Chepachet four citizens of Providence were seized by an armed force, pinioned, and compelled to march about 10 miles under a guard of about forty men to Woonsocket, where they were cruelly treated under pretense of being spies. The insurgents are provided with cannon, tents, ammunition, and stores.

It is ascertained that Thomas W. Dorr has returned from the city of New York to the State of Connecticut, and I have reason to believe he will be at Chepachet this day, where he will concentrate what forces he has already under arms with such others as he can collect. Those already assembled are composed of citizens of other States as well as of our own, and are variously estimated at 500 to 1,000 men.

I have this morning had an interview with Colonel Bankhead, who will communicate to the War Department such facts as have come to his knowledge. I would further state to Your Excellency that in those villages and their vicinity the civil authority is disregarded and paralyzed.

Under these circumstances I respectfully submit to Your Excellency that the crisis has arrived when the aid demanded by the legislature of the State from the Federal Government is imperatively required to furnish that protection to our citizens from domestic violence which is guaranteed by the Constitution and laws of the United States.

I confidently trust that Your Excellency will adopt such measures as will afford us prompt and efficient relief.

I remain, with great consideration, your obedient servant,

SAM. W. KING.

Governor KING.

WASHINGTON, June 25, 1842.

SIR: Your letter of the 23d instant was this day received by the hands of Governor Sprague, together with the documents accompanying the same. Your excellency has unintentionally overlooked the fact that the legislature of Rhode Island is now in session. The act of Congress gives to the Executive of the United States no power to summon to the aid of the State the military force of the United States unless an application shall be made by the legislature if in session; and that the State executive can not make such application except when the legislature can not be convened. (See act of Congress, February 28, 1795.)

I presume that your excellency has been led into the error of making this application (the legislature of the State being in session at the date of your dispatch) from a misapprehension of the true import of my letter of 7th May last. I lose no time in correcting such misapprehension if it exist.

Should the legislature of Rhode Island deem it proper to make a similar application to that addressed to me by your excellency, their communication shall receive all the attention which will be justly due to the high source from which such application shall emanate.

I renew to your excellency assurances of high consideration.

J. TYLER.

Hon. JOHN C. SPENCER,

Secretary of War.

SIR: I addressed you yesterday afternoon in great haste, that my letter might go by the mail (then about being closed), to inform you of the sudden change in the aspect of affairs in this State, and also to inform you that I should be this morning at Governors Island, New York.

At the urgent solicitation of Governor King, who crossed over from Newport to Stonington to intercept me on the route, I returned last night to this place from Stonington, having proceeded so far on my way to New York.

In addition to what I stated in my letter yesterday, I learn from Governor King (who has just called on me) that four citizens of this city who had gone to Chepachet to ascertain what was going on there were arrested as spies by the insurgents, bound, and sent last night to Woonsocket, where they were confined when his informer left there at 8 o'clock this morning; also that martial law had been proclaimed by the insurgents at Woonsocket and Chepachet, and no one was allowed to enter or depart from either place without permission.

The citizens of this city are in a state of intense excitement.

I shall return to-morrow to Newport to await any instructions you may be pleased to favor me with.

I have the honor to be, sir, with great respect, your obedient servant,

JAS. BANKHEAD, Colonel Second Regiment Artillery.

PROVIDENCE, R. I., June 23, 1842.

Brigadier-General R. JONES,

PROVIDENCE, R. I., June 23, 1842.

Adjutant-General United States Army.

SIR: I left Newport yesterday morning to return to Fort Columbus, with the belief that my presence could no longer be necessary for the purpose I had been ordered there for. The legislature was in session, and, as I was well assured, determined honestly and faithfully to adopt measures to meet the wishes of the citizens of this State to form a constitution on such liberal principles as to insure full satisfaction to all patriotic and intelligent men who had any interest in the welfare of the State. The well-known intention of the legislature in this respect would, I hoped and believed, reconcile the factious and produce tranquillity. But the aspect of affairs has suddenly become more threatening and alarming. There is an assemblage of men at Woonsocket and Chepachet, two small villages (say 15 miles distant hence) on the borders of Connecticut, composed principally of strangers or persons from other States. They have recently received 75 muskets from Boston and 80 from New York, in addition to former supplies. They have also several mounted cannon and a large quantity of ammunition, 48 kegs of which they stole from a powder house not far distant from this, the property of a manufacturer of powder. Dorr, it is supposed, joined his party at one of the above-named places the night before last; he has certainly returned from New York and passed through Norwich. His concentrated forces are variously estimated at from 500 to 1,000 men.

I had proceeded thus far yesterday afternoon on my return to New York, and had taken my seat in the cars for Stonington, when an express from Governor King, who was at Newport, overtook me, to request that I would not leave the State; too late, however, for me then to stop here, as the cars were just moving off. On getting to Stonington I there found Governor King, who had crossed over from Newport to intercept me, and at his solicitation I at once returned with him last night in an extra car to this place. Not then having a moment's time to write you, as the steamboat left immediately on the arrival of the cars at Stonington, I sent my adjutant on in the boat with directions to report to you the fact and the cause of my return.

I had written thus far when the governor called on me, and has informed me that four citizens of this State, who had gone to Chepachet to ascertain the exact state of affairs there, were arrested as spies, bound, and sent last night to Woonsocket, where two hours ago they were still in confinement. Martial law has been declared in Chepachet and Woonsocket, and no one allowed to enter or depart without permission. I yesterday afternoc n wrcte to the Secretary of War (as I had been directed), in great haste, however, to send by the mail, to inform him of the sudden change in the aspect of affairs here; in which letter I stated that I should be at Governors Island this morning. As I, of course, then did not contemplate to the contrary, I beg you will do me the favor to acquaint him with the cause of my return.

I can only add that the citizens of this place are in a state of intense anxiety and excitement. I remain here to-day at the special request of several who have just left me. To-morrow I shall return to Newport to await any communication from you.

I am, sir, very respectfully, your obedient servant,

JAS. BANKHEAD, Colonel Second Regiment Artillery.

PROVIDENCE, R. I., June 27, 1842.

SIR:* As there was no mail yesterday from this, I could make no report to the Major-General Commanding of the military movements in this quarter up to that time. Since my last letter to you most of the volunteers and other military companies called out by the governor have assembled here to the amount of about 2,000 men. The force of the insurgents under the immediate direction of Mr. Dorr, and concentrated at Chepachet, is estimated at from 800 to 1,000 men armed with muskets, about 1,500 without arms, and 10 or 12 cannon mounted.

It seems to be impossible to avoid a conflict between the contending parties without the interposition of a strong regular force.

The State force here can defend this city, and it might successfully attack the insurgent force at Chepachet; but there would be danger in leaving the city without adequate means of protection to it, as there is doubtless a large number within the city with concealed arms ready to commence hostilities.

The position taken by Dorr's troops at Chepachet is naturally strong, and has been much strengthened by intrenchments, etc. It would therefore be highly imprudent to make the attack, even if no secret foes were left behind within the city, without a positive certainty of success; and with the aid of a few disciplined troops a defeat there would be ruinous and irreparable.

A force of 300 regular troops would insure success, and probably without bloodshed. I am, sir, very respectfully, your obedient servant,

> JAS. BANKHEAD, Colonel Second Regiment Artillery.

The PRESIDENT OF THE UNITED STATES.

SIR: The intelligence from Rhode Island since the call was made on you by the Senators from that State is of a character still more serious and urgent than that then communicated to you by Mr. Sprague, who was charged with communications to Your Excellency from Governor King. We are informed that a requisition was made upon the Government of the United States by the governor of Rhode Island, pursuant to resolutions passed by the general assembly of that State when in session in May last, calling for a proclamation against those engaged in an armed rebellion against the government of Rhode Island and for military aid in suppressing the same; that Your Excellency replied to Governor King that in the opinion of the

* Addressed to Brigadier-General R. Jones, Adjutant-General United States Army.

WASHINGTON, June 27, 1842.

Executive the force arrayed against the government of the State was not then such as to warrant immediate action on his part, but that Your Excellency in your reply proceeded to say: "If an exigency of lawless violence shall actually arise, the executive government of the United States, on the application of your excellency under the authority of the resolutions of the legislature already submitted, will stand ready to succor the authorities of the State in their efforts to maintain a due respect for the laws." Whereby it was understood that in the event of the assembling of such an armed force as would require the interference contemplated by the Constitution and laws of the United States the Executive of the United States, upon being duly notified of the fact by the governor of the State, would act upon the requisition already made by the legislature without further action on the part of that body.

We understand that upon this notice being given through the communications handed you by Mr. Sprague on Saturday, containing proof of the existence and array of a large body of armed men within the State of Rhode Island, who had already committed acts of lawless violence, both by depredating largely upon property in various parts of the State and by capturing and confining citizens, as well as owning and manifesting a determination to attack the constituted authorities, you considered that it was desirable that this communication should have been accompanied with a further resolution of the general assembly authorizing the governor to act in this instance, from the fact that the assembly was then in session by adjournment.

It is the purpose of this communication respectfully to state that we conceive the existing circumstances call for the immediate action of the Executive upon the information and papers now in its possession.

The meeting of the legislature during the last week was by adjournment. It is in law regarded as the May session of the general assembly, and can be regarded in no other light than if it had been a continuous session of that body held from day to day by usual adjournments. Had this last been the case, it can not be conceived that new action on its part would have been required to give notice of any movements of hostile forces engaged in the same enterprise which was made known to the Executive by its resolutions of May last.

Our intelligence authorizes us to believe that a multitude of lawless and violent men, not citizens of Rhode Island, but inhabitants of other States, wickedly induced by pay and by hopes of spoil, and perhaps instigated also by motives arising from exasperation on the part of their instigators and of themselves at the course heretefcre indicated in this matter by the executive government of the Union, have congregated themselves and are daily increasing their numbers within the borders of our State, organized, armed, and arrayed in open war upon the State authorities, and ready to be led, and avowedly about to be led, to the attack of the principal city of the State as part of the same original plan to overthrow the government, and that in the prosecution of this plan our citizens have reason to apprehend the most desperate and reckless assaults of ruflianly violence upon their property, their habitations, and their lives.

We beg leave to refer you, in addition, to a letter which we understand was received yesterday by General Scott from Colonel Bankhead, detailing some information in his possession.

We therefore respectfully request an immediate compliance on the part of the Executive with the requisition communicated in the papers from Governor King, as the most effectual, and, in our opinion, the only measure that can now prevent the effusion of blood and the calamities of intestine violence, if each has not already occurred.

We are, with the highest respect, Your Excellency's obedient servants,

JAMES F. SIMMONS. WM. SPRAGUE. JOSEPHI L. TILLINGHAST.

The SECRETARY OF WAR.

WASHINGTON, June 29, 1842.

SIR: From the official communication of Colonel Bankhead to you, this day laid before me, it is evident that the difficulties in Rhode Island have arrived at a crisis which may require a prompt interposition of the Executive of the United States to prevent the effusion of blood. From the correspondence already had with the governor of Rhode Island I have reason to expect that a requisition will be immediately made by the government of that State for the assistance guaranteed by the Constitution to protect its citizens from domestic violence. With a view to ascertain the true condition of things and to render the assistance of this Government (if any shall be required) as prompt as may be, you are instructed to proceed to Rhode Island, and, in the event of a requisition being made upon the President in conformity with the laws of the United States, you will cause the proclamation herewith delivered to be published. And should circumstances in your opinion render it necessary, you will also call upon the governors of Massachusetts and Connecticut, or either of them, for such number and description of the militia of their respective States as may be sufficient to terminate at once the insurrection in Rhode Island. And in the meantime the troops in the vicinity of Providence may with propriety be placed in such positions as will enable them to defend that city from assault.

JOHN TYLER.

BY THE PRESIDENT OF THE UNITED STATES OF AMERICA.

A PROCLAMATION.

Whereas the legislature of the State of Rhode Island has applied to the President of the United States setting forth the existence of a dangerous insurrection in that State, composed partly of deluded citizens of the State, but chiefly of intruders of dangerous and abandoned character coming from other States, and requiring the immediate interposition of the constitutional power vested in him to be exercised in such cases, I do issue this my proclamation, according to law, hereby commanding all insurgents and all persons connected with said insurrection to disperse and retire peaceably to their respective abodes within twenty-four hours from the time when this proclamation shall be made public in Rhode Island.

In testimony whereof I have caused the seal of the United States to be hereunto affixed, and signed the same with my hand.

Done at the city of Washington this ---- day of -----, A. D. 1842, and of the Independence of the United States the sixty-sixth. [1,. S.]

JOHN TYLER.

By the President:

DANL. WEBSTER, Secretary of State.

WASHINGTON, April 22, 1844.

To the Senate of the United States:

I transmit herewith, for your approval and ratification, a treaty which I have caused to be negotiated between the United States and Texas, whereby the latter, on the conditions therein set forth, has transferred and conveyed all its right of separate and independent sovereignty and jurisdiction to the United States. In taking so important a step I have been influenced by what appeared to me to be the most controlling considerations of public policy and the general good, and in having accomplished it, should it meet with your approval, the Government will have

succeeded in reclaiming a territory which formerly constituted a portion, as it is confidently believed, of its domain under the treaty of cession of 1803 by France to the United States.

The country thus proposed to be annexed has been settled principally by persons from the United States, who emigrated on the invitation of both Spain and Mexico, and who carried with them into the wilderness which they have partially reclaimed the laws, customs, and political and domestic institutions of their native land. They are deeply indoctrinated in all the principles of civil liberty, and will bring along with them in the act of reassociation devotion to our Union and a firm and inflexible resolution to assist in maintaining the public liberty unimpaired—a consideration which, as it appears to me, is to be regarded as of no small moment. The country itself thus obtained is of incalculable value in an agricultural and commercial point of view. To a soil of inexhaustible fertility it unites a genial and healthy climate, and is destined at a day not distant to make large contributions to the commerce of the world. Its territory is separated from the United States in part by an imaginary line, and by the river Sabine for a distance of 310 miles, and its productions are the same with those of many of the contiguous States of the Union. Such is the country, such are its inhabitants, and such its capacities to add to the general wealth of the Union. As to the latter, it may be safely asserted that in the magnitude of its productions it will equal in a short time, under the protecting care of this Government, if it does not surpass, the combined production of many of the States of the Confederacy. Α new and powerful impulse will thus be given to the navigating interest of the country, which will be chiefly engrossed by our fellow-citizens of the Eastern and Middle States, who have already attained a remarkable degree of prosperity by the partial monopoly they have enjoyed of the carrying trade of the Union, particularly the coastwise trade, which this new acquisition is destined in time, and that not distant, to swell to a magnitude which can not easily be computed, while the addition made to the boundaries of the home market thus secured to their mining, manufacturing, and mechanical skill and industry will be of a character the most commanding and important. Such are some of the many advantages which will accrue to the Eastern and Middle States by the ratification of the treaty-advantages the extent of which it is impossible to estimate with accuracy or properly to appreciate. Texas, being adapted to the culture of cotton, sugar, and rice, and devoting most of her energies to the raising of these productions, will open an extensive market to the Western States in the important articles of beef, pork, horses, mules, etc., as well as in breadstuffs. At the same time, the Southern and Southeastern States will find in the fact of annexation protection and security to their peace and tranquillity, as well against all domestic as foreign efforts to disturb them, thus consecrating anew the union of the States and holding out the promise of its perpetual duration.

Thus, at the same time that the tide of public prosperity is greatly swollen, an appeal of what appears to the Executive to be of an imposing, if not of a resistless, character is made to the interests of every portion of the Agriculture, which would have a new and extensive marcountry. ket opened for its produce; commerce, whose ships would be freighted with the rich productions of an extensive and fertile region; and the mechanical arts, in all their various ramifications, would seem to unite in one universal demand for the ratification of the treaty. But important as these considerations may appear, they are to be regarded as but secondary to others. Texas, for reasons deemed sufficient by herself. threw off her dependence on Mexico as far back as 1836, and consummated her independence by the battle of San Jacinto in the same year, since which period Mexico has attempted no serious invasion of her territory, but the contest has assumed features of a mere border war, characterized by acts revolting to humanity. In the year 1836 Texas adopted her constitution, under which she has existed as a sovereign power ever since, having been recognized as such by many of the principal powers of the world; and contemporaneously with its adoption, by a solemn vote of her people, embracing all her population but ninetythree persons, declared her anxious desire to be admitted into association with the United States as a portion of their territory. This vote, thus solemnly taken, has never been reversed, and now by the action of her constituted authorities, sustained as it is by popular sentiment, she reaffirms her desire for annexation. This course has been adopted by her without the employment of any sinister measures on the part of this Government. No intrigue has been set on foot to accomplish it. Texas herself wills it, and the Executive of the United States, concurring with her, has seen no sufficient reason to avoid the consummation of an act esteemed to be so desirable by both. It can not be denied that Texas is greatly depressed in her energies by her long-protracted war with Mexico. Under these circumstances it is but natural that she should seek for safety and repose under the protection of some stronger power, and it is equally so that her people should turn to the United States, the land of their birth, in the first instance in the pursuit of such protection. She has often before made known her wishes, but her advances have to this time been repelled. The 'xecutive of the United States sees no longer any cause for pursuing such a course. The hazard of now defeating her wishes may be of the most fatal tendency. It might lead, and most probably would, to such an entire alienation of sentiment and feeling as would inevitably induce her to look elsewhere for aid, and force her either to enter into dangerous alliances with other nations, who, looking with more wisdom to their own interests, would, it is fairly to be presumed, readily adopt such expedients; or she would hold out the proffer of discriminating duties in trade and commerce in order to secure the necessary assistance. Whatever step she might adopt looking to

2163 Messages and Papers of the Presidents

this object would prove disastrous in the highest degree to the interests of the whole Union. To say nothing of the impolicy of our permitting the carrying trade and home market of such a country to pass out of our hands into those of a commercial rival, the Government, in the first place, would be certain to suffer most disastrously in its revenue by the introduction of a system of smuggling upon an extensive scale, which an army of custom-house officers could not prevent, and which would operate to affect injuriously the interests of all the industrial classes of this country. Hence would arise constant collisions between the inhabitants of the two countries, which would evermore endanger their peace. A large increase of the military force of the United States would inevitably follow, thus devolving upon the people new and extraordinary burdens in order not only to protect them from the danger of daily collision with Texas herself, but to guard their border inhabitants against hostile inroads, so easily excited on the part of the numerous and warlike tribes of Indians dwelling in their neighborhood. Texas would undoubtedly be unable for many years to come, if at any time, to resist unaided and alone the military power of the United States; but it is not extravagant to suppose that nations reaping a rich harvest from her trade, secured to them by advantageous treaties, would be induced to take part with her in any conflict with us, from the strongest considerations of public policy. Such a state of things might subject to devastation the territory of contiguous States, and would cost the country in a single campaign more treasure, thrice told over, than is stipulated to be paid and reimbursed by the treaty now proposed for ratification. I will not permit myself to dwell on this view of the subject. Consequences of a fatal character to the peace of the Union, and even to the preservation of the Union itself, might be dwelt upon. They will not, however, fail to occur to the mind of the Senate and of the country. Nor do I indulge in any vague conjectures of the future. The documents now transmitted along with the treaty lead to the conclusion, as inevitable, that if the boon now tendered be rejected Texas will seek for the friendship of others. In contemplating such a contingency it can not be overlooked that the United States are already almost surrounded by the possessions of European powers. The Canadas, New Prunswick, and Nova Scotia, the islands in the American seas, with Texa. trammeled by treaties of alliance or of a commercial character differing in policy from that of the United States, would complete the circle. Texas voluntarily steps forth, upon terms of perfect honor and good faith to all nations, to ask to be annexed to the Union. As an independent sovereignty her right to do this is unquestionable. In doing so she gives no cause of umbrage to any other power; her people desire it, and there is no slavish transfer of her sovereignty and independence. She has for eight years maintained her independence against all efforts to subdue her. She has been recognized as independent by many of the most prominent of the family of nations, and that

recognition, so far as they are concerned, places her in a position, without giving any just cause of umbrage to them, to surrender her sovereignty at her own will and pleasure. The United States, actuated evermore by a spirit of justice, has desired by the stipulations of the treaty to render justice to all. They have made provision for the payment of the public debt of Texas. We look to her ample and fertile domain as the certain means of accomplishing this; but this is a matter between the United States and Texas, and with which other Governments have nothing to do. Our right to receive the rich grant tendered by Texas is perfect, and this Government should not, having due respect either to its own honor or its own interests, permit its course of policy to be interrupted by the interference of other powers, even if such interference were threatened. The question is one purely American. In the acquisition, while we abstain most carefully from all that could interrupt the public peace, we claim the right to exercise a due regard to our own. This Government can not consistently with its honor permit any such interference. With equal, if not greater, propriety might the United States demand of other governments to surrender their numerous and valuable acquisitions made in past time at numberless places on the surface of the globe, whereby they have added to their power and enlarged their resources.

To Mexico the Executive is disposed to pursue a course conciliatory in its character and at the same time to render her the most ample justice by conventions and stipulations not inconsistent with the rights and dignity of the Government. It is actuated by no spirit of unjust aggrandizement, but looks only to its own security. It has made known to Mexico at several periods its extreme anxiety to witness the termination of hostilities between that country and Texas. Its wishes, however have been entirely disregarded. It has ever been ready to urge an adjustment of the dispute upon terms mutually advantageous to both. It will be ready at all times to hear and discuss any claims Mexico may think she has on the justice of the United States and to adjust any that may be deemed to be so on the most liberal terms. There is no desire on the part of the Executive to wound her pride or affect injuriously her interest, but at the same time it can not compromit by any delay in its action the essential interests of the United States. Mexico has no right to ask or expect this of us; we deal rightfully with Texas as an independent power. The war which has been waged for eight years has resulted only in the conviction with all others than herself that Texas can not be reconquered. I can not but repeat the opinion expressed in my message at the opening of Congress that it is time it had ceased. The Executive, while it could not look upon its longer continuance without the greatest uncasiness, has, nevertheless, for all past time preserved a course of strict neutrality. It could not be ignorant of the fact of the exhaustion which a war of so long a duration had produced. Least of all

Messages and Papers of the Presidents

was it ignorant of the anxiety of other powers to induce Mexico to enter into terms of reconciliation with Texas, which, affecting the domestic institutions of Texas, would operate most injuriously upon the United States and might most seriously threaten the existence of this happy Union. Nor could it be unacquainted with the fact that although foreign governments might disavow all design to disturb the relations which exist under the Constitution between these States, yet that one, the most powerful amongst them, had not failed to declare its marked and decided hostility to the chief feature in those relations and its purpose on all suitable occasions to urge upon Mexico the adoption of such a course in negotiating with Texas as to produce the obliteration of that feature from her domestic policy as one of the conditions of her recognition by Mexico as an independent state. The Executive was also aware of the fact that formidable associations of persons, the subjects of foreign powers, existed, who were directing their utmost efforts to the accomplishment of this object. To these conclusions it was inevitably brought by the documents now submitted to the Senate. I repeat, the Executive saw Texas in a state of almost hopeless exhaustion, and the question was narrowed down to the simple proposition whether the United States should accept the boon of annexation upon fair and even liberal terms, or, by refusing to do so, force Texas to seek refuge in the arms of some other power, either through a treaty of alliance, offensive and defensive, or the adoption of some other expedient which might virtually make her tributary to such power and dependent upon it for all future time. The Executive has full reason to believe that such would have been the result without its interposition, and that such will be the result in the event either of unnecessary delay in the ratification or of the rejection of the proposed treaty.

In full view, then, of the highest public duty, and as a measure of security against evils incalculably great, the Executive has entered into the negotiation, the fruits of which are now submitted to the Senate. Independent of the urgent reasons which existed for the step it has taken, it might safely invoke the fact (which it confidently believes) that there exists no civilized government on earth having a voluntary tender made it of a domain so rich and fertile, so replete with all that can add to national greatness and wealth, and so necessary to its peace and safety that would reject the offer. Nor are other powers, Mexico inclusive, likely in any degree to be injuriously affected by the ratification of the treaty. The prosperity of Texas will be equally interesting to all; in the increase of the general commerce of the world that prosperity will be secured by annexation.

But one view of the subject remains to be presented. It grows out of the proposed enlargement of our territory. From this, I am free to confess, I see no danger. The federative system is susceptible of the greatest extension compatible with the ability of the representation of the most

distant State or Territory to reach the seat of Government in time to participate in the functions of legislation and to make known the wants of the constituent body. Our confederated Republic consisted originally of thirteen members. It now consists of twice that number, while applications are before Congress to permit other additions. This addition of new States has served to strengthen rather than to weaken the Union. New interests have sprung up, which require the united power of all, through the action of the common Government, to protect and defend upon the high seas and in foreign parts. Each State commits with perfect security to that common Government those great interests growing out of our relations with other nations of the world, and which equally involve the good of all the States. Its domestic concerns are left to its own exclusive management. But if there were any force in the objection it would seem to require an immediate abandonment of territoriai possessions which lie in the distance and stretch to a far-off sea, and yet no one would be found, it is believed, ready to recommend such an abandonment. Texas lies at our very doors and in our immediate vicinity.

Under every view which I have been able to take of the subject, I think that the interests of our common constituents, the people of all the States, and a love of the Union left the Executive no other alternative than to negotiate the treaty. The high and solemn duty of ratifying or rejecting it is wisely devolved on the Senate by the Constitution of the United States.

JOHN TYLER.

WASHINGTON, April 22, 1844.

To the Senate of the United States:

1 transmit herewith an additional article to the treaty of extradition lately concluded between the Governments of France and the United States, for your approval and ratification. The reason upon which it is founded is explained on the face of the article and in the letter from Mr. Pageot which accompanies this communication.

JOHN TYLER.

WASHINGTON, April 26, 1844.

To the Senate of the United States:

In compliance with the resolution of the Senate of the 22d instant, requesting the President to communicate to that body any communication, papers, or maps in possession of this Government specifying the southern, southwestern, and western boundaries of Texas, I transmit a map of Texas and the countries adjacent, compiled in the Bureau of Topographical Engineers, under the direction of Colonel J. J. Abert, by Lieutenant U. E. Emory, of that Corps, and also a memoir upon the subject by the same officer. JOHN TYLER. Messages and Papers of the Presidents

To the Senate of the United States:

In my annual message at the commencement of the present waston of Congress I informed the two Houses that instructions had been given by the Executive to the United States envoy at Berlin to negotiate a commercial treaty with the States composing the Germanic Customs Union for a reduction of the duties on tobacco and other agricultural productions of the United States, in exchange for concessions on our part in relation to certain articles of export the product of the skill and industry of those countries. I now transmit a treaty which proposes to carry into effect the views and intentions thus previously expressed and declared. accompanied by two dispatches from Mr. Wheaton, our minister at Ber-This is believed to be the first instance in which the attempt has lin. proved successful to obtain a reduction of the heavy and onerous duties to which American tobacco is subject in foreign markets, and, taken in connection with the greatly reduced duties on rice and lard and the free introduction of raw cotton, for which the treaty provides, I can not but anticipate from its ratification important benefits to the great agricultural, commercial, and navigating interests of the United States. The concessions on our part relate to articles which are believed not to enter injuriously into competition with the manufacturing interest of the United States, while a country of great extent and embracing a population of 28,000,000 human beings will more thoroughly than heretofore be thrown open to the commercial enterprise of our fellow-citizens.

Inasmuch as the provisions of the treaty come to some extent in conflict with existing laws, it is my intention, should it receive your approval and ratification, to communicate a copy of it to the House of Representatives, in order that that House may take such action upon it as it may deem necessary to give efficiency to its provisions.

APRIL 29, 1844.

JOHN TYLER.

To the Senate of the United States:

I herewith transmit to the Senate, with reference to my message of the 22d instant, the copy of a recent correspondence* between the Department of State and the minister of Her Britannic Majesty in this country.

JOHN TYLER.

WASHINGTON, April 29, 1844.

WASHINGTON, April 29, 1844.

To the Scnate of the United States:

I transmit to the Senate a report of the Secretary of War, prepared in compliance with the request contained in a resolution of the 10th instant.† JOHN TYLER.

*With reference to the annexation of Texas.

[†] Proceedings under as t of March 3, 1843, for the relief of the Stockbridge tribe of Indians in the Territory of Wisconsin,

WASHINGTON, May 1, 1844.

To the Senate of the United States:

I transmit herewith a dispatch from the British minister, addressed to the Secretary of State, bearing date the 30th April, in reply to the letter of the Secretary of State of the 27th April, which has already been communicated to the Senate, having relation to the Texas treaty.

JOHN TYLER.

2168

WASHINGTON, May 3, 1844.

In answer to the resolution of the Senate of the 29th ultimo, requesting a copy of additional papers upon the subject of the relations between the United States and the Republic of Texas, I transmit a report from the Secretary of State and the documents by which it was accompanied.

JOHN TYLER.

WASHINGTON, May 6, 1844.

I herewith transmit the accompanying correspondence, relating to the treaty recently concluded by the minister of the United States at Berlin with the States comprising the Zollverein. JOHN TYLER.

To the House of Representatives:

I transmit to the House of Representatives a report* of the Secretary of War, prepared as requested by the resolution of the House of the 18th of January last.

To the House of Representatives:

I transmit herewith a report and accompanying documents from the Secretary of War, containing all the information that can be now furnished by that Department, in answer to the resolution of the House of Representatives of the 18th of January, respecting the allowance of claims previously rejected. JOHN TYLER.

WASHINGTON, May 7, 1844.

To the Senate of the United States:

I transmit to the Senate, for its consideration with a view to ratification, a postal convention between the United States and the Republic of New Granada, signed in the city of Bogota on the 6th of March last.

* Transmitting lists of persons employed by the War Department since March 4, 1837, without express authority of law, etc.

To the Senate of the United States:

To the Senate of the United States:

JOHN TYLER.

WASHINGTON, May 6, 1844.

WASHINGTON, May 6, 1844.

Messages and Papers of the Presidents

In order that the Senate may better understand the objects of the convention and the motives which have made those objects desirable on the part of the United States, I also transmit a copy of a correspondence between the Department of State and the chairman of the Committee on Commerce in the Senate, and between the same Department and Mr. Blackford, the chargé d'affaires of the United States at Bogota, who concluded the convention on the part of this Government.

JOHN TYLER.

To the Senate of the United States:

I deem it proper to transmit the accompanying dispatch, recently received from the United States envoy at London, having reference to the treaty now before the Senate lately negotiated by Mr. Wheaton, our envoy at Berlin, with the Zollverein.

I will not withhold the expression of my full assent to the views expressed by Mr. Everett in his conference with Lord Aberdeen.

JOHN TYLER.

To the House of Representatives:

I communicate to Congress a letter from the Imaum of Muscat and a translation of it, together with sundry other papers, by which it will be perceived that His Highness has been pleased again to offer to the United States a present of Arabian horses. These animals will be in Washington in a short time, and will be disposed of in such manner as Congress may think proper to direct.

JOHN TYLER.

To the Senate of the United States:

I herewith communicate to the Senate, for its consideration, two conventions concluded by the minister of the United States at Berlin—the one with the Kingdom of Wurtemberg, dated on the 10th day of April, and the other with the Grand Duchy of Hesse, dated on the 26th day of March, 1844—for the mutual abolition of the *droit d'aubaine* and the *droit de detraction* between those Governments and the United States, and I communicate with the conventions copies of the correspondence necessary to explain the reasons for concluding them.

JOHN TYLER.

To the Senate of the United States:

In answer to the resolution of the Senate of the 13th instant, requesting to be informed "whether since the commencement of the negotiations

WASHINGTON, May 10, 1844.

WASHINGTON, May 10, 1844.

WASHINGTON, May 11, 1844.

WASHINGTON, May 15, 1844.

which resulted in the treaty now before the Senate for the annexation of Texas to the United States, any military preparation has been made or ordered by the President for or in anticipation of war, and, if so, for what cause, and with whom was such war apprehended, and what are the preparations that have been made or ordered; has any movement or assemblage or disposition of any of the military or naval forces of the United States been made or ordered with a view to such hostilities; and to communicate to the Senate copies of all orders or directions given for any such preparation or for any such movement or disposition or for the future conduct of such military or naval forces," I have to inform the Senate that, in consequence of the declaration of Mexico communicated to this Government and by me laid before Congress at the opening of its present session, announcing the determination of Mexico to regard as a declaration of war against her by the United States the definitive ratification of any treaty with Texas annexing the territory of that Republic to the United States, and the hope and belief entertained by the Executive that the treaty with Texas for that purpose would be speedily approved and ratified by the Senate, it was regarded by the Executive to have become emphatically its duty to concentrate in the Gulf of Mexico and its vicinity, as a precautionary measure, as large a portion of the home squadron, under the command of Captain Conner, as could well be drawn together, and at the same time to assemble at Fort Jesup, on the borders of Texas, as large a military force as the demands of the service at other encampments would authorize to be detached. For the number of ships already in the Gulf and the waters contiguous thereto and such as are placed under orders for that destination, and of troops now assembled upon the frontier, I refer you to the accompanying reports from the Secretaries of the War and Navy Departments. It will also be perceived by the Senate, by referring to the orders of the Navy Department which are herewith transmitted, that the naval officer in command of the fleet is directed to cause his ships to perform all the duties of a fleet of observation and to apprise the Executive of any indication of a hostile design upon Texas on the part of any nation pending the deliberations of the Senate upon the treaty, with a view that the same should promptly be submitted to Congress for its mature deliberation. At the same time, it is due to myself that I should declare it as my opinion that the United States having by the treaty of annexation acquired a title to Texas which requires only the action of the Senate to perfect it, no other power could be permitted to invade and by force of arms to possess itself of any portion of the territory of Texas pending your deliberations upon the treaty without placing itself in an hostile attitude to the United States and justifying the employment of any military means at our disposal to drive back the invasion. At the same time, it is my opinion that Mexico or any other power will find in your approval of the treaty no just cause of war against the United States, nor do I believe that there is any serious

Messages and Papers of the Presidents

hazard of war to be found in the fact of such approval. Nevertheless, every proper measure will be resorted to by the Executive to preserve upon an honorable and just basis the public peace by reconciling Mexico, through a liberal course of policy, to the treaty.

JOHN TYLER.

WASHINGTON, May 15, 1844.

To the Senate of the United States:

In answer to the resolution of the Senate of the 13th instant, requesting to be informed "whether a messenger has been sent to Mexico with a view to obtain her consent to the treaty with Texas, and, if so, to communicate to the Senate a copy of the dispatches of which he is bearer and a copy of the instructions given to said messenger; and also to inform the Senate within what time said messenger is expected to return," I have to say that no messenger has been sent to Mexico in order to obtain her assent to the treaty with Texas, it not being regarded by the Executive as in any degree requisite to obtain such consent in order (should the Senate ratify the treaty) to perfect the title of the United States to the territory thus acquired, the title to the same being full and perfect without the assent of any third power. The Executive has negotiated with Texas as an independent power of the world, long since recognized as such by the United States and other powers, and as subordinate in all her rights of full sovereignty to no other power. A messenger has been dispatched to our minister at Mexico as bearer of the dispatch already communicated to the Senate, and which is to be found in the letter addressed to Mr. Green, and forms a part of the documents ordered confidentially to be printed for the use of the Senate. That dispatch was dictated by a desire to preserve the peace of the two countries by denying to Mexico all pretext for assuming a belligerent attitude to the United States, as she had threatened to do, in the event of the annexation of Texas to the United States, by the dispatch of her Government which was communicated by me to Congress at the opening of its present session. The messenger is expected to return before the 15th of June next, but he may be detained to a later day. The recently appointed envoy from the United States to Mexico will be sent so soon as the final action is had on the question of annexation, at which time, and not before, can his instructions be understandingly prepared.

JOHN TYLER.

WASHINGTON, May 16, 1814.

To the Senate of the United States:

In my message communicating the treaty with Texas I expressed the opinion that if Texas was not now annexed it was probable that the opportunity of annexing it to the United States would be lost forever. Since then the subject has been much agitated, and if an opinion may be formed

of the chief ground of the opposition to the treaty, it is not that Texas ought not at some time or other to be annexed, but that the present is not the proper time. It becomes, therefore, important, in this view of the subject, and is alike due to the Senate and the country, that I should furnish any papers in my possession which may be calculated to impress the Senate with the correctness of the opinion thus expressed by me. With this view I herewith transmit a report from the Secretary of State, accompanied by various communications on the subject. These communications are from private sources, and it is to be remarked that a resort must in all such cases be had chiefly to private sources of information, since it is not to be expected that any government, more especially if situated as Texas is, would be inclined to develop to the world its ulterior line of policy.

Among the extracts is one from a letter from General Houston to General Andrew Jackson, to which I particularly invite your attention, and another from General Jackson to a gentleman of high respectability, now of this place. Considering that General Jackson was placed in a situation to hold the freest and fullest interview with Mr. Miller, the private and confidential secretary of President Houston, who, President Houston informed General Jackson, "knows all his actions and understands all his motives," and who was authorized to communicate to General Jackson the views of the policy entertained by the President of Texas, as well applicable to the present as the future; that the declaration made by General Jackson in his letter " that the present golden moment to obtain Texas must not be lost, or Texas might from necessity be thrown into the arms of England and be forever lost to the United States," was made with a full knowledge of all circumstances, and ought to be received as conclusive of what will be the course of Texas should the present treaty fail-from this high source, sustained, if it requires to be sustained, by the accompanying communications, I entertain not the least doubt that if annexation should now fail it will in all human probability fail forever. Indeed, I have strong reasons to believe that instructions have already been given by the Texan Government to propose to the Government of Great Britain, forthwith on the failure, to enter into a treaty of commerce and an alliance offensive and defensive.

JOHN TYLER.

WASHINGTON, May 17, 1844.

To the Senate of the United States:

In answer to the resolution of the Senate of the 13th instant, relating to a supposed armistice between the Republics of Mexico and Texas, I transmit a report from the Secretary of State and the papers by which it was accompanied.

JOHN TYLER.

To the Senate of the United States:

In answer to the resolution of the Senate of the 29th ultimo, upon the subject of unpublished correspondence in regard to the purchase of or title to Texas, I transmit a report from the Secretary of State and the documents by which it was accompanied. JOHN TYLER.

WASHINGTON, May 18, 1844.

WASHINGTON, May 18, 1844.

To the House of Representatives of the United States:

In answer to a resolution of the House of Representatives of the 3d of January last, requesting the President of the United States "to cause to be communicated to that House copies of all the instructions given to the commanding officers of the squadron stipulated by the treaty with Great Britzin of 9th of August, 1842, to be kept on the coast of Africa for the suppression of the slave trade," and also copies of the "instructions given by the British Government to their squadron stipulated by the same, if such instructions have been communicated to this Government," I have to inform the House of Representatives that in my opinion it would be incompatible with the public interests to communicate to that body at this time copies of the instructions referred to.

To the House of Representatives:

In compliance with a resolution of the House of Representatives of the 22d ultimo, I communicate a report * from the Secretary of State, which embraces the information called for by said resolution.

JOHN TYLER.

To the House of Representatives:

I herewith transmit a letter from the Secretary of the Navy, accompanied by a report from the Bureau of Construction and Equipment and a communication from Lieutenant Hunter, of the Navy, prepared at the request of the Secretary, upon the subject of a plan for the establishment in connection with the Government of France of a line of steamers between the ports of Havre and New York, with estimates of the expense which may be necessary to carry the said plan into effect.

JOHN TYLER.

WASHINGTON, May 23, 1844.

To the Senate of the United States:

Your resolution of the 18th instant, adopted in *executive* session, addressed to the Secretary of the Treasury *ad interim*, has been commu-

WASHINGTON, May 20, 1844.

JOHN TYLER.

^{*} Relating to indemnity from Denmark for three ships and their cargoes sent by Commodore John Paul Jones in 1770 as prizes into Bergen, and there surrendered by order of the Danish King to the British minister, in obedience to the demand of that minister.

nicated to me by that officer. While I can not recognize this call thus made on the head of a Department as consistent with the constitutional rights of the Senate when acting in its executive capacity, which in such case can only properly hold correspondence with the President of the United States, nevertheless, from an anxious desire to lay before the Senate all such information as may be necessary to enable it with full understanding to act upon any subject which may be before it, I herewith transmit communications* which have been made to me by the Secretaries of the War and Navy Departments, in full answer to the resolution of the Senate. JOHN TYLER.

WASHINGTON CITY, D. C., May 24, 1844.

To the House of Representatives of the United States:

I transmit herewith a report + from the Secretary of the Navy, in compliance with the resolution of the House of Representatives of the 18th of January last. JOHN TYLER.

WASHINGTON, May 31, 1844.

To the Senate of the United States:

In answer to the resolution of the Senate of the 22d instant, requesting information in regard to any promise by the President of military or other aid to Texas in the event of an agreement on the part of that Republic to annex herself to the United States, I transmit a report from the Secretary of State and the documents by which it was accompanied.

In my message to the Senate of the 15th of this month I adverted to the duty which, in my judgment, the signature of the treaty for the annexation of Texas had imposed upon me, to repel any invasion of that country by a foreign power while the treaty was under consideration by the Senate, and I transmitted reports from the Secretaries of War and of the Navy, with a copy of the orders which had been issued from those Departments for the purpose of enabling me to execute that duty. In those orders General Taylor was directed to communicate directly with the President of Texas upon the subject, and Captain Conner was instructed to communicate with the chargé d'affaires of the United States accredited to that Government. No copy of any communication which either of those officers may have made pursuant to those orders has yet been received at the Departments from which they emanated.

JOHN TYLER.

^{*}Relating to money drawn from the Treasury to carry into effect orders of the War and Navy Departments made since April 12, 1844, for stationing troops or increasing the military force upon the frontiers of Texas and the Gulf of Mexico and for placing a naval force in the Gulf of Mexico, etc.

[†] Transmitting list of persons employed by the Navy Department without express authority of law from March 4, 1837, to January 18, 1844, etc.

To the Senate of the United States:

I transmit herewith to the Senate a copy of a letter dated the 25th of August, 1829, addressed by Mr. Van Buren, Secretary of State, to Mr. Poinsett, envoy extraordinary and minister plenipotentiary of the United States to Mexico, which letter contains, it is presumed, the instructions a copy of which was requested by the resolution of the Senate of the 28th ultimo in executive session. JOHN TYLER.

WASHINGTON, June 3, 1844.

WASHINGTON, June 1, 1844.

To the Senate of the United States:

In answer to the resolution of the Senate of the 28th ultimo, upon the subject of a "private letter" quoted in the instruction from the late Mr. Upshur to the chargé d'affaires of the United States in Texas, dated the 8th of August last, I transmit a report from the Secretary of State, to whom the resolution was referred. JOHN TYLER.

WASHINGTON, June 4, 1844.

To the Senate of the United States:

In answer to the resolution of the Senate of yesterday in executive session, requesting a copy of a note supposed to have been addressed to the Secretary of State by the diplomatic agents of the Republic of Texas accredited to this Government, I transmit a report from the Secretary of State, to whom the resolution was referred. JOHN TYLER.

WASHINGTON, June 5, 1844.

To the Senate of the United States:

I herewith transmit to the Senate, with reference to previous Executive communications to that body relating to the same subject, the copy of a letter* recently received at the Department of State from the minister of the United States in London.

JOHN TYLER.

WASHINGTON, June 7, 1844.

To the House of Representatives of the United States:

I herewith transmit to the House of Representatives the copy of a letter recently addressed to the Secretary of State by the British minister at Washington, with the view of ascertaining "whether it would be agreeable to this Government that an arrangement should be concluded for the transmission through the United States of the mails to and from

* Relating to the treaty of annexation with Texas.

2175

.

JOHN LYLER.

Canada and England, which are now landed at Halifax and thence forwarded through the British dominions to their destination."

It will be perceived that this communication has been referred to the Postmaster-General, and his opinion respecting the proposition will accordingly be found in his letter to the Department of State of the 5th instant, a copy of which is inclosed. I lose no time in recommending the subject to the favorable consideration of the House and in bespeaking for it early attention. JOHN TYLER.

•

To the House of Representatives:

In compliance with a resolution of the House of Representatives of the 29th of April last, I communicate to that body a report* from the Secretary of State, which embraces the information called for by that resolution. JOHN TYLER.

WASHINGTON, June 10, 1844.

WASHINGTON, June 8, 1844.

To the House of Representatives of the United States:

The treaty negotiated by the Executive with the Republic of Texas, without a departure from any form of proceeding customarily observed in the negotiations of treaties for the annexation of that Republic to the United States, having been rejected by the Senate, and the subject having excited on the part of the people no ordinary degree of interest, I feel it to be my duty to communicate, for your consideration, the rejected treaty, together with all the correspondence and documents which have heretofore been submitted to the Senate in its executive sessions. The papers communicated embrace not only the series already made public by orders of the Senate, but others from which the veil of secrecy has not been removed by that body, but which I deem to be essential to a just appreciation of the entire question. While the treaty was pending before the Senate I did not consider it compatible with the just rights of that body or consistent with the respect entertained for it to bring this important subject before you. The power of Congress is, however, fully competent in some other form of proceeding to accomplish everything that a formal ratification of the treaty could have accomplished, and I therefore feel that I should but imperfectly discharge my duty to yourselves or the country if I failed to lay before you everything in the possession of the Executive which would enable you to act with full light on the subject if you should deem it proper to take any action upon it.

I regard the question involved in these proceedings as one of vast magnitude and as addressing itself to interests of an elevated and enduring character. A Republic coterminous in territory with our own, of

^{*}Transmitting correspondence from 1810 to 1815, inclusive, between United States ministers to Spain and the Department of State, between those ministers and Spanish secretaries of state, and between the Department of State and the Spanish ministers accredited to the United States.

Messages and Papers of the Presidents

immense resources, which require only to be brought under the influence of our confederate and free system in order to be fully developed, promising at no distant day, through the fertility of its soil, nearly, if not entirely, to duplicate the exports of the country, thereby making an addition to the carrying trade to an amount almost incalculable and giving a new impulse of immense importance to the commercial, manufacturing, agricultural, and shipping interests of the Union, and at the same time affording protection to an exposed frontier and placing the whole country in a condition of security and repose; a territory settled mostly by emigrants from the United States, who would bring back with them in the act of reassociation an unconquerable love of freedom and an ardent attachment to our free institutions-such a question could not fail to interest most deeply in its success those who under the Constitution have become responsible for the faithful administration of public affairs. I have regarded it as not a little fortunate that the question involved was no way sectional or local, but addressed itself to the interests of every part of the country and made its appeal to the glory of the American name.

It is due to the occasion to say that I have carefully reconsidered the objections which have been urged to immediate action upon the subject without in any degree having been struck by their force. It has been objected that the measure of annexation should be preceded by the consent of Mexico. To preserve the most friendly relations with Mexico; to concede to her, not grudgingly, but freely, all her rights; to negotiate fairly and frankly with her as to the question of boundary; to render her, in a word, the fullest and most ample recompense for any loss she might convince us she had sustained, fully accords with the feelings and views the Executive has always entertained.

But negotiation in advance of annexation would prove not only abortive, but might be regarded as offensive to Mexico and insulting to Texas. Mexico would not, I am persuaded, give ear for a moment to an attempt at negotiation in advance except for the whole territory of Texas. While all the world beside regards Texas as an independent power, Mexico chooses to look upon her as a revolted province. Nor could we negotiate with Mexico for Texas without admitting that our recognition of her independence was fraudulent, delusive, or void. It is only after acquiring Texas that the question of boundary can arise between the United States and Mexico-a question purposely left open for negotiation with Mexico as affording the best opportunity for the most friendly and pacific arrangements. The Executive has dealt with Texas as a power independent of all others, both de facto and de jure. She was an independent State of the Confederation of Mexican Republics. When by violent revolution Mexico declared the Confederation at an end, Texas owed her no longer allegiance, but claimed and has maintained the right for eight years to a separate and distinct position. During

that period no army has invaded her with a view to her reconquest; and if she has not yet established her right to be treated as a nation independent *de facto* and *de jure*, it would be difficult to say at what period she will attain to that condition.

Nor can we by any fair or any legitimate inference be accused of violating any treaty stipulations with Mexico. The treaties with Mexico give no guaranty of any sort and are coexistent with a similar treaty with Texas. So have we treaties with most of the nations of the earth which are equally as much violated by the annexation of Texas to the United States as would be our treaty with Mexico. The treaty is merely commercial and intended as the instrument for more accurately defining the rights and securing the interests of the citizens of each country. What bad faith can be implied or charged upon the Government of the United States for successfully negotiating with an independent power upon any subject not violating the stipulations of such treaty I confess my inability to discern.

The objections which have been taken to the enlargement of our territory were urged with much zeal against the acquisition of Louisiana, and yet the futility of such has long since been fully demonstrated. Since that period a new power has been introduced into the affairs of the world, which has for all practical purposes brought Texas much nearer to the seat of Government than Louisiana was at the time of its annexation. Distant regions are by the application of the steam engine brought within a close proximity.

With the views which I entertain on the subject, I should prove faithless to the high trust which the Constitution has devolved upon me if I neglected to invite the attention of the representatives of the people to it at the earliest moment that a due respect for the Senate would allow me so to do. I should find in the urgency of the matter a sufficient apology, if one was wanting, since annexation is to encounter a great, if not certain, hazard of final defeat if something be not now done to prevent it. Upon this point I can not too impressively invite your attention to my message of the 16th of May and to the documents which accompany it, which have not heretofore been made public. If it be objected that the names of the writers of some of the private letters are withheld, all that I can say is that it is done for reasons regarded as altogether adequate, and that the writers are persons of the first respectability and citizeus of Texas, and have such means of obtaining information as to entitle their statements to full credit. Nor has anything occurred to weaken, but, on the contrary, much to confirm, my confidence in the statements of General Jackson, and my own statement, made at the close of that message, in the belief, amounting almost to certainty, "that instructions have already been given by the Texan Government to propose to the Government of Great Britain, forthwith on the failure [of the treaty], to enter into a treaty of commerce and an alliance offensive and defensive."

I also particularly invite your attention to the letter from Mr. Everett, our envoy at London, containing an account of a conversation in the House of Lords which lately occurred between Lord Brougham and Lord Aberdeen in relation to the question of annexation. Nor can I do so without the expression of some surprise at the language of the minister of foreign affairs employed upon the occasion. That a Kingdom which is made what it now is by repeated acts of annexation-beginning with the time of the heptarchy and concluding with the annexation of the Kingdoms of Ireland and Scotland-should perceive any principle either novel or serious in the late proceedings of the American Executive in regard to Texas is well calculated to excite surprise. If it be pretended that because of commercial or political relations which may exist between the two countries neither has a right to part with its sovereignty, and that no third power can change those relations by a voluntary treaty of union or annexation, then it would seem to follow that an annexation to be achieved by force of arms in the prosecution of a just and necessary war could in no way be justified; and yet it is presumed that Great Britain would be the last nation in the world to maintain any such doctrine. The commercial and political relations of many of the countries of Europe have undergone repeated changes by voluntary treaties, by conquest, and by partitions of their territories without any question as to the right under the public law. The question, in this view of it, can be considered as neither "serious" nor "novel." I will not permit myself to believe that the British minister designed to bring himself to any such conclusion, but it is impossible for us to be blind to the fact that the statements contained in Mr. Everett's dispatch are well worthy of serious consideration. The Government and people of the United States have never evinced nor do they feel any desire to interfere in public questions not affecting the relations existing between the States of the American continent. We leave the European powers exclusive control over matters affecting their continent and the relations of their different States; the United States claim a similar exemption from any such interference on their part. The treaty with Texas was negotiated from considerations of high public policy, influencing the conduct of the two Republics. We have treated with Texas as an independent power solely with a view of bettering the condition of the two countries. If annexation in any form occur, it will arise from the free and unfettered action of the people of the two countries; and it seems altogether becoming in me to say that the honor of the country, the dignity of the American name, and the permanent interests of the United States would forbid acquiescence in any such interference. No one can more highly appreciate the value of peace to both Great Britain and the United States and the capacity of each to do injury to the other than myself, but peace can best be preserved by maintaining firmly the rights which belong to us as an independent community.

So much have I considered it proper for me to say; and it becomes me only to add that while I have regarded the annexation to be accomplished by treaty as the most suitable form in which it could be effected, should Congress deem it proper to resort to any other expedient compatible with the Constitution and likely to accomplish the object I stand prepared to yield my most prompt and active cooperation.

The great question is not as to the manner in which it shall be done, but whether it shall be accomplished or not.

The responsibility of deciding this question is now devolved upon you.

JOHN TYLER.

WASHINGTON, June 10, 1844.

To the Senate of the United States:

In answer to the resolution of the Senate of the 7th instant, upon the subject of the supposed employment of Mr. Duff Green in Europe by the Executive of the United States, I transmit a report from the Secretary of State, to whom the resolution was referred

JOHN TYLER.

WASHINGTON, June 12, 1844.

To the Senate of the United States:

In compliance with the resolution of the Senate of the 4th instant, calling for a correspondence* between the late minister of the United States in Mexico and the minister for foreign affairs of that Republic, I transmit a report from the Secretary of State and the documents by which it was accompanied.

JOHN TYLER.

To the Senate of the United States:

The resolution of the Senate of the 3d instant, requesting the President to lay before that body, confidentially, "a copy of any instructions which may have been given by the Executive to the American minister in England on the subject of the title to and occupation of the Territory of Oregon since the 4th of March, 1841; also a copy of any correspondence which may have passed between this Government and that of Great Britain in relation to the subject since that time," has been received.

In reply I have to state that in the present state of the subject-matter to which the resolution refers it is deemed inexpedient to communicate the information requested by the Senate. JOHN TYLER.

*On the subject of an order issued by the Mexican Government expelling all natives of the United States from Upper California and other departments of the Mexican Republic, and of the order prohibiting foreigners the privilege of the retail trade in Mexico.

WASHINGTON, June, 1844.

WASHINGTON, June 15, 1844.

To the House of Representatives of the United States:

I herewith transmit to the House of Representatives, in answer to their resolution of the 4th instant, a report from the Secretary of State, with the correspondence * therein referred to. JOHN TYLER.

The PRESIDENT OF THE SENATE:

I transmit herewith a report from the Secretary of State, in answer to a resolution of the 12th instant. Although the contingent fund for foreign intercourse has for all time been placed at the disposal of the President, to be expended for the purposes contemplated by the fund without any requisition upon him for a disclosure of the names of persons employed by him, the objects of their employment, or the amount paid to any particular person, and although any such disclosures might in many cases disappoint the objects contemplated by the appropriation of that fund, yet in this particular instance I feel no desire to withhold the fact that Mr. Duff Green was employed by the Executive to collect such information, from private or other sources, as was deemed important to assist the Executive in undertaking a negotiation then contemplated, but afterwards abandoned, upon an important subject, and that there was paid to him through the hands of the Secretary of State \$1,000, in full for all such service. It is proper to say that Mr. Green afterwards presented a claim for an additional allowance, which has been neither allowed nor recognized as correct. JOHN TYLER.

To the Senate:

WASHINGTON, June 17, 1844.

I have learned that the Senate has laid on the table the nomination, heretofore made, of Reuben H. Walworth to be an associate justice of the Supreme Court, in the place of Smith Thompson, deceased. I am informed that a large amount of business has accumulated in the second district, and that the immediate appointment of a judge for that circuit is essential to the administration of justice. Under these circumstances I feel it my duty to withdraw the name of Mr. Walworth, whose appointment the Senate by their action seems not now prepared to confirm, in the hope that another name may be more acceptable.

The circumstances under which the Senate heretofore declined to advise and consent to the nomination of John C. Spencer have so far changed as to justify me in my again submitting his name to their consideration.

I therefore nominate John C. Spencer, of New York, to be appointed an associate justice of the Supreme Court, in the place of Smith Thompson deceased.

JOHN TYLER.

WASHINGTON, June 17, 1844.

^{*}With Great Britain relative to the duties exacted by that Government on rough rice exported from the United States, contrary to the treaty of 1815.

VETO MESSAGES.*

WASHINGTON, December 18, 1843.

To the House of Representatives:

I received within a few hours of the adjournment of the last Congress a resolution "directing payment of the certificates or awards issued by the commissioners under the treaty with the Cherokee Indians." Its provisions involved principles of great importance, in reference to which it required more time to obtain the necessary information than was allowed.

The balance of the fund provided by Congress for satisfying claims under the seventeenth article of the Cherokee treaty, referred to in the resolution, is wholly insufficient to meet the claims still pending. To direct the payment, therefore, of the whole amount of those claims which happened to be first adjudicated would prevent a ratable distribution of the fund among those equally entitled to its benefits. Such a violation of the individual rights of the claimants would impose upon the Government the obligation of making further appropriations to indemnify them, and thus Congress would be obliged to enlarge a provision, liberal and equitable, which it had made for the satisfaction of all the demands of the Cherokees. I was unwilling to sanction a measure which would thus indirectly overturn the adjustment of our differences with the Cherokees, accomplished with so much difficulty, and to which time is reconciling those Indians.

If no such indemnity should be provided, then a palpable and very gross wrong would be inflicted upon the claimants who had not been so fortunate as to have their claims taken up in preference to others. Besides, the fund having been appropriated by law to a specific purpose, in fulfillment of the treaty, it belongs to the Cherokees, and the authority of this Government to direct its application to particular claims is more than questionable.

The direction in the joint resolution, therefore, to pay the awards of the commissioners to the amount of \$100,000 seemed to me quite objectionable, and could not be approved.

The further direction that the certificates required to be issued by the treaty, and in conformity with the practice of the board heretofore, shall be proper and sufficient vouchers, upon which payments shall be made at the Treasury, is a departure from the system established soon after the adoption of the Constitution and maintained ever since. That system requires that payments under the authority of any Department shall be made upon its requisition, countersigned by the proper Auditor and Comptroller. The greatest irregularity would ensue from the mode of payment prescribed by the resolution.

I have deemed it respectful and proper to lay before the House of Representatives these reasons for having withheld my approval of the above-mentioned joint resolution. JOHN TYLER.

WASHINGTON, June 11, 1844.

To the House of Representatives of the United States:

I return to the House of Representatives, in which it originated, the bill entitled "An act making appropriations for the improvement of certain harbors and rivers," with the following objections to its becoming a law:

At the adoption of the Constitution each State was possessed of a separate and independent sovereignty and an exclusive jurisdiction over all streams and water courses within its territorial limits. The Articles of Confederation in no way affected this authority or jurisdiction, and the present Constitution, adopted for the purpose of correcting the defects which existed in the original Articles, expressly reserves to the States all powers not delegated. No such surrender of jurisdiction is made by the States to this Government by any express grant, and if it is possessed it is to be deduced from the clause in the Constitution which invests Congress with authority "to make all laws which are necessary and proper for carrying into execution" the granted powers. There is, in my view of the subject, no pretense whatever for the claim to power which the bill now returned substantially sets up. The inferential power, in order to be legitimate, must be clearly and plainly incidental to some granted power and necessary to its exercise. To refer it to the head of convenience or usefulness would be to throw open the door to a boundless and unlimited discretion and to invest Congress with an unrestrained authority. The power to remove obstructions from the water courses of the States is claimed under the granted power "to regulate commerce with foreign nations, among the several States, and with the Indian tribes;" but the plain and obvious meaning of this grant is that Congress may adopt rules and regulations prescribing the terms and conditions on which the citizens of the United States may carry on commercial operations with foreign states or kingdoms, and on which the citizens or subjects of foreign states or kingdoms may prosecute trade with the United States or And so the power to regulate commerce among the either of them. several States no more invests Congress with jurisdiction over the water courses of the States than the first branch of the grant does over the water courses of foreign powers, which would be an absurdity.

The right of common use of the people of the United States to the navigable waters of each and every State arises from the express stipulation contained in the Constitution that "the citizens of each State shall be entitled to all privileges and immunities of citizens in the several States." While, therefore, the navigation of any river in any State is by the laws of such State allowed to the citizens thereof, the same is also secured by the Constitution of the United States on the same terms and conditions to the citizens of every other State; and so of any other privilege or immunity.

The application of the revenue of this Government, if the power to do so was admitted, to improving the navigation of the rivers by removing obstructions or otherwise would be for the most part productive only of local benefit. The consequences might prove disastrously ruinous to as many of our fellow-citizens as the exercise of such power would benefit. I will take one instance furnished by the present bill-out of no invidious feeling, for such it would be impossible for me to feel, but because of my greater familiarity with locations-in illustration of the above opinion: Twenty thousand dollars are proposed to be appropriated toward improving the harbor of Richmond, in the State of Virginia. Such improvement would furnish advantages to the city of Richmond and add to the value of the property of its citizens, while it might have a most disastrous influence over the wealth and prosperity of Petersburg, which is situated some 25 miles distant on a branch of James River, and which now enjoys its fair portion of the trade. So, too, the improvement of James River to Richmond and of the Appomattox to Petersburg might, by inviting the trade to those two towns, have the effect of prostrating the town of Norfolk. This, too, might be accomplished without adding a single vessel to the number now engaged in the trade of the Chesapeake Bay or bringing into the Treasury a dollar of additional revenue. It would produce, most probably, the single effect of concentrating the commerce now profitably enjoyed by three places upon one of them. This case furnishes an apt illustration of the effect of this bill in several other particulars.

There can not, in fact, be drawn the slightest discrimination between the improving the streams of a State under the power to regulate commerce and the most extended system of internal improvements on land. The excavating a canal and paving a road are equally as much incidents to such claim of power as the removing obstructions from water courses; nor can such power be restricted by any fair course of reasoning to the mere fact of making the improvement. It reasonably extends also to the right of seeking a return of the means expended through the exaction of tolls and the levying of contributions. Thus, while the Constitution denies to this Government the privilege of acquiring a property in the soil of any State, even for the purpose of erecting a necessary fortification, without a grant from such State, this claim to power would invest it with control and dominion over the waters and soil of each State without restriction. Power so incongruous can not exist in the same instrument

The bill is also liable to a serious objection because of its blending appropriations for numerous objects but few of which agree in their general features. This necessarily produces the effect of embarrassing Executive action. Some of the appropriations would receive my sanction if separated from the rest, however much I might deplore the reproduction of a system which for some time past has been permitted to sleep with apparently the acquiescence of the country. I might particularize the Delaware Breakwater as an improvement which looks to the security from the storms of our extended Atlantic seaboard of the vessels of all the country engaged either in the foreign or the coastwise trade, as well as to the safety of the revenue; but when, in connection with that, the same bill embraces improvements of rivers at points far in the interior, connected alone with the trade of such river and the exertion of mere local influences, no alternative is left me but to use the qualified veto with which the Executive is invested by the Constitution, and to return the bill to the House in which it originated for its ultimate reconsideration and decision.

In sanctioning a bill of the same title with that returned, for the improvement of the Mississippi and its chief tributaries and certain harbors on the Lakes, if I bring myself apparently in conflict with any of the principles herein asserted it will arise on my part exclusively from the want of a just appreciation of localities. The Mississippi occupies a footing altogether different from the rivers and water courses of the different States. No one State or any number of States can exercise any other jurisdiction over it than for the punishment of crimes and the service of civil process. It belongs to no particular State or States, but of common right, by express reservation, to all the States. It is reserved as a great common highway for the commerce of the whole country. To have conceded to Louisiana, or to any other State admitted as a new State into the Union, the exclusive jurisdiction, and consequently the right to make improvements and to levy tolls on the segments of the river embraced within its territorial limits, would have been to have disappointed the chief object in the purchase of Louisiana, which was to secure the free use of the Mississippi to all the people of the United States. Whether levies on commerce were made by a foreign or domestic government would have been equally burdensome and objectionable. The United States, therefore, is charged with its improvement for the benefit of all, and the appropriation of governmental means to its improvement becomes indispensably necessary for the good of all.

As to the harbors on the Lakes, the act originates no new improvements, but makes appropriations for the continuance of works already begun.

It is as much the duty of the Government to construct good harbors, without reference to the location or interests of cities, for the shelter of the extensive commerce of the Lakes as to build breakwaters on the Atlantic coast for the protection of the trade of that ocean. These great inland seas are visited by destructive storms, and the annual loss of ships and cargoes, and consequently of revenue to the Government, is immense. If, then, there be any work embraced by that act which is not required in order to afford shelter and security to the shipping against the tempests which so often sweep over those great inland seas, but has, on the contrary, originated more in a spirit of speculation and local interest than in one of the character alluded to, the House of

INTERNAL IMPROVEMENTS-BRIDGES

The question of appropriating money out of the Federal Treasury to be used in improving roads, building bridges, digging canals and deepening streams in the States is no longer a political issue. The article "Internal Improvements" in the Encyclopedic Index, relates how prominent an issue it used to be in the days before the Civil War. In our day the annual Rivers and Harbors Bill covering the matter is voted through with little or no discussion. Under the authority of Congress some notable works of public improvement have been performed by the engineers of the army in recent years. These tasks include the irrigation and reclamation projects in the West, the constant curbing of the unruly Mississippi, the construction of breakwaters in harbors of both the Atlantic and Pacific seaboards, and numerous enterprises on the Great Lakes. Although the sphere in which the Federal Government can operate is so well defined as to remove the question from politics, the country is profoundly interested in these benevolent activities, which promote commerce, agriculture and industry in all their branches. The evolution of the policy is revealed in the President's state papers on the pages mentioned by the index. The Annual Rivers and Harbors Bill is so notorious an example of log-rolling that it is called "the pork barrel," referring, of course, to the fact that it is passed at the last moment and that members who have faithfully obeyed their party managers, receive enough "pork" for their constituencies to grease their way to re-election, while mutineers are correspondingly punished. References to pages 7869 and 7897 will show the reader that President Taft thinks of "pork barrel" legislation.

Representatives will regard my approval of the bill more as the result of misinformation than any design to abandon or modify the principles laid down in this message. Every system is liable to run into abuse, and none more so than that under consideration; and measures can not be too soon taken by Congress to guard against this evil.

JOHN TYLER.

EXECUTIVE ORDERS.

CIRCULAR.*

DEPARTMENT OF STATE,

Washington, February 29, 1844.

SIR: It has become my most painful duty to announce to you the sudden and violent death of the Hon. Abel P. Upshur, late Secretary of State of the United States. This afflicting dispensation occurred on the afternoon of yesterday, from the bursting of one of the great guns on board the Government steamship *Princeton*, near Alexandria, on her return from an excursion of pleasure down the river Potomac. By this most unfortunate accident several of our distinguished citizens, amongst whom were the Secretaries of State and of the Navy, were immediately killed, and many other persons mortally wounded or severely injured. It is the wish of the President that the diplomatic and consular agents of the United States, and all other officers connected with the State Department, either at home or abroad, shall wear the usual badge of mourning, in token of their grief and of respect for the memory of Mr. Upshur, during thirty days from the time of receiving this order.

In consequence of this event, the President has been pleased to charge me *ad interim* with the direction of the Department of State, and I have accordingly this day entered upon the duties of this appointment.

I have the honor to be, with great respect, sir, your obedient servant,

JNO. NELSON.

GENERAL ORDERS.

WAR DEPARTMENT, February 29, 1844.

In the deepest grief the President of the United States has instructed the undersigned to announce to the Army that from the accidental explosion of a gun yesterday on board the United States steamship *Princeton* the country and its Government lost at the same moment the Secretary of State, the Hon. A. P. Upshur, and the Secretary of the Navy, the Hon. T. W. Gilmer.

Called but a few days since to preside over the administration of the War Department, it is peculiarly painful to the undersigned that his first official communication to the Army should be the announcement of a

^{*}Sent to all diplomatic and consular officers of the United States.

calamity depriving the country of the public services of two of our most accomplished statesmen and popular and deeply esteemed fellow-citizens. Their virtues, talents, and patriotic services will ever be retained in the grateful recollection of their countrymen and perpetuated upon the pages of the history of our common country.

Deep as may be the gloom which spreads over the community, it has pleased the Almighty Disposer of Events to add another shade to it by blending in this melancholy catastrophe the deaths of an eminent citizen, Virgil Maxcy, esq., lately chargé d'affaires to Belgium; a gallant and meritorious officer of the Navy, a chief of a bureau, Captain B. Kennon, and a private citizen of New York of high and estimable character, besides others, citizens and sailors, cither killed or wounded.

As appropriate honors to the memory of these distinguished Secretaries, half-hour guns will be fired at every military post furnished with the proper ordnance the day after the receipt of this order from sunrise to sunset. The national flag will be displayed at half-staff during the same time. And all officers of the Army will wear for three months the customary badge of mourning.

WM. WILKINS, Secretary of War.

GENERAL ORDER.

NAVY DEPARTMENT, February 29, 1844.

As a mark of respect to the memory of the late Hon. Thomas W. Gilmer, Secretary of the Navy, whose career at his entrance upon the duties of his office, would have been nobly maintained by that ability and vigor of which his whole previous life had been the guaranty, the flags of all vessels in commission, navy-yards, and stations are to be hoisted at half-mast on the day after the receipt of this order, minute guns to the number of seventeen are to be fired between sunrise and sunset, and crape is to be worn on the left arm and upon the sword for the space of three months.

By command of the President:

L. WARRINGTON, Secretary of the Navy ad interim.

FOURT'H ANNUAL MESSAGE.

WASHINGTON, December 3, 1844.

To the Senate and House of Representatives of the United States:

We have continued cause for expressing our gratitude to the Supreme Ruler of the Universe for the benefits and blessings which our country, under His kind providence, has enjoyed during the past year. Notwithstanding the exciting scenes through which we have passed, nothing

has occurred to disturb the general peace or to derange the harmony of our political system. The great moral spectacle has been exhibited of a nation approximating in number to 20,000,000 people having performed the high and important function of electing their Chief Magistrate for the term of four years without the commission of any acts of violence or the manifestation of a spirit of insubordination to the laws. The great and inestimable right of suffrage has been exercised by all who were invested with it under the laws of the different States in a spirit dictated alone by a desire, in the selection of the agent, to advance the interests of the country and to place beyond jeopardy the institutions under which it is our happiness to live. That the deepest interest has been manifested by all our countrymen in the result of the election is not less true than highly creditable to them. Vast multitudes have assembled from time to time at various places for the purpose of canvassing the merits and pretensions of those who were presented for their suffrages, but no armed soldiery has been necessary to restrain within proper limits the popular zeal or to prevent violent outbreaks. A principle much more controlling was found in the love of order and obedience to the laws, which, with mere individual exceptions, everywhere possesses the American mind, and controls with an influence far more powerful than hosts of armed men. We can not dwell upon this picture without recognizing in it that deep and devoted attachment on the part of the people to the institutions under which we live which proclaims their perpetuity. The great objection which has always prevailed against the election by the people of their chief executive officer has been the apprehension of tumults and disorders which might involve in ruin the entire Government. A security against this is found not only in the fact before alluded to, but in the additional fact that we live under a Confederacy embracing already twenty-six States, no one of which has power to control the election. The popular vote in each State is taken at the time appointed by the laws, and such vote is announced by the electoral college without reference to the decision of other States. The right of suffrage and the mode of conducting the election are regulated by the laws of each State, and the election is distinctly federative in all its prominent features. Thus it is that, unlike what might be the results under a consolidated system, riotous proceedings, should they prevail, could only affect the elections in single States without disturbing to any dangerous extent the tranquillity of others. The great experiment of a political confederation each member of which is supreme as to all matters appertaining to its local interests and its internal peace and happiness, while by a voluntary compact with others it confides to the united power of all the protection of its citizens in matters not domestic has been so far crowned with complete success. The world has witnessed its rapid growth in wealth and population, and under the guide and direction of a superin tending Providence the developments of the past may be regarded but 71

as the shadowing forth of the mighty future. In the bright prospects of that future we shall find, as patriots and philanthropists, the highest inducements to cultivate and cherish a love of union and to frown down every measure or effort which may be made to alienate the States or the people of the States in sentiment and feeling from each other. A rigid and close adherence to the terms of our political compact and, above all, a sacred observance of the guaranties of the Constitution will preserve union on a foundation which can not be shaken, while personal liberty is placed beyond hazard or jeopardy. The guaranty of religious freedom, of the freedom of the press, of the liberty of speech, of the trial by jury, of the habeas corpus, and of the domestic institutions of each of the States, leaving the private citizen in the full exercise of the high and ennobling attributes of his nature and to each State the privilege (which can only be judiciously exerted by itself) of consulting the means best calculated to advance its own happiness-these are the great and important guaranties of the Constitution which the lovers of liberty must cherish and the advocates of union must ever cultivate. Preserving these and avoiding all interpolations by forced construction under the guise of an imagined expediency upon the Constitution, the influence of our political system is destined to be as actively and as beneficially felt on the distant shores of the Pacific as it is now on those of the Atlantic Ocean. The only formidable impediments in the way of its successful expansion (time and space) are so far in the progress of modification by the improvements of the age as to render no longer speculative the ability of representatives from that remote region to come up to the Capitol, so that their constituents shall participate in all the benefits of Federal legislation. Thus it is that in the progress of time the inestimable principles of civil liberty will be enjoyed by millions yet unborn and the great benefits of our system of government be extended to now distant and uninhabited regions. In view of the vast wilderness yet to be reclaimed, we may well invite the lover of freedom of every land to take up his abode among us and assist us in the great work of advancing the standard of civilization and giving a wider spread to the arts and refinements of cultivated life. Our prayers should evermore be offered up to the Father of the Universe for His wisdom to direct us in the path of our duty so as to enable us to consummate these high purposes.

One of the strongest objections which has been urged against confederacies by writers on government is the liability of the members to be tampered with by foreign governments or the people of foreign states, either in their local affairs or in such as affected the peace of others or endangered the safety of the whole confederacy. We can not hope to be entirely exempt from such attempts on our peace and safety. The United States are becoming too important in population and resources not to attract the observation of other nations. It therefore may in the progress of time occur that opinions entirely abstract in the States in

which they may prevail and in no degree affecting their domestic institutions may be artfully but secretly encouraged with a view to undermine the Union. Such opinions may become the foundation of political parties, until at last the conflict of opinion, producing an alienation of friendly feeling among the people of the different States, may involve in general destruction the happy institutions under which we live. It should ever be borne in mind that what is true in regard to individuals is equally so in regard to states. An interference of one in the affairs of another is the fruitful cause of family dissensions and neighborhood disputes, and the same cause affects the peace, happiness, and prosperity of states. It may be most devoutly hoped that the good sense of the American people will ever be ready to repel all such attempts should they ever be made.

There has been no material change in our foreign relations since my last annual message to Congress. With all the powers of Europe we continue on the most friendly terms. Indeed, it affords me much satisfaction to state that at no former period has the peace of that enlightened and important quarter of the globe ever been, apparently, more firmly established. The conviction that peace is the true policy of nations would seem to be growing and becoming deeper amongst the enlightened everywhere, and there is no people who have a stronger interest in cherishing the sentiments and adopting the means of preserving and giving it permanence than those of the United States. Amongst these, the first and most effective are, no doubt, the strict observance of justice and the honest and punctual fulfillment of all engagements. But it is not to be forgotten that in the present state of the world it is no less necessary to be ready to enforce their observance and fulfillment in reference to ourselves than to observe and fulfill them on our part in regard to others.

Since the close of your last session a negotiation has been formally entered upon between the Secretary of State and Her Britannic Majesty's minister plenipotentiary and envoy extraordinary residing at Washington relative to the rights of their respective nations in and over the Oregon Territory. That negotiation is still pending. Should it during your session be brought to a definitive conclusion, the result will be promptly communicated to Congress. I would, however, again call your attention to the recommendations contained in previous messages designed to protect and facilitate emigration to that Territory. The establishment of military posts at suitable points upon the extended line of land travel would enable our citizens to emigrate in comparative safety to the fertile regions below the Falls of the Columbia, and make the provision of the existing convention for the joint occupation of the territory by subjects of Great Britain and the citizens of the United States more available than heretofore to the latter. These posts would constitute places of rest for the weary emigrant, where he would be sheltered securely against the danger of attack from the Indians and be enabled

to recover from the exhaustion of a long line of travel. Legislative enactments should also be made which should spread over him the ægis of our laws, so as to afford protection to his person and property when he shall have reached his distant home. In this latter respect the British Government has been much more careful of the interests of such of her people as are to be found in that country than the United States. She has made necessary provision for their security and protection against the acts of the viciously disposed and lawless, and her emigrant reposes in safety under the panoply of her laws. Whatever may be the result of the pending negotiation, such measures are necessary. It will afford me the greatest pleasure to witness a happy and favorable termination to the existing negotiation upon terms compatible with the public honor, and the best efforts of the Government will continue to be directed to this end.

It would have given me the highest gratification in this my last annual communication to Congress to have been able to announce to you the complete and entire settlement and adjustment of other matters in difference between the United States and the Government of Her Britannic Majesty, which were adverted to in a previous message. It is so obviously the interest of both countries, in respect to the large and valuable commerce which exists between them, that all causes of complaint, however inconsiderable, should be with the greatest promptitude removed that it must be regarded as cause of regret that any unnecessary delays should be permitted to intervene. It is true that in a pecuniary point of view the matters alluded to are altogether insignificant in amount when compared with the ample resources of that great nation, but they nevertheless, more particularly that limited class which arise under seizures and detentions of American ships on the coast of Africa upon the mistaken supposition indulged in at the time the wrong was committed of their being engaged in the slave trade, deeply affect the sensibilities of this Government and people. Great Britain, having recognized her responsibility to repair all such wrongs by her action in other cases, leaves nothing to be regretted upon the subject as to all cases arising prior to the treaty of Washington than the delay in making suitable reparation in such of them as fall plainly within the principle of others which she has long since adjusted. The injury inflicted by delays in the settlement of these claims falls with severity upon the individual claimants and makes a strong appeal to her magnanimity and sense of justice for a speedy settlement. Other matters arising out of the construction of existing treaties also remain unadjusted, and will continue to be urged upon her attention.

The labors of the joint commission appointed by the two Governments to run the dividing line established by the treaty of Washington were, unfortunately, much delayed in the commencement of the season by the failure of Congress at its last session to make a timely appropriation of funds to meet the expenses of the American party, and by other causes. The United States commissioner, however, expresses his expectation that by increased diligence and energy the party will be able to make up for lost time.

We continue to receive assurances of the most friendly feelings on the part of all the other European powers, with each and all of whom it is so obviously our interest to cultivate the most amicable relations; nor can I anticipate the occurrence of any event which would be likely in any degree to disturb those relations. Russia, the great northern power, under the judicious sway of her Emperor, is constantly advancing in the road of science and improvement, while France, guided by the counsels of her wise Sovereign, pursues a course calculated to consolidate the general peace. Spain has obtained a breathing spell of some duration from the internal convulsions which have through so many years marred her prosperity, while Austria, the Netherlands, Prussia, Belgium, and the other powers of Europe reap a rich harvest of blessings from the prevailing peace.

I informed the two Houses of Congress in my message of December last that instructions had been given to Mr. Wheaton, our minister at Berlin, to negotiate a treaty with the Germanic States composing the Zollverein if it could be done, stipulating, as far as it was practicable to accomplish it, for a reduction of the heavy and onerous duties levied on our tobacco and other leading articles of agricultural production, and yielding in return on our part a reduction of duties on such articles the product of their industry as should not come into competition, or but a limited one, with articles the product of our manufacturing industry. The Executive in giving such instructions considered itself as acting in strict conformity with the wishes of Congress as made known through several measures which it had adopted, all directed to the accomplishment of this important result. The treaty was therefore negotiated, by which essential reductions were secured in the duties levied by the Zollverein on tobacco, rice, and lard, accompanied by a stipulation for the admission of raw cotton free of duty; in exchange for which highly important concessions a reduction of duties imposed by the laws of the United States on a variety of articles, most of which were admitted free of all duty under the act of Congress commonly known as the compromise law, and but few of which were produced in the United States, was stipulated for on our part. This treaty was communicated to the Senate at an early day of its last session, but not acted upon until near its close, when, for the want (as I am bound to presume) of full time to consider it, it was laid upon the table. This procedure had the effect of virtually rejecting it, in consequence of a stipulation contained in the treaty that its ratifications should be exchanged on or before a day which has already passed. The Executive, acting upon the fair inference that the Senate did not intend its absolute rejection, gave instructions to our minister at Berlin to reopen the negotiations so far as to obtain an extension of

time for the exchange of ratifications. I regret, however, to say that his efforts in this respect have been unsuccessful. I am nevertheless not without hope that the great advantages which were intended to be secured by the treaty may yet be realized.

I am happy to inform you that Belgium has, by an "arrêté royale" issued in July last, assimilated the flag of the United States to her own, so far as the direct trade between the two countries is concerned. This measure will prove of great service to our shipping interest, the trade having heretofore been carried on chiefly in foreign bottoms. I flatter myself that she will speedily resort to a modification of her system relatling to the tobacco trade, which would decidedly benefit the agriculture of the United States and operate to the mutual advantage of both countries.

No definitive intelligence has yet been received from our minister of the conclusion of a treaty with the Chinese Empire, but enough is known to induce the strongest hopes that the mission will be crowned with success.

With Brazil our relations continue on the most friendly footing. The commercial intercourse between that growing Empire and the United States is becoming daily of greater importance to both, and it is to the interest of both that the firmest relations of amity and good will should continue to be cultivated between them.

The Republic of New Granada still withholds, notwithstanding the most persevering efforts have been employed by our chargé d'affaires, Mr. Blackford, to produce a different result, indemnity in the case of the brig *Morris;* and the Congress of Venezuela, although an arrangement has been effected between our minister and the minister of foreign affairs of that Government for the payment of \$18,000 in discharge of its liabilities in the same case, has altogether neglected to make provision for its payment. It is to be hoped that a sense of justice will soon induce a settlement of these claims.

Our late minister to Chili, Mr. Pendleton, has returned to the United States without having effected an adjustment in the second claim of the *Macedonian*, which is delayed on grounds altogether frivolous and untenable. Mr. Pendleton's successor has been directed to urge the claim in the strongest terms, and, in the event of a failure to obtain a prompt adjustment, to report the fact to the Executive at as early a day as possible, so that the whole matter may be communicated to Congress.

At your last session I submitted to the attention of Congress the convention with the Republic of Peru of the 17th March, 1841, providing for the adjustment of the claims of citizens of the United States against that Republic, but no definitive action was taken upon the subject. I again invite to it your attention and prompt action.

In my last annual message I felt it to be my duty to make known to Congress, in terms both plain and emphatic, my opinion in regard to the war which has so long existed between Mexico and Texas, which since the battle of San Jacinto has consisted altogether of predatory incursions, attended by circumstances revolting to humanity. I repeat now what I then said, that after eight years of feeble and ineffectual efforts to reconquer Texas it was time that the war should have ceased. The United States have a direct interest in the question. The contiguity of the two nations to our territory was but too well calculated to involve our peace. Unjust suspicions were engendered in the mind of one or the other of the belligerents against us, and as a necessary consequence American interests were made to suffer and our peace became daily endangered; in addition to which it must have been obvious to all that the exhaustion produced by the war subjected both Mexico and Texas to the interference of other powers, which, without the interposition of this Government, might eventuate in the most serious injury to the United States. This Government from time to time exerted its friendly offices to bring about a termination of hostilities upon terms honorable alike to both the belligerents. Its efforts in this behalf proved unavailing. Mexico seemed almost without an object to persevere in the war, and no other alternative was left the Executive but to take advantage of the wellknown dispositions of Texas and to invite her to enter into a treaty for annexing her territory to that of the United States.

Since your last session Mexico has threatened to renew the war, and has either made or proposes to make formidable preparations for invading Texas. She has issued decrees and proclamations, preparatory to the commencement of hostilities, full of threats revolting to humanity, and which if carried into effect would arouse the attention of all Christendom. This new demonstration of feeling, there is too much reason to believe, has been produced in consequence of the negotiation of the late treaty of annexation with Texas. The Executive, therefore, could not be indifferent to such proceedings, and it felt it to be due as well to itself as to the honor of the country that a strong representation should be made to the Mexican Government upon the subject. This was accordingly done, as will be seen by the copy of the accompanying dispatch from the Secretary of State to the United States envoy at Mexico. Mexico has no right to jeopard the peace of the world by urging any longer a useless and fruitless contest. Such a condition of things would tot be tolerated on the European continent. Why should it be on this? A war of desolation, such as is now threatened by Mexico, can not be waged without involving our peace and tranquillity. It is idle to believe that such a war could be looked upon with indifference by our own eitizens inhabiting adjoining States; and our neutrality would be violated in despite of all efforts on the part of the Government to prevent it. The country is settled by emigrants from the United States under invitations held out to them by Spain and Mexico. Those emigrants have left behind them friends and relatives, who would not fail to sympathize with them in their difficulties, and who would be led by those sympathies to

participate in their struggles, however energetic the action of the Government to prevent it. Nor would the numerous and formidable bands of Indians — the most warlike to be found in any land — which occupy the extensive regions contiguous to the States of Arkansas and Missouri, and who are in possession of large tracts of country within the limits of Texas, be likely to remain passive. The inclinations of those numerous tribes lead them invariably to war whenever pretexts exist.

Mexico had no just ground of displeasure against this Government or people for negotiating the treaty. What interest of hers was affected by the treaty? She was despoiled of nothing, since Texas was forever lost to her. The independence of Texas was recognized by several of the leading powers of the earth. She was free to treat, free to adopt her own line of policy, free to take the course which she believed was best calculated to secure her happiness.

Her Government and people decided on annexation to the United States, and the Executive saw in the acquisition of such a territory the means of advancing their permanent happiness and glory. What principle of good faith, then, was violated? What rule of political morals trampled under foot? So far as Mexico herself was concerned, the measure should have been regarded by her as highly beneficial. Her inability to reconquer Texas had been exhibited, I repeat, by eight (now nine) years of fruitless and ruinous contest. In the meantime Texas has been growing in population and resources. Emigration has flowed into her territory from all parts of the world in a current which continues to increase in strength. Mexico requires a permanent boundary between that young Republic and herself. Texas at no distant day, if she continues separate and detached from the United States, will inevitably seek to consolidate her strength by adding to her domain the contiguous Provinces of Mexico. The spirit of revolt from the control of the central Government has heretofore manifested itself in some of those Provinces. and it is fair to infer that they would be inclined to take the first favorable opportunity to proclaim their independence and to form close alliances with Texas. The war would thus be endless, or if cessations of hostilities should occur they would only endure for a season. The interests of Mexico, therefore, could in nothing be better consulted than in a peace with her neighbors which would result in the establishment of a permanent boundary. Upon the ratification of the treaty the Executive was prepared to treat with her on the most liberal basis. Hence the boundaries of Texas were left undefined by the treaty. The Executive proposed to settle these upon terms that all the world should have pronounced just and reasonable. No negotiation upon that point could have been undertaken between the United States and Mexico in advance of the ratification of the treaty. We should have had no right, no power, no authority, to have conducted such a negotiation, and to have undertaken it would have been an assumption equally revolting to the

pride of Mexico and Texas and subjecting us to the charge of arrogance, while to have proposed in advance of annexation to satisfy Mexico for any contingent interest she might have in Texas would have been to have treated Texas not as an independent power, but as a mere dependency of Mexico. This assumption could not have been acted on by the Executive without setting at defiance your own solemn declaration that that Republic was an independent State. Mexico had, it is true, threatened war against the United States in the event the treaty of annexation was ratified. The Executive could not permit itself to be influenced by It represented in this the spirit of our people, who are this threat. ready to sacrifice much for peace, but nothing to intimidation. A war under any circumstances is greatly to be deplored, and the United States is the last nation to desire it; but if, as the condition of peace, it be required of us to forego the unquestionable right of treating with an independent power of our own continent upon matters highly interesting to both, and that upon a naked and unsustained pretension of claim by a third power to control the free will of the power with whom we treat, devoted as we may be to peace and anxious to cultivate friendly relations with the whole world, the Executive does not hesitate to say that the people of the United States would be ready to brave all consequences sooner than submit to such condition. But no apprehension of war was entertained by the Executive, and I must express frankly the opinion that had the treaty been ratified by the Senate it would have been followed by a prompt settlement, to the entire satisfaction of Mexico, of every matter in difference between the two countries. Seeing, then, that new preparations for hostile invasion of Texas were about to be adopted by Mexico, and that these were brought about because Texas had adopted the suggestions of the Executive upon the subject of annexation, it could not passively have folded its arms and permitted a war, threatened to be accompanied by every act that could mark a barbarous age, to be waged against her because she had done so.

Other considerations of a controlling character influenced the course of the Executive. The treaty which had thus been negotiated had failed to receive the ratification of the Senate. One of the chief objections which was urged against it was found to consist in the fact that the question of annexation had not been submitted to the ordeal of public opinion in the United States. However untenable such an objection was esteemed to be, in view of the unquestionable power of the Executive to negotiate the treaty and the great and lasting interests involved in the question, **I** felt it to be my duty to submit the whole subject to Congress as the best expounders of popular sentiment. No definitive action having been taken on the subject by Congress, the question referred itself directly to the decision of the States and people. The great popular election which has just terminated afforded the best opportunity of ascertaining the will of the States and the people upon it. Pending that issue it

became the imperative duty of the Executive to inform Mexico that the question of annexation was still before the American people, and that until their decision was pronounced any serious invasion of Texas would be regarded as an attempt to torestall their judgment and could not be looked upon with indifference. I am most happy to inform you that no such invasion has taken place; and I trust that whatever your action may be upon it Mexico will see the importance of deciding the matter by a resort to peaceful expedients in preference to those of arms. The decision of the people and the States on this great and interesting subject has been decisively manifested. The question of annexation has been presented nakedly to their consideration. By the treaty itself all collateral and incidental issues which were calculated to divide and distract the public councils were carefully avoided. These were left to the wisdom of the future to determine. It presented, I repeat, the isolated question of annexation, and in that form it has been submitted to the ordeal of public sentiment. A controlling majority of the people and a large majority of the States have declared in favor of immediate annexa-Instructions have thus come up to both branches of Congress tion. from their respective constituents in terms the most emphatic. It is the will of both the people and the States that Texas shall be annexed to the Union promptly and immediately. It may be hoped that in carrying into execution the public will thus declared all collateral issues may be avoided. Future Legislatures can best decide as to the number of States which should be formed out of the territory when the time has arrived for deciding that question. So with all others. By the treaty the United States assumed the payment of the debts of Texas to an amount not exceeding \$10,000,000, to be paid, with the exception of a sum falling short of \$400,000, exclusively out of the proceeds of the sales of her public lands. We could not with honor take the lands without assuming the full payment of all incumbrances upon them.

Nothing has occurred since your last session to induce a doubt that the dispositions of Texas remain unaltered. No intimation of an altered determination on the part of her Government and people has been furnished to the Executive. She still desires to throw herself under the protection of our laws and to partake of the blessings of our federative system, while every American interest would seem to require it. The extension of our coastwise and foreign trade to an amount almost incalculable, the enlargement of the market for our manufactures, a constantly growing market for our agricultural productions, safety to our frontiers, and additional strength and stability to the Union—these are the results which would rapidly develop themselves upon the consummation of the measure of annexation. In such event I will not doubt but that Mexico would find her true interest to consist in meeting the advances of this Government in a spirit of amity. Nor do I apprehend any serious complaint from any other quarter; no sufficient ground exists

for such complaint. We should interfere in no respect with the rights of any other nation. There can not be gathered from the act any design on our part to do so with their possessions on this continent. We have interposed no impediments in the way of such acquisitions of territory, large and extensive as many of them are, as the leading powers of Europe have made from time to time in every part of the world. We seek no conquest made by war. No intrigue will have been resorted to or acts of diplomacy essayed to accomplish the annexation of Texas. Free and independent herself, she asks to be received into our Union. It is a question for our own decision whether she shall be received or not.

The two Governments having already agreed through their respective organs on the terms of annexation, I would recommend their adoption by Congress in the form of a joint resolution or act to be perfected and made binding on the two countries when adopted in like manner by the Government of Texas.

In order that the subject may be fully presented in all its bearings, the correspondence which has taken place in reference to it since the adjournment of Congress between the United States, Texas, and Mexico is herewith transmitted.

The amendments proposed by the Senate to the convention concluded between the United States and Mexico on the 20th of November, 1843, have been transmitted through our minister for the concurrence of the Mexican Government, but, although urged thereto, no action has yet been had on the subject, nor has any answer been given which would authorize a favorable conclusion in the future.

The decree of September, 1843, in relation to the retail trade, the order for the expulsion of foreigners, and that of a more recent date in regard to passports—all which are considered as in violation of the treaty of amity and commerce between the two countries—have led to a correspondence of considerable length between the minister for foreign relations and our representatives at Mexico, but without any satisfactory result. They remain still unadjusted, and many and serious inconveniences have already resulted to our citizens in consequence of them.

Questions growing out of the act of disarming a body of Texan troops under the command of Major Snively by an officer in the service of the United States, acting under the orders of our Government, and the forcible entry into the custom-house at Bryarlys Landing, on Red River, by certain citizens of the United States, and taking away therefrom the goods seized by the collector of the customs as forfeited under the laws of Texas, have been adjusted so far as the powers of the Executive extend. The correspondence between the two Governments in reference to both subjects will be found amongst the accompanying documents. It contains a full statement of all the facts and circumstances, with the views taken on both sides and the principles on which the questions have been adjusted. It remains for Congress to make the necessary appropriation to carry the arrangement into effect, which I respectfully recommend.

The greatly improved condition of the Treasury affords a subject for The paralysis which had fallen on trade and general congratulation. commerce, and which subjected the Government to the necessity of resorting to loans and the issue of Treasury notes to a large amount, has passed away, and after the payment of upward of \$7,000,000 on account of the interest, and in redemption of more than \$5,000,000 of the publie debt which falls due on the 1st of January next, and setting apart upward of \$2,000,000 for the payment of outstanding Treasury notes and meeting an installment of the debts of the corporate cities of the District of Columbia, an estimated surplus of upward of \$7,000,000 over and above the existing appropriations will remain in the Treasury at the close of the fiscal year. Should the Treasury notes continue outstanding as heretofore, that surplus will be considerably augmented. Although all interest has ceased upon them and the Government has invited their return to the Treasury, yet they remain outstanding, affording great facilities to commerce, and establishing the fact that under a well-regulated system of finance the Government has resources within itself which render it independent in time of need, not only of private loans, but also of bank facilities.

The only remaining subject of regret is that the remaining stocks of the Government do not fall due at an earlier day, since their vedemption would be entirely within its control. As it is, it may be well worthy the consideration of Congress whether the law establishing the sinking fund (under the operation of which the debts of the Revolution and last war with Great Britain were to a great extent extinguished) should not, with proper modifications, so as to prevent an accumulation of surpluses, and limited in amount to a specific sum, be reenacted. Such provision, which would authorize the Government to go into the market for a purchase of its own stock on fair terms, would serve to maintain its credit at the highest point and prevent to a great extent those fluctuations in the price of its securities which might under other circumstances affect its credit. No apprehension of this sort is at this moment entertained. since the stocks of the Government, which but two years ago were offered for sale to capitalists at home and abroad at a depreciation, and could find no purchasers, are now greatly above par in the hands of the holders; but a wise and prudent forecast admonishes us to place beyond the reach of contingency the public credit.

It must also be a matter of unmingled gratification that under the existing financial system (resting upon the act of 1789 and the resolution of 1816) the currency of the country has attained a state of perfect soundness; and the rates of exchange between different parts of the Union, which in 1841 denoted by their enormous amount the great depreciation and, in fact, worthlessness of the currency in most of the States, are now reduced to little more than the mere expense of transporting specie from place to place and the risk incident to the operation. In a new

country like that of the United States, where so many inducements are held out for speculation, the depositories of the surplus revenue, consisting of banks of any description, when it reaches any considerable amount, require the closest vigilance on the part of the Government. All banking institutions, under whatever denomination they may pass, are governed by an almost exclusive regard to the interest of the stockholders. That interest consists in the augmentation of profits in the form of dividends, and a large surplus revenue intrusted to their custody is but too apt to lead to excessive loans and to extravagantly large issues of paper. As a necessary consequence prices are nominally increased and the speculative mania very soon seizes upon the public mind. A fictitious state of prosperity for a season exists, and, in the language of the day, money becomes plenty. Contracts are entered into by individuals resting on this unsubstantial state of things, but the delusion speedily passes away and the country is overrun with an indebtedness so weighty as to overwhelm many and to visit every department of industry with great and ruinous embarrassment. The greatest vigilance becomes necessary on the part of Government to guard against this state of things. The depositories must be given distinctly to understand that the favors of the Government will be altogether withdrawn, or substantially diminished, if its revenues shall be regarded as additions to their banking capital or as the foundation of an enlarged circulation.

The Government, through its revenue, has at all times an important part to perform in connection with the currency, and it greatly depends upon its vigilance and care whether the country be involved in embarrassments similar to those which it has had recently to encounter, or, aided by the action of the Treasury, shall be preserved in a sound and healthy condition.

The daugers to be guarded against are greatly augmented by too large a surplus of revenue. When that surplus greatly exceeds in amount what shall be required by a wise and prudent forecast to meet unforeseen contingencies, the Legislature itself may come to be seized with a disposition to indulge in extravagant appropriations to objects many of which may, and most probably would, be found to conflict with the Constitution. A fancied expediency is elevated above constitutional authority, and a reckless and wasteful extravagance but too certainly follows.

The important power of taxation, which when exercised in its most restricted form is a burthen on labor and production, is resorted to under various pretexts for purposes having no affinity to the motives which dictated its grant, and the extravagance of Government stimulates individual extravagance until the spirit of a wild and ill-regulated speculation involves one and all in its unfortunate results. In view of such fatal consequences, it may be laid down as an axiom founded in moral and political truth that no greater taxes should be imposed than are necessary for an economical administration of the Government, and that

Messages and Papers of the Presidents

whatever exists beyond should be reduced or modified. This doctrine does in no way conflict with the exercise of a sound discrimination in the selection of the articles to be taxed, which a due regard to the public weal would at all times suggest to the legislative mind. It leaves the range of selection undefined; and such selection should always be made with an eye to the great interests of the country. Composed as is the Union of separate and independent States, a patriotic Legislature will not fail in consulting the interests of the parts to adopt such course as will be best calculated to advance the harmony of the whole, and thus insure that permanency in the policy of the Government without which all efforts to advance the public prosperity are vain and fruitless.

This great and vitally important task rests with Congress, and the Executive can do no more than recommend the general principles which should govern in its execution.

I refer you to the report of the Secretary of War for an exhibition of the condition of the Army, and recommend to you as well worthy your best consideration many of the suggestions it contains. The Secretary in no degree exaggerates the great importance of pressing forward without delay in the work of erecting and finishing the fortifications to which he particularly alludes. Much has been done toward placing our cities and roadsteads in a state of security against the hazards of hostile attack within the last four years; but considering the new elements which have been of late years employed in the propelling of ships and the formidable implements of destruction which have been brought into service, we can not be too active or vigilant in preparing and perfecting the means of defense. I refer you also to his report for a full statement of the condition of the Indian tribes within our jurisdiction. The Executive has abated no effort in carrying into effect the well-established policy of the Government which contemplates a removal of all the tribes residing within the limits of the several States beyond those limits, and it is now enabled to congratulate the country at the prospect of an early consummation of this object. Many of the tribes have already made great progress in the arts of civilized life, and through the operation of the schools established among them, aided by the efforts of the pious men of various religious denominations who devote themselves to the task of their improvement, we may fondly hope that the remains of the formidable tribes which were once masters of this country will in their transition from the savage state to a condition of refinement and cultivation add another bright trophy to adorn the labors of a well-directed philanthropy.

The accompanying report of the Secretary of the Navy will explain to you the situation of that branch of the service. The present organization of the Department imparts to its operations great efficiency, but I concur fully in the propriety of a division of the Bureau of Construction, Equipment, Increase, and Repairs into two bureaus. The subjects as now

arranged are incongruous, and require to a certain extent information and qualifications altogether dissimilar.

The operations of the squadron on the coast of Africa have been conducted with all due attention to the object which led to its origination, and I am happy to say that the officers and crews have enjoyed the best possible health under the system adopted by the officer in command. It is believed that the United States is the only nation which has by its laws subjected to the punishment of death as pirates those who may be engaged in the slave trade. A similar enactment on the part of other nations would not fail to be attended by beneficial results.

In consequence of the difficulties which have existed in the way of securing titles for the necessary grounds, operations have not yet been commenced toward the establishment of the navy-yard at Memphis. So soon as the title is perfected no further delay will be permitted to intervene. It is well worthy of your consideration whether Congress should not direct the establishment of a ropewalk in connection with the contemplated navy-yard, as a measure not only of economy, but as highly useful and necessary. The only establishment of the sort now connected with the service is located at Boston, and the advantages of a similar establishment convenient to the hemp-growing region must be apparent to all.

The report of the Secretary presents other matters to your consideration of an important character in connection with the service.

In referring you to the accompanying report of the Postmaster-General it affords me continued cause of gratification to be able to advert to the fact that the affairs of the Department for the last four years have been so conducted as from its unaided resources to meet its large expenditures. On my coming into office a debt of nearly \$500,000 existed against the Department, which Congress discharged by an appropriation from the Treasury. The Department on the 4th of March next will be found, under the management of its present efficient head, free of debt or embarrassment, which could only have been done by the observance and practice of the greatest vigilance and economy. The laws have contemplated throughout that the Department should be self-sustained, but it may become necessary, with the wisest regard to the public interests, to introduce amendments and alterations in the system.

There is a strong desire manifested in many quarters so to alter the tariff of letter postage as to reduce the amount of tax at present imposed. Should such a measure be carried into effect to the full extent desired, it can not well be doubted but that for the first years of its operation a diminished revenue would be collected, the supply of which would necessarily constitute a charge upon the Treasury. Whether such a result would be desirable it will be for Congress in its wisdom to determine. It may in general be asserted as true that radical alterations in any system should rather be brought about gradually than by sudden changes,

and by pursuing this prudent policy in the reduction of letter postage the Department might still sustain itself through the revenue which would accrue by the increase of letters. The state and condition of the public Treasury has heretofore been such as to have precluded the recommendation of any material change. The difficulties upon this head have, however, ceased, and a larger discretion is now left to the Government.

I can not too strongly urge the policy of authorizing the establishment of a line of steamships regularly to ply between this country and foreign ports and upon our own waters for the transportation of the mail. The example of the British Government is well worthy of imitation in this respect. The belief is strongly entertained that the emoluments arising from the transportation of mail matter to foreign countries would operate of itself as an inducement to cause individual enterprise to undertake that branch of the task, and the remuneration of the Government would consist in the addition readily made to our steam navy in case of emergency by the ships so employed. Should this suggestion meet your approval, the propriety of placing such ships under the command of experienced officers of the Navy will not escape your observation. The application of steam to the purposes of naval warfare cogently recommends an extensive steam marine as important in estimating the defenses of the country. Fortunately this may be obtained by us to a great extent without incurring any large amount of expenditure. Steam vessels to be engaged in the transportation of the mails on our principal water courses, lakes, and ports of our coast could also be so constructed as to be efficient as war vessels when needed, and would of themselves constitute a formidable force in order to repel attacks from abroad. We can not be blind to the fact that other nations have already added large numbers of steamships to their naval armaments and that this new and powerful agent is destined to revolutionize the condition of the world. It becomes the United States, therefore, looking to their security, to adopt a similar policy, and the plan suggested will enable them to do so at a small comparative cost.

I take the greatest pleasure in bearing testimony to the zeal and untiring industry which has characterized the conduct of the members of the Each in his appropriate sphere has rendered me Executive Cabinet. the most efficient aid in carrying on the Government, and it will not, I trust, appear out of place for me to bear this public testimony. The cardinal objects which should ever be held in view by those intrusted with the administration of public affairs are rigidly, and without favor or affection, so to interpret the national will expressed in the laws as that injustice should be done to none, justice to all. This has been the rule upon which they have acted, and thus it is believed that few cases, if any, exist wherein our fellow-citizens, who from time to time have been drawn to the seat of Government for the settlement of their transactions with the Government, have gone away dissatisfied. Where the

testimony has been perfected and was esteemed satisfactory their claims have been promptly audited, and this in the absence of all favoritism or partiality. The Government which is not just to its own people can neither claim their affection nor the respect of the world. At the same time, the closest attention has been paid to those matters which relate more immediately to the great concerns of the country. Order and efficiency in each branch of the public service have prevailed, accompanied by a system of the most rigid responsibility on the part of the receiving and disbursing agents. The fact, in illustration of the truth of this remark, deserves to be noticed that the revenues of the Government, amounting in the last four years to upward of \$120,000,000, have been collected and disbursed through the numerous governmental agents without the loss by default of any amount worthy of serious commentary.

The appropriations made by Congress for the improvement of the rivers of the West and of the harbors on the Lakes are in a course of judicious expenditure under suitable agents, and are destined, it is to be hoped, to realize all the benefits designed to be accomplished by Congress. I can not, however, sufficiently impress upon Congress the great importance of withholding appropriations from improvements which are not ascertained by previous examination and survey to be necessary for the shelter and protection of trade from the dangers of storms and tempests. Without this precaution the expenditures are but too apt to inure to the benefit of individuals, without reference to the only consideration which can render them constitutional—the public interests and the general good.

I can not too earnestly urge upon you the interests of this District, over which by the Constitution Congress has exclusive jurisdiction. It would be deeply to be regretted should there be at any time ground to complain of neglect on the part of a community which, detached as it is from the parental care of the States of Virginia and Maryland, can only expect aid from Congress as its local legislature. Amongst the subjects which claim your attention is the prompt organization of an asylum for the insane who may be found from time to time sojourning within the District. Such course is also demanded by considerations which apply to branches of the public service. For the necessities in this behalf I invite your particular attention to the report of the Secretary of the Navy.

I have thus, gentlemen of the two Houses of Congress, presented you a true and faithful picture of the condition of public affairs, both foreign and domestic. The wants of the public service are made known to you, and matters of no ordinary importance are urged upon your consideration. Shall I not be permitted to congratulate you on the happy auspices under which you have assembled and at the important change in the condition of things which has occurred in the last three years' During that period questions with foreign powers of vital importance to the peace of our country have been settled and adjusted. A desolating and wasting war with savage tribes has been brought to a close. The internal tranquillity of the country, threatened by agitating questions, has been preserved. The credit of the Government, which had experienced a temporary embarrassment, has been thoroughly restored. Its coffers. which for a season were empty, have been replenished. A currency nearly uniform in its value has taken the place of one depreciated and almost worthless. Commerce and manufactures, which had suffered in common with every other interest, have once more revived, and the whole country exhibits an aspect of prosperity and happiness. Trade and barter, no longer governed by a wild and speculative mania, rest upon a solid and substantial footing, and the rapid growth of our cities in every direction bespeaks most strongly the favorable circumstances by which we are surrounded. My happiness in the retirement which shortly awaits me is the ardent hope which I experience that this state of prosperity is neither deceptive nor destined to be short lived, and that measures which have not yet received its sanction, but which I can not but regard as closely connected with the honor, the glory, and still more enlarged prosperity of the country, are destined at an early day to receive the approval of Congress. Under these circumstances and with these anticipations I shall most gladly leave to others more able than myself the noble and pleasing task of sustaining the public prosperity. I shall carry with me into retirement the gratifying reflection that as my sole object throughout has been to advance the public good I may not entirely have failed in accomplishing it; and this gratification is heightened in no small degree by the fact that when under a deep and abiding sense of duty I have found myself constrained to resort to the qualified veto it has neither been followed by disapproval on the part of the people nor weakened in any degree their attachment to that great conservative feature of our Government.

JOHN TYLER.

SPECIAL MESSAGES.

WASHINGTON, December 10, 1844.

To the Senate of the United States:

I have great pleasure in submitting to the Senate, for its ratification and approval, a treaty which has been concluded between Mr. Cushing, the United States commissioner, and the Chinese Empire.

JOHN TYLER.

WASHINGTON, December 10, 1844.

To the Senate of the United States:

I submit copies of two private and confidential letters addressed by Mr. Fay, acting in his place during the absence of Mr. Wheaton from

John Tyler

Berlin, from which it appears that should the Senate see cause to ratify the treaty with the States composing the Zollverein without reference to the fact that the time limited for the exchange of its ratification bad expired the Germanic States would regard the time fixed for the exchange of ratifications as immaterial and would give by their action upon it vitality and force to the treaty. I submit it to your mature consideration whether, in view of the important benefits arising from the treaty to the trade and commerce of the United States and to their agriculture, it would not comport with sound policy to adopt that course.

The Executive, not regarding the action of the Senate upon the treaty as expressive of its decisive opinion, deemed it proper to reopen the negotiations so far as to obtain an extension of time for the interchange of ratifications. The negotiation failed, however, in this particular, out of no disinclination to abide by the terms of the treaty on the part of the Zollverein, but from a belief that it would not fully comport with its dignity to do so. JOHN TYLER.

WASHINGTON, December 10, 1844.

To the Senate and House of Representatives:

I communicate to you an extract of a dispatch from Mr. Hall to the Secretary of State, which has been received by me since my message of the 3d instant, containing the pleasing intelligence that the indemnity assumed to be paid by the Republic of Venezuela in the case of the brig Morris has been satisfactorily arranged. JOHN TYLER.

WASHINGTON, December 18, 1844.

To the Senate and House of Representatives:

I transmit herewith copies of dispatches received from our minister at Mexico since the commencement of your present session, which claim from their importance, and I doubt not will receive, your calm and deliberate consideration. The extraordinary and highly offensive language which the Mexican Government has thought proper to employ in reply to the remonstrance of the Executive, through Mr. Shannon, against the renewal of the war with Texas while the question of annexation was pending before Congress and the people, and also the proposed manner of conducting that war, will not fail to arrest your attention. Such remonstrance, urged in no unfriendly spirit to Mexico, was called for by considerations of an imperative character, having relation as well to the peace of this country and honor of this Government as to the cause of humanity and civilization. Texas had entered into the treaty of annexation upon the invitation of the Executive, and when for that act she was threatened with a renewal of the war on the part of Mexico she naturally looked to this Government to interpose its efforts to ward

off the threatened blow. But one course was left the Executive, acting within the limits of its constitutional competency, and that was to protest in respectful, but at the same time strong and decided, terms against The war thus threatened to be renewed was promulgated by edicts it. and decrees, which ordered on the part of the Mexican military the desolation of whole tracts of country and the destruction without discrimination of all ages, sexes, and conditions of existence. Over the manner of conducting war Mexico possesses no exclusive control. She has no right to violate at pleasure the principles which an enlightened civilization has laid down for the conduct of nations at war, and thereby retrograde to a period of barbarism, which happily for the world has long since passed away. All nations are interested in enforcing an observance of those principles, and the United States, the oldest of the American Republics and the nearest of the civilized powers to the theater on which these enormities were proposed to be enacted, could not quietly content themselves to witness such a state of things. They had through the Executive on another occasion, and, as was believed, with the approbation of the whole country, remonstrated against outrages similar but even less inhuman than those which by her new edicts and decrees she has threatened to perpetrate, and of which the late inhuman massacre at Tabasco was but the precursor.

The bloody and inhuman murder of Fannin and his companions, equaled only in savage barbarity by the usages of the untutored Indian tribes, proved how little confidence could be placed on the most solemn stipulations of her generals, while the fate of others who became her captives in war-many of whom, no longer able to sustain the fatigues and privations of long journeys, were shot down by the wayside, while their companions who survived were subjected to sufferings even more painful than death-had left an indelible stain on the page of civilization. The Executive, with the evidence of an intention on the part of Mexico to renew scenes so revolting to humanity, could do no less than renew remonstrances formerly urged. For fulfilling duties so imperative Mexico has thought proper, through her accredited organs, because she has had represented to her the inhumanity of such proceedings, to indulge in language unknown to the courtesy of diplomatic intercourse and offensive in the highest degree to this Government and people. Nor has she offended in this only. She has not only violated existing conventions between the two countries by arbitrary and unjust decrees against our trade and intercourse, but withholds installments of debt due to our citizens which she solennly pledged herself to pay under circumstances which are fully explained by the accompanying letter from Mr. Green, our secretary of legation. And when our minister has invited the attention of her Government to wrongs committed by her local authorities, not only on the property but on the persons of our fellow-citizens engaged in prosecuting fair and honest pursuits, she has added insult to injury

by not even deigning for months together to return an answer to his representations. Still further to manifest her unfriendly feelings toward the United States, she has issued decrees expelling from some of her Provinces American citizens engaged in the peaceful pursuits of life, and now denies to those of our citizens prosecuting the whale fishery on the northwest coast of the Pacific the privilege, which has through all time heretofore been accorded to them, of exchanging goods of a small amount in value at her ports in California for supplies indispensable to their health and comfort.

Nor will it escape the observation of Congress that in conducting a correspondence with a minister of the United States, who can not and does not know any distinction between the geographical sections of the Union, charges wholly unfounded are made against particular States, and an appeal to others for aid and protection against supposed wrongs. In this same connection, sectional prejudices are attempted to be excited and the hazardous and unpardonable effort is made to foment divisions amongst the States of the Union and thereby imbitter their peace. Mexico has still to learn that however freely we may indulge in discussion among ourselves, the American people will tolerate no interference in their domestic affairs by any foreign government, and in all that concerns the constitutional guaranties and the national honor the people of the United States have but one mind and one heart.

The subject of annexation addresses itself, most fortunately, to every portion of the Union. The Executive would have been unmindful of its highest obligations if it could have adopted a course of policy dictated by sectional interests and local feelings. On the contrary, it was because the question was neither local nor sectional, but made its appeal to the interests of the whole Union, and of every State in the Union, that the negotiation, and finally the treaty of annexation, was entered into; and it has afforded me no ordinary pleasure to perceive that so far as demonstrations have been made upon it by the people they have proceeded from all portions of the Union. Mexico may seek to excite divisions amongst us by uttering unjust denunciations against particular States, but when she comes to know that the invitations addressed to our fellow-citizens by Spain, and afterwards by herself, to settle Texas were accepted by emigrants from all the States, and when, in addition to this, she refreshes her recollection with the fact that the first effort which was made to acquire Texas was during the Administration of a distinguished citizen from an Eastern State, which was afterwards renewed under the auspices of a President from the Southwest, she will awake to a knowledge of the futility of her present purpose of sowing dissensions among us or producing distraction in our councils by attacks either on particular States or on persons who are now in the retirement of private life.

Considering the appeal which she now makes to eminent citizens by

name, can she hope to escape censure for having ascribed to them, as well as to others, a design, as she pretends now for the first time revealed, of having originated negotiations to despoil her by duplicity and falsehood of a portion of her territory? The opinion then, as now, prevailed with the Executive that the annexation of Texas to the Union was a matter of vast importance. In order to acquire that territory before it had assumed a position among the independent powers of the earth, propositions were made to Mexico for a cession of it to the United States. Mexico saw in these proceedings at the time no cause of complaint. She is now, when simply reminded of them, awakened to the knowledge of the fact, which she, through her secretary of state, promulgates to the whole world as true, that those negotiations were founded in deception and falsehood and superinduced by unjust and iniquitous motives. While Texas was a dependency of Mexico the United States opened negotiations with the latter power for the cession of her then acknowledged territory, and now that Texas is independent of Mexico and has maintained a separate existence for nine years, during which time she has been received into the family of nations and is represented by accredited ambassadors at many of the principal Courts of Europe, and when it has become obvious to the whole world that she is forever lost to Mexico, the United States is charged with deception and falsehood in all relating to the past, and condemnatory accusations are made against States which have had no special agency in the matter, because the Executive of the whole Union has negotiated with free and independent Texas upon a matter vitally important to the interests of both countries; and after nine years of unavailing war Mexico now announces her intention, through her secretary of foreign affairs, never to consent to the independence of Texas or to abandon the effort to reconquer that Republic. She thus announces a perpetual claim, which at the end of a century will furnish her as plausible a ground for discontent against any nation which at the end of that time may enter into a treaty with Texas as she possesses at this moment against the United The lapse of time can add nothing to her title to independence. States.

A course of conduct such as has been described on the part of Mexico, in violation of all friendly feeling and of the courtesy which should characterize the intercourse between the nations of the earth, might well justify the United States in a resort to any measures to vindicate their national honor; but, actuated by a sincere desire to preserve the general peace, and in view of the present condition of Mexico, the Executive, resting upon its integrity, and not fearing but that the judgment of the world will duly appreciate its motives, abstains from recommending to Congress a resort to measures of redress and contents itself with reurging upon that body prompt and immediate action on the subject of annexation. By adopting that measure the United States will be in the exercise of an undoubted right; and if Mexico, not regarding their forbearance, shall aggravate the injustice of her conduct by a declaration of war against them, upon her head will rest all the responsibility.

JOHN TYLER.

WASHINGTON, December 23, 1844.

To the Senate of the United States:

The messenger who lately bore to Berlin the ratified copy of the convention for the mutual abolition of the *droit d'aubaine* and taxes on emigration between the United States of America and the Grand Duchy of Hesse, has just returned to Washington, bearing with him the exchange copy of said convention. It appears that the exchange of ratifications did not take place until the 16th day of October, twenty days after the period fixed by the convention itself for that purpose. This informality, which it would seem was occasioned by the absence from Berlin of the plenipotentiary from Hesse and by the time necessarily required for the preparation of the document, has been waived by the representative of that Government.

This subject is now submitted for the consideration of the Senate.

JOHN TYLER.

WASHINGTON, December 23, 1844.

To the Senate of the United States:

I herewith transmit a letter from the Secretary of State, accompanied by copies of the correspondence* asked for by your resolution of the 12th instant. JOHN TYLER.

WASHINGTON, January 2, 1845.

To the Senate of the United States:

I transmit herewith a letter from the Secretary of State, accompanied by a copy of a letter† from Mr. Raymond, secretary of legation and chargé d'affaires *ad interim* of the Republic of Texas, in answer to the Senate's resolution of the 16th December last.

JOHN TYLER.

WASHINGTON, January 2, 1845.

To the Senate of the United States:

In answer to your resolution of the 19th December last, I herewith transmit a letter ‡ from the Secretary of State and the accompanying documents.

JOHN TYLER.

WASHINGTON, January 9, 1845.

To the House of Representatives:

I herewith transmit to the House of Representatives, in reply to their resolution of the 14th of June last, a report from the Secretary of State, with accompanying papers.

JOHN TYLER.

‡ Transmitting copies of treaties between the Republic of Texas and Great Britain and France.

^{*}Extracts from the instructions of the Department of State to the United States minister to France relative to the proposed annexation of Texas, etc.

[†] Relating to the public debt and public lands of the Republic of Texas.

^{\$}Copy of the instructions to George W. Erving upon his appointment as minister to Spain in 1814 and during his mission to that Court.

To the Senate of the United States:

I transmit herewith additional documents having relation to the treaty with China, which may enable the Senate more satisfactorily to act upon it.

JOHN TYLER.

WASHINGTON, January 22, 1845.

WASHINGTON, January 9, 1845.

To the Senate and House of Representatives of the United States:

I communicate herewith an abstract of the treaty between the United States of America and the Chinese Empire concluded at Wang-Hiya on the 3d of July last, and ratified by the Senate on the 16th instant, and which, having also been ratified by the Emperor of China, now awaits only the exchange of the ratifications in China, from which it will be seen that the special mission authorized by Congress for this purpose has fully succeeded in the accomplishment so far of the great objects for which it was appointed, and in placing our relations with China on a new footing eminently favorable to the commerce and other interests of the United States.

In view of the magnitude and importance of our national concerns, actual and prospective, in China, I submit to the consideration of Congress the expediency of providing for the preservation and cultivation of the subsisting relations of amity between the United States and the Chinese Government, either by means of a permanent minister or commissioner with diplomatic functions, as in the case of certain of the Mohammedan States. It appears by one of the extracts annexed that the establishment of the British Government in China consists both of a plenipotentiary and also of paid consuls for all the five ports, one of whom has the title and exercises the functions of consul-general; and France has also a salaried consul-general, and the interests of the United States seem in like manner to call for some representative in China of a higher class than an ordinary commercial consulate.

I also submit to the consideration of Congress the expediency of making some special provision by law for the security of the independent and honorable position which the treaty of Wang-Hiya confers on citizens of the United States residing or doing business in China. By the twentyfirst and twenty-fifth articles of the treaty (copies of which are subjoined *in extenso*) citizens of the United States in China are wholly exempted, as well in criminal as in civil matters, from the local jurisdiction of the Chinese Government and made amenable to the laws and subject to the jurisdiction of the appropriate authorities of the United States alone. Some action on the part of Congress seems desirable in order to give full effect to these important concessions of the Chinese Government.

JOHN TYLER.

WASHINGTON, January 29, 1845.

To the Senate and House of Representatives of the United States:

In compliance with the request of the governor of the State of Illinois, I transmit herewith a copy of certain resolutions* adopted by the general assembly of that State. JOHN TYLER.

WASHINGTON, February 3, 1845.

To the Senate of the United States:

In answer to the resolution of the Senate of the 2d ultimo, calling for information in reference to the indemnities stipulated to be paid pursuant to the convention between the United States and the Mexican Republic of the 30th of January, 1843, I transmit herewith reports from the Secretaries of State and of the Treasury and the documents which accompanied them.

JOHN TYLER.

To the House of Representatives:

In answer to the resolution of the House of Representatives of the 23d ultimo, requesting information upon the subject of embezzlement of public money, I transmit herewith a report from the Secretary of State. JOHN TYLER.

WASHINGTON, February 3, 1845.

WASHINGTON, February 3, 1845.

To the House of Representatives:

In answer to the resolution of the House of Representatives of the 16th ultimo, calling for information upon the subject of the boundaries of the Republic of Texas and for copies of treaties between that Republic and other powers, I transmit herewith a report from the Secretary of State and the documents which accompanied it.

JOHN TYLER.

WASHINGTON, February 4, 1845.

To the Senate of the United States:

In compliance with the resolution of the Senate of the 5th December, I herewith transmit copies of the proceedings in the case of the inquiry into the official conduct of Silas Reed, principal surveyor of Missouri and Illinois, together with all the complaints against him and all the evidence taken in relation thereto. I did not consider the irregularities into which the surveyor-general had fallen as of sufficient magnitude to induce his dismissal from office at the time that the papers reached me, having become convinced, upon inquiry of the Commissioner of the General Land Office, of the ability, efficiency, and fidelity of the surveyor-general in all things

*Asking the publication and distribution of the decisions of the Supreme Court of the United States.

appertaining to his office; but since the passage of the resolution by the Senate I regarded the matter as so augmented in importance as to induce me to refer the subject to the Commissioner of the General Land Office for a minute and thorough examination. A copy of the report which he has made, and also the defense of Dr. Reed, accompanies the papers. It has seemed to me that the facts set forth by the report exhibit certain irregularities which are properly reprehensible, but from which neither the surveyor-general, in a pecuniary point of view, derived profit nor the Government sustained loss, and which the reproof contained in the Commissioner's report will in all future cases restrain; while the high testimony borne by the Commissioner to the generally excellent deportment in office of the surveyor-general has seemed to me to mark the case more as one meriting disapproval and correction in future than the severe punishment of dismissal.

JOHN TYLER.

WASHINGTON, February 5, 1845.

To the House of Representatives of the United States:

I herewith transmit to the House of Representatives, in answer to its resolution of the 31st ultimo, a report from the Secretary of State, together with copies of documents* therein referred to.

JOHN TYLER.

WASHINGTON, February 5, 1845.

WASHINGTON, February 7, 1845.

WASHINGTON, February 7, 1845.

To the Senate of the United States:

In compliance with the resolution of the Senate of the roth of December last, requesting further correspondence touching the relations between the United States and the Mexican Republic, I transmit herewith a report from the Secretary of State and the documents which accompanied it.

JOHN TYLER.

To the Senate of the United States:

I transmit herewith the report † requested by the resolution of the Senate of the 2d of January last. JOHN TYLER.

To the Senate of the United States:

In answer to the resolution of the Senate of the 4th instant, requesting information relative to the employment of Mr. Duff Green in the service of this Government, I transmit herewith a report from the Secretary of State.

JOHN TYLER.

† Of Lieutenant II. Wager Halleck, of the Engineer Corps, on the means of national defense.

^{*}Correspondence relative to the surrender by Great Britain of fugitive criminals from Florida under the treaty of Washington.

John Tyler

WASHINGTON, February 12, 1845.

To the House of Representatives of the United States:

I transmit herewith a copy of the correspondence relating to the claims of citizens of the United States upon the Mexican Republic, requested by the resolution of the House of Representatives of the roth of January, ^{1844.} JOHN TYLER.

WASHINGTON, February 12, 1845.

To the Senate of the United States:

I transmit herewith a copy of the correspondence relative to claims of citizens of the United States on the Mexican Republic, requested by the resolution of the Senate of the 26th December, 1843.

JOHN TYLER.

WASHINGTON CITY, February 13, 1845.

To the Senate of the United States:

I transmit herewith, for the advice and approbation of the Senate, a treaty with the Creek and Seminole tribes of Indians, concluded on the 4th day of January last.

JOHN TYLER.

WASHINGTON, February 14, 1845.

To the Senate of the United States:

I herewith transmit certain documents connected with the case of Silas Reed,* and which were inadvertently omitted in the packet of papers which accompanied my message to the Senate on this subject.

JOHN TYLER.

WASHINGTON, February 17, 1845.

To the House of Representatives:

In compliance with the resolution of the House of Representatives of the 30th of December last, requesting information with reference to indemnities for claims of citizens of the United States upon the Mexican Government, I transmit herewith a report from the Secretary of State and the documents which accompanied it.

JOHN TYLER.

WASHINGTON, February 19, 1845.

To the Senate of the United States:

In answer to the resolution of the Senate of the 11th December, 1844, requesting the President "to lay before the Senate, if in his judgment

* Principal surveyor of Missouri and Illinois, official conduct of.

that may be done without prejudice to the public interests, a copy of any instructions which may have been given by the Executive to the American minister in England on the subject of the title to and occupation of the Territory of Oregon since the 4th day of March, 1841; also a copy of any correspondence which may have passed between this Government and that of Great Britain, or between either of the two Governments and the minister of the other, in relation to that subject since that time," I have to say that in my opinion, as the negotiation is still pending, the information sought for can not be communicated without prejudice to the public service.

I deem it, however, proper to add that considerable progress has been made in the discussion, which has been carried on in a very amicable spirit between the two Governments, and that there is reason to hope that it may be terminated and the negotiation brought to a close within a short period.

I have delayed answering the resolution under the expectation expressed in my annual message that the negotiation would have been terminated before the close of the present session of Congress, and that the information called for by the resolution of the Senate might be communicated.

JOHN TYLER.

WASHINGTON, February 20, 1845.

To the Senate of the United States:

I herewith communicate to the Senate a report* from the Secretary of State, in reply to the inquiries contained in their resolution of the 17th instant.

JOHN TYLER.

WASHINGTON, February 20, 1845.

To the Senate and House of Representatives of the United States:

I transmit herewith, for the information of Congress, copies of certain dispatches recently received from Mr. Wise, our envoy extraordinary and minister plenipotentiary at the Court of Brazil, upon the subject of the slave trade, developing the means used and the devices resorted to in order to evade existing enactments upon that subject.

Auxiously desirous as are the United States to suppress a traffic so revolting to humanity, in the efforts to accomplish which they have been the pioneers of civilized states, it can not but be a subject of the most profound regret that any portion of our citizens should be found acting in cooperation with the subjects of other powers in opposition to the policy of their own Government, thereby subjecting to suspicion and to the hazard of disgrace the flag of their own country. It is true that this

^{*} Relating to redress from the British Government for the illegal capture of the fishing schooner Argus and other American vessels engaged in the fisheries, under a pretended infraction of the convention of October 20, 1818.

traffic is carried on altogether in foreign parts and that our own coasts are free from its pollution; but the crime remains the same wherever perpetrated, and there are many circumstances to warrant the belief that some of our citizens are deeply involved in its guilt. The mode and manner of carrying on this trade are clearly and fearlessly set forth in the accompanying documents, and it would seem that a regular system has been adopted for the purpose of thwarting the policy and evading the penalties of our laws. American vessels, with the knowledge, as there are good reasons to believe, of the owners and masters, are chartered, or rather purchased, by notorious slave dealers in Brazil, aided by English brokers and capitalists, with this intent. The vessel is only nominally chartered at so much per month, while in truth it is actually sold, to be delivered on the coast of Africa; the charter party binding the owners in the meantime to take on board as passengers a new crew in Brazil, who, when delivered on the coast, are to navigate her back to the ports of Brazil with her cargo of slaves. Under this agreement the vessel clears from the United States for some port in Great Britain, where a cargo of merchandise known as "coast goods," and designed especially for the African trade, is purchased, shipped, and consigned, together with the vessel sither directly to the slave dealer himself or to his agents or accomplices in Brazil. On her arrival a new sew is put on board as passengers and the vessel and cargo consigned to an equally guilty factor on agent on the coast of Africa, where the unlawful purpose originally designed is finally consummated. The merchandise is exchanged for slaves, the vessel is delivered up, her name obliterated, her papers destroyed, her American crew discharged, to be provided for by the charterers, and the new or passenger crew put in command to carry back its miserable freight to the first contrivers of the vovage, or their *employees* in Brazil.

During the whole progress of this tortuous enterprise it is possible that neither the American crew originally enlisted nor the *passenger* crew put on board in the Brazilian ports are aware of the nature of the voyage, and yet it is on these principally, ignorant if not innocent, that the penalties of the law are inflicted, while the guilty contrivers—the charterers, brokers, owners, and masters; in short, all who are most deeply concerned in the crime and its rewards—for the most part escape impunished.

It will be seen from the examinations which have recently taken place at Rio that the subjects of Her Britannie Majesty as well as our own citizens are deeply implicated in this inhuman traffic. British factors and agents, while they supply Africa with British fabrics in exchange for slaves, are chiefly instrumental in the abuse of the American flag; and the suggestions contained in the letter of Mr. Wise (whose judicious and zealous efforts in the matter can not be too highly commended), addressed to Mr. Hamilton, the British envoy, as to the best mode of suppressing the evil, deserve your most deliberate consideration, as they will receive, I doubt not, that of the British Government.

It is also worthy of consideration whether any other measures than those now existing are necessary to give greater efficacy to the just and humane policy of our laws, which already provide for the restoration to Africa of slaves captured at sea by American cruisers. From time to time provision has been made by this Government for their comfortable support and maintenance during a limited period after their restoration, and it is much to be regretted that this liberal policy has not been adopted by Great Britain. As it is, it seems to me that the policy it has adopted is calculated rather to perpetuate than to suppress the trade by enlisting very large interests in its favor. Merchants and capitalists furnish the means of carrying it on; manufactures, for which the negroes are exchanged, are the products of her workshops; the slaves, when captured, instead of being returned back to their homes are transferred to her colonial possessions in the West Indies and made the means of swelling the amount of their products by a system of apprenticeship for a term of years; and the officers and crews who capture the vessels receive on the whole number of slaves so many pounds sterling *per capita* by way of bounty.

It must be obvious that while these large interests are enlisted in favor of its continuance it will be difficult, if not impossible, to suppress the nefarious traffic, and that its results would be in effect but a continuance of the slave trade in another and more cruel form; for it can be but a matter of little difference to the African whether he is torn from his country and transported to the West Indies as a slave in the regular course of the trade, or captured by a cruiser, transferred to the same place, and made to perform the same labor under the name of an apprentice, which is at present the practical operation of the policy adopted.

It is to be hoped that Her Britannic Majesty's Government will, upon a review of all the circumstances stated in these dispatches, adopt more efficient measures for the suppression of the trade, which she has so long attempted to put down, with, as yet, so little success, and more consonant with the original policy of restoring the captured African to his home.

JOHN TYLER.

WASHINGTON, February 21, 1845.

To the Senate of the United States:

I transmit to the Senate, for its consideration with a view to ratification, a treaty of peace, friendship, navigation, and commerce between the United States and the Republic of New Granada, signed at Bogota on the 20th of December last. A copy of the papers on file in the Department of State relating to the treaty is also herewith communicated, for the information of the Senate. JOHN TYLER.

WASHINGTON, February 21, 1845.

To the Senate of the United States:

I herewith transmit to the Senate, in answer to their resolution of the 14th instant, a report of the Secretary of State, with the accompanying papers.* JOHN TYLER.

WASHINGTON, February 21, 1845.

To the House of Representatives of the United States:

In compliance with your resolution of the 23d January last, asking information "if any, and what, officers of the United States have been guilty of embezzlement of public money since the 19th August, 1841, and, further, whether such officers have been criminally prosecuted for such embezzlement, and, if not, that the reasons why they have not been so prosecuted be communicated," I herewith transmit letters from the Secretaries of the Treasury, War, and Navy Departments and the Postmaster-General, and from various heads of bureaus, from which it will be seen that no case of embezzlement by any person holding office under the Government is known to have occurred since the 19th August, 1841, unless exceptions are to be found in the cases of the postmaster at Tompkinsville, Ky., who was instantly removed from office, and all papers necessary for his prosecution were transmitted to the United States district attorney, and John Flanagan, superintendent of lead mines of the Upper Mississippi, who was also removed, and whose place of residence, as will be seen by the letter of the head of the Ordnance Bureau, has been, and still is, unknown. JOHN TYLER.

WASHINGTON, February 24, 1845.

To the Senate of the United States:

I herewith communicate to the Senate, for its consideration, a convention concluded by the minister of the United States at Berlin with the Kingdom of Bavaria, dated on the 21st day of January, 1845, for the mutual abolition of the *droit d'aubaine* and taxes on emigration between that Government and the United States, and also a copy of a dispatch from the minister explanatory of the sixth article of the same.

JOHN TYLER.

WASHINGTON, February 26, 1845.

To the Senate of the United States:

I transmit herewith a communication from the Secretary of the Treasury, inclosing reports from the Commissioner of the General Land Office, dated the 25th instant, and accompanying papers, in compliance with your resolution of the 17th instant, asking for information relative to reservations of mineral lands in the State of Illinois south of the base line and west of the third principal meridian. JOHN TYLER.

* Instructions to Hon, Caleb Cushing, commissioner to China and envoy extraordinary and minister plenipotentiary to the Court of China, etc.

To the Senate of the United States:

I herewith communicate a dispatch recently received, and an extract from one of a prior date, from our minister at Mexico, which I deem it important to lay confidentially before the Senate.

JOHN TYLER.

WASHINGTON, February 26, 1845. To the Senate of the United States:

In compliance with the resolution of the Senate of the 3d instant, I herewith transmit the information* called for.

IOHN TYLER.

WASHINGTON, February 26, 1845.

WASHINGTON, February 26, 1845.

To the Senate of the United States:

I herewith transmit to the Senate, for its approval, an additional article to the treaty of extradition between the United States and France of the oth of November, 1843. It will be found to contain the amendments suggested by the resolution of the Senate of the 15th of June last.

JOHN TYLER.

WASHINGTON, February 28, 1845.

To the Senate of the United States:

I transmit herewith to the Senate, in answer to its resolution of the 17th instant, a report † from the Secretary of State, together with the copies of papers therein referred to.

JOHN TYLER.

VETO MESSAGE.

WASHINGTON, February 20, 1845.

To the Senate of the United States:

I herewith return the bill entitled "An act relating to revenue cutters and steamers," with the following objections to its becoming a law:

The Executive has found it necessary and esteemed it important to the public interests to direct the building of two revenue boats, to be propelled by wind or steam, as occasion may require-the one for the coast of Georgia and the other for Mobile Bay, to be used as dispatch

^{*} Operations of the United States squadron on the west coast of Africa, the growth, condition, and influence of the American colonies there, and the nature, extent, and progress of the commerce of the United States with the same.

[†]Relating to redress from the British Government for the illegal capture of the fishing schooner Argus and other American vessels engaged in the fisheries, under a pretended infraction of the convention of October 20, 1818.

vessels if necessary. The models have been furnished by the Navy Department and side wheels have been ordered, as being best tested and least liable to failure. The one boat is directed to be built at Richmond. Va., the other at Pittsburg, Pa., and contracts have been regularly entered into for their construction. The contractors have made and are making all necessary arrangements in procuring materials and sites for building, etc., and have doubtless been at considerable expense in the necessary preparations for completing their engagements. It was no part of the intention of the Senate in originating the bill, I am well convinced, to violate the sanctity of contracts regularly entered into by the Government. The language of the act, nevertheless, is of a character to produce in all probability that effect. Its language is "that no revenue cutter or revenue steamer shall hereafter be built (excepting such as are now in the course of building or equipment) nor purchased unless an appropriation be first made by law therefor." The building of the two cutters under contract can not be said properly to have commenced, although preparations have been made for building; but even if the construction be ambiguous, it is better that all ambiguity should be removed and thus the hazard of violating the pledged faith of the country be removed along with it.

I am free to confess that, existing contracts being guarded and protected, the law to operate *in futuro* would be regarded as both proper and wise.

With these objections, I return the bill to the House in which it originated for its final constitutional action. JOHN TYLER.

PROCLAMATION.

[From Senate Journal, Twenty-eighth Congress, second session, p. 271.]

WASHINGTON, January 8, 1845.

To the Senators of the United States, respectively.

SIR: Objects interesting to the United States requiring that the Senate should be in session on Tuesday, the 4th of March next, to receive and act upon such communications as may be made to it on the part of the Executive, your attendance in the Senate Chamber, in this city, on that day at 10 o'clock in the forenoon is accordingly requested.

JOHN TYLER.

SUGGESTIONS.

During Tyler's administration the dispute as to the boundary line between the United States and Canada was settled by the Ashburton Treaty, q. v., Encyclopedic Index. For discussion by the President, see page 2015 and following, and page 2082.

The explorations of John C. Fremont, "The Pathfinder," forms an interesting epoch in the country's history. Opposite page 2049.

Dorr's Rebellion in Rhode Island is an important landmark in the growth of the country. Pages 2136 to 2139. (See Dorr's Rebellion, Encyclopedic Index.)

Read Tyler's Foreign Policy. Pages 1890, 2049, 2064, 2160, 2169, 2171, 2176, 2190, 2193, 2199.

NOTE.

For further suggestions on Tyler's administration, see Tyler. John, Encyclopedic Index.

By reading the Foreign Policy of each President, and by scanning the messages as to the state of the nation, a thorough knowledge of the history of the United States will be acquired from the most authentic sources: because, as has been said, "Each President reviews the past, depicts the present and forecasts the future of the nation."

James K. Polk

March 4, 1845, to March 4, 1849

SEE ENCYCLOPEDIC INDEX.

The Encyclopedic Index is not only an index to the other volumes, not only a key that unlocks the treasures of the entire publication, but it is in itself an alphabetically arranged brief history or story of the great controlling events constituting the History of the United States.

Under its proper alphabetical classification the story is told of every great subject referred to by any of the Presidents in their official Messages, and at the end of each article the official utterances of the Presidents themselves are cited upon the subject, so that you may readily turn to the page in the body of the work itself for this original information.

Next to the possession of knowledge is the ability to turn at will to where knowledge is to be found.

HOME, AT NASHVILLE, TENNESSEE, OF JAMES K. POLK With reproduction of official portrait, by Healy, from the White House Collection

and the second sec

POLK

James K. Polk will be remembered for the war that he did not fight as much as for the war he made against Mexico. The prominent issues presented in the famous Presidential campaign between Polk and Clay were the Texas and Oregon questions. Clay, who had always been a compromise man, occupied a compromise position in the campaign. He was in favor of the acquisition of Texas, provided it could be done without a war with Mexico, but probably a majority of his party did not go even that far. On the other hand Polk was strongly in favor of the immediate annexation of Texas and of the acquisition of the whole of Oregon up to 54° 40" north latitude, and was in favor of war in both cases, if necessary to accomplish these results. It will be remembered that one of the campaign slogans was "Fifty-Four Forty or Fight." The result of such a campaign was 170 electoral votes for Polk and only 105 for Clay.

Polk in his inaugural address commended the late action of Congress in relation to Texas, providing for the introduction of the Republic into the Federal Union as a separate State, and strongly asserted the title of the United States to the whole of Oregon, regardless of the claim of Great Britain, and intimated his intention to maintain it by force if necessary. Texas was promptly admitted into the Union, which resulted in the breaking off of diplomatic relations between this Republic and the Republic of Mexico, Mexico having never recognized the independence of Texas, and still claiming that territory as belonging to her dominion. The Mexican War followed, which was prosecuted not only to defend and maintain the status of Texas, but even to a war of conquest. The war was pushed until the flag of the United States floated over the Mexican capital, and the immense territory from New Mexico to Oregon west of the Mississippi River, excluding the Louisiana purchase acquired by Jefferson, was taken as a war indemnity by the peace of Guadaloupe Hidalgo.

Thus while Polk, as a result of the war, was acquiring most valuable and important territory in the South and Southwest, and in this respect going even further than his campaign promises and pledges, yet he was pursuing an entirely different, just the opposite course in fact, with reference to the other important question of the memorable campaign which won him the Presidency, with reference to Oregon and the Northwest. President Polk unfortunately surrendered and compromised away the rights and contention of the United States. All of Oregon north of the forty-ninth degree of north latitude was quietly and peaceably surrendered. If the public had not had its attention so sharply drawn to the great acquisitions in the South and Southwest, as a result of the Mexican War, Polk and his administration would have met overwhelming condemnation for the surrender of the Northwest.

So President Polk will be remembered not only for the war that he did fight and the great and valuable territory acquired as a result of it, but will each year, as time goes on, be remembered more and more for the war that he did not fight and the territory he did not acquire, or rather fight to hold.

Even at this day it is hard to tell whether or not future generations will fully justify Mr. Polk as a man who did the true, wise, and great thing in perpetrating the war with Mexico and afterward pushing it to a war of conquest. At the same time it seems clear that future generations will blame Mr. Polk more and more for his needless surrender of the Oregon territory between the forty-ninth degree and fifty-four forty.

Polk will also be remembered as a Jeffersonian Democrat. In his mode of life he was plain; in his dealings and speech, straightforward and honest. In his convictions he was strong and preferred rather to stand for the right as he saw it than to curry popular favor as a trimmer. He stood for a strict construction of the Constitution and held that great compact in the utmost reverence. He was a friend and follower of Jackson, and his career resembles that of the great Democrat in many ways. An honest man and of humble parentage, he arose from obscurity to the highest station in the gift of the American people. Like Jackson he stood unalterably opposed to the National Bank which monopolists of his day were trying to fasten on the American people. As chairman of the Ways and Means Committee of the House, and later as Speaker of the same body, and as Governor of the State of Tennessee, his course calls for little adverse comment, and for general commendation.

However historians and posterity may differ about his course as President with reference to the two great questions before him for solution, no man will question that Polk believed he was right in the course that he pursued, and ever and anon the immortal words of the great Kentuckian, whom Polk defeated for the Presidency, will recur to the impartial student of history: "I would rather be right than be President."

Manow Buch

SARAH CHILDRESS POLK

SARAH CHILDRESS, of Tennessee, when nineteen years old married James Knox Polk, a member of the Legislature of that State. The next year he was elected to Congress, continuing fourteen sessions in Washington, and Mrs. Polk held a high social position there owing to her courteous manners, dignity and many accomplishments. When she returned to Washington as the wife of the President, having no children, she devoted herself exclusively to her duties in that position. At her weekly receptions the custom of serving refreshments to guests was abolished. As she was a strict Presbyterian, dancing also was forbidden; nevertheless, she was very popular. She was a handsome woman of the Spanish type, dressed with refined and elegant taste, and was noted as a conversationalist, beside realizing keenly the obligations of her station. She survived her husband over forty years, living at "Polk Place," Nashville, the home they had hoped to share in old age.

James K. Polk

JAMES KNOX POLK was born in Mecklenburg County, N. C., November 2, 1795. He was a son of Samuel Polk, a farmer, whose father, Ezekiel, and his brother, Colonel Thomas Polk, one of the signers of the Mecklenburg Declaration of Independence, were sons of Robert Polk (or Pollock), who was born in Ireland and emigrated to America. His mother was Jane, daughter of James Knox, a resident of Iredell County, N. C., and a captain in the War of the Revolution. His father removed to Tennessee in the autumn of 1806, and settled in the valley of Duck River, a tributary of the Tennessee, in a section that was erected the following year into the county of Maury; he died in 1827. James was brought up on the farm; was inclined to study, and was fond of reading. He was sent to school, and had succeeded in mastering the English branches when ill health compelled his removal. Was then placed with a merchant, but, having a strong dislike to commercial pursuits, soon returned home, and in July, 1813, was given in charge of a private In 1815 entered the sophomore class at the University of North tutor. Carolina. As a student he was correct, punctual, and industrious. At his graduation in 1818 he was officially acknowledged to be the best scholar in both the classics and mathematics, and delivered the Latin salutatory. In 1847 the university conferred upon him the degree of LL. D. In 1819 he entered the law office of Felix Grundy, then at the head of the Tennessee bar. While pursuing his legal studies he attracted the attention of Andrew Jackson, and an intimacy was thus begun between the two men. In 1820 Mr. Polk was admitted to the bar, and established himself at Columbia, the county seat of Maury County. He attained immediate success, his career at the bar only ending with his election to the governorship of Tennessee in 1839. Brought up as a Jeffersonian and early taking an interest in politics, he was frequently heard in public as an exponent of the views of his party. His style of oratory was so popular that his services soon came to be in great demand, and he was not long in earning the title of the "Napoleon of the Stump." His first public employment was that of principal clerk of the senate of the State of Tennessee. In 1823 was elected a member of that body. In January, 1824, he married Sarah,

Messages and Papers of the Presidents

daughter of Joel Childress, a merchant of Rutherford County, Tenn. In August, 1825, he was elected to Congress from the Duck River district, and reelected at every succeeding election till 1839, when he withdrew from the contest to become a candidate for governor. With one or two exceptions, he was the youngest member of the Nineteenth Congress. He was prominently connected with every leading question, and upon all he struck what proved to be the keynote for the action of his party. His maiden speech was in defense of the proposed amendment to the Constitution giving the choice of the President and Vice-President directly to the people. It at once placed him in the front rank of Congressional debaters. He opposed the appropriation for the Panama mission, asked for by President Adams, contending that such action would tend to involve the United States in a war with Spain and establish an unfortunate precedent. In December, 1827, he was placed on the Committee on Foreign Affairs, and afterwards was also appointed chairman of the select committee to which was referred that portion of President Adams's message calling attention to the probable accumulation of a surplus in the Treasury after the anticipated extinguishment of the national debt. As the head of the latter committee he made a report denying the constitutional power of Congress to collect from the people for distribution a surplus beyond the wants of the Government, and maintaining that the revenue should be reduced to the requirements of the public service. During the whole period of President Jackson's Administration he was one of its leading supporters, and at times its chief reliance. Early in 1833, as a member of the Ways and Means Committee, he made a minority report unfavorable to the Bank of the United States. During the entire contest between the bank and President Jackson, caused by the removal of the deposits in October, 1833, Mr. Polk, as chairman of the Ways and Means Committee, supported the Executive. He was elected Speaker of the House of Representatives in December, 1835, and held that office till 1839. It was his fortune to preside over the House at a period when party feelings were excited to an unusual degree, and notwithstanding the fact that during the first session more appeals were taken from his decisions than were ever known before, he was uniformly sustained by the House, and frequently by leading members of the Whig party. He gave to the Administration of Martin Van Buren the same unhesitating support he had accorded to that of President Jackson. On leaving Congress he became the candidate of the Democrats of Tennessee for governor, and was elected by over 2,500 majority. He was an unsuccessful candidate for governor again in 1841 and 1843. In 1839 he was nominated by the legislatures of Tennessee and other States for Vice-President of the United States, but Richard M. Johnson, of Kentucky, was the choice of the great body of the Democratic party, and was accordingly nominated. On May 27, 1844, Mr. Polk was nominated for President of the

United States by the national Democratic convention at Baltimore, and on November 12 was elected, receiving about 40,000 majority on the popular vote, and 170 electoral votes to 105 that were cast for Henry Clay. He was inaugurated March 4, 1845. Among the important events of his Administration were the establishment of the United States Naval Academy; the consummation of the annexation of Texas; the admission of Texas, Iowa, and Wisconsin as States; the war with Mexico, resulting in a treaty of peace, by which the United States acquired New Mexico and Upper California; the treaty with Great Britain settling the Oregon boundary; the establishment of the "warehouse system;" the reenactment of the independent-treasury system; the passage of the act establishing the Smithsonian Institution; the treaty with New Granada, the thirtyfifth article of which secured for citizens of the United States the right of way across the Isthmus of Panama; and the creation of the Department of the Interior. He declined to become a candidate for reelection, and at the conclusion of his term retired to his home in Nashville. He died June 15, 1849, and was buried at Polk Place, in Nashville. September 19, 1893, the remains were removed by the State to Capitol Square.

INAUGURAL ADDRESS.

FELLOW-CITIZENS: Without solicitation on my part, I have been chosen by the free and voluntary suffrages of my countrymen to the most honorable and most responsible office on earth. I am deeply impressed with gratitude for the confidence reposed in me. Honored with this distinguished consideration at an earlier period of life than any of my predecessors, I can not disguise the diffidence with which I am about to enter on the discharge of my official duties.

If the more aged and experienced men who have filled the office of President of the United States even in the infancy of the Republic distrusted their ability to discharge the duties of that exalted station, what ought not to be the apprelensions of one so much younger and less endowed now that our domain extends from ocean to ocean, that our people have so greatly increased in numbers, and at a time when so great diversity of opinion prevails in regard to the principles and policy which should characterize the administration of our Government? Well may the boldest fear and the wisest tremble when incurring responsibilities on which may depend our country's peace and prosperity, and in some degree the hopes and happiness of the whole human family.

In assuming responsibilities so vast I fervently invoke the aid of that Almighty Ruler of the Universe in whose hands are the destinies of nations and of men to guard this Heaven-favored land against the mischiefs which without His guidance might arise from an unwise public policy. With a firm reliance upon the wisdom of Omnipotence to sustain and direct me in the path of duty which I am appointed to pursue, I stand in the presence of this assembled multitude of my countrymen to take upon myself the solemn obligation "to the best of my ability to preserve, protect, and defend the Constitution of the United States."

A concise enumeration of the principles which will guide me in the administrative policy of the Government is not only in accordance with the examples set me by all my predecessors, but is eminently befitting the occasion.

The Constitution itself, plainly written as it is, the safeguard of our federative compact, the offspring of concession and compromise, binding together in the bonds of peace and union this great and increasing family of free and independent States, will be the chart by which I shall be directed.

It will be my first care to administer the Government in the true spirit of that instrument, and to assume no powers not expressly granted or clearly implied in its terms. The Government of the United States is one of delegated and limited powers, and it is by a strict adherence to the clearly granted powers and by abstaining from the exercise of doubtful or unauthorized implied powers that we have the only sure guaranty against the recurrence of those unfortunate collisions between the Federal and State authorities which have occasionally so much disturbed the harmony of our system and even threatened the perpetuity of our glorious Union.

"To the States, respectively, or to the people" have been reserved "the powers not delegated to the United States by the Constitution nor prohibited by it to the States." Each State is a complete sovereignty within the sphere of its reserved powers. The Government of the Union, acting within the sphere of its delegated authority, is also a complete sovereignty. While the General Government should abstain from the exercise of authority not clearly delegated to it, the States should be equally careful that in the maintenance of their rights they do not overstep the limits of powers reserved to them. One of the most distinguished of my predecessors attached deserved importance to "the support of the State governments in all their rights, as the most competent administration for our domestic concerns and the surest bulwark against antirepublican tendencies," and to the "preservation of the General Government in its whole constitutional vigor, as the sheet anchor of our peace at home and safety abroad."

To the Government of the United States has been intrusted the exclusive management of our foreign affairs. Beyond that it wields a few general enumerated powers. It does not force reform on the States. It leaves individuals, over whom it casts its protecting influence, entirely free to improve their own condition by the legitimate exercise of all their mental and physical powers. It is a common protector of each and all the States; of every man who lives upon our soil, whether of native

or foreign birth; of every religious sect, in their worship of the Almighty according to the dictates of their own conscience; of every shade of opinion, and the most free inquiry; of every art, trade, and occupation consistent with the laws of the States. And we rejoice in the general happiness, prosperity, and advancement of our country, which have been the offspring of freedom, and not of power.

This most admirable and wisest system of well-regulated self-government among men ever devised by human minds has been tested by its successful operation for more than half a century, and if preserved from the usurpations of the Federal Government on the one hand and the exercise by the States of powers not reserved to them on the other, will, I fervently hope and believe, endure for ages to come and dispense the blessings of civil and religious liberty to distant generations. To effect objects so dear to every patriot I shall devote myself with anxious solicitude. It will be my desire to guard against that most fruitful source of danger to the harmonious action of our system which consists in substituting the mere discretion and caprice of the Executive or of majorities in the legislative department of the Government for powers which have been withheld from the Federal Government by the Constitution. Bv the theory of our Government majorities rule, but this right is not an arbitrary or unlimited one. It is a right to be exercised in subordination to the Constitution and in conformity to it. One great object of the Constitution was to restrain majorities from oppressing minorities or encroaching upon their just rights. Minorities have a right to appeal to the Constitution as a shield against such oppression.

That the blessings of liberty which our Constitution secures may be enjoyed alike by minorities and majorities, the Executive has been wisely invested with a qualified veto upon the acts of the Legislature. It is a negative power, and is conservative in its character. It arrests for the time hasty, inconsiderate, or unconstitutional legislation, invites reconsideration, and transfers questions at issue between the legislative and executive departments to the tribunal of the people. Like all other powers, it is subject to be abused. When judiciously and properly exercised, the Constitution itself may be saved from infraction and the rights of all preserved and protected.

The inestimable value of our Federal Union is felt and acknowledged by all. By this system of united and confederated States our people are permitted collectively and individually to seek their own happiness in their own way, and the consequences have been most auspicious. Since the Union was formed the number of the States has increased from thirteen to twenty-eight; two of these have taken their position as members of the Confederacy within the last week. Our population has increased from three to twenty millions. New communities and States are seeking protection under its ægis, and multitudes from the Old World are flocking to our shores to participate in its blessings. Beneath its benign sway peace and prosperity prevail. Freed from the burdens and miseries of war, our trade and intercourse have extended throughout the world. Mind, no longer tasked in devising means to accomplish or resist schemes of ambition, usurpation, or conquest, is devoting itself to man's true interests in developing his faculties and powers and the capacity of nature to minister to his enjoyments. Genius is free to announce its inventions and discoveries, and the hand is free to accomplish whatever the head conceives not incompatible with the rights of a fellow-being. All distinctions of birth or of rank have been abolished. All citizens, whether native or adopted, are placed upon terms of precise equality. All are entitled to equal rights and equal protection. No union exists between church and state, and perfect freedom of opinion is guaranteed to all sects and creeds.

These are some of the blessings secured to our happy land by our Federal Union. To perpetuate them it is our sacred duty to preserve it. Who shall assign limits to the achievements of free minds and free hands under the protection of this glorious Union? No treason to mankind since the organization of society would be equal in atrocity to that of him who would lift his hand to destroy it. He would overthrow the noblest structure of human wisdom, which protects himself and his fellow-man. He would stop the progress of free government and involve his country either in anarchy or despotism. He would extinguish the fire of liberty, which warms and animates the hearts of happy millions and invites all the nations of the earth to imitate our example. If he say that error and wrong are committed in the administration of the Government, let him remember that nothing human can be perfect, and that under no other system of government revealed by Heaven or devised by man has reason been allowed so free and broad a scope to combat error. Has the sword of despots proved to be a safer or surer instrument of reform in government than enlightened reason? Does he expect to find among the ruins of this Union a happier abode for our swarming millions than they now have under it? Every lover of his country must shudder at the thought of the possibility of its dissolution, and will be ready to adopt the patriotic sentiment, "Our Federal Union-it must be preserved." To preserve it the compromises which alone enabled our fathers to form a common constitution for the government and protection of so many States and distinct communities, of such diversified habits, interests, and domestic institutions, must be sacredly and religiously observed. Any attempt to disturb or destroy these compromises, being terms of the compact of union, can lead to none other than the most ruinous and disastrous consequences.

It is a source of deep regret that in some sections of our country misguided persons have occasionally indulged in schemes and agitations whose object is the destruction of domestic institutions existing in other sections—institutions which existed at the adoption of the Constitution

and were recognized and protected by it. All must see that if it were possible for them to be successful in attaining their object the dissolution of the Union and the consequent destruction of our happy form of government must speedily follow.

I am happy to believe that at every period of our existence as a nation there has existed, and continues to exist, among the great mass of our people a devotion to the Union of the States which will shield and protect it against the moral treason of any who would seriously contemplate its destruction. To secure a continuance of that devotion the compromises of the Constitution must not only be preserved, but sectional jealousies and heartburnings must be discountenanced, and all should remember that they are members of the same political family, having a common destiny. To increase the attachment of our people to the Union, our laws should be just. Any policy which shall tend to favor monopolies or the peculiar interests of sections or classes must operate to the prejudice of the interests of their fellow-citizens, and should be avoided. If the compromises of the Constitution be preserved, if sectional jealousies and heartburnings be discountenanced, if our laws be just and the Government be practically administered strictly within the limits of power prescribed to it, we may discard all apprehensions for the safety of the Union.

With these views of the nature, character, and objects of the Government and the value of the Union, I shall steadily oppose the creation of those institutions and systems which in their nature tend to pervert it from its legitimate purposes and make it the instrument of sections, classes, and individuals. We need no national banks or other extraneous institutions planted around the Government to control or strengthen it in opposition to the will of its authors. Experience has taught us how unnecessary they are as auxiliaries of the public authorities—how impotent for good and how powerful for mischief.

Ours was intended to be a plain and frugal government, and I shall regard it to be my duty to recommend to Congress and, as far as the Executive is concerned, to enforce by all the means within my power the strictest economy in the expenditure of the public money which may be compatible with the public interests.

A national debt has become almost an institution of European monarchies. It is viewed in some of them as an essential prop to existing governments. Melancholy is the condition of that people whose government can be sustained only by a system which periodically transfers large amounts from the labor of the many to the coffers of the few. Such a system is incompatible with the ends for which our republican Government was instituted. Under a wise policy the debts contracted in our Revolution and during the War of 1812 have been happily extinguished. By a judicious application of the revenues not required for other necessary purposes, it is not doubted that the debt which has grown out of the circumstances of the last few years may be speedily paid off. I congratulate my fellow-citizens on the entire restoration of the credit of the General Government of the Union and that of many of the States. Happy would it be for the indebted States if they were freed from their liabilities, many of which were incautiously contracted. Although the Government of the Union is neither in a legal nor a moral sense bound for the debts of the States, and it would be a violation of our compact of union to assume them, yet we can not but feel a deep interest in seeing all the States meet their public liabilities and pay off their just debts at the earliest practicable period. That they will do so as soon as it can be done without imposing too heavy burdens on their citizens there is no reason to doubt. The sound moral and honorable feeling of the people of the indebted States can not be questioned, and we are happy to perceive a settled disposition on their part, as their ability returns after a season of unexampled pecuniary embarrassment, to pay off all just demands and to acquiesce in any reasonable measures to accomplish that object.

One of the difficulties which we have had to encounter in the practical administration of the Government consists in the adjustment of our revenue laws and the levy of the taxes necessary for the support of Government. In the general proposition that no more money shall be collected than the necessities of an economical administration shall require all parties seem to acquiesce. Nor does there seem to be any material difference of opinion as to the absence of right in the Government to tax one section of country, or one class of citizens, or one occupation, for the mere profit of another. "Justice and sound policy forbid the Federal Government to foster one branch of industry to the detriment of another. or to cherish the interests of one portion to the injury of another portion of our common country." I have heretofore declared to my fellow-citizens that "in my judgment it is the duty of the Government to extend, as far as it may be practicable to do so, by its revenue laws and all other means within its power, fair and just protection to all the great interests of the whole Union, embracing agriculture, manufactures, the mechanic arts, commerce, and navigation." I have also declared my opinion to be "in favor of a tariff for revenue," and that "in adjusting the details of such a tariff I have sanctioned such moderate discriminating duties as would produce the amount of revenue needed and at the same time afford reasonable incidental protection to our home industry," and that I was "opposed to a tariff for protection merely, and not for revenue."

The power "to lay and collect taxes, duties, imposts, and excises" was an indispensable one to be conferred on the Federal Government, which without it would possess no means of providing for its own support. In executing this power by levying a tariff of duties for the support of Government, the raising of *revenue* should be the *object* and *protection* the *incident*. To reverse this principle and make *protection* the *object* and *revenue* the *incident* would be to inflict manifest injustice upon all other than the protected interests. In levying duties for revenue it is doubtless proper to make such discriminations within the revenue principle as will afford incidental protection to our home interests. Within the revenue limit there is a discretion to discriminate; beyond that limit the rightful exercise of the power is not conceded. The incidental protection afforded to our home interests by discriminations within the revenue range it is believed will be ample. In making discriminations all our home interests should as far as practicable be equally protected. The largest portion of our people are agriculturists. Others are employed in manufactures, commerce, navigation, and the mechanic arts. They are all engaged in their respective pursuits, and their joint labors constitute the national or home industry. To tax one branch of this home industry for the benefit of another would be unjust. No one of these interests can rightfully claim an advantage over the others, or to be enriched by impoverishing the others. All are equally entitled to the fostering care and protection of the Government. In exercising a sound discretion in levying discriminating duties within the limit prescribed, care should be taken that it be done in a manner not to benefit the wealthy few at the expense of the toiling millions by taxing lowest the luxuries of life, or articles of superior quality and high price, which can only be consumed by the wealthy, and highest the necessaries of life, or articles of coarse quality and low price, which the poor and great mass of our people must consume. The burdens of government should as far as practicable be distributed justly and equally among all classes of our population. These general views, long entertained on this subject. I have deemed it proper to reiterate. It is a subject upon which conflicting interests of sections and occupations are supposed to exist, and a spirit of mutual concession and compromise in adjusting its details should be cherished by every part of our widespread country as the only means of preserving harmony and a cheerful acquiescence of all in the operation of our revenue laws. Our patriotic citizens in every part of the Union will readily submit to the payment of such taxes as shall be needed for the support of their Government, whether in peace or in war, if they are so levied as to distribute the burdens as equally as possible among them.

The Republic of Texas has made known her desire to come into our Union, to form a part of our Confederacy and enjoy with us the blessings of liberty secured and guaranteed by our Constitution. Texas was once a part of our country—was unwisely ceded away to a foreign power—is now independent, and possesses an undoubted right to dispose of a part or the whole of her territory and to merge her sovereignty as a separate and independent state in ours. I congratulate my country that by an act of the late Congress of the United States the assent of this Government has been given to the reunion, and it only remains for the two countries to agree upon the terms to consummate an object so important to both.

I regard the question of annexation as belonging exclusively to the United States and Texas. They are independent powers competent to contract, and foreign nations have no right to interfere with them or to take exceptions to their reunion. Foreign powers do not seem to appreciate the true character of our Government. Our Union is a confederation of independent States, whose policy is peace with each other and all the world. To enlarge its limits is to extend the dominions of peace over additional territories and increasing millions. The world has nothing to fear from military ambition in our Government. While the Chief Magistrate and the popular branch of Congress are elected for short terms by the suffrages of those millions who must in their own persons bear all the burdens and miseries of war, our Government can not be otherwise than pacific. Foreign powers should therefore look on the annexation of Texas to the United States not as the conquest of a nation seeking to extend her dominions by arms and violence, but as the peaceful acquisition of a territory once her own, by adding another member to our confederation, with the consent of that member, thereby diminishing the chances of war and opening to them new and ever-increasing markets for their products.

To Texas the reunion is important, because the strong protecting arm of our Government would be extended over her, and the vast resources of her fertile soil and genial climate would be speedily developed, while the safety of New Orleans and of our whole southwestern frontier against hostile aggression, as well as the interests of the whole Union, would be promoted by it.

In the earlier stages of our national existence the opinion prevailed with some that our system of confederated States could not operate successfully over an extended territory, and serious objections have at different times been made to the enlargement of our boundaries. These objections were earnestly urged when we acquired Louisiana. Experience has shown that they were not well founded. The title of numerous Indian tribes to vast tracts of country has been extinguished; new States have been admitted into the Union; new Territories have been created and our jurisdiction and laws extended over them. As our population has expanded, the Union has been cemented and strengthened. As our boundaries have been enlarged and our agricultural population has been spread over a large surface, our federative system has acquired additional strength and security. It may well be doubted whether it would not be in greater danger of overthrow if our present population were confined to the comparatively narrow limits of the original thirteen States than it is now that they are sparsely settled over a more expanded territory. It is confidently believed that our system may be safely extended to the utmost bounds of our territorial limits, and that as it shall be extended the bonds of our Union, so far from being weakened, will become stronger.

None can fail to see the danger to our safety and future peace if Texas remains an independent state or becomes an ally or dependency of some foreign nation more powerful than herself. Is there one among our citizens who would not prefer perpetual peace with Texas to occasional wars, which so often occur between bordering independent nations? there one who would not prefer free intercourse with her to high duties ou all our products and manufactures which enter her ports or cross her Is there one who would not prefer an unrestricted commufrontiers? nication with her citizens to the frontier obstructions which must occur if she remains out of the Union? Whatever is good or evil in the local institutions of Texas will remain her own whether annexed to the United States or not. None of the present States will be responsible for them any more than they are for the local institutions of each other. They have confederated together for certain specified objects. Upon the same principle that they would refuse to form a perpetual union with Texas because of her local institutions our forefathers would have been prevented from forming our present Union. Perceiving no valid objection to the measure and many reasons for its adoption vitally affecting the peace, the safety, and the prosperity of both countries, I shall on the broad principle which formed the basis and produced the adoption of our Constitution, and not in any narrow spirit of sectional policy, endeavor by all constitutional, honorable, and appropriate means to consummate the expressed will of the people and Government of the United States by the reannexation of Texas to our Union at the earliest practicable period.

Nor will it become in a less degree my duty to assert and maintain by all constitutional means the right of the United States to that portion of our territory which lies beyond the Rocky Mountains. Our title to the country of the Oregon is "clear and unquestionable," and already are our people preparing to perfect that title by occupying it with their wives and children. But eighty years ago our population was confined on the west by the ridge of the Alleghanies. Within that period-within the lifetime, I might say, of some of my hearers-our people, increasing to many millions, have filled the eastern valley of the Mississippi, adventurously ascended the Missouri to its headsprings, and are already engaged in establishing the blessings of self-government in valleys of which the rivers flow to the Pacific. The world beholds the peaceful triumphs of the industry of our emigrants. To us belongs the duty of protecting them adequately wherever they may be upon our soil. The jurisdiction of our laws and the benefits of our republican institutions should be extended over them in the distant regions which they have selected for their homes. The increasing facilities of intercourse will easily bring the States, of which the formation in that part of our territory can not be long delayed, within the sphere of our federative Union. In the meantime every obligation imposed by treaty or conventional stipulations should be sacredly respected.

In the management of our foreign relations it will be my aim to observe a careful respect for the rights of other nations, while our own will be the subject of constant watchfulness. Equal and exact justice should characterize all our intercourse with foreign countries. All alliances having a tendency to jeopard the welfare and honor of our country or sacrifice any one of the national interests will be studiously avoided, and yet no opportunity will be lost to cultivate a favorable understanding with foreign governments by which our navigation and commerce may be extended and the ample products of our fertile soil, as well as the manufactures of our skillful artisans, find a ready market and remunerating prices in foreign countries.

In taking "care that the laws be faithfully executed," a strict performance of duty will be exacted from all public officers. From those officers, especially, who are charged with the collection and disbursement of the public revenue will prompt and rigid accountability be required. Any culpable failure or delay on their part to account for the moneys intrusted to them at the times and in the manner required by law will in every instance terminate the official connection of such defaulting officer with the Government.

Although in our country the Chief Magistrate must almost of necessity be chosen by a party and stand pledged to its principles and measures, yet in his official action he should not be the President of a part only, but of the whole people of the United States. While he executes the laws with an impartial hand, shrinks from no proper responsibility, and faithfully carries out in the executive department of the Government the principles and policy of those who have chosen him, he should not be unmindful that our fellow-citizens who have differed with him in opinion are entitled to the full and free exercise of their opinions and judgments, and that the rights of all are entitled to respect and regard.

Confidently relying upon the aid and assistance of the coordinate departments of the Government in conducting our public affairs, I enter upon the discharge of the high duties which have been assigned me by the people, again humbly supplicating that Divine Being who has watched over and protected our beloved country from its infancy to the present hour to continue His gracious benedictions upon us, that we may continue to be a prosperous and happy people.

MARCH 4, 1845.

SPECIAL MESSAGE.

WASHINGTON, March 15, 1845.

To the Senate of the United States:

I have received and maturely considered the two resolutions adopted by the Senate in executive session on the 12th instant, the first requesting the President to communicate information to the Senate (in confidence) of any steps which have been taken, if any were taken, by the

late President in execution of the resolution of Congress entitled "A joint resolution for the annexation of Texas to the United States," and if any such steps have been taken, then to inform the Senate whether anything has been done by him to counteract, suspend, or reverse the action of the late President in the premises; and the second requesting the President "to inform the Senate what communications have been made by the Mexican minister in consequence of the proceedings of Congress and the Executive in relation to Texas."

With the highest respect for the Senate and a sincere desire to furnish all the information requested by the first resolution, I yet entertain strong apprehensions lest such a communication might delay and ultimately endanger the success of the great measure which Congress so earnestly sought to accomplish by the passage of the "joint resolution for the annexation of Texas to the United States." The initiatory proceedings which have been adopted by the Executive to give effect to this resolution can not, therefore, in my judgment, at this time and under existing circumstances, be communicated without injury to the public interest.

In conformity with the second resolution, I herewith transmit to the Senate the copy of a note, dated on the 6th instant, addressed by General Almonte, envoy extraordinary and minister plenipotentiary of the Mexican Republic, to the Hon. John C. Calhoun, late Secretary of State, which is the only communication that has been made by the Mexican minister to the Department of State since the passage of the joint resolution of Congress for the annexation of Texas; and I also transmit a copy of the answer of the Secretary of State to this note of the Mexican minister.

JAMES K. POLK.

EXECUTIVE ORDERS.

WASHINGTON CITY, June 16, 1845.

Andrew Jackson is no more. He departed this life on Sunday, the 8th instant, full of days and full of honors. His country deplores his loss, and will ever cherish his memory. Whilst a nation mourns it is proper that business should be suspended, at least for one day, in the Executive Departments, as a tribute of respect to the illustrious dead.

I accordingly direct that the Departments of State, the Treasury, War, the Navy, the Post-Office, the office of the Attorney-General, and the Executive Mansion be instantly put into mourning, and that they be closed during the whole day to-morrow.

JAMES K. POLK.

GENERAL ORDERS, NO. 27.

WAR DEPARTMENT, Adjutant-General's Office, Washington, June 16, 1845.

The following general order of the President, received through the 'Nar Department, announces to the Army the death of the illustrious ex-President, General Andrew Jackson:

GENERAL ORDER.

WASHINGTON, June 16, 1845.

The President of the United States with heartfelt sorrow announces to the Army, the Navy, and the Marine Corps the death of Andrew Jackson. On the evening of Sunday, the 8th day of June, about 6 o'clock, he resigned his spirit to his Heavenly Father. The nation, while it learns with grief the death of its most illustrious citizen, finds solace in contemplating his venerable character and services. The Valley of the Mississippi beheld in him the bravest and wisest and most fortunate of its defenders; the country raised him to the highest trusts in military and in civil life with a confidence that never abated and an affection that followed him in undiminished vigor to retirement, watched over his latest hours, and pays its tribute at his grave. Wherever his lot was cast he appeared among those around him first in natural endowments and resources, not less than first in authority and station. The power of his mind impressed itself on the policy of his country, and still lives, and will live forever in the memory of its people. Child of a forest region and a settler of the wilderness, his was a genius which, as it came to the guidance of affairs, instinctively attached itself to general principles, and inspired by the truth which his own heart revealed to him in singleness and simplicity, he found always a response in the breast of his country. men. Crowned with glory in war, in his whole career as a statesman he showed himself the friend and lover of peace. With an American heart, whose throbs were all for republican freedom and his native land, he yet longed to promote the widest intercourse and most intimate commerce between the many nations of mankind. He was the servant of humanity. Of a vehement will, he was patient in council, deliberating long, hearing all things, yet in the moment of action deciding with rapidity. Of a noble nature and incapable of disguise, his thoughts lay open to all around him and won their confidence by his ingenuous frankness. His judgment was of that solidity that he ever tempered vigor with prudence. The flushings of anger could never cloud his faculties, but rather kindled and lighted them up, quickening their energy without disturbing their balance. In war his eye at a glance discerned his plans with unerring sagacity: in peace he proposed measures with an instinctive wisdom of which the inspirations were prophecy. In discipline stern,

in a just resolution inflexible, he was full of the gentlest affections, ever ready to solace the distressed and to relieve the needy, faithful to his friends, fervid for his country. Indifferent to other rewards, he aspired throughout life to an honorable fame, and so loved his fellow-men that he longed to dwell in their affectionate remembrance. Heaven gave him length of days and he filled them with deeds of greatness. He was always happy-happy in his youth, which shared the achievement of our national independence; happy in his after years, which beheld the Valley of the West cover itself with the glory of free and ever-increasing States; happy in his age, which saw the people multiply from two to twenty millions and freedom and union make their pathway from the Atlantic to the Pacific; thrice happy in death, for while he believed the liberties of his country imperishable and was cheered by visions of its constant advancement, he departed from this life in a full hope of a blessed immortality through the merits and atonement of the Redeemer.

Officers of the Army, the Navy, and the Marine Corps will wear crape on the left arm and on their swords and the colors of the several regiments will be put in mourning for the period of six months. At the naval stations and the public vessels in commission the flags will be worn at half-mast for one week, and on the day after this order is received twenty-one minute guns will be fired, beginning at 12 o'clock.

At each military station the day after the reception of this order the national flag will be displayed at half-staff from sunrise to sunset, thirteen guns will be fired at daybreak, half-hour guns during the day, and at the close of the day a general salute. The troops will be paraded at 10 o'clock and this order read to them, on which the labors of the day will cease.

Let the virtues of the illustrious dead retain their influence, and when energy and courage are called to trial emulate his example.

GEORGE BANCROFT,

Acting Sccretary of War, and Secretary of the Navy.

By order:

R. JONES, Adjutant-General.

FIRST ANNUAL MESSAGE.

WASHINGTON, December 2, 1845.

Fellow-Citizens of the Senate and House of Representatives:

It is to me a source of unaffected satisfaction to meet the representatives of the States and the people in Congress assembled, as it will be to receive the aid of their combined wisdom in the administration of public affairs. In performing for the first time the duty imposed on me by the Constitution of giving to you information of the state of the Union and recommending to your consideration such measures as in my judgment are necessary and expedient, I am happy that I can congratulate you on the continued prosperity of our country. Under the blessings of Divine Providence and the benign influence of our free institutions, it stands before the world a spectacle of national happiness.

With our unexampled advancement in all the elements of national greatness, the affection of the people is confirmed for the Union of the States and for the doctrines of popular liberty which lie at the foundation of our Government.

It becomes us in humility to make our devout acknowledgments to the Supreme Ruler of the Universe for the inestimable civil and religious blessings with which we are favored.

In calling the attention of Congress to our relations with foreign powers, I am gratified to be able to state that though with some of them there have existed since your last session serious causes of irritation and misunderstanding, yet no actual hostilities have taken place. Adopting the maxim in the conduct of our foreign affairs "to ask nothing that is not right and submit to nothing that is wrong," it has been my anxious desire to preserve peace with all nations, but at the same time to be prepared to resist aggression and maintain all our just rights.

In pursuance of the joint resolution of Congress "for annexing Texas to the United States," my predecessor, on the 3d day of March, 1845, elected to submit the first and second sections of that resolution to the Republic of Texas as an overture on the part of the United States for her admission as a State into our Union. This election I approved, and accordingly the chargé d'affaires of the United States in Texas, under instructions of the 10th of March, 1845, presented these sections of the resolution for the acceptance of that Republic. The executive government, the Congress, and the people of Texas in convention have successively complied with all the terms and conditions of the joint resolution. A constitution for the government of the State of Texas, formed by a convention of deputies, is herewith laid before Congress. It is well known, also, that the people of Texas at the polls have accepted the terms of annexation and ratified the constitution. I communicate to Congress the correspondence between the Secretary of State and our chargé d'affaires in Texas, and also the correspondence of the latter with the authorities of Texas, together with the official documents transmitted by him to his own Government. The terms of annexation which were offered by the United States having been accepted by Texas, the public faith of both parties is solemnly pledged to the compact of their union. Nothing remains to consummate the event but the passage of an act by Congress to admit the State of Texas into the Union upon an equal footing with the original States. Strong reasons exist why this should be done at an early period of the session. It will be observed

that by the constitution of Texas the existing government is only continued temporarily till Congress can act, and that the third Monday of the present month is the day appointed for holding the first general election. On that day a governor, a lieutenant-governor, and both branches of the legislature will be chosen by the people. The President of Texas is required, immediately after the receipt of official information that the new State has been admitted into our Union by Congress, to convene the legislature, and upon its meeting the existing government will be superseded and the State government organized. Questions deeply interesting to Texas, in common with the other States, the extension of our revenue laws and judicial system over her people and territory, as well as measures of a local character, will claim the early attention of Congress, and therefore upon every principle of republican government she ought to be represented in that body without unnecessary delay. I can not too earnestly recommend prompt action on this important subject. As soon as the act to admit Texas as a State shall be passed the union of the two Republics will be consummated by their own voluntary consent.

This accession to our territory has been a bloodless achievement. No arm of force has been raised to produce the result. The sword has had no part in the victory. We have not sought to extend our territorial possessions by conquest, or our republican institutions over a reluctant peo-It was the deliberate homage of each people to the great principle ple. of our federative union. If we consider the extent of territory involved in the annexation, its prospective influence on America, the means by which it has been accomplished, springing purely from the choice of the people themselves to share the blessings of our union, the history of the world may be challenged to furnish a parallel. The jurisdiction of the United States, which at the formation of the Federal Constitution was bounded by the St. Marys on the Atlantic, has passed the capes of Florida and been peacefully extended to the Del Norte. In contemplating the grandeur of this event it is not to be forgotten that the result was achieved in despite of the diplomatic interference of European monarchies. Even France, the country which had been our ancient ally, the country which has a common interest with us in maintaining the freedom of the seas, the country which, by the cession of Louisiana, first opened to us access to the Gulf of Mexico, the country with which we have been every year drawing more and more closely the bonds of successful commerce, most unexpectedly, and to our unfeigned regret, took part in an effort to prevent annexation and to impose on Texas, as a condition of the recognition of her independence by Mexico, that she would never join herself to the United States. We may rejoice that the tranquil and pervading influence of the American principle of self-government was sufficient to defeat the purposes of British and French interference, and that the almost unauimous voice of the people of Texas has given to that interference a peaceful and effective rebuke. From this example European

Governments may learn how vain diplomatic arts and intrigues must ever prove upon this continent against that system of self-government which seems natural to our soil, and which will ever resist foreign interference.

Toward Texas I do not doubt that a liberal and generous spirit will actuate Congress in all that concerns her interests and prosperity, and that she will never have cause to regret that she has united her "lone star" to our glorious constellation.

I regret to inform you that our relations with Mexico since your last session have not been of the amicable character which it is our desire to cultivate with all foreign nations. On the 6th day of March last the Mexican envoy extraordinary and minister plenipotentiary to the United States made a formal protest in the name of his Government against the joint resolution passed by Congress "for the annexation of Texas to the United States," which he chose to regard as a violation of the rights of Mexico, and in consequence of it he demanded his passports. He was informed that the Government of the United States did not consider this joint resolution as a violation of any of the rights of Mexico, or that it afforded any just cause of offense to his Government; that the Republic of Texas was an independent power, owing no allegiance to Mexico and constituting no part of her territory or rightful sovereignty and jurisdiction. He was also assured that it was the sincere desire of this Government to maintain with that of Mexico relations of peace and good understanding. That functionary, however, notwithstanding these representations and assurances, abruptly terminated his mission and shortly afterwards left the country. Our envoy extraordinary and minister plenipotentiary to Mexico was refused all official intercourse with that Government, and, after remaining several months, by the permission of his own Government he returned to the United States. Thus, by the acts of Mexico, all diplomatic intercourse between the two countries was suspended.

Since that time Mexico has until recently occupied an attitude of hostility toward the United States—has been marshaling and organizing armies, issuing proclamations, and avowing the intention to make war on the United States, either by an open declaration or by invading Texas. Both the Congress and convention of the people of Texas invited this Government to send an army into that territory to protect and defend them against the menaced attack. The moment the terms of annexation offered by the United States were accepted by Texas the latter became so far a part of our own country as to make it our duty to afford such protection and defense. I therefore deemed it proper, as a precautionary measure, to order a strong squadron to the coasts of Mexico and to concentrate an efficient military force on the western frontier of Texas. Our Army was ordered to take position in the country between the Nueces and the Del Norte, and to repel any invasion of the Texan territory which might be attempted by the Mexican forces. Our squadron in the Gulf was ordered to cooperate with the Army. But though our Army and Navy were placed in a position to defend our own and the rights of Texas, they were ordered to commit no act of hostility against Mexico unless she declared war or was herself the aggressor by striking the first The result has been that Mexico has made no aggressive moveblow. ment, and our military and naval commanders have executed their orders with such discretion that the peace of the two Republics has not been dis-Texas had declared her independence and maintained it by her turbed. arms for more than nine years. She has had an organized government in successful operation during that period. Her separate existence as an independent state had been recognized by the United States and the principal powers of Europe. Treaties of commerce and navigation had been concluded with her by different nations, and it had become manifest to the whole world that any further attempt on the part of Mexico to conquer her or overthrow her Government would be vain. Even Mexico herself had become satisfied of this fact, and whilst the question of annexation was pending before the people of Texas during the past summer the Government of Mexico, by a formal act, agreed to recognize the independence of Texas on condition that she would not annex herself to any other power. The agreement to acknowledge the independence of Texas, whether with or without this condition, is conclusive against The independence of Texas is a fact conceded by Mexico Mexico. herself, and she had no right or authority to prescribe restrictions as to the form of government which Texas might afterwards choose to assume. But though Mexico can not complain of the United States on account of the annexation of Texas, it is to be regretted that serious causes of misunderstanding between the two countries continue to exist, growing out of unredressed injuries inflicted by the Mexican authorities and people on the persons and property of citizens of the United States through a long series of years. Mexico has admitted these injuries, but has neglected and refused to repair them. Such was the character of the wrongs and such the insults repeatedly offered to American citizens and the American flag by Mexico, in palpable violation of the laws of nations and the treaty between the two countries of the 5th of April, 1831, that they have been repeatedly brought to the notice of Congress by my predecessors. As early as the 6th of February, 1837, the President of the United States declared in a message to Congress that-

The length of time since some of the injuries have been committed, the repeated and unavailing applications for redress, the wanton character of some of the outrages upon the property and persons of our citizens, upon the officers and flag of the United States, independent of recent insults to this Government and people by the late extraordinary Mexican minister, would justify in the eyes of all nations immediate war.

He did not, however, recommend an immediate resort to this extreme measure, which, he declared, "should not be used by just and generous nations, confiding in their strength for injuries committed, if it can be

Messages and Papers of the Presidents

honorably avoided, '' but, in a spirit of forbearance, proposed that another demand be made on Mexico for that redress which had been so long and unjustly withheld. In these views committees of the two Houses of Congress, in reports made to their respective bodies, concurred. Since these proceedings more than eight years have elapsed, during which, in addition to the wrongs then complained of, others of an aggravated character have been committed on the persons and property of our citizens. A special agent was sent to Mexico in the summer of 1838 with full authority to make another and final demand for redress. The demand was made; the Mexican Government promised to repair the wrongs of which we complained, and after much delay a treaty of indemnity with that view was concluded between the two powers on the 11th of April, 1839, and was duly ratified by both Governments. By this treaty a joint commission was created to adjudicate and decide on the claims of American citizens on the Government of Mexico. The commission was organized at Washington on the 25th day of August, 1840. Their time was limited to eighteen months, at the expiration of which they had adjudicated and decided claims amounting to \$2,026,139.68 in favor of citizens of the United States against the Mexican Government, leaving a large amount of claims undecided. Of the latter the American commissioners had decided in favor of our citizens claims amounting to \$928,627.88, which were left unacted on by the umpire authorized by the treaty. Still further claims, amounting to between three and four millions of dollars, were submitted to the board too late to be considered, and were left undisposed of. The sum of \$2,026,139.68, decided by the board, was a liquidated and ascertained debt due by Mexico to the claimants, and there was no justifiable reason for delaying its payment according to the terms of the treaty. It was not, however, paid. Mexico applied for further indulgence, and, in that spirit of liberality and forbearance which has ever marked the policy of the United States toward that Republic, the request was granted, and on the 30th of January, 1843, a new treaty was concluded. By this treaty it was provided that the interest due on the awards in favor of claimants under the convention of the 11th of April, 1839, should be paid on the 30th of April, 1843, and that-

The principal of the said awards and the interest accruing thereon shall be paid in five years, in equal installments every three months, the said term of five years to commence on the 30th day of April, 1843, aforesaid.

The interest due on the 30th day of April, 1843, and the three first of the twenty installments have been paid. Seventeen of these installments remain unpaid, seven of which are now due.

The claims which were left undecided by the joint commission, amounting to more than \$3,000,000, together with other claims for spoliations on the property of our citizens, were subsequently presented to the Mexican Government for payment, and were so far recognized that a treaty

providing for their examination and settlement by a joint commission was concluded and signed at Mexico on the 20th day of November, 1843. This treaty was ratified by the United States with certain amendments to which no just exception could have been taken, but it has not yet received the ratification of the Mexican Government. In the meantime our citizens, who suffered great losses-and some of whom have been reduced from affluence to bankruptcy-are without remedy unless their rights be enforced by their Government. Such a continued and unprovoked series of wrongs could never have been tolerated by the United States had they been committed by one of the principal nations of Europe. Mexico was, however, a neighboring sister republic, which, following our example, had achieved her independence, and for whose success and prosperity all our sympathies were early enlisted. The United States were the first to recognize her independence and to receive her into the family of nations, and have ever been desirous of cultivating with her a good understanding. We have therefore borne the repeated wrongs she has committed with great patience, in the hope that a returning sense of justice would ultimately guide her councils and that we might, if possible, honorably avoid any hostile collision with her. Without the previous authority of Congress the Executive possessed no power to adopt or enforce adequate remedies for the injuries we had suffered, or to do more than to be prepared to repel the threatened aggression on the part of Mexico. After our Army and Navy had remained on the frontier and coasts of Mexico for many weeks without any hostile movement on her part, though her menaces were continued, I deemed it important to put an end, if possible, to this state of things. With this view I caused steps to be taken in the month of September last to ascertain distinctly and in an authentic form what the designs of the Mexican Government were-whether it was their intention to declare war, or invade Texas, or whether they were disposed to adjust and settle in an amicable manner the pending differences between the two countries. On the 9th of November an official answer was received that the Mexican Government consented to renew the diplomatic relations which had been suspended in March last, and for that purpose were willing to accredit a minister from the United States. With a sincere desire to preserve peace and restore relations of good understanding between the two Republics, I waived all ceremony as to the manner of renewing diplomatic intercourse between them, and, assuming the initiative, on the 10th of November a distinguished citizen of Louisiana was appointed envoy extraordinary and minister plenipotentiary to Mexico, clothed with full powers to adjust and definitively settle all pending differences between the two countries, including those of boundary between Mexico and the State of Texas. The minister appointed has set out on his mission and is probably by this time near the Mexican capital. He has been instructed to bring the negotiation with which he is charged to a conclusion at the earliest

practicable period, which it is expected will be in time to enable me to communicate the result to Congress during the present session. Until that result is known I forbear to recommend to Congress such ulterior measures of redress for the wrongs and injuries we have so long borne as it would have been proper to make had no such negotiation been instituted.

Congress appropriated at the last session the sum of \$275,000 for the payment of the April and July installments of the Mexican indemnities for the year 1844:

Provided it shall be ascertained to the satisfaction of the American Government that said installments have been paid by the Mexican Government to the agent appointed by the United States to receive the same in such manner as to discharge all claim on the Mexican Government, and said agent to be delinquent in remitting the money to the United States.

The unsettled state of our relations with Mexico has involved this subject in much mystery. The first information in an authentic form from the agent of the United States, appointed under the Administration of my predecessor, was received at the State Department on the 9th of November last. This is contained in a letter, dated the 17th of October, addressed by him to one of our citizens then in Mexico with a view of having it communicated to that Department. From this it appears that the agent on the 20th of September, 1844, gave a receipt to the treasury of Mexico for the amount of the April and July installments of the indemnity. In the same communication, however, he asserts that he had not received a single dollar in cash, but that he holds such securities as warranted him at the time in giving the receipt, and entertains no doubt but that he will eventually obtain the money. As these installments appear never to have been actually paid by the Government of Mexico to the agent, and as that Government has not, therefore, been released so as to discharge the claim, I do not feel myself warranted in directing payment to be made to the claimants out of the Treasury without further legislation. Their case is undoubtedly one of much hardship, and it remains for Congress to decide whether any, and what, relief ought to be granted to them. Our minister to Mexico has been instructed to ascertain the facts of the case from the Mexican Government in an authentic and official form and report the result with as little delay as possible.

My attention was early directed to the negotiation which on the 4th of March last I found pending at Washington between the United States and Great Britain on the subject of the Oregon Territory. Three several attempts had been previously made to settle the questions in dispute between the two countries by negotiation upon the principle of compromise, but each had proved unsuccessful. These negotiations took place at London in the years 1818, 1824, and 1826—the two first under the Administration of Mr. Monroe and the last under that of Mr. Adams.

The negotiation of 1818, having failed to accomplish its object, resulted in the convention of the 20th of October of that year.

By the third article of that convention it was-

Agreed that any country that may be claimed by either party on the northwest coast of America westward of the Stony Mountains shall, together with its harbors, bays, and creeks, and the navigation of all rivers within the same, be free and open for the term of ten years from the date of the signature of the present convention to the vessels, citizens, and subjects of the two powers; it being well understood that this agreement is not to be construed to the prejudice of any claim which either of the two high contracting parties may have to any part of the said country, nor shall it be taken to affect the claims of any other power or state to any part of the said country, the only object of the high contracting parties in that respect being to prevent disputes and differences amongst themselves.

The negotiation of 1824 was productive of no result, and the convention of 1818 was left unchanged.

The negotiation of 1826, having also failed to effect an adjustment by compromise, resulted in the convention of August 6, 1827, by which it was agreed to continue in force for an indefinite period the provisions of the third article of the convention of the 20th of October, 1818; and it was further provided that—

It shall be competent, however, to either of the contracting parties, in case either should think fit, at any time after the 20th of October, 1828, on giving due notice of twelve months to the other contracting party, to annul and abrogate this convention; and it shall in such case be accordingly entirely annulled and abrogated after the expiration of the said term of notice.

In these attempts to adjust the controversy the parallel of the fortyninth degree of north latitude had been offered by the United States to Great Britain, and in those of 1818 and 1826, with a further concession of the free navigation of the Columbia River south of that latitude. The parallel of the forty-ninth degree from the Rocky Mountains to its intersection with the northeasternmost branch of the Columbia, and thence down the channel of that river to the sea, had been offered by Great Britain, with an addition of a small detached territory north of the Columbia. Each of these propositions had been rejected by the parties respectively. In October, 1843, the envoy extraordinary and minister plenipotentiary of the United States in London was authorized to make a similar offer to those made in 1818 and 1826. Thus stood the question when the negotiation was shortly afterwards transferred to Washington, and on the 23d of August, 1844, was formally opened under the direction of my immediate predecessor. Like all the previous negotiations, it was based upon principles of "compromise," and the avowed purpose of the parties was "to treat of the respective claims of the two countries to the Oregon Territory with the view to establish a permanent boundary between them westward of the Rocky Mountains to the Pacific Ocean."

Accordingly, on the 26th of August, 1844, the British plenipotentiary offered to divide the Oregon Territory by the forty-minth parallel of

north latitude from the Rocky Mountains to the point of its intersection with the northeasternmost branch of the Columbia River, and thence down that river to the sea, leaving the free navigation of the river to be enjoyed in common by both parties, the country south of this line to belong to the United States and that north of it to Great Britain. At the same time he proposed in addition to yield to the United States a detached territory north of the Columbia extending along the Pacific and the Straits of Fuca from Bulfinchs Harbor, inclusive, to Hoods Canal, and to make free to the United States any port or ports south of latitude 49° which they might desire, either on the mainland or on Quadra and Vancouvers Island. With the exception of the free ports, this was the same offer which had been made by the British and rejected by the American Government in the negotiation of 1826. This proposition was properly rejected by the American plenipotentiary on the day it was submitted. This was the only proposition of compromise offered by the British plenipotentiary. The proposition on the part of Great Britain having been rejected, the British plenipotentiary requested that a proposal should be made by the United States for "an equitable adjustment of the question." When I came into office I found this to be the state of the negotiation. Though entertaining the settled conviction that the British pretensions of title could not be maintained to any portion of the Oregon Territory upon any principle of public law recognized by nations, yet in deference to what had been done by my predecessors, and especially in consideration that propositions of compromise had been thrice made by two preceding Administrations to adjust the question on the parallel of 49°, and in two of them yielding to Great Britain the free navigation of the Columbia, and that the pending negotiation had been commenced on the basis of compromise, I deemed it to be my duty not abruptly to break it off. In consideration, too, that under the conventions of 1818 and 1827 the citizens and subjects of the two powers held a joint occupancy of the country, I was induced to make another effort to settle this long-pending controversy in the spirit of moderation which had given birth to the renewed discussion. A proposition was accordingly made, which was rejected by the British plenipotentiary, who, without submitting any other proposition, suffered the negotiation on his part to drop, expressing his trust that the United States would offer what he saw fit to call "some further proposal for the settlement of the Oregon question more consistent with fairness and equity and with the reasonable expectations of the British Government." The proposition thus offered and rejected repeated the offer of the parallel of 49° of north latitude, which had been made by two preceding Administrations, but without proposing to surrender to Great Britain, as they had done, the free navigation of the Columbia River. The right of any foreign power to the free navigation of any of our rivers through the heart of our country was one which I was unwilling to concede. It also embraced a provision to

make free to Great Britain any port or ports on the cap of Quadra and Vancouvers Island south of this parallel. Had this been a new question, coming under discussion for the first time, this proposition would not have been made. The extraordinary and wholly inadmissible demands of the British Government and the rejection of the proposition made in deference alone to what had been done by my predecessors and the implied obligation which their acts seemed to impose afford satisfactory evidence that no compromise which the United States ought to accept can be effected. With this conviction the proposition of compromise which had been made and rejected was by my direction subsequently withdrawn and our title to the whole Oregon Territory asserted, and, as is believed, maintained by irrefragable facts and arguments.

The civilized world will see in these proceedings a spirit of liberal concession on the part of the United States, and this Government will be relieved from all responsibility which may follow the failure to settle the controversy.

All attempts at compromise having failed, it becomes the duty of Congress to consider what measures it may be proper to adopt for the security and protection of our citizens now inhabiting or who may hereafter inhabit Oregon, and for the maintenance of our just title to that Territory. In adopting measures for this purpose care should be taken that nothing be done to violate the stipulations of the convention of 1827, which is still in force. The faith of treaties, in their letter and spirit, has ever been, and, I trust, will ever be, scrupulously observed by the United States. Under that convention a year's notice is required to be given by either party to the other before the joint occupancy shall terminate and before either can rightfully assert or exercise exclusive jurisdiction over any portion of the territory. This notice it would, in my judgment, be proper to give, and I recommend that provision be made by law for giving it accordingly, and terminating in this manner the convention of the 6th of August, 1827.

It will become proper for Congress to determine what legislation they can in the meantime adopt without violating this convention. Beyond all question the protection of our laws and our jurisdiction, civil and criminal, ought to be immediately extended over our citizens in Oregon. They have had just cause to complain of our long neglect in this particular, and have in consequence been compelled for their own security and protection to establish a provisional government for themselves. Strong in their allegiance and ardent in their attachment to the United States, they have been thus cast upon their own resources. They are anxious that our laws should be extended over them, and I recommend that this be done by Congress with as little delay as possible in the full extent to which the British Parliament have proceeded in regard to British subjects in that Territory by their act of July 2, 1821, "for regulating the fur trade and establishing a criminal and civil jurisdiction within certain parts of North America." By this act Great Britain extended her laws and jurisdiction, civil and criminal, over her subjects engaged in the fur trade in that Territory. By it the courts of the Province of Upper Canada were empowered to take cognizance of causes civil and criminal. Justices of the peace and other judicial officers were authorized to be appointed in Oregon with power to execute all process issuing from the courts of that Province, and to "sit and hold courts of record for the trial of criminal offenses and misdemeaners" not made the subject of capital punishment, and also of civil cases where the cause of action shall not "exceed in value the amount or sum of $\int_{0}^{1} 200$."

Subsequent to the date of this act of Parliament a grant was made from the "British Crown" to the Hudsons Bay Company of the exclusive trade with the Indian tribes in the Oregon Territory, subject to a reservation that it shall not operate to the exclusion "of the subjects of any foreign states who, under or by force of any convention for the time being between us and such foreign states, respectively, may be entitled to and shall be engaged in the said trade." It is much to be regretted that while under this act British subjects have enjoyed the protection of British laws and British judicial tribunals throughout the whole of Oregon, American citizens in the same Territory have enjoyed no such protection from their Government. At the same time, the result illustrates the character of our people and their institutions. In spite of this neglect they have multiplied, and their number is rapidly increasing in that Territory. They have made no appeal to arms, but have peacefully fortified themselves in their new homes by the adoption of republican institutions for themselves, furnishing another example of the truth that self-government is inherent in the American breast and must prevail. It is due to them that they should be embraced and protected by our laws. It is deemed important that our laws regulating trade and intercourse with the Indian tribes east of the Rocky Mountains should be extended to such tribes as dwell beyond them. The increasing emigration to Oregon and the care and protection which is due from the Government to its citizens in that distant region make it our duty, as it is our interest, to cultivate amicable relations with the Indian tribes of that Territory. For this purpose I recommend that provision be made for establishing an Indian agency and such subagencies as may be deemed necessary beyond the Rocky Mountains.

For the protection of emigrants whilst on their way to Oregon against the attacks of the Indian tribes occupying the country through which they pass, I recommend that a suitable number of stockades and blockhouse forts be erected along the usual route between our frontier settlements on the Missouri and the Rocky Mountains, and that an adequate force of mounted riflemen be raised to guard and protect them on their journey. The immediate adoption of these recommendations by Congress will not violate the provisions of the existing treaty. It will be

OVERLAND EMIGRATION.

Sutter's discovery of gold in California was known on the Atlantic sea board in the wanter of 1848. Seventeen thousand emigrants immediately set sail for El Dorado. When spring came an equal number of gold hunters started on the arduous journey overland to the Pacifie. Having congregated at points on the Missouri during the winter, the emigrants, in May, began their arduous march over the rolling prairies, usually with eight over to haul their wagons. Before long, however, the weaker animals would perish or be caten for food, and sights of oxen, horses, mules, and dogs yoked together were common. Their route was strewn with the debris of failure ;---wagons, tools, food, impedimenta of every description were cast aside in the frantic effort to get out of the torments of the desert more quickly. When the first of the overland emigrants reached San Francisco, their description of the pitcous plight of those in the rear caused the army commandant there to send troops with supplies for their relief. They found the trails strewn with wreckage and crowded with emigrants marching on foot, with their children and wives following them. Winter caught the rear guard of the emigrants still plodding along, and those who had survived the trial by fire in the desert now underwent the tortures of winter on the plains. By the end of November all the argonauts were safe in San Francisco.

See the articles "California" and "Gold" in the encyclopedic index.

The trek to California is, of course, typical of the westward emigration toward an ever-receding frontier which occurred from the earliest days of the Republic.

One of the agents in civilizing the new territory was the pouy express, carrying passengers, mail, and valuables between settlements. Many thrilling tales are told of the attacks upon the pouy expresses by Indians and also by highwaymen in the days when each man was his own policeman. As the West became more thickly settled, thousands and thousands of the butfalo which had inhabited us plains were killed, until that noble animal became practically extinct. doing nothing more for American citizens than British laws have long since done for British subjects in the same territory.

It requires several months to perform the voyage by sea from the Atlantic States to Oregon, and although we have a large number of whale ships in the Pacific, but few of them afford an opportunity of interchanging intelligence without great delay between our settlements in that distant region and the United States. An overland mail is believed to be entirely practicable, and the importance of establishing such a mail at least once a month is submitted to the favorable consideration of Congress.

It is submitted to the wisdom of Congress to determine whether at their present session, and until after the expiration of the year's notice, any other measures may be adopted consistently with the convention of 1827 for the security of our rights and the government and protection of our citizens in Oregon. That it will ultimately be wise and proper to make liberal grants of land to the patriotic pioneers who amidst privations and dangers lead the way through savage tribes inhabiting the vast wilderness intervening between our frontier settlements and Oregon, and who cultivate and are ever ready to defend the soil, I am fully satisfied. To doubt whether they will obtain such grants as soon as the convention between the United States and Great Britain shall have ceased to exist would be to doubt the justice of Congress; but, pending the year's notice, it is worthy of consideration whether a stipulation to this effect may be made consistently with the spirit of that convention.

The recommendations which I have made as to the best manner of securing our rights in Oregon are submitted to Congress with great deference. Should they in their wisdom devise any other mode better calculated to accomplish the same object, it shall meet with my hearty concurrence.

At the end of the year's notice, should Congress think it proper to make provision for giving that notice, we shall have reached a period when the national rights in Oregon must either be abandoned or firmly maintained. That they can not be abandoned without a sacrifice of both national honor and interest is too clear to admit of doubt.

Oregon is a part of the North American continent, to which, it is confidently affirmed, the title of the United States is the best now in existence. For the grounds on which that title rests I refer you to the correspondence of the late and present Secretary of State with the British plenipotentiary during the negotiation. The British proposition of compromise, which would make the Columbia the line south of 49° , with a trifling addition of detached territory to the United States north of that river, and would leave on the British side two-thirds of the whole Oregon Territory, including the free navigation of the Columbia and all the valuable harbors on the Pacific, can never for a moment be entertained by the United States without an abandonment of their just and clear territorial rights, their own self-respect, and the national honor. For the information of Congress, I communicate herewith the correspondence which took place between the two Governments during the late negotiation.

The rapid extension of our settlements over our territories heretofore unoccupied, the addition of new States to our Confederacy, the expansion of free principles, and our rising greatness as a nation are attracting the attention of the powers of Europe, and lately the doctrine has been broached in some of them of a "balance of power" on this continent to check our advancement. The United States, sincerely desirous of preserving relations of good understanding with all nations, can not in silence permit any European interference on the North American continent, and should any such interference be attempted will be ready to resist it at any and all hazards.

It is well known to the American people and to all nations that this Government has never interfered with the relations subsisting between other governments. We have never made ourselves parties to their wars or their alliances; we have not sought their territories by conquest; we have not mingled with parties in their domestic struggles; and believing our own form of government to be the best, we have never attempted to propagate it by intrigues, by diplomacy, or by force. We may claim on this continent a like exemption from European interference. The nations of America are equally sovereign and independent with those of Europe. They possess the same rights, independent of all foreign interposition, to make war, to conclude peace, and to regulate their internal affairs. The people of the United States can not, therefore, view with indifference attempts of European powers to interfere with the independent action of the nations on this continent. The American system of government is entirely different from that of Europe. Jealousy among the different sovereigns of Europe, lest any one of them might become too powerful for the rest, has caused them anxiously to desire the establishment of what they term the "balance of power." It can not be permitted to have any application on the North American continent, and especially to the United States. We must ever maintain the principle that the people of this continent alone have the right to decide their own destiny. Should any portion of them, constituting an independent state, propose to unite themselves with our Confederacy, this will be a question for them and us to determine without any foreign interposition. We can never consent that European powers shall interfere to prevent such a union because it might disturb the "balance of power" which they may desire to maintain upon this continent. Near a quarter of a century ago the principle was distinctly announced to the world, in the annual message of one of my predecessors, that-

The American continents, by the free and independent condition which they have assumed and maintain, are henceforth not to be considered as subjects for future colonization by any European powers.

This principle will apply with greatly increased force should any European power attempt to establish any new colony in North America. In the existing circumstances of the world the present is deemed a proper occasion to reiterate and reaffirm the principle avowed by Mr. Monroe and to state my cordial concurrence in its wisdom and sound policy. The reassertion of this principle, especially in reference to North America, is at this day but the promulgation of a policy which no European power should cherish the disposition to resist. Existing rights of every European nation should be respected, but it is due alike to our safety and our interests that the efficient protection of our laws should be extended over our whole territorial limits, and that it should be distinctly announced to the world as our settled policy that no future European colony or dominion shall with our consent be planted or established on any part of the North American continent.

A question has recently arisen under the tenth article of the subsisting treaty between the United States and Prussia. By this article the consuls of the two countries have the right to sit as judges and arbitrators "in such differences as may arise between the captains and crews of the vessels belonging to the nation whose interests are committed to their charge without the interference of the local authorities, unless the conduct of the crews or of the captain should disturb the order or tranquillity of the country, or the said consuls should require their assistance to cause their decisions to be carried into effect or supported."

The Prussian consul at New Bedford in June, 1844, applied to Mr. Justice Story to carry into effect a decision made by him between the captain and crew of the Prussian ship *Borussia*, but the request was refused on the ground that without previous legislation by Congress the judiciary did not possess the power to give effect to this article of the treaty. The Prussian Government, through their minister here, have complained of this violation of the treaty, and have asked the Government of the United States to adopt the necessary measures to prevent similar violations hereafter. Good faith to Prussia, as well as to other nations with whom we have similar treaty stipulations, requires that these should be faithfully observed. I have deemed it proper, therefore, to lay the subject before Congress and to recommend such legislation as may be necessary to give effect to these treaty obligations.

By virtue of an arrangement made between the Spanish Government and that of the United States in December, 1831, American vessels, since the 29th of April, 1832, have been admitted to entry in the ports of Spain, including those of the Balearie and Canary islands, on payment of the same tonnage duty of 5 cents per ton, as though they had been Spanish vessels; and this whether our vessels arrive in Spain directly from the United States or indirectly from any other country. When Congress, by the act of 13th July, 1832, gave effect to this arrangement between the two Governments, they confined the reduction of tonnage 73

duty merely to Spanish vessels "coming from a port in Spain," leaving the former discriminating duty to remain against such vessels coming from a port in any other country. It is manifestly unjust that whilst American vessels arriving in the ports of Spain from other countries pay no more duty than Spanish vessels, Spanish vessels arriving in the ports of the United States from other countries should be subjected to heavy discriminating tonnage duties. This is neither equality nor reciprocity, and is in violation of the arrangement concluded in December, 1831, between the two countries. The Spanish Government have made repeated and earnest remonstrances against this inequality, and the favorable attention of Congress has been several times invoked to the subject by my predecessors. I recommend, as an act of justice to Spain, that this inequality be removed by Congress and that the discriminating duties which have been levied under the act of the 13th of July, 1832, on Spanish vessels coming to the United States from any other foreign country be refunded. This recommendation does not embrace Spanish vessels arriving in the United States from Cuba and Porto Rico, which will still remain subject to the provisions of the act of June 30, 1834, concerning tonnage duty on such vessels. By the act of the 14th of July, 1832, coffee was exempted from duty altogether. This exemption was universal, without reference to the country where it was produced or the national character of the vessel in which it was imported. By the tariff act of the 30th of August, 1842, this exemption from duty was restricted to coffee imported in American vessels from the place of its production, whilst coffee imported under all other circumstances was subjected to a duty of 20 per cent ad valorem. Under this act and our existing treaty with the King of the Netherlands Java coffee imported from the European ports of that Kingdom into the United States, whether in Dutch or American vessels, now pays this rate of duty. The Government of the Netherlands complains that such a discriminating duty should have been imposed on coffee the production of one of its colonies, and which is chiefly brought from Java to the ports of that Kingdom and exported from thence to foreign countries. Our trade with the Netherlands is highly beneficial to both countries and our relations with them have ever been of the most friendly character. Under all the circumstances of the case, I recommend that this discrimination should be abolished and that the coffee of Java imported from the Netherlands be placed upon the same footing with that imported directly from Brazil and other countries where it is produced.

Under the eighth section of the tariff act of the 30th of August, 1842, a duty of 15 cents per gallon was imposed on port wine in casks, while on the red wines of several other countries, when imported in casks, a duty of only 6 cents per gallon was imposed. This discrimination, so far as regarded the port wine of Portugal, was deemed a violation of our treaty with that power, which provides that—

No higher or other duties shall be imposed on the importation into the United States of America of any article the growth, produce, or manufacture of the Kingdom

and possessions of Portugal than such as are or shall be payable on the like article being the growth, produce, or manufacture of any other foreign country.

Accordingly, to give effect to the treaty as well as to the intention of Congress, expressed in a proviso to the tariff act itself, that nothing therein contained should be so construed as to interfere with subsisting treaties with foreign nations, a Treasury circular was issued on the 16th of July, 1844, which, among other things, declared the duty on the port wine of Portugal, in casks, under the existing laws and treaty to be 6 cents per gallon, and directed that the excess of duties which had been collected on such wine should be refunded. By virtue of another clause in the same section of the act it is provided that all imitations of port or any other wines "shall be subject to the duty provided for the genuine article." Imitations of port wine, the production of France, are imported to some extent into the United States, and the Government of that country now claims that under a correct construction of the act these imitations ought not to pay a higher duty than that imposed upon the original port wine of Portugal. It appears to me to be unequal and unjust that French imitations of port wine should be subjected to a duty of 15 cents, while the more valuable article from Portugal should pay a duty of 6 cents only per gallon. I therefore recommend to Congress such legislation as may be necessary to correct the inequality.

The late President, in his annual message of December last, recommended an appropriation to satisfy the claims of the Texan Government against the United States, which had been previously adjusted so far as the powers of the Executive extend. These claims arose out of the act of disarning a body of Texan troops under the command of Major Snively by an officer in the service of the United States, acting under the orders of our Government, and the forcible entry into the custom-house at Bryarlys Landing, on Red River, by certain citizens of the United States and taking away therefrom the goods seized by the collector of the customs as forfeited under the laws of Texas. This was a liquidated debt ascertained to be due to Texas when an independent state. Her acceptance of the terms of annexation proposed by the United States does not discharge or invalidate the claim. I recommend that provision be made for its payment.

The commissioner appointed to China during the special session of the Senate in March last shortly afterwards set out on his mission in the United States ship *Columbus*. On arriving at Rio de Janeiro on his passage the state of his health had become so critical that by the advice of his medical attendants he returned to the United States early in the month of October last. Commodore Biddle, commanding the East India Squadron, proceeded on his voyage in the *Columbus*, and was charged by the commissioner with the duty of exchanging with the proper authorities the ratifications of the treaty lately concluded with the Emporer of China. Since the return of the commissioner to the United States his health has been much improved, and he entertains the confident belief that he will soon be able to proceed on his mission.

Unfortunately, differences continue to exist among some of the nations of South America which, following our example, have established their independence, while in others internal dissensions prevail. It is natural that our sympathies should be warmly enlisted for their welfare; that we should desire that all controversies between them should be amicably adjusted and their Governments administered in a manner to protect the rights and promote the prosperity of their people. It is contrary, however, to our settled policy to interfere in their controversies, whether external or internal.

I have thus adverted to all the subjects connected with our foreign relations to which I deem it necessary to call your attention. Our policy is not only peace with all, but good will toward all the powers of the earth. While we are just to all, we require that all shall be just to us. Excepting the differences with Mexico and Great Britain, our relations with all civilized nations are of the most satisfactory character. It is hoped that in this enlightened age these differences may be amicably adjusted.

The Secretary of the Treasury in his annual report to Congress will communicate a full statement of the condition of our finances. The imports for the fiscal year ending on the 30th of June last were of the value of \$117,254,564, of which the amount exported was \$15,346,830, leaving a balance of \$101,907,734 for domestic consumption. The exports for the same year were of the value of \$114,646,606, of which the amount of domestic articles was \$99,299,776. The receipts into the Treasury during the same year were \$29,769,133.56, of which there were derived from customs \$27,528,112.70, from sales of public lands \$2,077,022.30, and from incidental and miscellaneous sources \$163,998.56. The expenditures for the same period were \$29,968,206.98, of which \$8,588,157.62 were applied to the payment of the public debt. The balance in the Treasury on the 1st of July last was \$7,658,306.22. The amount of the public debt remaining unpaid on the 1st of October last was \$17,075,445.52. Further payments of the public debt would have been made, in anticipation of the period of its reimbursement under the authority conferred upon the Secretary of the Treasury by the acts of July 21, 1841, and of April 15, 1842, and March 3, 1843, had not the unsettled state of our relations with Mexico menaced hostile collision with that power. In view of such a contingency it was deemed prudent to retain in the Treasury an amount unusually large for ordinary purposes.

A few years ago our whole national debt growing out of the Revolution and the War of 1812 with Great Britain was extinguished, and we presented to the world the rare and noble spectacle of a great and growing people who had fully discharged every obligation. Since that time the existing debt has been contracted, and, small as it is in comparison

with the similar burdens of most other nations, it should be extinguished at the earliest practicable period. Should the state of the country permit, and especially if our foreign relations interpose no obstacle, it is contemplated to apply all the moneys in the Treasury as they accrue, beyond what is required for the appropriations by Congress, to its liquidation. I cherish the hope of soon being able to congratulate the country on its recovering once more the lofty position which it so recently occupied. Our country, which exhibits to the world the benefits of self-government, in developing all the sources of national prosperity owes to mankind the permanent example of a nation free from the blighting influence of a public debt.

The attention of Congress is invited to the importance of making suitable modifications and reductions of the rates of duty imposed by our present tariff laws. The object of imposing duties on imports should be to raise revenue to pay the necessary expenses of Government. Congress may undoubtedly, in the exercise of a sound discretion, discriminate in arranging the rates of duty on different articles, but the discriminations should be within the revenue standard and be made with the view to raise money for the support of Government.

It becomes important to understand distinctly what is meant by a revenue standard the maximum of which should not be exceeded in the rates of duty imposed. It is conceded, and experience proves, that duties may be laid so high as to diminish or prohibit altogether the importation of any given article, and thereby lessen or destroy the revenue which at lower rates would be derived from its importation. Such duties exceed the revenue rates and are not imposed to raise money for the support of Government. If Congress levy a duty for revenue of 1 per cent on a given article, it will produce a given amount of money to the Treasury and will incidentally and necessarily afford protection or advantage to the amount of 1 per cent to the home manufacturer of a similar or like article over the importer. If the duty be raised to 10 per cent, it will produce a greater amount of money and afford greater protection. If it be still raised to 20, 25, or 30 per cent, and if as it is raised the revenue derived from it is found to be increased, the protection or advantage will also be increased; but if it be raised to 31 per cent, and it is found that the revenue produced at that rate is less than at 30 per cent, it ceases to be a revenue duty. The precise point in the ascending scale of duties at which it is ascertained from experience that the revenue is greatest is the maximum rate of duty which can be laid for the bona fide purpose of collecting money for the support of Government. To raise the duties higher than that point, and thereby diminish the amount collected, is to levy them for protection merely, and not for revenue. As long, then, as Congress may gradually increase the rate of duty on a given article, and the revenue is increased by such increase of duty, they are within the revenue standard. When they go beyond that point, and as they increase

the duties, the revenue is diminished or destroyed; the act ceases to have for its object the raising of money to support Government, but is for protection merely. It does not follow that Congress should levy the highest duty on all articles of import which they will bear within the revenue standard, for such rates would probably produce a much larger amount than the economical administration of the Government would require. Nor does it follow that the duties on all articles should be at the sameor a horizontal rate. Some articles will bear a much higher revenue duty than others. Below the maximum of the revenue standard Congress may and ought to discriminate in the rates imposed, taking care so to adjust them on different articles as to produce in the aggregate the amount which, when added to the proceeds of the sales of public lands, may be needed to pay the economical expenses of the Government.

In levying a tariff of duties Congress exercise the taxing power, and for purposes of revenue may select the objects of taxation. They may exempt certain articles altogether and permit their importation free of duty. On others they may impose low duties. In these classes should be embraced such articles of necessity as are in general use, and especially such as are consumed by the laborer and poor as well as by the wealthy Care should be taken that all the great interests of the councitizen. try, including manufactures, agriculture, commerce, navigation, and the mechanic arts, should, as far as may be practicable, derive equal advantages from the incidental protection which a just system of revenue duties may afford. Taxation, direct or indirect, is a burden, and it should be so imposed as to operate as equally as may be on all classes in the proportion of their ability to bear it. To make the taxing power an actual benefit to one class necessarily increases the burden of the others beyond their proportion, and would be manifestly unjust. The terms "protection to domestic industry" are of popular import, but they should apply under a just system to all the various branches of industry in our country. The farmer or planter who toils yearly in his fields is engaged in "domestic industry," and is as much entitled to have his labor "protected" as the manufacturer, the man of commerce, the navigator, or the mechanic, who are engaged also in "domestic industry" in their different pursuits. The joint labors of all these classes constitute the aggregate of the "domestic industry" of the nation, and they are equally entitled to the nation's "protection." No one of them can justly claim to be the exclusive recipient of "protection," which can only be afforded by increasing burdens on the "domestic industry" of the others.

If these views be correct, it remains to inquire how far the tariff act of 1842 is consistent with them. That many of the provisions of that act are in violation of the cardinal principles here laid down all must concede. The rates of duty imposed by it on some articles are prohibitory and on others so high as greatly to diminish importations and to produce a less amount of revenue than would be derived from lower rates. They operate

as "protection merely" to one branch of "domestic industry" by taxing other branches.

By the introduction of minimums, or assumed and false values, and by the imposition of specific duties the injustice and inequality of the act of 1842 in its practical operations on different classes and pursuits are seen and felt. Many of the oppressive duties imposed by it under the operation of these principles range from 1 per cent to more than 200 per cent. They are prohibitory on some articles and partially so on others, and bear most heavily on articles of common necessity and but lightly on articles of luxury. It is so framed that much the greatest burden which it imposes is thrown on labor and the poorer classes, who are least able to bear it, while it protects capital and exempts the rich from paying their just proportion of the taxation required for the support of Government. While it protects the capital of the wealthy manufacturer and increases his profits, it does not benefit the operatives or laborers in his employment, whose wages have not been increased by it. Articles of prime necessity or of coarse quality and low price, used by the masses of the people, are in many instances subjected by it to heavy taxes, while articles of finer quality and higher price, or of luxury, which can be used only by the opulent, are lightly taxed. It imposes heavy and unjust burdens on the farmer, the planter, the commercial man, and those of all other pursuits except the capitalist who has made his investments in manufac-All the great interests of the country are not as nearly as may tures. be practicable equally protected by it.

The Government in theory knows no distinction of persons or classes, and should not bestow upon some favors and privileges which all others may not enjoy. It was the purpose of its illustrious founders to base the institutions which they reared upon the great and unchanging principles of justice and equity, conscious that if administered in the spirit in which they were conceived they would be felt only by the benefits which they diffused, and would secure for themselves a defense in the hearts of the people more powerful than standing armies and all the means and appliances invented to sustain governments founded in injustice and oppression.

The well-known fact that the tariff act of 1842 was passed by a majority of one vote in the Senate and two in the House of Representatives, and that some of those who felt themselves constrained, under the peculiar circumstances existing at the time, to vote in its favor, proclaimed its defects and expressed their determination to aid in its modification on the first opportunity, affords strong and conclusive evidence that it was not intended to be permanent, and of the expediency and necessity of its thorough revision.

In recommending to Congress a reduction of the present rates of duty and a revision and modification of the act of 1842, I am far from entertaining opinions unfriendly to the manufacturers. On the contrary, I desire to see them prosperous as far as they can be so without imposing unequal burdens on other interests. The advantage under any system of indirect taxation, even within the revenue standard, must be in favor of the manufacturing interest, and of this no other interest will complain.

I recommend to Congress the abolition of the minimum principle, or assumed, arbitrary, and false values, and of specific duties, and the substitution in their place of ad valorem duties as the fairest and most equitable indirect tax which can be imposed. By the ad valorem principle all articles are taxed according to their cost or value, and those which are of inferior quality or of small cost bear only the just proportion of the tax with those which are of superior quality or greater cost. The articles consumed by all are taxed at the same rate. A system of ad valorem revenue duties, with proper discriminations and proper guards against frauds in collecting them, it is not doubted will afford ample incidental advantages to the manufacturers and enable them to derive as great profits as can be derived from any other regular business. It is believed that such a system strictly within the revenue standard will place the manufacturing interests on a stable footing and inure to their permanent advantage, while it will as nearly as may be practicable extend to all the great interests of the country the incidental protection which can be afforded by our revenue laws. Such a system, when once firmly established, would be permanent, and not be subject to the constant complaints, agitations, and changes which must ever occur when duties are not laid for revenue, but for the "protection merely" of a favored interest.

In the deliberations of Congress on this subject it is hoped that a spirit of mutual concession and compromise between conflicting interests may prevail, and that the result of their labors may be crowned with the happiest consequences.

By the Constitution of the United States it is provided that "no money shall be drawn from the Treasury but in consequence of appropriations made by law." A public treasury was undoubtedly contemplated and intended to be created, in which the public money should be kept from the period of collection until needed for public uses. In the collection and disbursement of the public money no agencies have ever been employed by law except such as were appointed by the Government, directly responsible to it and under its control. The safe-keeping of the public money should be confided to a public treasury created by law and under like responsibility and control. It is not to be imagined that the framers of the Constitution could have intended that a treasury should be created as a place of deposit and safe-keeping of the public money which was irresponsible to the Government. The first Congress under the Constitution, by the act of the 2d of September, 1789, "to establish the Treasury Department," provided for the appointment of a Treasurer, and made it his duty "to receive and keep the moneys of the United States" and "at all times to submit to the Secretary of the Treasury and the Comptroller, or either of them, the inspection of the moneys in his hands."

That banks, national or State, could not have been intended to be used as a substitute for the Treasury spoken of in the Constitution as keepers of the public money is manifest from the fact that at that time there was no national bank, and but three or four State banks, of limited capital, existed in the country. Their employment as depositories was at first resorted to to a limited extent, but with no avowed intention of continuing them permanently in place of the Treasury of the Constitution. When they were afterwards from time to time employed, it was from motives of supposed convenience. Our experience has shown that when banking corporations have been the keepers of the public money, and been thereby made in effect the Treasury, the Government can have no guaranty that it can command the use of its own money for public purposes. The late Bank of the United States proved to be faithless. The State banks which were afterwards employed were faithless. But a few years ago, with millions of public money in their keeping, the Government was brought almost to bankruptcy and the public credit seriously impaired because of their inability or indisposition to pay on demand to the public creditors in the only currency recognized by the Constitution. Their failure occurred in a period of peace, and great inconvenience and loss were suffered by the public from it. Had the country been involved in a foreign war, that inconvenience and loss would have been much greater, and might have resulted in extreme public calamity. The public money should not be mingled with the private funds of banks or individuals or be used for private purposes. When it is placed in banks for safe-keeping, it is in effect loaned to them without interest, and is loaned by them upon interest to the borrowers from them. The public money is converted into banking capital, and is used and loaned out for the private profit of bank stockholders, and when called for, as was the case in 1837, it may be in the pockets of the borrowers from the banks instead of being in the public Treasury contemplated by the Constitution. The framers of the Constitution could never have intended that the money paid into the Treasury should be thus converted to private use and placed beyond the control of the Government.

Banks which hold the public money are often tempted by a desire of gain to extend their loans, increase their circulation, and thus stimulate, if not produce, a spirit of speculation and extravagance which sooner or later must result in ruin to thousands. If the public money be not permitted to be thus used, but be kept in the Treasury and paid out to the public creditors in gold and silver, the temptation afforded by its deposit with banks to an undue expansion of their business would be checked, while the amount of the constitutional currency left in circulation would be enlarged by its employment in the public collections and disbursements, and the banks themselves would in consequence be found in a safer and sounder condition. At present State banks are employed as depositories, but without adequate regulation of law whereby the public money can be secured against the casualties and excesses, revulsions, suspensions, and defalcations to which from overissues, overtrading, an inordinate desire for gain, or other causes they are constantly exposed. The Secretary of the Treasury has in all cases when it was practicable taken collateral security for the amount which they hold, by the pledge of stocks of the United States or such of the States as were in good credit. Some of the deposit banks have given this description of security and others have declined to do so.

Entertaining the opinion that "the separation of the moneys of the Government from banking institutions is indispensable for the safety of the funds of the Government and the rights of the people," I recommend to Congress that provision be made by law for such separation, and that a constitutional treasury be created for the safe-keeping of the public money. The constitutional treasury recommended is designed as a secure depository for the public money, without any power to make loans or discounts or to issue any paper whatever as a currency or circulation. I can not doubt that such a treasury as was contemplated by the Constitution should be independent of all banking corporations. The money of the people should be kept in the Treasury of the people created by law, and be in the custody of agents of the people chosen by themselves according to the forms of the Constitution-agents who are directly responsible to the Government, who are under adequate bonds and oaths, and who are subject to severe punishments for any embezzlement, private use, or misapplication of the public funds, and for any failure in other respects to perform their duties. To say that the people or their Government are incompetent or not to be trusted with the custody of their own money in their own Treasury, provided by themselves, but must rely on the presidents, cashiers, and stockholders of banking corporations, not appointed by them nor responsible to them, would be to concede that they are incompetent for self-government.

In recommending the establishment of a constitutional treasury in which the public money shall be kept, I desire that adequate provision be made by law for its safety and that all Executive discretion or control over it shall be removed, except such as may be necessary in directing its disbursement in pursuance of appropriations made by law.

Under our present land system, limiting the minimum price at which the public lands can be entered to \$1.25 per acre, large quantities of lands of inferior quality remain unsold because they will not command that price. From the records of the General Land Office it appears that of the public lands remaining unsold in the several States and Territories in which they are situated, 39,105,577 acres have been in the market subject to entry more than twenty years, 49,638,644 acres for more than fifteen years, 73,074,600 acres for more than ten years, and 106,176,961 acres for more than five years. Much the largest portion of these lands will continue to be unsalable at the minimum price at which they are permitted to be sold so long as large territories of lands from which the more valuable portions have not been selected are annually brought into market by the Government. With the view to the sale and settlement of these inferior lands, I recommend that the price be graduated and reduced below the present minimum rate, confining the sales at the reduced prices to settlers and cultivators, in limited quantities. If graduated and reduced in price for a limited term to \$1 per acre, and after the expiration of that period for a second and third term to lower rates, a large portion of these lands would be purchased, and many worthy citizens who are unable to pay higher rates could purchase homes for themselves and their families. By adopting the policy of graduation and reduction of price these inferior lands will be sold for their real value, while the States in which they lie will be freed from the inconvenience, if not injustice, to which they are subjected in consequence of the United States continuing to own large quantities of the public lands within their borders not liable to taxation for the support of their local governments.

I recommend the continuance of the policy of granting preemptions in its most liberal extent to all those who have settled or may hereafter settle on the public lands, whether surveyed or unsurveyed, to which the Indian title may have been extinguished at the time of settlement. It has been found by experience that in consequence of combinations of purchasers and other causes a very small quantity of the public lands, when sold at public auction, commands a higher price than the minimum rates established by law. The settlers on the public lands are, however, but rarely able to secure their homes and improvements at the public sales at that rate, because these combinations, by means of the capital they command and their superior ability to purchase, render it impossible for the settler to compete with them in the market. By putting down all competition these combinations of capitalists and speculators are usually enabled to purchase the lands, including the improvements of the settlers, at the minimum price of the Government, and either turn them out of their homes or extort from them, according to their ability to pay, double or quadruple the amount paid for them to the Government. It is to the enterprise and perseverance of the hardy pioneers of the West, who penetrate the wilderness with their families, suffer the dangers, the privations, and hardships attending the settlement of a new country, and prepare the way for the body of emigrants who in the course of a few years usually follow them, that we are in a great degree indebted for the rapid extension and aggrandizement of our country.

Experience has proved that no portion of our population are more patriotic than the hardy and brave men of the frontier, or more ready to obey the call of their country and to defend her rights and her honor whenever and by whatever enemy assailed. They should be protected from the grasping speculator and secured, at the minimum price of the public lands, in the humble homes which they have improved by their labor. With this end in view, all vexatious or unnecessary restrictions imposed upon them by the existing preemption laws should be repealed or modified. It is the true policy of the Government to afford facilities to its citizens to become the owners of small portions of our vast public domain at low and moderate rates.

The present system of managing the mineral lands of the United States is believed to be radically defective. More than 1,000,000 acres of the public lands, supposed to contain lead and other minerals, have been reserved from sale, and numerous leases upon them have been granted to individuals upon a stipulated rent. The system of granting leases has proved to be not only unprofitable to the Government, but unsatisfactory to the citizens who have gone upon the lands, and must, if continued, lay the foundation of much future difficulty between the Government and the lessees. According to the official records, the amount of rents received by the Government for the years 1841, 1842, 1843, and 1844 was \$6,354.74, while the expenses of the system during the same period, including salaries of superintendents, agents, clerks, and incidental expenses, were \$26,111.11, the income being less than one-fourth of the To this pecuniary loss may be added the injury sustained by expenses. the public in consequence of the destruction of timber and the careless and wasteful manner of working the mines. The system has given rise to much litigation between the United States and individual citizens, producing irritation and excitement in the mineral region, and involving the Government in heavy additional expenditures. It is believed that similar losses and embarrassments will continue to occur while the present system of leasing these lands remains unchanged. These lands are now under the superintendence and care of the War Department, with the ordinary duties of which they have no proper or natural connection. I recommend the repeal of the present system, and that these lands be placed under the superintendence and management of the General Land Office, as other public lands, and be brought into market and sold upon such terms as Congress in their wisdom may prescribe, reserving to the Government an equitable percentage of the gross amount of mineral product, and that the preemption principle be extended to resident miners and settlers upon them at the minimum price which may be established by Congress.

I refer you to the accompanying report of the Secretary of War for information respecting the present situation of the Army and its operations during the past year, the state of our defenses, the condition of the public works, and our relations with the various Indian tribes within our limits or upon our borders. I invite your attention to the suggestions contained in that report in relation to these prominent objects of national interest. When orders were given during the past summer for concentrating a military force on the western frontier of Texas, our troops were widely dispersed and in small detachments, occupying posts remote from

each other. The prompt and expeditious manner in which an army embracing more than half our peace establishment was drawn together on an emergency so sudden reflects great credit on the officers who were intrusted with the execution of these orders, as well as upon the discipline of the Army itself. To be in strength to protect and defend the people and territory of Texas in the event Mexico should commence hostilities or invade her territories with a large army, which she threatened, I authorized the general assigned to the command of the army of occupation to make requisitions for additional forces from several of the States nearest the Texan territory, and which could most expeditiously furnish them, if in his opinion a larger force than that under his command and the auxiliary aid which under like circumstances he was authorized to receive from Texas should be required. The contingency upon which the exercise of this authority depended has not occurred. The circumstances under which two companies of State artillery from the city of New Orleans were sent into Texas and mustered into the service of the United States are fully stated in the report of the Secretary of War. I recommend to Congress that provision be made for the payment of these troops, as well as a small number of Texan volunteers whom the commanding general thought it necessary to receive or muster into our service.

During the last summer the First Regiment of Dragoons made extensive excursions through the Indian country on our borders, a part of them advancing nearly to the possessions of the Hudsons Bay Company in the north, and a part as far as the South Pass of the Rocky Mountains and the head waters of the tributary streams of the Colorado of the West. The exhibition of this military force among the Indian tribes in those distant regions and the councils held with them by the commanders of the expeditions, it is believed, will have a salutary influence in restraining them from hostilities among themselves and maintaining friendly relations between them and the United States. An interesting account of one of these excursions accompanies the report of the Secretary of War. Under the directions of the War Department Brevet Captain Frémont, of the Corps of Topographical Engineers, has been employed since 1842 in exploring the country west of the Mississippi and beyond the Rocky Mountains. Two expeditions have already been brought to a close, and the reports of that scientific and enterprising officer have furnished much interesting and valuable information. He is now engaged in a third expedition, but it is not expected that this arduous service will be completed in season to enable me to communicate the result to Congress at the present session.

Our relations with the Indian tribes are of a favorable character. The policy of removing them to a country designed for their permanent residence west of the Mississippi, and without the limits of the organized States and Territories, is better appreciated by them than it was a few years ago, while education is now attended to and the habits of civilized life are gaining ground among them. Serious difficulties of long standing continue to distract the several parties into which the Cherokees are unhappily divided. The efforts of the Government to adjust the difficulties between them have heretofore proved unsuccessful, and there remains no probability that this desirable object can be accomplished without the aid of further legislation by Congress. I will at an early period of your session present the subject for your consideration, accompanied with an exposition of the complaints and claims of the several parties into which the nation is divided, with a view to the adoption of such measures by Congress as may enable the Executive to do justice to them, respectively, and to put an end, if possible, to the dissensions which have long prevailed and still prevail among them.

I refer you to the report of the Secretary of the Navy for the present condition of that branch of the national defense and for grave suggestions having for their object the increase of its efficiency and a greater economy in its management. During the past year the officers and men have performed their duty in a satisfactory manner. The orders which have been given have been executed with promptness and fidelity. A larger force than has often formed one squadron under our flag was readily concentrated in the Gulf of Mexico, and apparently without unusual effort. It is especially to be observed that notwithstanding the union of so considerable a force, no act was committed that even the jealousy of an irritated power could construe as an act of aggression, and that the commander of the squadron and his officers, in strict conformity with their instructions, holding themselves ever ready for the most active duty, have achieved the still purer glory of contributing to the preservation of peace. It is believed that at all our foreign stations the honor of our flag has been maintained and that generally our ships of war have been distinguished for their good discipline and order. I am happy to add that the display of maritime force which was required by the events of the summer has been made wholly within the usual appropriations for the service of the year, so that no additional appropriations are required.

The commerce of the United States, and with it the navigating interests, have steadily and rapidly increased since the organization of our Government, until, it is believed, we are now second to but one power in the world, and at no distant day we shall probably be inferior to none. Exposed as they must be, it has been a wise policy to afford to these important interests protection with our ships of war distributed in the great highways of trade throughout the world. For more than thirty years appropriations have been made and annually expended for the gradual increase of our naval forces. In peace our Navy performs the important duty of protecting our commerce, and in the event of war will be, as it has been, a most efficient means of defense.

The successful use of steam navigation on the ocean has been followed by the introduction of war steamers in great and increasing numbers into

the navies of the principal maritime powers of the world. A due regard to our own safety and to an efficient protection to our large and increasing commerce demands a corresponding increase on our part. No country has greater facilities for the construction of vessels of this description than ours, or can promise itself greater advantages from their employ-They are admirably adapted to the protection of our commerce, ment. to the rapid transmission of intelligence, and to the coast defense. In pursuance of the wise policy of a gradual increase of our Navy, large supplies of live-oak timber and other materials for shipbuilding have been collected and are now under shelter and in a state of good preservation, while iron steamers can be built with great facility in various parts of the Union. The use of iron as a material, especially in the construction of steamers which can enter with safety many of the harbors along our coast now inaccessible to vessels of greater draft, and the practicability of constructing them in the interior, strongly recommend that liberal appropriations should be made for this important object. Whatever may have been our policy in the earlier stages of the Government, when the nation was in its infancy, our shipping interests and commerce comparatively small, our resources limited, our population sparse and scarcely extending beyond the limits of the original thirteen States, that policy must be essentially different now that we have grown from three to more than twenty millions of people, that our commerce, carried in our own ships, is found in every sea, and that our territorial boundaries and settlements have been so greatly expanded. Neither our commerce nor our long line of coast on the ocean and on the Lakes can be successfully defended against foreign aggression by means of fortifications alone. These are essential at important commercial and military points, but our chief reliance for this object must be on a well-organized, efficient navy. The benefits resulting from such a navy are not confined to the Atlantic States. The productions of the interior which seek a market abroad are directly dependent on the safety and freedom of our commerce. The occupation of the Balize below New Orleans by a hostile force would embarrass, if not stagnate, the whole export trade of the Mississippi and affect the value of the agricultural products of the entire valley of that mighty river and its tributaries.

It has never been our policy to maintain large standing armies in time of peace. They are contrary to the genius of our free institutions, would impose heavy bardens on the people and be dangerous to public liberty. Our reliance for protection and defense on the land must be mainly on our citizen soldiers, who will be ever ready, as they ever have been ready in times past, to rush with alacrity, at the call of their country, to her defense. This description of force, however, can not defend our coast, harbors, and inland seas, nor protect our commerce on the ocean or the Lakes. These must be protected by our Navy.

Considering an increased naval force, and especially of steam vessels,

corresponding with our growth and importance as a nation, and proportioned to the increased and increasing naval power of other nations, of vast importance as regards our safety, and the great and growing interests to be protected by it, I recommend the subject to the favorable consideration of Congress.

The report of the Postmaster-General herewith communicated contains a detailed statement of the operations of his Department during the past year. It will be seen that the income from postages will fall short of the expenditures for the year between \$1,000,000 and \$2,000,000. This deficiency has been caused by the reduction of the rates of postage, which was made by the act of the 3d of March last. No principle has been more generally acquiesced in by the people than that this Department should sustain itself by limiting its expenditures to its income. Congress has never sought to make it a source of revenue for general purposes except for a short period during the last war with Great Britain, nor should it ever become a charge on the general Treasury. If Congress shall adhere to this principle, as I think they ought, it will be necessary either to curtail the present mail service so as to reduce the expenditures, or so to modify the act of the 3d of March last as to improve its revenues. The extension of the mail service and the additional facilities which will be demanded by the rapid extension and increase of population on our western frontier will not admit of such curtailment as will materially reduce the present expenditures. In the adjustment of the tariff of postages the interests of the people demand that the lowest rates be adopted which will produce the necessary revenue to meet the expenditures of the Department. I invite the attention of Congress to the suggestions of the Postmaster-General on this subject, under the belief that such a modification of the late law may be made as will yield sufficient revenue without further calls on the Treasury, and with very little change in the present rates of postage. Proper measures have been taken in pursuance of the act of the 3d of March last for the establishment of lines of mail steamers between this and foreign countries. The importance of this service commends itself strongly to favorable consideration.

With the growth of our country the public business which devolves on the heads of the several Executive Departments has greatly increased. In some respects the distribution of duties among them seems to be incongruous, and many of these might be transferred from one to another with advantage to the public interests. A more auspicious time for the consideration of this subject by Congress, with a view to system in the organization of the several Departments and a more appropriate division of the public business, will not probably occur.

The most important duties of the State Department relate to our foreign affairs. By the great enlargement of the family of nations, the increase of our commerce, and the corresponding extension of our consular system the business of this Department has been greatly increased. In its present organization many duties of a domestic nature and consisting of details are devolved on the Secretary of State, which do not appropriately belong to the foreign department of the Government and may properly be transferred to some other Department. One of these grows out of the present state of the law concerning the Patent Office, which a few years since was a subordinate clerkship, but has become a distinct bureau of great importance. With an excellent internal organization, it is still connected with the State Department. In the transaction of its business questions of much importance to inventors and to the community frequently arise, which by existing laws are referred for decision to a board of which the Secretary of State is a member. These questions are legal, and the connection which now exists between the State Department and the Patent Office may with great propriety and advantage be transferred to the Attorney-General.

In his last annual message to Congress Mr. Madison invited attention to a proper provision for the Attorney-General as "an important improvement in the executive establishment." This recommendation was repeated by some of his successors. The official duties of the Attorney-General have been much increased within a few years, and his office has become one of great importance. His duties may be still further increased with advantage to the public interests. As an executive officer his residence and constant attention at the seat of Government are required. Legal questions involving important principles and large amounts of public money are constantly referred to him by the Presideut and Executive Departments for his examination and decision, The public business under his official management before the judiciary has been so augmented by the extension of our territory and the acts of Congress authorizing suits against the United States for large bodies of valuable public lands as greatly to increase his labors and responsibilities. I therefore recommend that the Attorney-General be placed on the same footing with the heads of the other Executive Departments, with such subordinate officers provided by law for his Department as may be required to discharge the additional duties which have been or may be devolved upon him.

Congress possess the power of exclusive legislation over the District of Columbia, and I commend the interests of its inhabitants to your favorable consideration. The people of this District have no legislative body of their own, and must confide their local as well as their general interests to representatives in whose election they have no voice and over whose official conduct they have no control. Each member of the National Legislature should consider himself as their immediate representative, and should be the more ready to give attention to their interests and wants because he is not responsible to them. I recommend that a liberal and generous spirit may characterize your measures in relation to them. I shall be ever disposed to show a proper regard for their wishes and, within constitutional limits, shall at all times cheerfully cooperate with you for the advancement of their welfare.

I trust it may not be deemed inappropriate to the occasion for me to dwell for a moment on the memory of the most eminent citizen of our country who during the summer that is gone by has descended to the tomb. The enjoyment of contemplating, at the advanced age of near fourscore years, the happy condition of his country cheered the last hours of Andrew Jackson, who departed this life in the tranquil hope of a blessed immortality. His death was happy, as his life had been eminently useful. He had an unfaltering confidence in the virtue and capacity of the people and in the permanence of that free Government which he had largely contributed to establish and defend. His great deeds had secured to him the affections of his fellow-citizens, and it was his happiness to witness the growth and glory of his country, which he loved so well. He departed amidst the benedictions of millions of free-The nation paid its tribute to his memory at his tomb. Coming men. generations will learn from his example the love of country and the rights of man. In his language on a similar occasion to the present, "I now commend you, fellow-citizens, to the guidance of Almighty God, with a full reliance on His merciful providence for the maintenance of our free institutions, and with an earnest supplication that whatever errors it may be my lot to commit in discharging the arduous duties which have devolved on me will find a remedy in the harmony and wisdom of your counsels."

JAMES K. POLK.

SPECIAL MESSAGES.

WASHINGTON, December 9, 1845.

To the Senate and House of Representatives:

I communicate herewith a letter received from the President of the existing Government of the State of Texas, transmitting duplicate copies of the constitution formed by the deputies of the people of Texas in convention assembled, accompanied by official information that the said constitution had been ratified, confirmed, and adopted by the people of Texas themselves, in accordance with the joint resolution for annexing Texas to the United States, and in order that Texas might be admitted as one of the States of that Union. IAMES K. POLK.

WASHINGTON, December 10, 1845.

To the Senate of the United States:

I transmit herewith a report of the Secretary of War, in answer to a resolution of the Senate of the 4th instant, calling for information "with

respect to the practicability and utility of a fort or forts on Ship Island, on the coast of Mississippi, with a view to the protection of said coast."

JAMES K. POLK.

WASHINGTON, December 15, 1845.

To the Senate of the United States:

I herewith communicate to the Senate, for its consideration, a convention signed on the 14th May of the present year by the minister of the United States at Berlin with the minister of Saxony at the same Court, for the mutual abolition of the *droit d'aubaine*, *droit de détraction*, and taxes on emigration between the United States and Saxony; and I communicate with the convention an explanatory dispatch of the minister of the United States, dated on the 14th May, 1845, and numbered 267.

JAMES K. POLK.

WASHINGTON, December 16, 1845.

To the Senate of the United States:

I herewith communicate to the Senate, for its consideration, a convention concluded and signed at Berlin on the 29th day of January, 1845, between the United States and Prussia, together with certain other German States, for the mutual extradition of fugitives from justice in certain cases; and I communicate with the convention the correspondence necessary to explain it.

In submitting this convention to the Senate I deem it proper to call their attention to the third article, by which it is stipulated that "none of the contracting parties shall be bound to deliver up its own citizens or subjects under the stipulations of this convention."

No such reservation is to be found in our treaties of extradition with Great Britain and France, the only two nations with whom we have concluded such treaties. These provide for the surrender of all persons who are fugitives from justice, without regard to the country to which they may belong. Under this article, if German subjects of any of the parties to the convention should commit crimes within the United States and fly back to their native country from justice, they would not be surrendered. This is clear in regard to all such Germans as shall not have been naturalized under our laws. But even after naturalization difficult and embarrassing questions might arise between the parties. These German powers, holding the doctrine of perpetual allegiance, might refuse to surrender German naturalized citizens, whilst we must ever maintain the principle that the rights and duties of such citizens are the same as if they had been born in the United States.

I would also observe that the fourth article of the treaty submitted contains a provision not to be found in our conventions with Great Britain and France.

JAMES K. POLK.

WASHINGTON, December 16, 1845.

To the Senate of the United States:

I herewith transmit a report from the Secretary of State, containing the information called for by the resolution of the Senate of the 8th of January last, in relation to the claim of the owners of the brig *General Armstrong* against the Government of Portugal.*

JAMES K. POLK.

WASHINGTON, December 19, 1845.

To the House of Representatives:

I communicate to the House of Representatives, in reply to their resolution of the 25th of February last, a report from the Secretary of State, together with the correspondence of George W. Slacum, late consul of the United States at Rio de Janeiro, with the Department of State, relating to the African slave trade.

JAMES K. POLK.

WASHINGTON, December 22, 1845.

WASHINGTON, January 3, 1846.

To the Congress of the United States:

I transmit to Congress a communication from the Secretary of State, with a statement of the expenditures from the appropriation made by the act entitled "An act providing the means of future intercourse between the United States and the Government of China," approved the 3d of March, 1843.

JAMES K. POLK.

To the Senate of the United States:

I transmit to the Senate a report of the Secretary of the Navy, communicating the information called for by their resolution of the 18th of December, 1845, in relation to the "number of agents now employed for the preservation of timber, their salaries, the authority of law under which they are paid, and the allowances of every description made within the last twenty years in the settlement of the accounts of said agents."

JAMES K. POLK.

WASHINGTON, January 6, 1846.

To the Senate of the United States:

I communicate to the Senate the information called for by their resolution of December 31, 1845, "requesting the President to cause to be communicated to the Senate copies of the correspondence between the

⁴ For failing to protect the American armed brig *General Armstrong*, while lying in the port of Fayal, Azores, from attack by British armed ships on September 26, 1814.

James K. Polk

Attorney-General and the Solicitor of the Treasury and the judicial officers of Florida in relation to the authority of the Territorial judges as Federal judges since the 3d of March, 1845."

JAMES K. POLK.

WASHINGTON, January 12, 1846.

To the Senate of the United States:

I nominate the persons named in the accompanying list* of promotions and appointments in the Army of the United States to the several grades annexed to their names, as proposed by the Secretary of War.

JAMES K. POLK.

WAR DEPARTMENT, January 8, 1846.

The PRESIDENT OF THE UNITED STATES.

SIR: I have the honor respectfully to propose for your approbation the annexed list* of officers for promotion and persons for appointment in the Army of the United States.

I am, sir, with great respect, your obedient servant, W. L. MARCY.

ADJUTANT-GENERAL'S OFFICE, Washington, January 8, 1846.

Hon. W. L. MARCY,

Secretary of War.

SIR: I respectfully submit the accompanying list * of promotions and appointments to fill the vacancies in the Army which are known to have happened since the date of the last list, December 12, 1845. The promotions are all regular except that of Captain Martin Scott, Fifth Infantry, whose name, agreeably to the decision of the President and your instructions, is submitted to fill the vacancy of major in the First Regiment of Infantry (*vice* Dearborn, promoted), over the two senior captains of infantry, Captain John B. Clark, of the Third Regiment, and Brevet Major Thomas Noel, of the Sixth. The reasons for this departure from the ordinary course (as in other like cases of disability) are set forth in the Adjutant-General's report of the 27th ultimo and the General in Chief's indorsement thereon, of which copies are herewith respectfully annexed, marked A.

I am, sir, with great respect, your obedient servant,

R. JONES, Adjutant-General.

А.

ADJUTANT-GENERAL'S OFFICE, Washington, December 27, 1845.

Major-General WINFIELD SCOTT, Commanding the Army.

SIR: The death of Lieutenant-Colonel Hoffman, Seventh Infantry, on the 26th ultimo, having caused a vacancy in the grade of major, to which, under the rule, Captain J. B. Clark, Third Infantry, would be entitled to succeed, I deem it proper to submit the following statement, extracted from the official returns of his regiment, touching his physical capacity for the performance of military duty.

In May, 1836, Captain Clark went on the recruiting service, where he remained till October 4, 1838, when he was granted a three months' leave. He joined his company at Fort Towson in May, 1839, and continued with it from that time till

March, 1841, accompanying it meanwhile (October, 1840) to Florida. He obtained a three months' leave on surgeon's certificate of ill health March 23, 1841, but did not rejoin till February 16, 1842. In the interim he was placed on duty for a short time as a member of a general court-martial, which happened to be convened at St. Louis, where he was then staying. He remained with his company from February to November, 1842, when he again received a leave for the benefit of his health, and did not return to duty till April 26, 1843 (after his regiment had been ordered to Florida), when he rejoined it at Jefferson Barracks. He continued with it (with the exception of one short leave) from April, 1843, till June, 1845, but the returns show him to have been frequently on the sick report during that period. On the 2d of June, 1845, his company being then encamped near Fort Jessup in expectation of orders for Texas, he again procured a leave on account of his health, and has not since been able to rejoin, reporting monthly that his health unfitted him for the performance of duty. The signature of his last report (not written by himself), of November 30 (herewith*), would seem to indicate great physical derangement or decrepitude, approaching, perhaps, to paralysis.

From the foregoing it appears that during the last seven years (since October, 1838) Captain Clark has been off duty two years and four months, the greater part of the time on account of sickness, and that even when present with his company his health is so much impaired that very often he is unable to perform the ordinary garrison duties.

Under these circumstances it is respectfully submitted, for the consideration of the proper authority, whether the senior captain of infantry should not be passed over and (as Brevet Major Noel,† the next in rank, is utterly disqualified) Captain Martin Scott, of the Fifth Infantry, promoted to the vacant majority.

It is proper to state that Captain Clark has always been regarded as a perfect gentleman, and as such, as far as I know, is equal to any officer in the Army.

I am, sir, most respectfully, your obedient servant,

R. JONES, Adjutant-General.

[Remarks indorsed on the foregoing report by the General in Chief.]

DECEMBER 30, 1845.

This report presents grave points for consideration. It is highly improbable that the Captain will ever be fit for the active duties of his profession. The question, therefore, seems to be whether he shall be a pensioner on full pay as captain or as major, for he has long been, not in name, but in fact, a pensioner on full pay. We have no half pay in the Army to relieve marching regiments of crippled and superannuated officers. We have many such—Colonel Maury, of the Third Infantry (superannuated), and Majors Cobb and McClintock, Fifth Infantry and Third Artillery (crippled). Many others are fast becoming superannuated. The three named are on indefinite leaves of absence, and so are Majors Searle and Noel, permanent cripples from wounds. General Cass's resolution of yesterday refers simply to age. A half pay or retired list with half pay would be much better. There are some twenty officers who ought at once to be placed on such list and their places filled by promotion.

Upon the whole, I think it best that Captain M. Scott should be promoted, vice Dearborn, vice Lieutenant-Colonel Hoffman.

Respectfully submitted to the Secretary of War.

WINFIELD SCOTT.

*Omitted.

† In 1839 Brevet Major Noel, Sixth Infantry, was severely wounded (serving in the Florida War at the time) by the accidental discharge of his own pistol. He left his company February 16, 1839, and has ever since been absent from his regiment, the state of his wound and great suffering tendering him utterly incapable of performing any kind of duty whatever; nor is there any reason to hope he will ever be able to resume his duties. R. JONES, Adjutant-General.

James K. Polk

JANUARY 8, 1846.

It appearing from the within statements of the Commanding General and the Adjutant-General that the two officers proposed to be passed over are physically unable to perform the duties of major, and their inability is not temporary, I recommend that Captain Martin Scott be promoted to the vacant majority 3d January, 1846. W. L. MARCY.

WASHINGTON, January 13, 1846.

To the Senate of the United States:

I transmit to the Senate a report of the Secretary of War, with accompanying papers, showing the measures which have been adopted in relation to the transfer of certain stocks between the Chickasaw and Choctaw Indians under the treaty between those tribes of the 24th March, 1837. The claim presented by the Choctaw General Council, if deemed to be founded in equity, can not be adjusted without the previous advice and consent of the Senate.

JAMES K. POLK.

WASHINGTON, January 20, 1846.

To the Senate of the United States:

On the 15th of January, 1846, I withdrew the nomination of James H. Tate, of Mississippi, as consul at Buenos Ayres. The withdrawal was made upon the receipt on that day of a letter addressed to me by the Senators from the State of Mississippi advising it. I transmit their letter herewith to the Senate. At that time I had not been furnished with a copy of the Executive Journal of the Senate, and had no knowledge of the pendency of the resolution before that body in executive session in relation to this nomination. Having since been furnished by the Secretary of the Senate with a copy of the Executive Journal containing the resolution referred to, I deem it proper and due to the Senate to reinstate the nomination in the condition in which it was before it was withdrawn. And with that view I nominate James H. Tate, of Mississippi, to be consul at Buenos Ayres.

JAMES K. POLK.

WASHINGTON, January 28, 1846.

To the Senate of the United States:

I herewith communicate to the Senate, for its consideration with regard to its ratification, a treaty of commerce and navigation between the United States and the Kingdom of the Two Sicilies, concluded and signed on the 1st day of December last at Naples by the chargé d'affaires of the United States with the plenipotentiaries of His Majesty the King of the Kingdom of the Two Sicilies.

And I communicate at the same time portions of the correspondence (so far as it has been received) in explanation of the treaty.

JAMES K. POLK.

WASHINGTON, February 3, 1846.

WASHINGTON, February 5, 1846.

To the Senate of the United States:

I herewith communicate to the Senate, for its consideration in refer ence to its ratification, a treaty of commerce and navigation between the United States and Belgium, concluded and signed on the 10th November last at Brussels by the chargé d'affaires of the United States with the minister of foreign affairs of His Majesty the King of the Belgians.

And I communicate at the same time the correspondence and other papers in explanation of the treaty. JAMES K. POLK.

J

To the Senate of the United States:

In pursuance with the request of the Senate in their resolution of the 4th instant, I "return" herewith, "for their further action, the resolution advising and consenting to the appointment of Isaac H. Wright as navy agent at Boston." It will be observed that the resolution of the Senate herewith returned contains the advice and consent of that body to the appointment of several other persons to other offices not embraced in their resolution of the 4th instant, and it being impossible to comply with the request of the Senate without communicating to them the whole resolution, I respectfully request that so far as it relates to the other cases than that of Mr. Wright it may be returned to me.

JAMES K. POLK.

WASHINGTON, February 7, 1846.

To the Senate of the United States:

In compliance with the request of the Senate in their resolution of the 29th January last, I herewith communicate a report from the Secretary of State, with the accompanying correspondence, which has taken place between the Secretary of State and the minister of the United States at London and between the Government of the United States and that of England on the "subject of Oregon" since my communication of the 2d of December last was made to Congress.

JAMES K. POLK.

WASHINGTON, February 7, 1846.

To the House of Representatives of the United States:

In compliance with the request of the House of Representatives in their resolution of the 3d instant, I herewith communicate a report from the Secretary of State, with the accompanying "correspondence, which has taken place" between the Secretary of State and the minister of the United States at London and "between the Government of Great Britain and this Government in relation to the country west of the Rocky Mountains since the last annual message of the President" to Congress.

JAMES K. POLK.

WASHINGTON, February 9, 1846.

To the House of Representatives of the United States:

I communicate herewith, in answer to the resolution of the House of Representatives of the 19th of December last, the report of the Secretary of State inclosing "copies of correspondence between this Government and Great Britain within the last two years in relation to the Washington treaty, and particularly in relation to the free navigation of the river St. John, and in relation to the disputed-territory fund named in said treaty;" and also the accompanying copies of documents filed in the Department of State, which embrace the correspondence and information called for by the said resolution. IAMES K. POLK.

WASHINGTON, February 9, 1846.

To the Senate of the United States:

In compliance with the request of the Senate in their resolution of the 5th instant, I herewith return "the resolution of the Senate advising and consenting to the appointment of F. G. Mayson to be a second lieutenant in the Marine Corps." As the same resolution which contains the advice and consent of the Senate to the appointment of Mr. Mayson contains also the advice and consent of that body to the appointment of several other persons to other offices, to whom commissions have been since issued, I respectfully request that the resolution, so far as it relates to the persons other than Mr. Mayson, may be returned to me.

JAMES K. POLK.

WASHINGTON, February 12, 1846.

To the Senate of the United States:

I transmit herewith, for the consideration and advice of the Senate with regard to its ratification, a treaty concluded on the 14th day of January last by Thomas H. Harvey and Richard W. Cummins, commissioners on the part of the United States, and the chiefs and headmen of the Kansas tribe of Indians, together with a report of the Commissioner of Indian Affairs and other papers explanatory of the same.

JAMES K. POLK.

WASHINGTON, February 16, 1846.

To the Senate and House of Representatives:

I herewith transmit a communication from the Attorney-General relating to a contract entered into by him with Messrs. Little & Brown for certain copies of their proposed edition of the laws and treaties of the United States, in pursuance of the joint resolution of the 3d March, 1845.

JAMES K. POLK.

WASHINGTON, February 16, 1840. To the Senate of the United States:

I herewith transmit a report from the Secretary of the Navy, communicating the correspondence called for by the resolution of the Senate of the 25th of February, 1845, between the commander of the East India Squadrons and foreign powers or United States agents abroad during the years 1842 and 1843, relating to the trade and other interests of this Government.

JAMES K. POLK.

WASHINGTON, February 18, 1846.

To the House of Representatives of the United States:

In compliance with the request of the House of Representatives in their resolution of the 12th instant, asking for information relative to the Mexican indemnity, I communicate herewith a report from the Secretary of State, with the paper accompanying it.

JAMES K. POLK.

[A similar message was sent to the Senate in compliance with a request of that body.]

WASHINGTON, March 23, 1846.

To the Senate and House of Representatives of the United States:

I transmit, for your consideration, a correspondence between the minister of Her Britannic Majesty in Washington and the Secretary of State, containing an arrangement for the adjustment and payment of the claims of the respective Governments upon each other arising from the collection of certain import duties in violation of the second article of the commercial convention of 3d of July, 1815, between the two countries, and I respectfully submit to Congress the propriety of making provision to carry this arrangement into effect.

The second article of this convention provides that "no higher or other duties shall be imposed on the importation into the United States of any articles the growth, produce, or manufacture of His Britannic Majesty's territories in Europe, and no higher or other duties shall be imposed on the importation into the territories of His Britannic Majesty in Europe of any articles the growth, produce, or manufacture of the United States, than are or shall be payable on the like articles being the growth, produce, or manufacture of any other foreign country."

Previous to the act of Parliament of the 13th of August, 1836, the duty on foreign rough rice imported into Great Britain was 28. 6d. sterling per bushel. By this act the duty was reduced to 1 penny per quarter (of 8 bushels) on the rough rice "imported from the west coast of Africa."

Upon the earnest and repeated remonstrances of our ministers at London in opposition to this discrimination against American and in favor of African rice, as a violation of the subsisting convention, Parliament,

by the act of 9th July, 1842, again equalized the duty on all foreign rough rice by fixing it at 7s. per quarter. In the intervening period, however, of nearly six years large importations had been made into Great Britain of American rough rice, which was subjected to a duty of 2s. 6d. per bushel; but the importers, knowing their rights under the convention, claimed that it should be admitted at the rate of 1 penny per quarter, the duty imposed on African rice. This claim was resisted by the British Government, and the excess of duty was paid, at the first under protest, and afterwards, in consequence of an arrangement with the board of customs, by the deposit of exchequer bills.

It seems to have been a clear violation both of the letter and spirit of the convention to admit rough rice "the growth" of Africa at r penny per quarter, whilst the very same article "the growth" of the United States was charged with a duty of 2s. 6d. per bushel.

The claim of Great Britain, under the same article of the convention, is founded on the tariff act of 30th August, 1842. Its twenty-fifth section provides "that nothing in this act contained shall apply to goods shipped in a vessel bound to any port of the United States, actually having left her last port of lading eastward of the Cape of Good Hope or beyond Cape Horn prior to the 1st day of September, 1842; and all legal provisions and regulations existing immediately before the 30th day of June, 1842, shall be applied to importations which may be made in vessels which have left such last port of lading eastward of the Cape of Good Hope or beyond Cape Horn prior to said 1st day of September, 1842."

The British Government contends that it was a violation of the second article of the convention for this act to require that "articles the growth, produce, or manufacture" of Great Britain, when imported into the United States in vessels which had left their last port of lading in Great Britain prior to the 1st day of September, 1842, should pay any "higher or other duties" than were imposed on "like articles" "the growth, produce, or manufacture" of countries beyond the Cape of Good Hope and Cape Horn.

Upon a careful consideration of the subject I arrived at the conclusion that this claim on the part of the British Government was well founded. I deem it unnecessary to state my reasons at length for adopting this opinion, the whole subject being fully explained in the letter of the Secretary of the Treasury and the accompanying papers.

The amount necessary to satisfy the British claim can not at present be ascertained with any degree of accuracy, no individual having yet presented his case to the Government of the United States. It is not apprehended that the amount will be large. After such examination of the subject as it has been in his power to make, the Secretary of the Treasury believes that it will not exceed \$100,000.

On the other hand, the claims of the importers of rough rice into Great Britain have been already ascertained, as the duties were paid either under protest or in exchequer bills. Their amount is stated by Mr. Everett, our late minister at London, in a dispatch dated June 1, 1843, to be $\pounds 88,886$ 16s. 10d. sterling, of which $\pounds 60,006$ 4d. belong to citizens of the United States.

As it may be long before the amount of the British claim can be ascertained, and it would be unreasonable to postpone payment to the American claimants until this can be adjusted, it has been proposed to the British Government immediately to refund the excess of duties collected by it on American rough rice. I should entertain a confident hope that this proposal would be accepted should the arrangement concluded be sanctioned by an act of Congress making provision for the return of the duties in question. The claimants might then be paid as they present their demands, properly authenticated, to the Secretary of the Treasury.

JAMES K. POLK.

To the Senate of the United States: WASHINGTON, March 24, 1846.

In answer to the inquiry of the Senate contained in their resolution of the 17th instant, whether in my "judgment any circumstances connected with or growing out of the foreign relations of this country require at this time an increase of our naval or military force," and, if so, "what those circumstances are," I have to express the opinion that a wise precaution demands such increase.

In my annual message of the 2d of December last I recommended to the favorable consideration of Congress an increase of our naval force, especially of our steam navy, and the raising of an adequate military force to guard and protect such of our citizens as might think proper to emigrate to Oregon. Since that period I have seen no cause to recall or modify these recommendations. On the contrary, reasons exist which, in my judgment, render it proper not only that they should be promptly carried into effect, but that additional provision should be made for the public defense.

The consideration of such additional provision was brought before appropriate committees of the two Houses of Congress, in answer to calls made by them, in reports prepared, with my sanction, by the Secretary of War and the Secretary of the Navy on the 29th of December and the 8th of January last—a mode of communication with Congress not unusual, and under existing circumstances believed to be most eligible. Subsequent events have confirmed me in the opinion that these recommendations were proper as precautionary measures.

It was a wise maxim of the Father of his Country that "to be prepared for war is one of the most efficient means of preserving peace," and that, "avoiding occasions of expense by cultivating peace," we should "remember also that timely disbursements to prepare for danger fre-

quently prevent much greater disbursements to repel it." The general obligation to perform this duty is greatly strengthened by facts known to the whole world. A controversy respecting the Oregon Territory now exists between the United States and Great Britain, and while, as far as we know, the relations of the latter with all European nations are of the most pacific character, she is making unusual and extraordinary armaments and warlike preparations, naval and military, both at home and in her North American possessions.

It can not be disguised that, however sincere may be the desire of peace, in the event of a rupture these armaments and preparations would be used against our country. Whatever may have been the original purpose of these preparations, the fact is undoubted that they are now proceeding, in part at least, with a view to the contingent possibility of a war with the United States. The general policy of making additional warlike preparations was distinctly announced in the speech from the throne as late as January last, and has since been reiterated by the ministers of the Crown in both houses of Parliament. Under this aspect of our relations with Great Britain, I can not doubt the propriety of increasing our means of defense both by land and sea. This can give Great Britain no cause of offense nor increase the danger of a rupture. If, on the contrary, we should fold our arms in security and at last be suddenly involved in hostilities for the maintenance of our just rights without any adequate preparation, our responsibility to the country would be of the gravest character. Should collision between the two countries be avoided, as I sincerely trust it may be, the additional charge upon the Treasury in making the necessary preparations will not be lost, while in the event of such a collision they would be indispensable for the maintenance of our national rights and national honor.

I have seen no reason to change or modify the recommendations of my annual message in regard to the Oregon question. The notice to abrogate the treaty of the 6th of August, 1827, is authorized by the treaty itself and can not be regarded as a warlike measure, and I can not withhold my strong conviction that it should be promptly given. The other recommendations are in conformity with the existing treaty, and would afford to American citizens in Oregon no more than the same measure of protection which has long since been extended to British subjects in that Territory.

The state of our relations with Mexico is still in an unsettled condition. Since the meeting of Congress another revolution has taken place in that country, by which the Government has passed into the hands of new rulers. This event has procrastinated, and may possibly defeat, the settlement of the differences between the United States and that country. The minister of the United States to Mexico at the date of the last advices had not been received by the existing authorities. Demonstrations of a character hostile to the United States continue to be made in Mexico, which has rendered it proper, in my judgment, to keep nearly two-thirds of our Army on our southwestern frontier. In doing this many of the regular military posts have been reduced to a small force inadequate to their defense should an emergency arise.

In view of these "circumstances," it is my "judgment" that "an increase of our naval and military force is at this time required" to place the country in a suitable state of defense. At the same time, it is my settled purpose to pursue such a course of policy as may be best calculated to preserve both with Great Britain and Mexico an honorable peace, which nothing will so effectually promote as unanimity in our councils and a firm maintenance of all our just rights.

JAMES K. POLK.

WASHINGTON, April 1, 1846.

To the House of Representatives of the United States:

I transmit herewith a letter received from the governor of the State of Ohio in answer to a communication addressed to him in compliance with a resolution of the House of Representatives of January 30, 1846, "requesting the President of the United States to apply to the governor of the State of Ohio for information in regard to the present condition of the Columbus and Sandusky turnpike road; whether the said road is kept in such a state of repair as will enable the Federal Government to realize in case of need the advantages contemplated by the act of Congress approved March 3, 1827."

JAMES K. POLK.

WASHINGTON, April 1, 1846.

WASHINGTON, April 3, 1846.

To the Senate of the United States:

In compliance with the request of a delegation of the Tonawanda band of the Seneca Indians now in this city, I herewith transmit, for your consideration, a memorial addressed to the President and the Senate in relation to the treaty of January 15, 1838, with the "Six Nations of New York Indians," and that of May 20, 1842, with the "Seneca Nation of Indians."

JAMES K. POLK.

To the Senate of the United States:

I transmit herewith a report from the Acting Secretary of State, with accompanying papers, in answer to the resolution of the Senate of the 23d ultimo, requesting the President to communicate to that body, "if not incompatible with public interests, any correspondence which took place between the Government of the United States and that of Great Britain on the subject of the northeastern boundary between the 20th of June, 1840, and the 4th of March, 1841."

JAMES K. POLK.

WASHINGTON, April 13, 1846.

To the Senate of the United States:

In answer to the resolution of the Senate of the 11th instant, calling for "copies of any correspondence that may have taken place between the authorities of the United States and those of Great Britain since the last documents transmitted to Congress in relation to the subject of the Oregon Territory, or so much thereof as may be communicated without detriment to the public interest," I have to state that no correspondence in relation to the Oregon Territory has taken place between the authorities of the United States and those of Great Britain since the date of the last documents on the subject transmitted by me to Congress.

JAMES K. POLK.

WASHINGTON, April 13, 1846.

To the Senate and House of Representatives:

In my annual message of the 2d of December last it was stated that serious difficulties of long standing continued to distract the several parties into which the Cherokee tribe of Indians is unhappily divided; that all the efforts of the Government to adjust these difficulties had proved to be unsuccessful, and would probably remain so without the aid of further legislation by Congress. Subsequent events have confirmed this opinion.

I communicate herewith, for the information of Congress, a report of the Secretary of War, transmitting a report of the Commissioner of Indian Affairs, with accompanying documents, together with memorials which have been received from the several bands or parties of the Cherokees themselves. It will be perceived that internal feuds still exist which call for the prompt intervention of the Government of the United States.

Since the meeting of Congress several unprovoked murders have been committed by the stronger upon the weaker party of the tribe, which will probably remain unpunished by the Indian authorities; and there is reason to apprehend that similar outrages will continue to be perpetrated unless restrained by the authorities of the United States.

Many of the weaker party have been compelled to seek refuge beyond the limits of the Indian country and within the State of Arkansas, and are destitute of the means for their daily subsistence. The military forces of the United States stationed on the western frontier have been active in their exertions to suppress these outrages and to execute the treaty of 1835, by which it is stipulated that "the United States agree to protect the Cherokee Nation from domestic strife and foreign enemies, and against intestine wars between the several tribes."

These exertions of the Army have proved to a great extent unavailing, for the reasons stated in the accompanying documents, including communications from the officer commanding at Fort Gibson.

I submit, for the consideration of Congress, the propriety of making

Messages and Papers of the Presidents

such amendments of the laws regulating intercourse with the Indian tribes as will subject to trial and punishment in the courts of the United States all Indians guilty of murder and such other felonies as may be designated, when committed on other Indians within the jurisdiction of the United States.

Such a modification of the existing laws is suggested because if orfenders against the laws of humanity in the Indian country are left to be punished by Indian laws they will generally, if not always, be permitted to escape with impunity. This has been the case in repeated instances among the Cherokees. For years unprovoked murders have been committed, and yet no effort has been made to bring the offenders to punishment. Should this state of things continue, it is not difficult to foresee that the weaker party will be finally destroyed. As the guardian of the Indian tribes, the Government of the United States is bound by every consideration of duty and humanity to interpose to prevent such a disaster.

From the examination which I have made into the actual state of things in the Cherokee Nation I am satisfied that there is no probability that the different bands or parties into which it is divided can ever again live together in peace and harmony, and that the well-being of the whole requires that they should be separated and live under separate governments as distinct tribes.

That portion who emigrated to the west of the Mississippi prior to the year 1819, commonly called the "Old Settlers," and that portion who made the treaty of 1835, known as the "treaty party," it is believed would willingly unite, and could live together in harmony. The number of these, as nearly as can be estimated, is about one-third of the tribe. The whole number of all the bands or parties does not probably exceed 20,000. The country which they occupy embraces, 7,000,000 acres of land, with the privilege of an outlet to the western limits of the United States. This country is susceptible of division, and is large enough for all.

I submit to Congress the propriety of either dividing the country which they at present occupy or of providing by law a new home for the one or the other of the bands or parties now in hostile array against each other, as the most effectual, if not the only, means of preserving the weaker party from massacre and total extermination. Should Congress favor the division of the country as suggested, and the separation of the Cherokees into two distinct tribes, justice will require that the annuities and funds belonging to the whole, now held in trust for them by the United States, should be equitably distributed among the parties, according to their respective claims and numbers.

There is still a small number of the Cherokee tribe remaining within the State of North Carolina, who, according to the stipulations of the treaty of 1835, should have emigrated with their brethren to the west of
